The rate of steel production has a generally declining tendency but the rate is very slow, because the Steel Corporation maintains its rate and the independent mills reached such a low operating rate in December that further decreases in their rate cannot make much difference. As noted in last report the Steel Corporation is producing steel ingots at about 21,000,000 tons a year and the independents at about 7,000,000 tons, which makes a rate for the whole industry of about 53 per cent. If the independent rate should be cut in half that would merely bring the rate of the whole industry down from 53 per cent. to 47 per cent.

The independents are operating intermittently. A mill closes for a week or two and then resumes in part on an accumulation of orders, while another mill may close to enable orders to accumulate. The next important change will occur by the Steel Corporation's production decreasing. The Steel Corporation entered this year with a large volume of business on books. It is not remarkable that the corporation's customers should "stick" but it is remarkable that they should continue to take shipments from week to week at such a high rate. How long the present operation will last is problematical. Many customers may say that they want the material eventually, but desire that shipments be made at say one-half the former rate. If there is no change in this respect it may be said that the specifications now on books would enable the corporation to continue at practically its present rate for a couple of months without the aid of new business, while if new specifications and orders should keep up at the present rate the time would be prolonged. Afterwards the corporation's production would gradually taper off. As to the independents, there is no indication that they will be able to run much better than at present until there is a general buying movement, and that is not expected for the near future.

There are the usual rumors of price cutting of steel products, in most cases quite indefinite. The condition is worse than that of orders being booked at cut prices, the fact being that orders are not booked at all. The mills are getting only a little business and what they are getting is chiefly, in the case of independents, in the form of releases on instructions previously given to suspend shipments. In the case of the Steel Corporation, the business being booked is either from regular customers or, in a few cases, from consumers who were not corporation customers during the 1920 flight of prices, and resolved that whenever the opportunity should occur for them to get on the corporation books they would embrace it.

Eventually a buying demand will develop and then there will be real price cutting to find the bottom, or basis on which business can proceed. That time may be far in the future.

Readjustment Continues in Hardware Prices

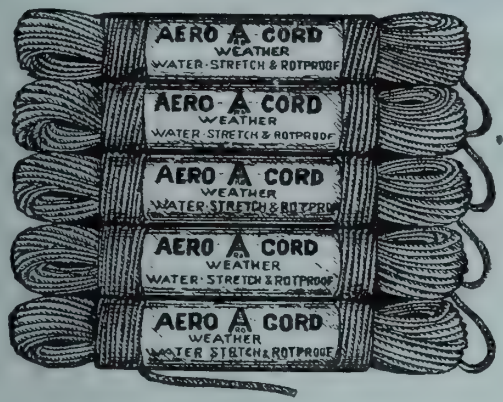
Practically Every Basic Material Figures in the Commodity Declines.

THE readjustment conditions in hardware markets continue and many lines are showing revisions with lower prices quoted. A special point worth noticing is that the declines are not confined to one line of goods or any one material, but are embracing commodities manufactured from such widely different materials as iron and steel, copper, lead, brass, rubber, cotton, leather, wood, and oils, both mineral and vegetable.

Iron and Steel Products Lead

Naturally iron and steel products lead in the matter of changes, and some of the more recent declines include butts and hinges, shelf brackets, barrel bolts, picks and mattocks, pipe fittings and some lines of carpenters' tools. Sheets are showing a further decline and allied products such as metal shingles, sidings and roofings, ridging, conductor pipe and elbows and eavestrough are all lower in price.

Copper Wares Reduced in Price



In copper goods the special feature this week has been the reduction made in quotations on copper wares and wash boilers, tea kettles and nickel plated tea and coffee pots have been reduced in price. It is stated by manufacturers of these goods that there is still too great a spread between the ingot metal and the copper sheet.

Changes are being made in some brass lines and compression goods, such as bath cocks. Various makes of valves have been reduced in price. Further changes along these lines appear to be expected.

The First Decline in Woodenware

Rope, which was reduced in price a week ago, shows a decline of 27 per cent. from the high level quotations of last summer. Cotton goods continue to be revised from week to week and with rubber this material is showing a considerable reduction from recent high figures. Woodenware prices continue to be firm generally, although reductions have recently been made on barrel churns, but changes are said to be due more to lower costs of metal than of lumber. Whether much may be expected in the way of lower prices on articles manufactured from wood is doubtful, but many are of the opinion that the peak has been reached in lumber prices, and that from now on there is a possibility of gradual declines, though these may be small.

To all probability, your customers' specifications for an IDEAL CLOTHES-LINE, would be one that was WEATHER, ROT, STRETCH and RUST PROOF, one to which clothing would not FREEZE—STRONG and DURABLE, and still not EXCESSIVE in PRICE.

AERO CORD

is the ONLY cordage coming within these specifications, and the sale of which will net you a good profit and give your customers ABSOLUTE SATISFACTION.

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

A-1981

A Canadian Made Nozzle

This brass spray nozzle No. A-1981 is always in demand on account of its easy adjustment from a fine misty spray to a solid stream. It is in use, or could profitably be used in every home using water under pressure. It is a popular EMPIRE product and an easy seller.

The useful hose coupling No. A-1982 is carefully machined, with full, deep corrugations, and these are of sufficient number to give a firm grip on the hose. In demand wherever hose is used.

Remember these are Canadian-made Empire products, upon which there is no duty or exchange to pay. Buy Canadian-made Empire goods and restore the Canadian dollar to its face value.

Empire products are handled by leading jobbers throughout Canada. Kindly specify them when ordering.

Empire Brass Mfg. Co., Limited

Beatty Bros. Limited Bulletin

"Every Red Star Stays Sold"

The Red Star is the easiest running washer on the market

Of course, you want to *sell* goods. But, as well, you want those goods to *stay sold.*

The "Red Star" is that kind of washing machine—there's no come-back. Writing to us recently the Blairmore Hardware Co., of Blairmore, Alta., said:

> *"Last year we handled 24 of your washing machines and we expect to sell more this year. The Red Star Washer is a labor-saver to the housewife and* a trouble-saver to the retailer as every machine stays sold."

That is just one of the many letters we could print saying the same thing.

Another of our friends—J. Pat Smyth, of Green River, N.B., puts it this way:

> *"The success I have had with your Red Star Washing Machine is because it is the easiest running machine I have ever handled here and every one of my customers is satisfied with it."*

You will find the Red Star profitable for your trade. Your customers will like it too.

It has all the desirable features: It is exceptionally easy-running—a double set of bicycle ball bearings, machine-cut gears, a heavy fly wheel and great simplicity account for that!

It will last a lifetime, because all working parts depend on a solid iron, one-piece bed plate which will not shrink nor warp.

"Every customer is satisfied with it."

Sales Force of J. P. Belair, 1811 St. Catherine St. East, Montreal, old Red Star Dealers and big buyers of BT Step Ladders

Order Red Stars Now

Specify Red Stars for immediate and spring delivery now. The spring house cleaning season with its extra washing and cleaning means lots of sales for Red Stars.

Be ready for it with a good stock! You will have a satisfied customer and a satisfactory margin of profit for every Red Star you sell.

The store of J. P. Belair has an excellent corner position and is noted for attractive window displays

We are glad to co-operate with any Red Star dealer by loaning him cuts, supplying printed matter and loaning slides for display in moving picture theatres. All these sales-helps increase business and are supplied for the asking.

Write our nearest Branch or ask our representative when he calls on you.

KEYSTONE BRAND

Recognized as the Best

Keystone Bass Stable Brushes are undoubtedly superior to all Stable Brushes in the market. Made in sizes from 12″ to 18″.

BASS STABLE BRUSHES

The finest quality of tough Bass is used and is fastened into the Block by a long steel wire staple, a process originated by us. We guarantee the tufts not to come out. The best quality of hard maple handles is supplied. Send for particulars and prices of Keystone Household and Stable Brushes.

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and **at the bench.**

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works
G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.
Owned and Operated by Nicholson File Co.

REGISTERED TRADE MARK

Celebrated Wa-Ko-Ver Stain

Wa-Ko-Ver beautifies all woodwork and literally wears like iron. Wherever there are worn floors and scratched woodwork you can safely recommend Wa-Ko-Ver Stain to restore its freshness. This reliable, trustworthy stain has long since won the confidence of consumers. It gives full value in service and creates consumer-satisfaction in the goods and confidence in the store that sells it.

This established reputation makes Wa-Ko-Ver Stain a pleasure to sell. A good display in your windows or on your counter reminds the housewife and keeps it moving.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Kasement Skrene Dores

Cost no More and Wear Longer

There are no other screen doors like Kasement Skrene Dores on the market to-day. The strongest and lightest made. A man weighing 200 pounds can swing on a "Kasement" door like a gate, without damaging door or hardware.

They cost no more than any make of good door—wear longer, and they are the cheapest in the end.

A complete set of nickel-plated "Kasement" hardware, packed in individual cartons, is furnished with each door.

Fit perfectly, even on a casement that is "out of line." May be hung in 15 minutes. Save time and labor. Made of selected B. C. fir, thoroughly air-dried and excellent quality mesh wire cloth, black painted. Plain designs, neat, attractive, and in a variety of finishes.

We guarantee "Kasement" Skrene Dores not to sag, warp, or pull apart, and to give absolute satisfaction. We authorize dealers to refund purchase price if customer is not entirely satisfied.

Window Screens

Offer a Wide Field of Sales and Profit

These reliable, dependable screens offer a wide field of sales and profit. Many of last season's screens in the hands of consumers have been badly stored through the winter or otherwise abused so that they must be replaced this season.

These popular screens are made of hard wood, and oil finished. The edges of the wire cloth are entirely covered with wood. Angle irons fit closely to the wire, leaving no space for flies to enter. Perfectly adjustable by means of double dovetailed tongues.

Window Ventilators

Keep Out Dirt and Rain

The Continental is a leader. Made with sanitary cloth, this Ventilator is of selected hardwood, oil stained and finished in "Mission Oak." A fine mesh cotton cloth, buff-colored and specially treated, forms the center of the ventilator, and acts as a filter, therefore keeping out all drafts, dirt and dust, rain and snow, and at the same time permitting the constant circulation of fresh air. Specially adapted for use in the home, schoolroom, offices, factories, institutions and hospitals, etc.

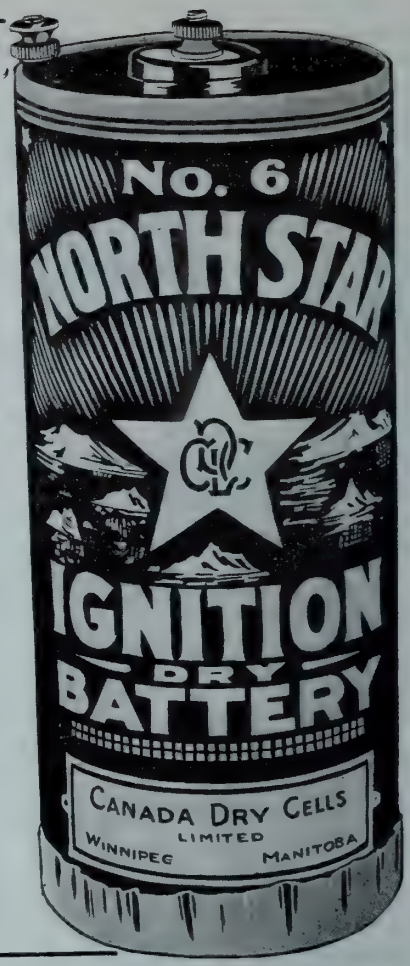
We Guarantee Every

North Star Battery



We guarantee every North Star Battery to be perfect in workmanship and material, and to last longer than any battery made in Canada.

We are using methods in constructing dry cells known only to us, and users are getting the benefit.

North Star Batteries will swell like mushrooms, because a specially prepared compound is used in manufacturing them.

Our guarantee is that if the consumer is not satisfied we stand the loss, and do it cheerfully.

Sold everywhere by leading jobbers.

SUPERIOR SMALL TOOLS

"Phoenix" and "Quality" Brand

No. 260 No. 20 No. 65 No. 251 No. 74 No. 8 No. 56

Special Service to Importers Abroad

The "Phoenix" and "Quality" are easily available to importers abroad because the Quality Tool Works is prepared to give an export service that relieves the importer of all trouble and annoyance. We offer prompt attention, quick shipments, and a sympathetic interest in our export trade.

The "Quality" line of small tools is oil-tempered, plain polished finish. The "Phoenix" line is electric-tempered, blued-finish.

The examples shown herewith illustrate but a very few of these comprehensive lines. We haven't space to describe all, but take the Victor Screw Driver, No. 20, for instance: It is one solid piece of steel throughout the whole length; the handle cannot twist and it can be hammered on without damage. Made from the toughest quality cast steel, specially treated for greatest strength and durability. Black rubberoid handles, all steel polished.

These lines comprise desirable, easily-sold tools in screwdrivers, awls, nail-sets, ice-picks, chisels, punches, cotter-pin extractors, and many other useful, quick-selling small tools. We shall be glad to hear from domestic or foreign trade and supply information promptly. Domestic trade; try your jobbers first.

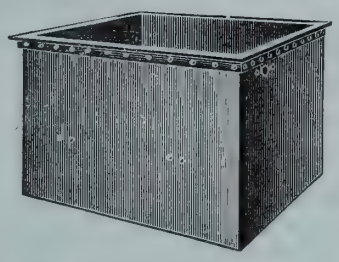
TANKS OF ALL KINDS



ROUND STEEL WELDED TANKS

Top End Open

Made any gauge iron from 20 G. to ¼" plate, welded throughout (making them practically one piece), these tanks are guaranteed to be absolutely leak-proof. The welding process makes this guarantee possible. We specialize on heavy tanks for manufacturers, finished round top with heavy angle steel if desired.

SQUARE STEEL WELDED TANKS

Another leak-proof, one-piece tank of similar quality to our Round Tanks; finished around top with heavy angle steel and the larger ones with extra cross and upright braces. Any size tank or pipe fittings can be supplied.

Also Air Pressure and Gasoline Tanks

Write for price lists. We also make baths, dairy equipment, gasoline tanks, truck tanks, etc.

Stove Mica

All sizes of Clear Mica in stock for immediate shipment.

Manufacturers of Mica Insulation.

Price List on Application.

Mica Company of Canada, Ltd.
P.O. Box 156, Hull, Que.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything, forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500-lb. containers.

TRADE MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

There Is No Risk in buying the LONDON ENGINE
Because we Guarantee

Every piece of material, the best grade.
Every man employed in the construction, an expert mechanic.
Every ounce of horse power.

We will not only replace any defective part which may be returned to the factory during the entire life of any London Engine, but if, at any time, our engine falls down on the claims we have made for it, we will return the purchase price.

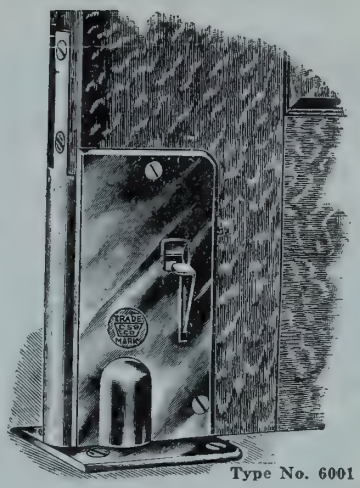
TRADE CSB CO MARK

TRADE CHICAGO MARK

SPRING HINGES



This Trade-Mark on Spring Hinges signifies the **highest quality.**

Look for it on every hinge— none are Genuine Chicago Spring Hinges without it.

The Chicago "Relax" Spring Pivot Hinge is high class and has an exclusive feature.

It swings doors silently and easily with its smooth ball bearing action. The spring action release feature has created a demand. Sells on sheer merit.

Chicago Spring Butt Company,
CHICAGO NEW YORK

Financing Export Shipments

Various Methods Used Are Described by One Who Has Been in Export Business.

Payment by Draft the Most Commonly Used Procedure—Meaning of Different Terms.

THERE are no doubt to-day Canadian manufacturers who are making a quality product for which there is a reasonable domestic demand, but feel if their fields were enlarged they could manufacture in larger quantities at a lower cost. They have products for which they have received foreign enquiries, and which they would like to market abroad but perhaps have hesitated on account of not being sufficiently in touch with export markets and procedure, or have felt unable to finance the business. The object of this article is to endeavor to give to the smaller manufacturer having an export demand a few methods used by exporting houses when quoting terms to foreign buyers and when financing foreign shipments.

Hardware and Metal is constantly receiving enquiries from foreign houses asking to be placed in touch with sources of supply on different Canadian products and assuming the export demand is presented, how is the manufacturer to quote in such a way as to interest the buyer and also protect himself? Manufacturers are all familiar with the charges and time involved in delivering their goods by rail to points in Canada and the United States and make their quotations and terms of payment accordingly. But it is the export business which includes using a steamer instead of a freight car, that seems to cause the difficulties. The difficulties, however, are not of such a nature that they cannot be overcome and the smaller manufacturer who believes in his product might be well repaid by making himself more familiar with the export machinery that is provided for his use and endeavor to turn it to his own advantage. The Department of Trade and Commerce at Ottawa have much information covering export procedure which is at the service of any manufacturer in Canada.

The Matter of Exchange

The foreign buyer often requests quotations in his own currency for the goods delivered to his nearest port. The question of currency brings up the problem of foreign exchange which at this particular time is a somewhat complicated one, and we believe the manufacturer who is not thoroughly conversant with the effects of a fluctuating exchange market, would for the meantime at least be well advised in confining his quotations to his own currency, leaving the profit or loss on the exchange to the buyer. Before making any quotation the exporter would satisfy himself as to the responsibility of the buyer and under what terms he could afford to sell him and what arrangements, if any, he would have to make to finance the order.

Since 1914 the banking facilities offered by our Canadian banks have been greatly increased and today there is nothing difficult or complicated in financing a legitimate export business. During the war, new terms and other methods were used by both bankers and manufacturers and today we have banking terms that may be confusing. But generally speaking the systems of conducting an export business are identical with the ordinary manufacturer's domestic business, viz., for cash, on open or restricted credit or by "collection by draft."

Seller's Market Meant Cash

The method of requesting cash with the order was used extensively during the war when there was a shortage of goods and where business was conducted in a "seller's market." In a buyer's market as we have today, or in a normal market it is not always a practical method. Most cash sales are carried through by the importer of the goods arranging with his own bank to pay to the exporter through the bank's agents in the country of the exporter, a certain specified amount (the sale price) when certain specified conditions have been complied with by the exporter. The ability of the buyer to make this kind of an arrangement depends largely upon his standing with his own bank. He might not necessarily put up the cash, but if his credit is good his bank would give assurance of payment, charging him with interest and commission. The exporter has, however, definite assurance from a responsible agent or bank that when he has complied with certain clearly defined conditions he will receive his money. This is known as a "Confirmed Letter of Credit" and enables the manufacturer to proceed with assurance of payment usually before the goods leave the country, and also permits him to finance on that assurance, dependent of course on his ability to fulfil the conditions of his "Letter of Credit." This arrangement, however, increases the cost of the goods to the buyer. He may have to arrange it when the exchange is very much against him, and might prefer to wait hoping for a more favorable exchange rate; or if his credit is fully employed it may necessitate placing with his bank additional securities or cash. In any event he has to pay interest and commission and if he is known to be responsible he may resent having to pay the additional charges and place his business where he can secure more favorable terms.

In shipping goods to foreign countries on open accounts the exporter, unless he has had a very satisfactory experience with that particular customer, may be unnecessarily encouraging losses. A manufacturer might feel highly flattered to think a merchant in South America whom he does not know desires to buy his goods and might proceed to ship. But unless he knows under what conditions he is shipping, and the hazards he is assuming, it is not at all unlikely that the transaction would turn out to be an unprofitable one. Open accounts or open credits are for the exporter who has been many years in the business—and he carries very few of them.

Draft Method Predominates

The great percentage of foreign business is conducted by the "Collection by Draft" method. Only it is known as "Bills of Exchange." A bill of exchange is defined as "an unconditional order in writing addressed by one person to another signed by the person giving it and requiring the person to whom it is addressed to pay on demand or at a fixed date or determinable future time a certain sum in money to the order of a specific person or bearer."

Bills of exchange have a very definite place in all export and international financing. Space does not permit going into detail in all their various forms and

uses. Their particular form is usually the banker's concern, but the exporter should be familiar with them. They are generally drawn "at sight" or so many days "after sight." Endorsed by the drawer they become bearer instruments to which the documents including bills of lading, insurance certificate, invoices, etc., are attached and which represent ownership of the goods shipped. The exporter may sell his draft which represents his bill against the buyer to his own bank or he may sell it on the open market with his instructions, which really are his conditions of sale, attached to the bill.

In this way he realizes, depending on his standing, practically the full amount of his account against the buyer and uses the money to continue his business. He has the assurance that the holder of the draft, who is really acting as his agent, does not lose possession of the goods until the draft has been paid or his contract of sale carried out. This might include handing over possession of the goods to the buyer on his "acceptance" of the draft, which practically becomes a promise to pay and is known as "Documents on Acceptance" (D/A), or it might mean the buyer was not to receive possession of the goods until the bill is paid in full, which would be "Documents on Payment" (D/P). In this way the exporter can realize by the sale of the draft to the bank on his account against the buyer and retain control of his goods until the buyer has fulfilled his end of the contract. The exporter, of course, must remember if the buyer does not meet his bills the bank looks to him for payment.

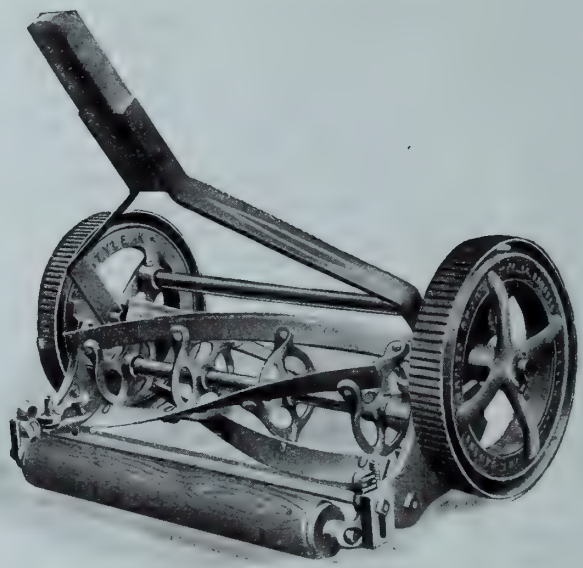
Get Banker's Advice

In all methods of financing export shipments, the exporter should endeavor to secure the advice, assistance and cooperation of his bankers. They may save him from many pitfalls and assist him in arriving at satisfactory working methods. The bank is, or should be familiar with the different methods of collection in different countries and is also in a position to assist in securing reliable information as to the character and responsibility of the buyer. If the smaller manufacturer will use the same precautions in dealing with his export accounts or inquiries that he does with his domestic business, and study the requirements of some of the foreign markets he need have no hesitation in tackling export business either on his own account with the banker's co-operation or through one of several Canadian export commission houses. He would of course study his product and know if there is a market in a given territory outside of any demand a particular buyer may have. If it is a product that does in itself satisfy the requirements of that particular country and that the trade mark, label or any published descriptive matter is in order; also that he is permitted to ship out of his own country and that there are no restrictions against him in foreign markets. In other words, he determines if he has a marketable product that can be traded in and for which there is a reasonable demand.

In financing the export shipment the closest attention must be given to details and as far as it is possible to do so with safety. The exporter should endeavor to comply in every possible way with the wishes of his foreign buyer. Opportunities are always open to the manufacturer who studies the field.

CANADA'S PUBLICLY-OWNED MERCHANT MARINE OF SIXTY-SIX VESSELS

The Canadian Government Merchant Marine is already one of the largest in the world operating under one house flag. There are 38 vessels now in service and 28 more under construction so that the fleet will presently number 66 vessels. All these ships were built in Canada, of Canadian materials, and are said to compare favorably with the best built anywhere.



In a recent address delivered at Liverpool the European manager of the Canadian Government marine service stated that the purpose of this fleet is to direct trade through our own ports, and open up new and direct avenues of trade with distant countries. There is now being provided approximately a service every ten days from Canadian ports to London, to Liverpool, and to Glasgow, and a monthly service to South Wales. There is one ship a week to the West Indies, and one each month to South Africa and to Australia and New Zealand. The service to India and Ceylon, the Straits Settlements and Java and China has commenced. Many of these vessels are carrying the Canadian flag to ports where it was never seen before.

This Government-owned merchant marine is a very great enterprise and the benefits the country will derive from direct trading will be large.

Can You Sell What Every Horse Owner Buys?

Then Stock Tapatco Horse Collar Pads!

Every horse owner appreciates the need of Tapatco Horse Collar Pads. They see at a glance the well-shaped, snugly-fitting design; they quickly recognize the soft, pliable padding that provides a cushion against all shoulder pressure.

A specially convincing selling point of these efficient horse-saving collar pads is the Tapatco stapling device (Pat. U.S. Dec. 1, 1914; Pat. Canada, April 6, 1915), which gives a firm hold and makes the hooks secure, even after the excellent, long-wearing fabric itself is weakened by long use.

It Pays You to Sell "Horse Insurance"

Every horse owner is convinced when he realizes that the loss of the services of one horse for one day may cost more money than would be required to outfit every horse in his barns with Tapatco Horse Collar Pads.

The excellent service in use given by these reliable pads creates good-will for you, and a greater confidence in your store and the other goods you sell; it builds permanent trade.

BURLAP

No. 1 of a Series

1921 Will Be a Burlap Year

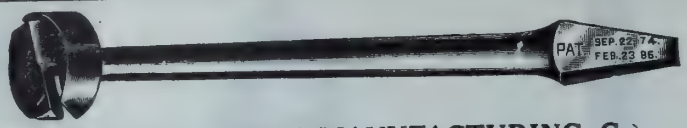
Present conditions indicate that 1921 will be a burlap year for Canada's building trade. It's already "in the air."

The plans for the interior decoration of many of our modern houses call for BURLAP, and dealers should stock up on this very essential line.

BURLAP is made in our own Canadian factory of imported jute canvas, oil-coated—in three shades—white, drab and green.

It recommends itself equally to the trade and to the consumer on account of its adaptability to almost any room, its cleanliness and warmth and, above all, by reason of the ease with which it is applied.

"There will be a big demand for BURLAP in 1921"



Its present cost is lower than it has been for several years and contractors everywhere are using it extensively for the above reasons.

For sale all through the wholesale jobbing trade

SAVAGE

NOW SECURE YOUR STOCK!

For years you've stocked the Savage Automatic, the Pistol that "aims as easy as pointing your finger." You know it—have handled it—have sold it to your customers as the Champion Pocket Gun—the home protector.

What about you? Have you a Savage located conveniently in your store, so that you can get at it, and utilize these 10 quick shots to guard your stock against the sneak thief or the bolder, more daring hold-up man?

Big banks recognize this peril, and are training their Tellers to shoot straight and shoot quick.

And you've put Savage protection in countless homes.

You've stocked this security for years—NOW SECURE YOUR STOCK.

Caliber .32 . . . . . 11 Shots
Caliber .380 . . . . . 10 Shots

We'll supply descriptive booklets on the new Savage Automatic, with the grip that fits the hand. They will help you sell yourself.

SAVAGE ARMS CORPORATION
UTICA, NEW YORK

Every Customer Unserved Is a Distinct Loss---

Every customer you turn away without supplying his or her requirements because of a lack of stock is a distinct loss to your store, not only in immediate and future profits on sales, but in good will.

Every person who leaves your store without making a purchase is a dissatisfied customer.

SPRING NEEDS

When spring trade opens up, which it surely will, you should be ready to meet it with a full range of *Spring Needs,* such as—Garden tools, wire netting, lawn mowers and lawn requisites, spring cleaning requisites, brushes, etc.

We carry a most complete stock of these goods and offer the trade quick service and right prices.

"America"
Trolley Hangers
The Dealers' Friend

Steel Trolley Track

The "America" operates in the Hatch Trolley track—the only track supported by the famous corrugated track brackets. These brackets are, naturally, much stronger and better than ordinary, plain track brackets.

The Largest Sales of Any Trolley Hanger in the Dominion

If you are not now sharing in the sales of this "best seller" and others of the popular Canada Steel Goods Line, you are overlooking an opportunity for constant, profitable sales.

"America" is for warehouse, factory, garage and barn doors. It has tandem trucks, hardened roller bearings and an apron 6 in. long, 3¼ in. wide. This hanger appeals to customers because of the simple adjustments, anti-friction forged steel yokes and ability to stand hard usage.

Its popularity with consumers and its great demand are well founded —on merit.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets. Packed one pair in a box complete with Screws and Bolts. Weight per dozen pairs, without Brackets, 95 pounds.

It Pays You to Handle the C. S. G. Co. Line—Ask Us About It

The history of the day's business

Every time a sale is recorded on an up-to-date National Cash Register, a complete record of the sale is printed on a strip of paper inside of the register.

This strip of paper is called the detail-strip.

It shows how much business is done during certain hours, or during the merchant's absence.

It cannot be removed or changed without the merchant's knowledge.

It prevents the cash drawer being opened without a permanent record being made.

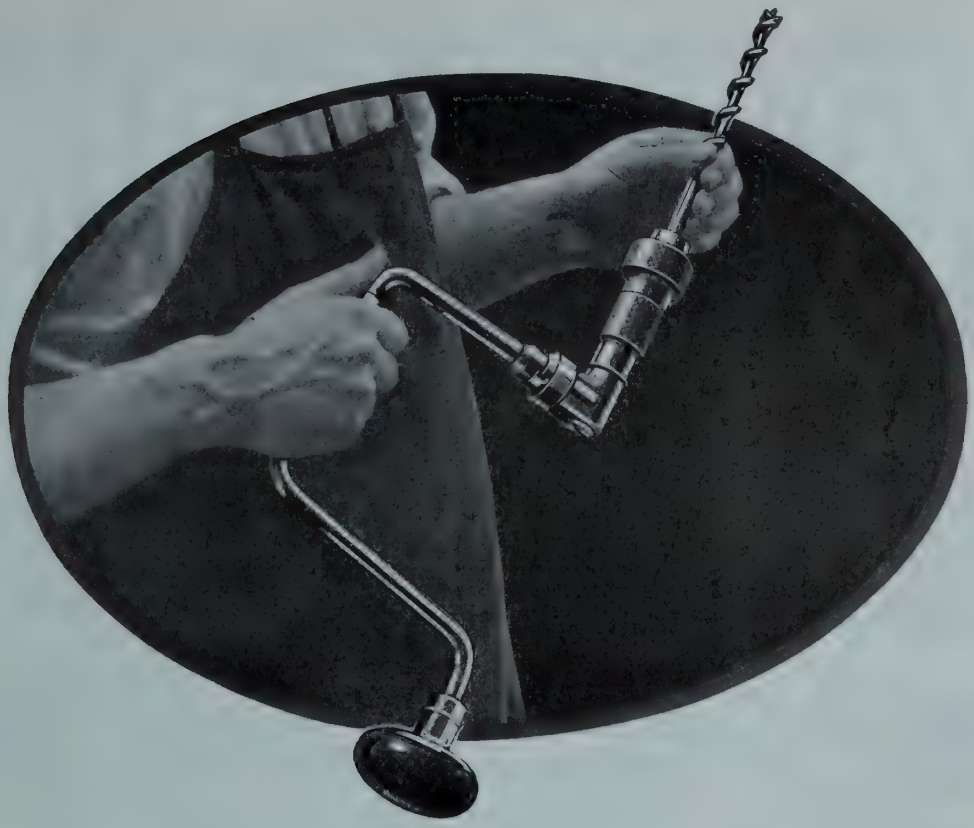
At the end of the day, the merchant takes the detail-strip out of the register and files it away.

It gives him a permanent, unchangeable history of each day's business.

The detail-strip is only one of the many features which make up-to-date National Cash Registers a business necessity.

This is a section of the detail-strip. For each transaction it shows (1) whether a receipt or slip was issued, (2) the initial of the clerk, (3) the kind of transaction, (4) the amount, and (5) the number.

Let our representative show you how it will help you make more money.



We make cash registers for every line of business

PEXTO

PEXTO

The Proof of a Bit Is in Its Use

Bits look so much alike that an average customer sees little or no difference in the various brands.

PEXTO BITS embody certain features which make them enough better than the average, so that they have become the choice of the mechanics who know the best tools.

All *PEXTO BITS* are forged from special bit steel, each bit is hardened and the temper drawn individually, which gives them a uniform quality. The lips are hardened to just the right degree, not hard enough to be brittle, nor soft enough to "turn" in hard service.

They are pitched to bore with or against the grain of wood and the pitch throws the chips out clear of the hole. They will bore through hard wood without chipping.

THE SAMSON SOLID CENTRE BITS are made in a wide variety of sizes and are packed in canvas rolls, wooden boxes, and in sets as well as by the dozen.

THE SAMSON EXPANSIVE AUGER BITS are graduated on the shanks to determine the depth of the bore. The cutters are interchangeable with any properly made Clark Pattern bit.

The finish is attractive and lasting.

These features and many more warrant our branding these Bits *PEXTO.*

Pexto goods can be obtained through representative Canadian Jobbers.

Our new No. 20 Catalog lists many tools. You will be interested. Send for a copy.

Get Closer to that Customer —The Fleet Owner

TO the hardware dealer who wishes to expand his business—and who doesn't —beyond the usual conventional lines, the field among automobile "fleet owners" offers a real opportunity.

By this we mean service stations operated privately by owners of a dozen or more autos or motor trucks.

To earn a profit, these service-stations put the dollar emphasis on "time." They will buy improved tools which cut out delays, prevent "botches," and keep the cars running on full schedule.

In the GTD line of threading tools, there are three introductory items *immediately salable* to a fleet owner.

No. AA4 *Little Giant* Screw-Plate (for magnetos and other small work).

No. 312 *Little Giant* Screw-Plate (for engine and chassis repair).

No. **260**—A Set of *Little Giant* Pipe Stocks and Dies (for pipe connections).

Get these in and GTD reamers, pipe taps and pipe wrenches as well as replacement business will follow.

This is a plan for immediate action by live dealers. We can tell you much more to help you develop this threading repair business. Make a start by trying out the above items on the service stations near you.

For any dealer who will make a list of possible customers for the above tools in his neighborhood, we will give prompt cooperation. Send us the list and we will supply the literature you need to bring your line to their attention.

See the "Triplex Jewel" when in Hamilton

Well Equipped

The "Triplex Jewel" is the last word in "Combination Ranges." In it are embodied all the latest and most modern features yet known to stove makers. No other combination range is so well equipped, and none so attractive in appearance and neat in design.

Ready for Service

The strong feature of this stove is the fact that it is never out of commission, but always ready for service.

Burns hard or soft coal or wood, natural or manufactured gas.

The Triplex Jewel

Satisfied stove customers can be made the world over with the Triplex Jewel Combination Range. Its special features save the housewife money and worry, and make the dealer many new friends.

The Triplex Jewel is the most complete and efficient combination range on the Canadian market. Only high quality materials and skilled workmanship have been used in perfecting this all-season, all-style range.

THE PYREX POLICY IS BUSINESS *INSURANCE*

THE question has been asked, "Why did you continue to advertise Pyrex when you could not supply the demand?" The reply was, "Business insurance for the dealer."

The question was also asked, "Why don't you do as others are doing and double the price of Pyrex?" The reply was the same, "Business insurance for the dealer."

Since 1915 the price of Pyrex was only advanced 20%. The trade knows it, the people know it, and no one is waiting for a "bargain" in Pyrex.

The Pyrex policy insures the dealer's investment. The Pyrex turnover is the backbone of the house-ware business.

BE ON TIME!

SEASONS seem to be travelling very fast. Winter is more than half gone. Spring will be along one day soon. And with spring comes thoughts of dairy pails and strainer pails, milk strainers, etc.

Remember when the demand commenced last year? Be on time this season. Order *now*, and you'll be "all set" for a profitable return.

The *SMP* Dairy line is a quality line *in the truest sense of the word.* Every pail, strainer and can is the result of close study of what was most generally popular. They are strongly put together—made from the best materials. And they are *sanitary.*

Dairy Pail

The SMP Dairy Pail—shown above—is known as the finest article of its kind on the market. The ears are strong, and are riveted with sturdy rivets, reinforced again by a metal strap inside. This strap and all seams are flushed with solder—making the pail absolutely clean and sanitary. It is highly polished and labelled.

This pail is made in two sizes: 14XXXX and 16XXXX both straight and flaring patterns.

Strainer Pail

Like its running mate, this popular SMP Strainer Pail (as shown above) is very strongly built and is highly sanitary. The high breast with the strainer in it, is rolled in around the brim and soldered flush on the inside. Nothing more sanitary could be desired. Double seamed bottoms—highly polished—labelled—carefully wrapped.

The other articles,—sanitary dairy pail with hood, cream pails, milk pails, milk strainers and creamery cans are also of the highest quality.

Story for Week Dated February 5th, 1921

Being No. 43 in the Series

The Tissue Papers: Serviettes, Paper Towels and Toilet Papers

PURITY is the first essential in the production of the tissue papers at the Eddy Plant. Here the reason for that pure well water, the many washings and strainings you have studied at the Sulphite Plant, becomes evident. For these tissue papers are used to wrap food with at picnic party or on restaurant table, and the paper towels manufactured by the E. B. Eddy Company have got to live up to their reputation of absolute sanitary perfection. To watch the processes of paper making, and packing at the Eddy Plant is to realize that this reputation is earned and maintained.

Speed is an important consideration too, in the production of the E. B. Eddy Company tissue paper lines. To watch the girls at work in the portion of the plant set apart for tissue and toilet papers is to realize that human hands can keep pace with the swiftest machines ever invented. Serviettes and towels are folded and bundled at lightning speed, and still the call for them is more urgent than production speed can keep pace with.

Ingenious machines take care of the clever interfolding of the famous "ONLIWON" line of E. B. Eddy tissue paper towels which you have used on many a railway journey, or in hotels, and city restaurants and offices. The interlocking fold which always ensures the pulling out of a new towel for each user is rapidly made by a descending blade working with unerring precision on a steadily running machine. The serviettes are packed flat in bundles of 250; the towels go in bundles of fifty. While a boy can mind the machine that folds the towels, each packet of towels is tested by a man who is an expert at the work, and not a faulty fold in many hundreds of thousands passes his vigilant testing.

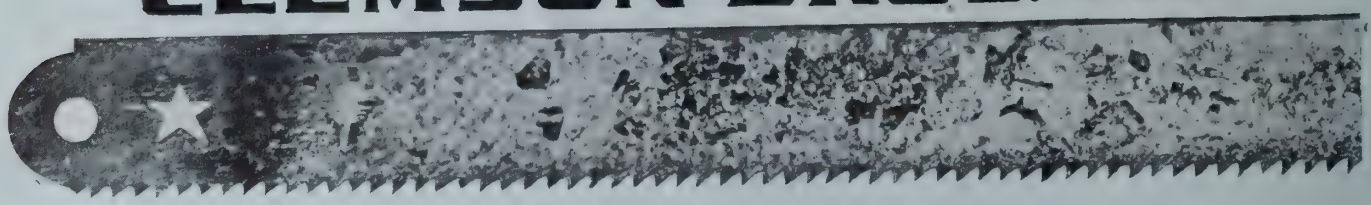
Let's get down to cases on this Hack Saw business

You can't carry all the different saw blades that salesmen are trying to force on you. If you did, you would have a lot of money tied up in stock that would take a year or more to move.

Why not do what the leading hardware dealers are doing and cut down to one or two lines and make quick turnover boost your profits?

Then the question arises: "What lines shall I choose if I cut down?"

Here is the answer that was recently given to that question the other day by a New Jersey mill supply man.



He said: "Years ago we carried seven or eight different brands of saws but decided to cut out many that were hard to sell. To-day we carry but two brands, Star and the X brand. And I have noticed this — at times when through oversight a Star user has been sent an order of X blades, he is always very quick to register a protest and insists upon Star.

"Star users' experience and their reading of Star advertising have made them insist on the brand so that we simply have to carry Star Saws."

Probably you will agree that the merchant makes the greatest success who doesn't wait to be coerced but finds the lines of least resistance himself and takes advantage of them.

Geo. N. Clemson *President*

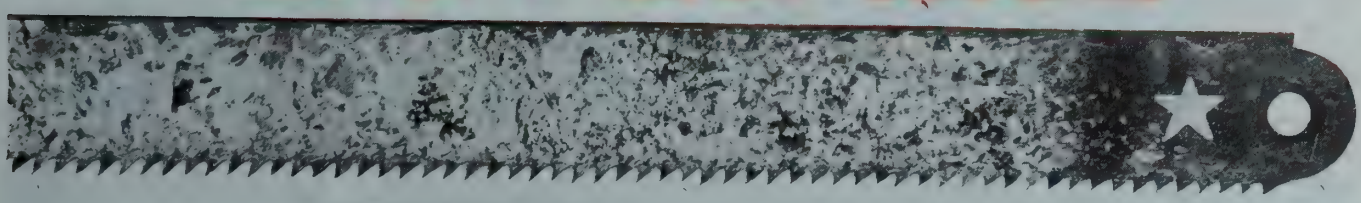
CLEMSON BROS. INC.

If interested tear out this page and place with letters to be answered.

Star Hack Saw Signs

Are lithographed on tin and show the actual blades. A small sign with striking display value for use of retail and mill supply dealers sent free on request.

Star quality and Star advertising make Star hack saws the line which is most called for and most readily accepted.



When you carry Star you can satisfy every hack saw demand as with no other blade. Star users are legion and you can never make a Star user believe another blade is "just as good as Star."

Don't buck established demand. Push Star Saws and cash in on it.

WILLIAMS' SUPERIOR DROP-FORGED WRENCHES

Why Williams'?

FOR the same reason you are selling other high grade standard lines. *Because they pay.*

Experienced mechanics, everywhere, are using Williams' Wrenches; they know the tools are dependable and ***they like them.*** Williams' Wrenches have correct balance as well as sturdy strength—they "feel" right—they fit the hand like an old glove.

Good tools, correctly designed and made, are of paramount importance to the operator. Help him to boost production. Remember when you sell Williams' Wrenches, you supply Superior quality.

We make 40 standard styles in about 1000 sizes with openings from 3-16 to 7⅝ inches. Also 3 patterns of Screw Wrenches, "Vulcan" Chain Pipe Wrenches, Stillson Wrenches, etc.

Spring Horse Clipping

There Will Be Big Sales This Year of

Stewart No. 1 Horse Clipping Machines

Made in Canada

Retail Price
$14
Eastern Canada
$14.50
Western Canada

Are you ready? If you have overlooked this, or your stock is low, you should order now.

About the season when you take off your overcoat to do any manual labor, the energy of a horse begins to flag because of his heavy coat. The necessity of spring clipping is well recognized now. Your customers are alert; they know that a horse does more work, is more productive when clipped in the spring.

A clipped horse is a better horse. He dries off quickly and is safe from colds, heaves, pneumonia, and other afflictions that cost horse-owners far more than Stewart Clipping Machines.

Every horse owner that sees a Stewart Machine in your store window will be interested. He will be a purchaser, also, when you put your influence and salesmanship to work.

Your jobber has Stewart Machines. Give him your order now—get your machines on display for the spring clipping season.

SOVEREIGN IRONS

SELLING an electric iron may be a commonplace occurrence—but, there are still plenty of housewives who have yet to break away from the traditions of their ancestors, and discard the old sadirons.

To a woman who has never owned an electric iron it is a specialty—and should be sold as such. Selling a "Sovereign" Iron paves the way for a series of sales. In fact, it is a typical C.G.E. electric appliance, in which you can place explicit confidence.

WENTWORTH MFG. CO. - HAMILTON, CANADA

Enamelled Ware

The high quality of Davidson's "Premier" Enamelled Ware has secured for it a popularity which extends all over the Dominion.

To have a regular stock of this line is a wise investment because value for value it has no superior in the trade.

Tea-kettles, for instance, are excellent sellers—they have seamless bodies, all joints, spouts and ears for handles being electrically welded. They are then triple coated and baked after each coating. They are also white lined.

Complete absence of air holes prevents rust and leakage. They can also be had with pit bottoms in 4 sizes.

We can also give you these in "Colonial" ware—a slightly cheaper grade.

A Big Field of Prospects for the *Westco* Tankless Water System

Made In Canada

In rural and suburban districts and on farms, the need of running water is urgent. The convenience and reliability of the Westco Tankless Water System appeals strongly to those people having electricity available.

Farmers everywhere are demanding a reliable, compact water system such as the Westco. In addition to this huge field of farmer prospects there are the suburban and outlying districts of cities and towns where the hand pump and well are still being used.

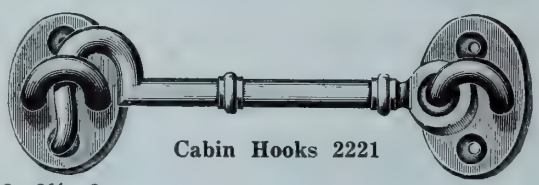
These Westco features make strong talking and selling points:

(a) Requires no storage tank. Water is pumped direct from source of supply to taps.
(b) Entirely automatic; open tap, pump starts at once; close tap, pump stops.
(c) Inexpensive to buy, install and run.
(d) Is vibrationless and silent in operation.
(e) Has no gear, no belt, no valve.
(f) Has only one moving part, and is self-lubricating.

But Above All—Thoroughly Reliable.

Handsome Profits for Westco Agents

Our dealers and agents are making splendid profits. There are still a few really good territories left open. Write us at once for our selling arrangement and other particulars.



Good commissions for you.

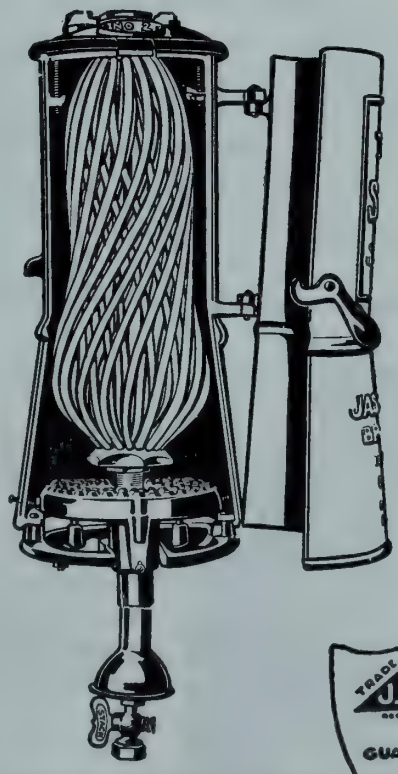
TRADE MARK J.M.T. REGISTERED A GUARANTEE OF QUALITY



True Economy
Stack Heater

The Stack Gas Water Heater will heat water in one minute.

The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.

Take note of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.

More hot water with a smaller consumption of gas—that's true economy.

Big Business in Burlap

No. 2 of a Series

BURLAP as a wall covering is adaptable for Dining Rooms, Kitchens and Halls as well as for Billiard and Pool Rooms, Offices and Stores—is always in demand, especially in a good building year as 1921 promises to be.

It makes a sanitary and very attractive decoration which may be tinted as desired with paint—and subsequently can always be kept clean by passing a damp cloth over surface like wallpaper; it is easily applied with paste, and being of good, substantial bulk it effectively keeps out cold and draughts.

Get Your Orders in Early

BURLAP is made in our own factory, of imported jute canvas, in three colors—White, Drab and Green. All three shades form a suitable ground for finishing coat.

This year there is going to be good business in BURLAP—there will also be handsome profits for the dealer who carries a full line, for prices are now lower than they have been for several years.

Government Applies the Soft Pedal

In Face of the Imminence of a Test Case Government Officials Now Inclined to Class Tinsmiths as Contractors, the Latter Categorized as Retailers—Have Turned Back Some Applications for Manufacturers' Licenses—What of Passenger Automobiles Converted Into Trucks?

THOUGH the test case to be instituted by the retail merchants to establish the liability for taxation of the merchant operating a tinshop has not yet been heard, there is evident a more sympathetic attitude on the part of Government officials toward the retailers in this and other points of contention.

Until now the stand has been taken by representatives of the Inland Revenue Department that hardware merchants operating tinshops, and tinsmiths themselves, are for the purposes of taxation classed as manufacturers if they make anything from a tin cup to an eavetrough. The point was protested by hardware merchants and the trade press but the Government stood fast. Deputy Minister of Inland Revenue Taylor was quoted as having stated to the Retail Merchants' Association that no prosecutions would be made of merchants operating tinshops who failed to take out manufacturers' licenses and collect sales tax, pending the outcome of the test case; but nevertheless the ruling given distinctly provided that such merchants were manufacturers and liable as such. And though some merchants may have decided to take a chance awaiting the results of the test case, no doubt the majority hastened to take out manufacturers' licenses.

Definitely Classified as Manufacturers

It was just recently that a ruling was forthcoming that blacksmiths were to be regarded as retailers for the purpose of taxation, but the tinsmith was again distinctly classified as a manufacturer. As a matter of fact, following is the official advice from Ottawa dealing with this matter:—

"Memo 36B to Collectors of Inland Revenue, dated January 19th, 1921:—

"Sir:—You are informed that bona fide blacksmiths are classed as retailers and as such they will not be required to obtain sales tax license nor will they be held responsible for the collection of sales tax.

"Tinsmiths are held to be manufacturers. They must, therefore, operate under a sales tax license and collect sales tax upon sales of their finished product."

The Soft Pedal

But now comes the soft pedal.

Putting the matter squarely up to the Government officials, as to the difference between a blacksmith and a tinsmith, and as to why either should ever have been classed as manufacturers, it was stated to Hardware and Metal by two of the head officials of the Toronto branch of the Inland Revenue Department that the question of liability of tinsmiths as manufacturers was to be largely determined by the extent of the manufacturing done. Meanwhile a new category is being found for tinsmiths under the heading of "contractors," which it happens, are classed as retailers.

Deal Direct With Consumer

"Tinsmiths as a rule who merely make a few stove or furnace pipes, eavestrough, etc., are really dealing direct with the consumer and make the majority of these lines for jobs which have been contracted for," was the admission of one of these officials who agreed that under the circumstances such tinsmiths should be eliminated from the category of manufacturers.

It was further stated to Hardware and Metal that some recent applications for manufacturers' licenses on the part of this trade had been turned back on this basis.

Confirmation of this stand was secured when a letter to Hardware and Metal from a hardware merchant in Fort William, Ont., asking if the operation of a tinshop in which stove pipes are made, repair work conducted, and occasional pans and cans are manufactured to order, would make him liable as a manufacturer and liable to collect sales tax on such articles. It was advised by the Toronto official that this merchant would not be classed as a manufacturer if the percentage of manufacturing to retail business was not too great, thus indicating that he was only manufacturing aritcles for his own use on jobs contracted for. No definite percentages are laid down but this is left for decision by the nearest collector of Inland Revenue.

This action of the Government in altering the policy so as to interpret the spirit rather than the

Says Outlook in Tire Industry is Good

Indications of Rapid Recovery—Removal of Luxury Tax Has Helped Business

"THE position in the tire industry may be briefly summed up as follows: The high peak was reached in March, 1920, but from that time through the summer trade became dull," said an official of a tire company discussing the outlook.

"This was due to two or three causes. In the first place the tightening of credits put a crimp into the selling of automobiles and consequently affected the tire industry. In the second place, as it seemed by common consent, people held off from purchasing in the hope of a reduction in prices, and in the third place, a spirit of conservation was abroad and people have been looking after their tires and economizing by not carrying spare tires as has rarely, if ever, been the case in the history of the industry.

"The consequences of all this were obvious and tire sales went down and down.

"This is not true now, however, of the industry's condition, for from the middle of November the tide has undoubtedly turned and the increase in sales for the month of December is over that of November and there is every reason to feel with the help that the removal of the luxury tax has given that a remarkable recovery in the tire trade will have taken place by spring.

"In fact it is possible to be even more optimistic than that. It is possible owing to cotton field conditions that there may be a considerable restriction in the output of cotton. It is reasonable also to feel that a large number of persons will hold off buying tires until the spring. The consequences of these two things will be that dealers and manufacturers who have been buying from hand to mouth will likely find themselves in the spring unable to meet the demand."

It is well to remember that the number of automobiles in Canada increases at the rate of about 25 per cent. per annum, to say nothing of the steady increase in the development and sale of the motor truck and the possibilities that are opening up in the Dominion for the motor bus.

In face of all this the rubber industry can look to 1921 with the greatest optimism.

The conditions of labor in the tire industry have been generally very good. There has been a large amount of welfare work done and factory conditions have been healthy and pleasant. It is true to say that the average wage in the tire business is at least as high, often times much higher, than the average wage in any other industry. The average wage at one of the principal tire factories for a considerable period was over $31.00 per week.

Every one knows that prices have been reduced very slightly during the past few weeks. There never was any need to reduce prices for tires because, as has been pointed out frequently, the percentage of increase in the prices of tires during the last six years has been very nearly negligible so that it is unreasonable to expect a very great change in the matter of prices. There may be an upward tendency. The possibilities in the export field are very large, especially so in the east, although owing to conditions in Europe trade may be held up for a time for this field.

To sum up, while we do not suggest any extravagance of view for the industry, we feel that a sane position is the position that says "all is well."

METAL FROM SALVAGED BATTLESHIPS IN CANADA

St. Catharines.—At Ald. John E. Riffer's brass foundry is a big pile of wheels, pieces of pipe, etc., which looks very much like junk.

"That is salvage from British and German battleships," said Ald. Riffer. "That is bronze of the highest quality. Many battleships have been scrapped since the war, and a lot of the brass and bronze has been bought in Canada. Our firm purchased 15 tons. That piece you are looking at may have come from one of the ships in the great sea fight. If the truth were known it's all historic. But we're going to melt it up in the regular line of business."

GOVERNMENT APPLYING THE SOFT PEDAL

Continued from page 35

hardware merchants even though the move is belated. As far as refund is concerned, Mr. Taylor, Deputy Minister of Inland Revenue, has been quoted as stating that refund of the license fee and of the tax collected would be made if the point was not upheld.

Autos for Commercial Use

Dealing with applications for refund of excise tax paid upon autos in consequence of their having been converted into commercial vehicles a Governmental communication has the following to say: "It will be necessary that the usual documents in support of the claim be supplemented by a sworn declaration from the purchaser of the converted vehicle stating that said car will not be re-converted for passenger use and that the commercial body will not be removed from the chassis. Application for refund must be submitted on form C-15 supported by documentary proofs.

Unused Stamps

As some merchants have not yet made application for refund of money on luxury stamps, perforated but unused, a communication under date of January 10th from the Inland Revenue Department states, "unused perforated stamps may be sent for refund accompanied by form C-15. An explanation as to the reasons for perforating the stamps before being attached to sales slips should be given in each case."

Prize Winners in Christmas Window Contest

Practically every part of Canada was represented by hardware merchants who entered this year in the Hardware and Metal Christmas Window Contest. A great many pictures of splendid window displays of Christmas goods have been entered, and judging is now proceeding. **Names of the prize-winners and pictures of the first prize winning windows in each group will be published in next week's issue of Hardware & Metal (February 12).** Watch for the results. If you had an entry in this year's contest your name may be among the winners. In any case you will be interested in noting the arrangement of the windows which won first place among all those entered and to see who the lucky window dressers are.

For the February Advertising

The first issue of Hardware and Metal each month will carry suggestions for the local advertising of retail hardware merchants for that month. Illustrations and descriptive matter will show how other merchants are developing seasonable trade. These will deal only with those lines which are particularly seasonable and will supplement the advertising suggestions shown from time to time elsewhere in the respective issues.

THREE advertisements departing slightly from the usual subject of advertisements by hardware merchants, are shown herewith.

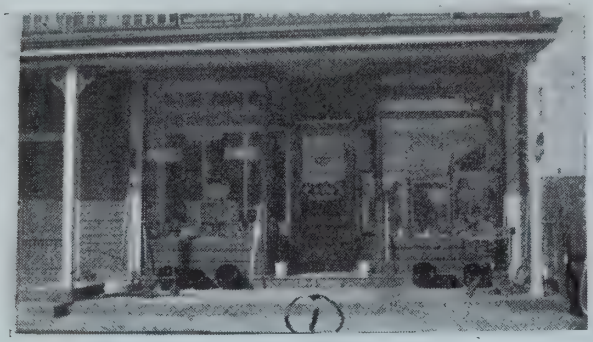
An ad by **Ingram & Davey, Ltd., St. Thomas, Ont.,** dealing with **safety razors** makes a point of the fact that the average man by shaving himself at home can save seventy dollars in a year. This is figured out at the rate of a shave a day costing $1.50 per week or $78.00 per year. As a comparison the cost of a good razor is placed at $5.00, shaving brush $2.00 and soap $1.00 making a total for the year's shave as $8.00 or a total saving of $70.00 per year. It could be pointed out that the saving in subsequent years, when the initial cost of purchasing the razor has been borne, would be even greater. The ad then continues to describe the various lines of safety and straight razors, strops, brushes and soap. The ad is well illustrated and its appeal is well made.

* * *

This is the season of the year when **kitchenware** comes in for the most use. When the warm weather comes the housewife prefers to have salads, cold meats, fresh fruits, etc., in place of the pies, cakes, roasts, etc., required in the cold weather. There is yet much time to point out to housewives the value of replacing their used kitchen utensils. The ad by **Consumers' Hardware & Supply Co., Lethbridge, Alta.,** deals with this point and under the heading "Good Tools for the Housewife" it states: "It's as necessary to have the right kind of utensils for doing housework as it is for the cabinet maker to have a good carpentering outfit. We have an excellent lot of fine aluminum, enamel and tinware utensils—all of these handy articles that lighten the burden and make cooking so much easier. The kinds we sell are well made of durable, highly finished metal and they're well put together. Replenish your kitchen outfit now from this assortment."

* * *

This point is further enlarged upon in the ad by **Fred W. Karn, Woodstock, Ont.,** who follows the plan of linking up his window displays with the ads. Now that this firm is paying special attention to utensils the two windows carry displays in **graniteware, tinware** and other lines. The ad shown herewith illustrates a fairly wide range of such utensils, each carrying a brief description and a range of prices shown for each. An invitation is extended for readers to inspect the stock of aluminware in the store.



* * *

And ad. dealing with tools, by McAvity's, St. John, N.B., is entitled: "Every man should have a set of tools." Along with an illustration of a complete tool set, the ad states: "And every tool should be a good one, for good tools help a lot toward doing the right kind of a job, whether it is the carpenter or cabinet maker on a regular job or the handy man repairing or adding some convenience to the home. Better results and more satisfaction are assured if you buy your tools here."

Showing Large Stock in a Small Store

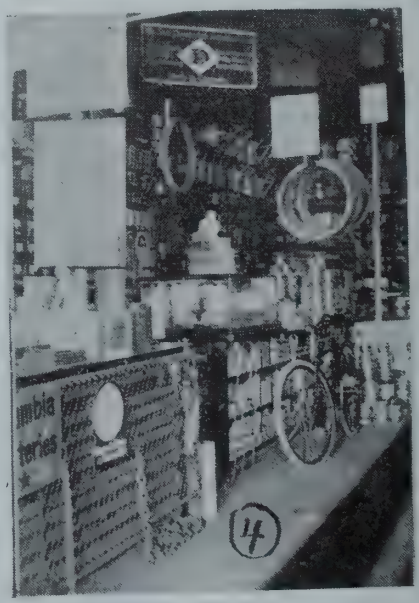
Some Novel Display Suggestions Used by Watson Smith & Son, Shubenacadie, N.S., to Display General Hardware Stock in Limited Premises—Twenty-five Years of Careful Merchandising Has Won This Store a High Place in Public Esteem.

HOW to arrange an effective display of general hardware stock in a store measuring 25 feet by 60 feet was the problem which faced the hardware firm of Watson, Smith & Son, of Shubenacadie, Nova Scotia, and it has been very effectively dealt with as

shown in the views herewith. The proprietors of this store have always kept before them the fundamentals of modern merchandising and by following these throughout have been successful in building up an extensive business, and the kind of business that insures the future of such a store. Briefly, the good-will of the community has been sought and business has been put on a more personal basis than is usually the case. This does not mean actual "friendship," for the place of friendship in business has often been questioned, but it means courtesy to customers and an interest on the part of the store salesmen in the individual problems facing the customer particularly those problems which have made necessary the visit to the store.

Personal service through taking an interest in the requirements of the customers and by seeing that their wants are supplied satisfactorily has given this store a sort of personality which is one of the achievements most to be desired by any retail hardware store.

Many Unique Features



Of course the natural development of this business following the adoption of such a policy has made necessary the carrying of a well assorted stock of general hardware and with such diminutive quarters available, the problem of store arrangement immediately became a serious one. As indicated in the pictures shown herewith the problem has been solved by the adoption of a number of unique methods which will be of interest not only to other merchants whose display facilities are limited, but also to those merchants favored with larger premises who appreciate the value of securing maximum display in a minimum space.

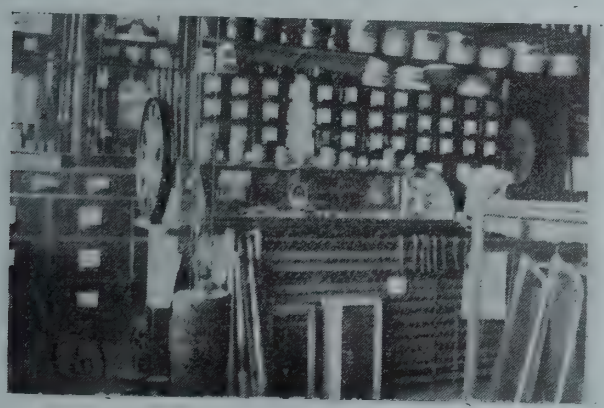
These photos show the various lines carried and suggest a big part of the explanation of how this firm has built up a big business in a small town. There is no waste space in this store and a good range of saleable goods is shown.

Window Display Limitations Don't Count

Picture No. 1 shows the store front indicating window displays of flashlights and ammunition. These are two fast selling lines in the store's trade, and are frequently shown in the windows. These displays on close examination, reveal the fact that even in the face of the evident limitations of display facilities as compared with some of the modern hardware stores illustrated in recent issues of Hardware and Metal, there is an attractiveness and a "punch" to the displays, a feature generally lacking in the displays by stores of this type. It is evident that good use is made of all advertising literature supplied. A few samples of seasonable articles are arranged.

in front of the store, including washers, carts, tools, etc. These supplement the limited display of the windows.

Part of the paint display is shown in picture No. 2. It will be noted that shelves along the front of the counter supplement those along the wall in the showing of paints. Brushes are shown in conjunction with the paint



display, these being arranged in the glass case on the counter. Color suggestions are suspended from the ceiling in this section.

A modern show case contains a display of carpenters' tools, as shown in picture No. 3. Here, too, advertising literature supplied by manufacturers is used both in and on the top of the case.

Handling Rope and Chain

In order to conserve space in the store the stock of rope and chain is kept in the cellar and sample is shown from an end brought through the floor. Picture No. 4 shows chain and rope handled in this manner. A four foot section of each piece is in view and when sales are made the rope is pulled up and cut off. When a chain is sold it is brought up from the cellar. This picture also illustrates how bicycle tires are displayed by being suspended from the ceiling.

Tree saws are shown in picture No. 5 in a prominent location right at the front of the store. Other lumber-

men's supplies are also shown and a display of motor oils is shown on a special rack facing the customer entering the store.

Enamelware, cutlery, screens, etc., are shown to advantage in picture No. 6. A special display rack showing guns behind a glass window is also indicated. Cards illustrating various lines are shown on the front of the small drawers above the counter and on the larger drawers below the counter containing stock of lines displayed.

Selling Auto Accessories

A very fair volume of trade in automobile accessories has also been established by this store due largely to the efforts made to encourage this trade by store displays,

advertising, etc. Picture No. 7 shows a display case devoted to an arrangement of automobile accessories including spark plugs, tires, batteries, horns, repair outfits, etc. A number of cameras are also shown in this case.

Picture No. 8 shows another view of the auto accessory display case and the place it occupies in the general layout. It will be noted that up-to-date display cases extend the depth of the store on this side, and it is evident the best use has been made of every foot of space whether on the floor or along the walls. This picture gives a fair idea of the dimensions of the store interior.

Marking the 25th Anniversary

The advertising and other forms of publicity done by this firm indicate the same policy of giving close attention to details and getting the utmost value. Not long ago this store celebrated its twenty-fifth anniversary. The occasion was marked by the sending out of a message to all who had contributed to the success of the business. This is somewhat of a novel plan and may convey a useful suggestion to those merchants who have been in business sufficiently long to carry it out. It is one of the means of establishing in the appreciation of the local community the fact that the store stands for something else besides the mere exchange of merchandise for money.

It is rather an unique idea for a retail store manage-

ment to send out such a message of gratitude on the completion of such a period of business. The suggestion is a good one, as it serves to consolidate the strong position which such a store must have achieved before it would be justified in sending out such a message. The novelty of the plan serves to create interest therein and it undoubtedly brings much appreciation from customers.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations.

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, FEBRUARY 5, 1921

IT IS an interesting sign of the times to note that linseed oil is again selling around the dollar mark.

* * *

THE Prairie Provinces and Nova Scotia have become bone dry by legislation just enacted. Prohibition has been good for business as a whole and much of the money formerly spent on liquor importations will no doubt be spent to much better advantage in future.

* * *

THE need for more aggressive selling in view of the fact that present market conditions favor the buyer, were emphasized at the convention of The Steel Co. of Canada. This is a good policy for hardware merchants to keep in mind.

* * *

THE addition of nails to the United States emergency tariff bill will, if adopted, be reflected to some extent in Canadian trade. Canada's exports of nails to the United States during last November were valued at $994,436. This export business in Canadian nails is largely the result of the big export demand in Europe for the United States product and the inability of United States mills to cope with both foreign and domestic trade would seem to be little reason for further protection of their nail industry.

Merchants Score Again

ALMOST on the eve of the hearing of a test case to establish the liability for taxation of tinsmiths and merchants operating a tinsmithing department in connection with hardware and other trades, the Government assumes an attitude of less severity in the enforcement of some of the regulations. Heretofore tinsmiths have been classed as manufacturers, required to take out a license as such and compelled to collect sales tax. True the retail merchants did by concerted action secure a temporary stay in the enforcement of the regulations, pending the result of the test case, but the strict letter and not the spirit of the regulation has been the interpretation of local collectors of Inland Revenue. Under date of January 10, an official communication from Ottawa to all collectors advised that though blacksmiths could be categorized as retailers, such was not the case with the tinsmiths. Since that time, however, the Government has adopted a more sympathetic attitude and the present inclination is to class tinsmiths as contractors, the latter being considered in the same category as retailers.

This is the logical class for tinsmiths in view of the fact that the largest percentage of their manufacturing is of stove-pipes, eavestrough, etc., for use on work contracted for and not for re-sale. The tinsmith has to pay 2 per cent. on materials purchased from the manufacturer and it is therefore unreasonable that a further sales tax as a manufacturer should be imposed on the tinsmith.

It has taken the Government a long time to realize this; probably the imminence of a thorough test case helped along the decision to go easy on this regulation.

The change of heart is but another indication of the uncertain tax policy at present being followed and is also an indication of what can be achieved by concerted action among merchants, largely through the medium of the trade press.

Making Salesmen Now

THERE are certain business houses where the visitor knows what to expect now. Go in and make a call. Sit down and talk for a few minutes. You will come out with an ear full of gloom. You will hear that the firm is not making money; that they are not selling as much as they did last year; that the future is uncertain.

After one gets well sprayed with that kind of speech it is easy to pass a little of it along.

Thank goodness there are other places. This week we found one that was out for a record year. Yes—not an inch less—out for a record year.

Their motto may be rather straight and unadorned, but it means this—the way to get business is to get it.

"We are going after business now in a way that some of our new salesmen never heard of before. There has not been much selling done since 1915—large a case of taking orders. It' s bad for the whole force. Salesmen are developed when business is not brisk, when the traveler has to think, has to study the business of his client, has to find out if he has anything to sell him that he should have. We believe there will be more salesmen developed in Canada during the year 1921 than there have in the previous five years."

The Market Not Crowded

IN a signed statement by T. A. Russell, president of the Willys-Overland Co., the much-repeated talk of overstocked automobile dealers is plainly denied. The remark has often been made that as soon as prices were cut some months ago dealers rushed in and bought very large stocks for the 1921 trade and therefore put an end to the buying movement as far as they were concerned for some time to come. Mr. Russell's statement follows:

"Motor dealers in Canada can look forward to 1921 with confidence. The statistics which were prepared by the manufacturers and dealers for submission to the Government in connection with the question of luxury taxes, brought out the surprising fact that the total number of cars in the hands of dealers, throughout the whole of Canada, did not exceed the normal production of the Canadian factories for one month. In other words, one month of normal sales would dispose of a greater number of cars than were in stock in the hands of dealers in Canada on January 1, 1921."

Dealing with general conditions, all of which will have a very direct bearing on the sale of cars and other business, Mr. Russell goes on to say: "A large part of Canada's grain crop has not been moved. Canadian banks and institutions have stood the strain of reconstruction without an important casualty. Liquidation, which has been so general, has been accomplished without shaking our commercial credit. Are these conditions not a sound basis for a healthy and profitable business in 1921?"

Convention Program of Ontario Retail Hardware Association

SIXTEENTH ANNUAL CONVENTION FEBRUARY 14-15-16-17-18 HAMILTON, ONT.

MONDAY, FEBRUARY 14TH

At Royal Connaught Hotel

2.30 p.m.—Meeting of Executive.

4.00 p.m.—Registration and enrollment of members.

7.30 p.m.—Reception and Smoker. For Members, Exhibitors, Travellers and Visitors.
Moving Picture. Industrial.

Note—All further Sessions will be held in Lecture Hall at Armouries. Members are specially requested to be prompt in attendance at opening of sessions, in order to carry program through on schedule time.

TUESDAY, FEBRUARY 15TH

In Lecture Hall—Armouries Building, James St., N.

9.00 a.m.—Opening of Business Sessions.

9.30 a.m.—Greetings from Mayor, and from Representatives of Manufacturing and Wholesale Trade.

10.00 a.m.—President's Address—Mr. Ed. Wanless.
Secretary's Report—Mr. W. F. Macpherson
Treasurer's Report—John Caslor.
Auditors' Report—Messrs. Matthewson and Peacock.

Receiving and Disposal of Reports of Officers. Appointment of Resolution and Convention Committees.

11.00 a.m.—Visit New Warehouse of Wood, Alexander & James, who extend to all an invitation to inspect their New Warehouse.

Tuesday Afternoon.

1.30 to 6.00 p.m.

Visit Exhibits in Armouries.

For practical education in the lines of goods you sell, a close examination of the various excellent Exhibits, is easily one of the best features of the Convention. There you will meet the Travellers you know, Salesmanagers with whom a personal acquaintance is a decided advantage, General Managers and Company Presidents, all of them ready to discuss business affairs and brim full of practical pointers in sales promoting.

SPEND LOTS OF TIME WITH THE EXHIBITORS.

Tuesday Evening.

7.30 p.m.—Presentation of report of Executive Committee on Permanent Secretaryship.
A conception of the duties and scope of an Asso-tion Secretary.—President Wanless.
What the Secretary owes to the members and what the members owe to the Secretary.—Secretary Macpherson.

8.00 p.m.—Notice of motion from 1920 Convention.
Discussion and disposal of report of Executive Committee.

8.15 p.m.—Nomination of Officers.

8.20 p.m.—A Game of Cards Every card headed, "What I want to know about the Hardware business." All questions to be answered first by the members, then by the President or Secretary.

9.15 p.m.—A film story of Plymouth Rope and Binder Twine. Produced by the Plymouth Cordage Company, North Plymouth, Mass., who have kindly consented to come and put on for our Association. and which will surely be appreciated by the members. Shown in nine parts:—
1—Growth and cultivation of Manila Fibre.
2—Production of Sisal Fibre.
3—Factory Panorama—arrival of hemp steamer, docking and unloading scenes.
4—Opening the fibre—its preparation and spinning. Tarring and putting up Lathyarn.
5—How Binder Twine is made. Spinning, testing for length and strength, balling, sacking, warehouse facilities for shipping. Harvest scenes.
6—Machine-made Rope.
7—General Factory scenes. Binding off coils, shipping, etc. End of the day.
8—Old-time method of hand spinning by a rope maker 90 years young.
9—Modern Rope-walk practice.

WEDNESDAY, FEBRUARY 16th.

Lecture Hall, The Armouries.

9.00 a.m.—Reports of Convention Committees.

9.30 a.m.—Business prespects for 1921.
"The Iron and Steel Market"—Robert Hobson, President the Steel Company of Canada.
"Manufactured Products"—John M. Taylor, President Taylor-Forbes Company; B. J. McCormick, General Sales Manager Canada Foundries & Forgings; Col. A. M. Hatch, Canada Steel Goods Co.
"Paint and Oil Trade"—W. J. Lotie, Toronto Manager Dominion Linseed Oil Co.; John Irwin, of McArthur-Irwin Co., of Montreal, representing the "Save the Surface" Campaign Committee.
"The Wholesale Trade"—Colonel Robert Starke, President Canadian Wholesale Hardware Assn.; S. H. Alexander, Wood, Alexander & James, Hamilton, Ont.
"The Retail Trade"—Nelson Mills, Vice-President O.R.H.A.; G. E. May, Toronto; F. B. Smith, Belleville, G. A. Binns, Newmarket; A. J. Wright, Hamilton.

11.30 a.m.—Mutual Fire Insurance as carried by Retail Associations—Mr. Norman S. Jones, Manager for Canada Northwest Mutual.

Wednesday Afternoon.

1.30 p.m. to 6 p.m.—Visit Exhibition in Armouries. Music by Orchestra.

7.30 p.m.—Complimentary Banquet tendered by Wood, Alexander & James, of Hamilton.

THURSDAY, FEBRUARY 17th.

Lecture Hall—The Armouries.

9.00 a.m.—Reports of Committees.

9.15 a.m.—Election of Officers.

9.30 a.m.—The Chain Store Proposition—F. A. Maycumber, Sales Manager Winchester Repeating Arms Co., New Haven, Conn.

10.00 a.m.—Co-operative Buying—Mr. William Hargreaves, Manager Drug Trading Company, Toronto.
Questions and discussion of addresses on chain stores and co-operative buying.

11.00 a.m.—Exhibitors' hour. Short, pithy addresses by Exhibitors and Salesmen on "Selling Points."

12.30 p.m.—Entertainment

Thursday Afternoon.

1.30 to 6 p.m.—Visit Exhibits in Armouries.

7.30 p.m.—A talk on advertising to bring results.

8.00 p.m.—Members' Session Question Box. Answers to cards on file.

Smoker and entertainment.

FRIDAY, FEBRUARY 18th.

9.30 a.m.—Visit to Factories. Hamilton is the centre of hardware manufacturing industries and a visit to the various factories is both instructive and enjoyable.

News of Western Canada

Interesting Subjects for B.C. Convention

VANCOUVER (Special).—This year the British Columbia Board of the Retail Merchants' Association of Canada has decided to make a change in the method of handling the annual convention. The entire sessions will probably occupy three days. The first day and a half or two days will be spent by the various sections separately. Thus the hardware men from the whole province will discuss their problems; the automotive sections, the dry goods sections, the tailors' sections, etc., will each meet separately and decide what they want the association as a whole to get behind. Then on the final day, the massed convention can take the necessary action, and all at high speed. The automotive section of the Retail Merchants' Association in British Columbia, which has been making great progress in the last six months, and doing great work for themselves, is an outstanding example of the success of this provincial section scheme. At some of the meetings of the automotive section of the Retail Merchants' Association there were more present than the total attendance at the provincial convention last year.

The Wholesalers' Policy

Hardware and Metal is advised at this year's convention of the Retail Merchants' Association of British Columbia, a list of questions has been prepared dealing with wholesale practice re selling to consumers, giving special quotations to large cash and carry stores, etc., and all the Vancouver and Victoria wholesale dealers will be invited to have a representative address the convention on these subjects. As the secretary states: "Any wholesaler is absolutely entitled to his own policy as to sales, but the merchants also are quite within their rights to require to know just what that policy is, and to govern themselves accordingly. What we consider right, a wholesaler may consider not feasible; we are all willing to be shown."

Optimism at Moose Jaw R.M.A. Meeting

MOOSE JAW, Jan.—At the annual meeting of the Retail Merchants' Association of this town held recently a great feeling of optimism was in everything apparent. Reports presented reviewed the work accomplished during the past year, particularly with the measures taken to have the luxury tax abolished, also changes in the pure food regulations, transient traders, insurance and the small debt recovery act.

It was recommended by the executive committee that the membership fee be reduced from $45 to $30. The thanks of the association was tendered the retiring officers.

Six members of the Regina Retail Merchants' Association, including President Morton, were present and extended greetings from the capital city. The president of the Regina organization made a wager of a new hat that his association would have more members at the provincial meeting in Saskatoon than would Moose Jaw in proportion to the membership. President McMicken of the provincial association was also present, and gave an address. He dealt with the work of the provincial executive during the past year, while he also made some recommendations to the local body along the lines of dividing the organization into sections, so that all business would be in its own particular section, and each section could meet to discuss the various problems peculiar to its own line of business.

The new officers elected are as follows:—

President—W. G. Marshall.
1st vice-president—Charles Williams.
2nd vice-president—Harry Hart.
Honorary secretary—H. Humber.
Honorary treasurer—W. Hembroff.

Executive committee—Clem Alexander, A. J. Wilcox, W. Hembroff, and B. C. Crichton.

Demonstrate Insulating Felt

Winnipeg.—The Canadian Insulation Co., of which George A. Merrick is president, gave a demonstration at the Lumbermen's convention of its insulating felt produced from flax straw at its plant in Selkirk. Owing to the high price of fuel greater interest is being taken in the subject of scientific insulation.

Western Notes

J. Brecker, hardware merchant at Engelfeld, Sask., has sold his grocery department.

* * *

Doner & Capp, hardware merchants, Winnipeg, Man., are discontinuing their branch at 881 Main street.

* * *

Peter J. Demers, who operates a hardware store at New Sarapta, Alberta, recently suffered a loss by fire.

* * *

Winnipeg.—Mr. Pechet, of the firm of Pechet & Company, of Crepar, Sask., was in Winnipeg on a business trip.

Development of Electrical Trade In the West

Winnipeg.— Indications of how the electrical appliance business has developed in western Canada is found in the report of one local firm, whose electrical appliance business has increased from $7,832 in 1916 to $304,000 last year, and no decrease in the business is in sight. The sales in 1917 aggregated $28,000, while the 1918 sales aggregated $60,000, and those in 1919 $98,000.

"We expect to have a turnover of $1,000,000 a year within four or five years in appliances alone," said the manager.

The department sells equipment ranging from electric irons to electrically-operated sewing machines and vacuum cleaners.

Recommend Huge Building Loan Fire Loss

Winnipeg.—At the final session of the Association of Canadian Building and Construction Industries Convention approval was given the standing committee of labor in entering into an arrangement with labor men for the formation of a national joint conference board. Recommendation was made that the committee appointed to undertake propaganda should lay stress upon the economic necessity of increased efficiency in the matter of production and the advantages accruing.

Action of the national joint conference board in making representation to the federal government with reference to the housing loan of $250,000,000 was approved by a majority committee and the newly-appointed members were instructed to take action to have this matter brought to a successful issue.

Selling British Made Goods in Canadian Market

Strong Organization to Take Up Matter of Fraudulent Trademarks—Montreal Speaker Believes That Tide Has Turned, And Feeling of Stability in Values Can Bring Business Revival.

ANOTHER step in bringing the Montreal and Toronto branches of the Canadian Association of British Manufacturers and their representatives closer together was taken at the annual meeting of the Toronto branch at the King Edward Hotel on January 28. Greetings were brought from the Montreal branch by Messrs. F. I. Spielman and John E. Ritchie, first and second vice-presidents of the Montreal branch, and both the retiring president, Mr. Geo. A. Marshall, and the newly-elected president, Major John Harris, intimated that steps would be taken to extend the activities of the organization to other centres of the Dominion.

Following luncheon in the banquet room, at which Mr. George A. Marshall presided, Secretary Bunney read the minutes of the last annual meeting. Treasurer Sharpe reported on the financial condition, showing a favorable balance in the treasury. A number of necessary changes in the constitution were left to the council to dispose of, these having been practically agreed upon by the Montreal and Toronto branches.

The President's Address

Mr. Marshall, in his annual report, gave a very thorough resume of the work of the association, both in Toronto and Montreal, the Montreal annual meeting having been held on January 21. The work of the two associations being reviewed in this manner gave a wider scope of the activities of the organization.

MAJOR JOHN HARRIS

President Canadian Association of British Manufacturers. Came to Canada in 1914 and saw military service in the Great War, rising from lieutenant to major. Decorated by the President of France. Also in South African War. Keenly interested in British trade in Canada.

"The association," said Mr. Marshall, "which was established in the early part of 1919 on the initiative of H. M. Trade Commissioners in Montreal and Toronto, has now a membership of over 200 representatives of the British trade in the Dominion of Canada, which development is due to your branch council members, trade section committees, and the valued assistance rendered through the good offices of H. M. trade commissioners. As outlined in our last annual report, the association, as members, has been strengthened considerably by the Federation of British Industries, which is an extensive organization dealing with British manufactures all over the world. They are in touch with chambers of commerce and boards of trade in all industrial centres, and we cannot too highly credit them with appreciation of their valuable assistance this past year to our association both as regards useful correspondence exchanged, and in the manner our suggestions are dealt with. In order of reciprocity the position is now better to extend to them our knowledge of any British firm desirous of purchasing in this country, and information relating to the Canadian markets. Several of our members when visiting England have called at their London office, 39 St. James St., S.W. 1, with very satisfactory results. In this connection alone it

They're on Their Way

Where? To the place where every progressive merchant in Ontario is going—to Hamilton for the big **convention of the Ontario Retail Hardware Association from February 14-18 inclusive.** There will be much to learn—and an enjoyable time socially while you are learning.

It is in the interests of your business to attend this convention. The many problems now facing the hardware trade will be fully discussed and the best policy to follow will be decided from this thorough discussion.

Your side of the story is needed too so get your hat and bag and arrange to be in Hamilton at the Royal Connaught Hotel for the first session on Monday afternoon, Feb. 14. See complete program in this issue.

Events in the Trade

Business Changes

Whitecourt, Alta.—Scoffield and Son, hardware, have been succeeded by Scoffield & Turner.

Fire Loss

Halifax, N.S.—Morton & Thompson have suffered fire loss.

* * *

Halifax, N.S.—Dunlop Tire & Rubber Goods Co.'s local branch suffered fire loss in the recent large fire here.

* * *

Quebec.—The Armand Bastien factory, at Indian Lorette, has been totally destroyed by fire. Snowshoes, canoes, etc., were manufactured.

Obituary

Hamilton, Ont.—R. B. McMurtrie for many years a salesman for the Steel Co., of Canada, is dead.

* * *

St. Catharines, Ont.—N. N. Bulger, superintendent of the Welland Vale Mfg. Co. plant, is dead.

Personal

Toronto.—E. Holt Gurney, of Gurney Foundry, Ltd., addressed the local branch of the Rotary Club concerning work for and among the boys.

* * *

Toronto.—G. F. Morris has been appointed sales manager of the time recording division of the International Business Machines Co., Toronto. Mr. Morris has been connected with the company for ten years.

* * *

Montreal.—E. L. Gibbons of Wilcox, Crittenden & Co. Inc., Middleton, Conn., and J. S. Bowbanks of Starr Mfg. Co., Ltd., Dartmouth, N.S., called on the wholesale trade this week.

Form New Company

Peterboro, Ont.—N. H. Barclay and D. Hardie, both of this city, have organized a company known as the Canadian Tent and Awning Co., and have applied for a Dominion charter, which they expect to receive very soon. Mr. D. Hardie has been in business at 376 Water street for five years.

Exide Battery Salesmanagers in Conference

Toronto.—The sales managers of Exide Batteries of Canada, Ltd., have been in conference at the King Edward Hotel.

Changes Made At Willys-Overland

Several changes have taken place in the personnel of Willys-Overland, Ltd. J. R. Marlow has been promoted from the position of Montreal branch manager to be secretary and treasurer of the company. As he will also have supervision

J. R. MARLOW

Appointed Secretary and Treasurer of the Willys-Overland Co., Toronto

of sales generally, Mr. Marlow will take over many of the duties formerly performed by Mr. MacKay and Mr. Dover. His appointment follows Mr. Burt's transfer to one of Overland's allied industries, the New Process Gear Company, of Syracuse, N.Y. When T. A. Russell, president of Willys-Overland Limited, announced the appointment of C. R. Burt as general manager, it was part of the arrangement with Mr. Willys- and Mr. Chrysler that Mr. Burt would return to the United States later in the present year. Owing to developments earlier than expected, it was found advisable for Mr. Burt to assume the management of the gear company in January. Formerly sales manager of the Russell Motor Car Company in Toronto, Mr. Marlow went to Montreal in 1915 to take charge of the then Russell Motor Car Company branch. This branch was taken over as a branch of Willys-Overland Limited in 1917 and Mr. Marlow continued as manager.

Canadian Copper Output in 1920

Ottawa.—The value of Canada's mineral production in 1920 is estimated at about $200,000,000, compared with $176,686,390 the year before, the Department of Mines announces. The gold output was valued at $16,000,000. Production of other minerals follows:

Silver, 13,500,000 ozs.; copper, 82,500,000 lbs.; nickel, 61,500,000 lbs.; lead, 35,000,000 lbs.; zinc, 42,000,000 lbs.; pig iron, 1,000,000 short tons; steel ingots and direct steel castings, 1,220,000 short tons.

Montreal Board of Trade Elections

Montreal.—At the recent elections of members of the various sections of the Montreal Board of Trade, Jno. Irwin, vice-president and managing director of McArthur Irwin, Ltd., was elected a member of the paint, oil and varnish manufacturing industries section. Edward Goodwill, vice-president Thos. Davidson Mfg. Co., Ltd., and Jno. C. Newman, manager McClary Mfg. Co., were also elected to the metal and hardware section.

New Wire Fencing Manufacturer

Montreal.—The Blashill Wire Machinery Co., Montreal, expects to be manufacturing wire fencing by the early summer months. Mr. Blashill, manager, stated that this project was contemplated some two years ago, but owing to scarcity at that time it was abandoned for the time being, the firm devoting their time to the manufacturing of wire machinery and other machine tools. Deliveries of wire are now more easily obtained and it is hoped to have the plant turning out wire fencing of all kinds before the summer is well advanced.

C.G.E. Team Defeated

Toronto.—By defeating Canadian General Electric 2 to 1 at the Ravina Rink the Massey-Harris team now lead the Mercantile Hockey League. Massey-Harris played a stiff close-checking game, which, on the sticky ice, was fruitful, and this defeat over C. G. E. will undoubtedly go a long way toward deciding the winner of the Mercantile League title.

McClary's Factory at Brantford To Re-open

Brantford.— Announcement is made that the McClary plant, formerly the Buck Stove Works, which has been closed since Christmas, would open this week, though not at full strength. The staff will be increased as the market opens up. Manager W. W. Knobbs stated that repairs at the factory had been completed in the interval and the staff will be increased as conditions warrant. This is the first factory which closed down after Christmas to reopen.

Western Ontario News

Robt. Bonthron, of Hensall, Ont., who has been seriously ill with pneumonia, is recovering rapidly.

* * *

Fire of unknown origin completely destroyed one of the large boarding houses of the St. Marys Cement Company at St. Marys, Ont., on Tuesday afternoon.

* * *

At the annual meeting of the Harrow Baseball Club, this week, Frank Richardson, hardware merchant, was elected a member of the executive committee.

* * *

At the annual meeting of the Lambton Loan Company, held at Sarnia, on Friday, Col. Mackenzie, of the Mackenzie Milne Co., was re-elected as a director.

* * *

Word has been received of the death in Vancouver of Donald McLashlan, for many years in the hardware business at Glencoe, and formerly of Blenheim. He was 77 years old.

* * *

B. O. Parker, of the B. O. Parker Hardware, Strathroy, Ont., was elected as one of the directors to represent the town this year on the board of the Strathroy Agricultural Society.

* * *

W. J. Doyle, hardware merchant at Windsor, Ont., came off luckily in a series of window burglaries on Monday night. Thieves, who made a systematic tour of the city smashing windows and taking what they pleased, smashed the plate glass at Mr. Doyle's store, but were apparently frightened away before they could take any merchandise.

* * *

The importance of not leaving money in the till over night was impressed forcibly on A. R. Wright, hardware merchant at Port Burwell, on Saturday. Mr. Wright is also collector for the local gas company and as the gas bills were due on Friday he had taken in a considerable sum of money. Some one was apparently aware of this and hoped to make a haul. When Mr. Wright came down on Saturday morning he discovered a heavy iron weight lying in front of the safe. This apparently had been used to smash the plate glass window of the office, through which entry to the store was obtained. The burglar had opened a show case and helped himself to a flashlight. He also had pried open two tills, but all he obtained for his trouble was about $3, as Mr. Wright had taken the precaution to deposit the money he had collected for the gas bills and his day's business.

New Sales Force Now Organized

Considerable interest is being shown in the forthcoming organization of what will be known as the Dominion Industrial Products Co., Ltd. This concern will be the accredited Canadian representatives of some thirty or more United States manufacturers of numerous industrial products.

The products handled range from industrial railway equipment, and road contractors' equipment and supplies to various metal specialties, i.e., machine screws, bolts, nuts, washers, special nails, escutcheon pins and screw machine products in all metals. Non-ferrous metals, steel sheets, bar shapes, etc., will be dealt in, as also will certain types of foundry equipment and supplies.

It is not expected that warehouses will be maintained before the end of the year, but there are immediate prospects of sales offices being opened in the principal Canadian cities this year.

Those connected with the enterprise include W. P. Young, formerly general purchasing agent of the Canadian Edison Appliance Co., Ltd., of Stratford, and the Canadian General Electric Co., Ltd.; J. M. Young, formerly connected with Russell Motor Car Co., Ltd., and the Machine & Stamping Co., Ltd. James W. Derbyshire will be general sales manager, and a fairly large sales staff will be engaged, as the Dominion Industrial Products Co., Ltd., is Dominion wide in its scope.

MARITIME NEWS

Moncton, N.B.—It is stated as likely that a million dollar cement plant will be built at Havelock, N.B. The best lime rock in the Maritime Provinces is said to be in that locality.

* * *

Moncton, N.B.—R. P. Dickson of Sumner Co., Ltd., attended the banquet of the St. John Iron and Hardware Ass'n, in St. John.

* * *

Moncton, N.B.—The U. S. emergency tariff took on a new interest to New Brunswick, when a big increase in the duty on lime was added. Large quantities of this have formerly found their way into Maine and other New England States.

St. John Merchants Ask For More Economy

St. John, N.B.—At a meeting of the St. John Branch of the Retail Merchants Association of Canada, a resolution was passed urging the city council of St. John to cut down all estimates for the Department of Public Works. They deemed this step to be necessary owing to the increased rate of taxation which would result if the estimates are allowed to go through. The association claims that at the present time all merchants are exercising strict economy and where possible cutting down expenses. It was felt that the city council should conduct the affairs of the city on the same lines, and not carry out any lavish expenditure in city improvements until economic conditions had assumed a more normal level. A communication to this effect was sent to the City Hall.

Annual Dinner of St. John Iron and Hardware Association

St. John, N.B.—About fifty members of the St. John Iron and Hardware Association were present at their annual dinner, held in the Union Club. The president, S. E. Fisher, was in the chair. The menu cards, as on former occasions, were designed to represent a piece of hardware. This year they were in the form of a bronze door set, and were very attractive.

The toast, "The King," was proposed by the president. "The Association," proposed by the vice-president, S. L. Emerson, and responded to by Hon. W. H. Thorn. "The City of St. John," proposed by R. B. Emerson and responded to by Mayor Schofield. "The Board of Trade," proposed by J. G. Harrison and responded to by W. F. Burditt. "Iron and Hardware Manufacturers," proposed by M. E. Agar and responded to by W. S. Fisher. "Our Guests," proposed by A. M. Rowan and responded to by Mr. Downing, Percy Dickson, of Moncton and W. J. Ambrose. Solos were sung by W. A. Smith and C. Jamieson. Instrumental selections were played by members of the St. John Concert Company, and a sketch was given by members of the cast who were playing at one of the local theatres. Mayor Schofield delivered a most interesting address dealing with taxation and other subjects of vital interest to the local hardware men, and was heartily applauded.

Those present included F. Watson, J. W. Andrews, W. P. Downing, W. J. Ambrose, Percy Dickson, W. F. Burditt, E. A. Schofield, H. G. Enfield, C. H. Ramsay, F. A. McDonald, H. P. Jenkins, W. F. Knoll, J. McM. Reid, G. B. Rivers, C. G. Fraser, A. E. Baxter, F. Murphy, G. W. Morrell, J. F. Tilton, G. W. Noble, W. E. Emerson, T. Fox, W. G. Stratton, R. R. Cummings, S. C. Hoyt, P. D. McAvity, W. A. Smith, W. S. Clark, W. S. Harrison, E. Harrington, H. Coates, R. B. Emerson, S. L. Emerson, E. Mullin, S. E. Elkin, W. A. Paterson, F. C. Jackson, W. S. Fisher, Hon. W. H. Thorne, J. G. Harrison, W. J. Ambrose, C. Jamieson.

Expect Big Future For Accessories

Stimulation of Motor Car Business Was Keynote Of London Motor Show.

LONDON, Ont.—The London Motor Show contained much that was of interest to hardware merchants. Viewed from the standpoint of sales possibilities for the hardware man and also from the viewpoint of the tendencies of the buying public, especially the farmers, it was a barometer that points to the undoubted prosperity of the rural communities and a steadily increasing business for the merchants who are handling auto accessories.

Something a little better, more luxurious, easier handled and capable of standing up to work the year round, summarizes the wants of the public. Among those attending the show were hundreds of farmers. Many of them taking advantage of the splendid condition of the roads had motored in with their families for fifty miles. These men have been making money in the last five or six years. They are thoroughly "sold" on the auto as an indispensable factor in their everyday life. What they want is something "a little better." It is not a question with them of $100 or $500. If they see the equipment they want they are going to buy, realizing that they will get back many times over in comfort and service their initial outlay.

Like Closed Cars

The great majority of the visitors showed keen interest in closed cars and there is, according to the men at the show, big business ahead in cars of this kind.

There was an unusually fine display of auto accessories in connection with the show and the questions asked by the visitors showed how keenly they are interested in the development of devices that make for better and easier motoring. This phase of the show has especial interest for the hardware merchants. Every day the number of car owners is increasing and every one of these car owners is interested in equipment that is going to make his car a better car. He must also have supplies. The auto accessory business has grown to be something enormous and it is going to be still greater. No class of merchants are better prepared to supply the needs of the car owner than the hardware men, and all over the Dominion may be found auto accessory departments in hardware stores that have grown from almost nothing to one of the largest and best paying branches in the store. With an ever broadening field not only of car owners but of truck owners as well, there is big business ahead for the merchant who carries the stock and then lets these people know they can get what they want at his store.

A Commendable Policy

HARDWARE

1921

Is Away to a Good Start

Again we wish to thank our friends and customers for the splendid amount of business given to us during the past year.

We look forward with confidence to what the new year will produce. Some lines of hardware are beginning to show a slight decline in price, at the same time we can't look for much along these lines yet. All the goods on the market at present have been produced with high-priced labor and materials. As fast as we can we shall try to get our prices down. But at the same time we shall insist on putting quality first in selecting our goods.

We would ask our customers to co-operate with us by increased buying at home for cash.

If you buy in your home town for cash, your town merchants can buy for cash and give you better service and value.

FOR QUALITY AND SERVICE

Go to Andrews

Minnedosa, Man.

A concise statement of conditions prevailing in the hardware trade at the present time, such as is made in this ad. by Andrews Hardware, Minnedosa, Man., is a good way in which to get the confidence of customers and will clear up many misapprehensions which customers may have regarding price tendencies. This policy can be followed in all dealings with customers.

Are You Basing Prices on Replacement Values?

The first article in this issue shows how one hardware merchant jeopardized a valuable connection by maintaining prices on the basis of cost instead of replacement value. This is one of the most important matters facing the trade to-day. Read the article and then

Send in Your Opinion

to the Editor, Hardware and Metal. A full discussion will bring out all points involved and help form a definite policy.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of February 9, 1901:—

The annual report of the hardware and metal section of the Toronto Board of Trade, as presented by the chairman, Mr. Peleg Howland, included the following statement: "The difficulties of doing business in the North-west country are intensified by the seeming determination of these companies (railways) to compel the distribution of all goods through Winnipeg by granting special traders' rates outward from that place. Whether relief will come from the appointment of a railroad commission, which seems to be foreshadowed, will depend largely upon its composition and powers."

* * *

A fair attendance was present at the hockey match at McQueen's rink, and once more the Drys (dry goods first team) were turned down by the hardware players. The nail handlers' team included the following line-up—Goal, Murdock; point, Boyd; cover point, Stanton; forwards, Kendall, H. Pauline, Austin, Whitehead.—From the Simcoe *Reformer*, Jan. 31, 1901.

* * *

The seventh annual meeting of the St. John Iron and Hardware Association was held a few days ago. Following officers were elected—President, S. Hayward; vice-president, P. Carmichael; secretary-treasurer, J. J. Barry; directors, R. B. Emerson, W. H. Thorne, and Thomas McAvity. A resolution lamenting the death of Her Majesty the late Queen Victoria was adopted.

* * *

The Montreal Retail Hardware Association held a meeting to discuss relations with tar paper manufacturers. President Martineau occupied the chair. Others present included Vice-president D. Drysdale, 2nd Vice-president L. J. A. Surveyers. Among others were A. Prudhomme, J. Prudhomme, U. Granger, W. Granger, E. D. Colleret, Mr. Leger (Lacrois & Leger), L. Prevost, Mr. Huberdeau, Chausse, Mailhot, Leblanc, Belanger, Jubinville, Watts, and Mederic Martineau. A copy of a letter from the Canada Hardware Co. to the Patterson Mfg. Co., dealing with the price of tar paper, etc., was read.

* * *

As Mr. John Irving, newly appointed agent for the Nova Scotia Steel Co., was taking leave of his firm, the Montreal Rolling Mills Co., a family gathering was held in the manager's office.

Accessories Featured at Motor Show

MONTREAL.—The display of automobiles, motor trucks, motor cycles, bicycles and accessories at this year's session of the National Motor Show of Eastern Canada surpassed the show of previous years.

The exhibitors report that public interest in motor transport was never keener. Enquiries for cars and applications for demonstrations have never been more numerous, they say, while a substantial number of sales were concluded during the show. "Surprised and delighted," — "business beyond expectation,"—"more sales and more prospects than at this time last year," — "many enquiries and outlook sound,"—"convinced now that this year's business will be far better than I had dared to anticipate," — "conditions fast becoming normal" — such were the expressions with which exhibitors summed up the impressions gained during the week.

Bicycles, another line that is featured by many hardware dealers, were also displayed in different booths; accompanied by their accessories and repair parts.

Express Rates Increased

OTTAWA.—The judgment of the board of railway commissioners in the express rates case has just been issued. The companies applied for a flat increase of 40 per cent. on all rates. The judgment grants an increase of 35 per cent. on first class rates and charges, 25 per cent. on second class and 20 per cent. on commodity rates.

It was found that the concession granted by the last judgment worked to a much greater extent in the interests of the mail order houses and shippers in cities and towns than in those living in rural districts who were expected to profit thereby.

With reference to the time at which the increases go into effect, the judgment of the board is as follows:

"The increases herein authorized may be provided for by the publication and filing, on one day's notice, at all express offices, blanket supplements to existing tariffs."

The average rate of increase would amount to 26 2-3 per cent., but on account of the greater percentage being carried at first-class rates, it would produce slightly more than that average incease to the express companies.

The express companies are instructed that, in the future, profits from investments and money order business shall be accounted for as revenue, and, taking these into consideration, the increases are expected to produce only sufficient revenue to take care of operation and depreciation and provide a sufficient sum with which to pay interest on investments at seven per cent.

Little Business for English Steel Trade

THE immediate prospects for the steel and allied trades in the Sheffield district could scarcely be worse, and unless something turns up very soon to improve the position a large section of Sheffield industry will have comparatively nothing to do, says the Ironmonger. Last year saw the greatest wave of prosperity in the history of the country reach its crest and collapse. This was followed by a period of depression which has continued. The slump is worst in raw and semi-steel, but it extends to most branches of finished steel products. A sharper contrast between the conditions obtaining at the beginning and the end of the year could scarcely be imagined. Not only did buying almost come to a standstill, but it was accompanied by wholesale cancellation of orders. Manufacturers, who six months ago were in the comfortable position of having work on order sufficient to keep them fully employed for a half or even the whole of the present year, have practically nothing on their books to-day. Bad as things are, Sheffield is in a rather better position than other centres of metal production, as a fair demand is being maintained for certain materials manufactured in the district, the chief of which are castings of iron and steel, good-class wire, strip, files, and hand tools of various descriptions. In these departments, however, new work inclines to taper off. Those who prophesy an early turn in the tide of bad trade base their arguments on the latest demand for iron and steel material which is known to exist. The steel is wanted, but the people who want it cannot afford to buy it.

Commercial Travellers' Insurance

Officers and trustees of the Commercial Travellers' Mutual Benefit Society of Toronto were recently elected for 1921, as follows:

President, Chas. S. Parsons; vice-president, S. M. Sterling; treasurer, S. R. Wicket; secretary, Richard Ivens; trustees for Toronto, Robert Forbes, W. J. Sykes, R. Maxwell, J. Burns, J. Curtis, L. R. Arnett, A. J. Tipping, E. Fielding and H. L. Willmott.

The report for the year 1920 was presented by the president and adopted. The total assets are now $194,712 as against $174,369 a year ago. $342,000 new insurance was written during the year compared with $257,000 written in 1919, an increase of over $200,000, after deducting $33,500 paid in death claims during the year.

If interested tear out this page and place with letters to be answered.

If interested tear out this page and place with letters to be answered.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

A NEW COLD WATER PAINT

A. Ramsay & Son Co., of Montreal, after several years of extensive experimental work with products all of which have been produced by Canadian energy and resourcefulness, claim to have developed an entirely new line, which they have registered under the trade mark of "Ramsay's Ideal Cold Water Paint."

To introduce this to the trade they have devised a very complete and instructive color card and are offering same in white and six beautiful shades; the color chart shows how thirty or more additional shades may be produced by the combination of white and one or more of these shades.

The fact that it can be used, it is stated, for outside equally as well as for inside work and is a product of Canada should be of material interest to the paint dealer.

Ramsays will mail the color chart folder to anyone interested.

ALUMINUM MEASURING SPOON SET

A set of aluminum measuring spoons is being manufactured by W. D. Shambrook & Co., Hamilton, Ont., makers of the "Duro" aluminum ware, who state

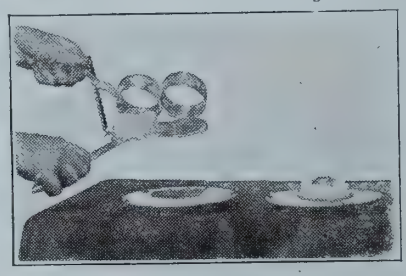
"Duro" Measuring Spoon Set

that it is the first set of this description to be manufactured in Canada.

The spoons which are of satin finish are of the same grade and quality as other "Duro" lines, are 4¼ inches long, are put up in sets of one dozen on an attractive display card and sell at a popular price.

CHAMPION MERCHANDISER

In furtherance of its service policy the Champion Spark Plug Co., of Canada, Ltd., Windsor, Ont., has developed a "Merchandiser" in the form of a cabinet which is equipped to carry a supply of every type of Champion spark plug made. Individual compartments separate the various types, making it a simple and easy task for the dealer to select the type of plug called for, and with the aid of the index charts on the face of the merchandiser quick and accurate service in the sale of any spark plug can be made, it is claimed, whether it be for



Champion Plug Merchandiser

passenger car, truck, tractor, motor cycle, motor boat, farm or stationary engine.

The Merchandiser is 31 inches long, 15 inches high and 11 inches deep, and its neat appearance makes it a handsome addition to any store whether placed on counter, show case or shelf.

MAGUIRE EGG POACHER

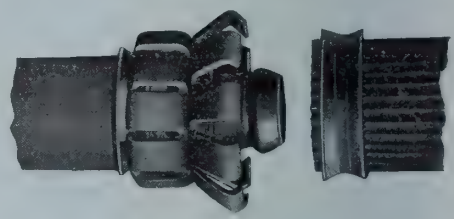
The Comstock-Bolton Co., Kansas City, Missouri, manufacturers of household specialties, are introducing the Maguire aluminum egg poacher to the trade. The illustration shows the construction of this poacher, and it is claimed that it is efficient and cleanly and that the risk of

Maguire Egg Poacher

breaking eggs in lifting them from the cooking utensil to the dish or plate is eliminated by using this appliance.

KANT SLIP WRENCH

A new wrench is being offered to the trade by the Allan-Diffenbaugh Wrench & Tool Co., Baraboo, Wisconsin.



The makers claim that this wrench differs from other wrenches in mechanical principles in that the strain all comes on the shoulder and not on the pin. Another advantage claimed is that the fulcrum is close to the load, and the instantaneous sliding adjustment on gripping handles saves time.

It is said to be equally useful for pipe or nuts, to take the place of a pipe wrench, nut wrench and plier in one tool, and for working in close quarters the makers state it cannot be excelled.

The size made is 8 inch, jaw opening range is 3-4-inch, and handle forms a screw driver.

"BANNER" HOSE MENDER

A new hose mender is being manufactured and placed on the market by the Ontario Lantern & Lamp Co., Hamilton, Ont., and is stated to be the only mender affording a permanent and non-leakable splice without injury to outer surface or

Banner Hose Mender

inner fabric of the hose. The mender is supplied with two grooved split rings which are placed over the ends of hose. The jaws of the mender are then brought over the rings and compressed into the grooves by hammering down each tooth into groove of ring, as shown by illustration, when a smooth, non-rustable grip will be made, it is claimed, which will not injure hose or tear up lawn. The mender is made in two sizes, ½ inch and ¾ inch, and will fit two to four ply hose.

BRASS HEADED TACKS

The Dominion Tack and Nail Co., Ltd., Galt, Ont., are manufacturing a complete line of brass headed and brass plated tacks and furniture nails.

This firm claim to be the only concern in Canada manufacturing these lines, and also make thumb tacks and artists' and surveyors' drawing pins. Other lines for which there is a good demand are metaline nails for upholstered furniture, etc. These are manufactured in various sizes and shades.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

PRICE is again the chief point of discussion in the iron and steel markets. A new basis of steel prices is mentioned by Pittsburgh though until wages and other costs have been dealt with no new basis will be established. The bringing out of new selling schedules by two makers appears to have aided little in bringing more business. The local market in non-ferrous metals shows tin and spelter to be weaker and the improvement in British exchange has rendered the importation of metals from that source less profitable. Primary markets show copper for March delivery is bringing better prices than for prompt shipments.

A feature of the price movements on hardware lines in Canada this week is the further decline in both wire and cut nails, accompanied by galvanized and bright staples. Other lines declining include wheelbarrows, wood and steel blocks, dry cells, certain lines of vises and meat choppers, saddlery hardware, including snaps, rings, and buckles, cut lace leather, copper rivets and burrs. A substantial reduction is made on window glass. Linseed oil and turpentine are also reduced.

Light stocks are found in many hardware stores where, however, stocks are being kept well assorted. Other merchants are maintaining very complete stocks in the expectation of an early resumption of active business and a desire to be in a position to cope with any developments. Taken as a whole, a fair volume of business is being done, some merchants reporting a notable stimulation of trade during the past month.

Montreal Markets

MONTREAL, Feb. 3.—The outstanding feature of this weeks markets is the decline in the price of both wire and cut nails, accompanied by galvanized and bright staples. Both of these lines have featured in recent price changes, and the present drop of 60 cents in the base price of wire nails, 85 cents on cut nails, and 50 cents on both galvanized and bright staples is quite notable.

Other lines such as wheelbarrows, wood and steel blocks, dry cells, Victor vises and Enterprise meat choppers are also now shown at reduced prices. Saddlery hardware, on such lines as snaps, rings and buckles, is about 10 per cent. lower, while bits remain unchanged. Cut lace leather and copper rivets and burrs are again lowered, and both have undergone recent price changes. Fruit jar prices are now available for spring and summer deliveries. Sheets and plates, corrugated sheets, pipe and fittings, waste material, prepared roofing and iron and steel are remaining fairly firm. Ingot metals remain quiet and unimproved this week with somewhat easier prices quoted on different metals.

Stearns' Hangers Revised

Montreal.

BARN DOOR HINGES—Stearns' barn door hangers have been revised with higher prices quoted, are now selling at $12.80, with No. 5 at $16.00.

Wheelbarrows Show Decline

Montreal.

WHEELBARROWS.— A decline of from 10 per cent. to 15 per cent. is noted this week on wheelbarrows of different makes. On account of wholesalers selling different lines changes in price are rather hard to determine, however the above reduction is shown on practically all makes.

Wire and Cut Nails Down

Montreal.

NAILS.—With the demand for nails gradually increasing with the approach of the spring building activities, an advance would have been thought more probable than a further decline. However, both wire and cut nails are again reduced. Wire nails are now selling at $5.25 base, and cut nails at $5.75, a reduction of 60 cents and 85 cents respectively.

50 Cents Reduction on Staples

Montreal.

FENCE STAPLES.—Both galvanized and bright fence staples are again reduced, showing a further decline of 50 cents a keg. Prices now quoted are: galvanized, $6.75 per keg; bright, $5.75 per keg.

10% Reduction on Saddlery Hardware

Montreal.

SADDLERY HARDWARE.—A revision, with lower prices, is made on practically all lines of saddlery hardware, including such items as snaps, rings and buckles. Bits, however are not included and remain at former prices. The reduction amounts to about 10 per cent.

New Net Prices on Mirrors

Montreal.

MIRRORS. — New prices are shown on mirrors and the best selling sizes are quoted below.

Louise—7 x 9, $5.50; 8 x 10, $6.40; 10 x 14, $9.60. X. L.—7 x 9, $4.25; 8 x 10, $5.20; 10 x 14, $8.

10% Off Rivets and Burrs

Montreal.

COPPER, RIVETS AND BURRS.—These lines were formerly quoted at list, new quotations are 10 per cent. off list.

Present Prices on Fruit Jars

Montreal.

FRUIT JARS.—Stocks of fruit jars are now being placed in the hands of the jobbers, accompanied by new prices for the coming season. Below are the prices now being quoted:

Crown and Improved Gem, wine measure — Small, $16.75; medium, $18.25; large, $21.25 gross.
Perfect Seal—Small, $17.25; medium. $19.25; large, $25.25 gross.
Crown Style Only, Imperial measure.—Pints, $17.25; quarts, $19.25; ½ gals., $23.25 gross.

Enterprise Meat Choppers Reduced

Montreal.

FOOD CHOPPERS.—The new catalogue, just issued by the Enterprise Mfg. Co., Ltd., Philadelphia, Penn., shows a reduction of 10 per cent. on food choppers and different lines of sausage stuffers. Other lines shown remain at former prices.

Wood and Steel Blocks Reduced

Montreal.

WOOD AND STEEL BLOCKS.— A reduction of from 5 to 7½ per cent. has been made in the price of both wood and steel blocks, also affecting wood blocks with japanned bushing or galvanized patent bushing.

Cut Lace Leather Lower

Montreal.

LACE LEATHER.—In the January 29 issue cut laces were noted as showing a reduction. This week shows a further slight decline and the net price now quoted is $2.25 a pound.

Dry Cells Are Lower

Montreal.

BATTERIES.—Dry cells or batteries are now selling at $39.00 per hundred, a reduction of $3.50 from the former price.

Victor Vises Slightly Lower

Montreal.

VICTOR VISES.—The revised prices on Victor vises show a slight decline on practically all patterns and sizes. Following are the new net prices:

No. 741, $1.50; No 742, $1.85; No. 743, $2.25; No. 744, $2.65; No. 745, $3.15; No. 746, $4.85; No. 761, $1.90; No. 762, $2.30; No. 763, $2.75; No. 764, $3.15; No. 765, $3.75; No. 766, $5.45; No. 772, $2.30; No. 775, $4.10; No. 776, $5.55, Asst., $31.45.

Fittings Hold at Decline

Montreal.

FITTINGS.—Pipe fittings remain unchanged at the recent decline, with stocks in fairly good shape. The demand has kept up well during the quiet months, and an improvement is expected to gradually become pronounced. Quotations are as follows:

	Less
Bushings, cast	20%
Do., malleable	20%
Flanges	20%
Plugs	17½%
Flange Unions	7½%
Malleable Unions	32½%
Nipples, blk. or galv., up to 4 in.	50%
Do., 4½ in. or larger	40%
Do., running thread, 4 in. and under	30%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 17½%.

Pipe Prices Remain Firm

Montreal.

WROUGHT PIPE.—Both supply and demand for wrought pipe continue to improve, the recent quiet months enabling deliveries. The demand has held up fairly well with a continued sorting trade during the winter. Sales will no doubt become heavier with the spring months approaching, however stocks are felt to be quite ample and the shortage experienced last year is not looked for during the coming season.

Quotations will be found on current market pages.

Bar Iron and Steel Unchanged

Montreal.

BAR IRON AND STEEL.—Business continues quiet in bar iron and steel, with prices showing no change. Present prices are as follows:

IRON AND STEEL

Common bar iron, 100 lbs.	4 55
Refined iron	6 05
Iron finish machinery steel	4 60
Mild steel	4 55
Band steel	4 55
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 55
Tire steel	4 75
Toe calk steel	5 45
Harrow tooth steel	4 70
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.
Band steel in scroll bdles, 50c per 100 lbs. extra.

Copper N. P. Ware Down

Montreal.

COPPERWARE. — Reductions are shown on nickel plated tea kettles and teapots. Quotations now place them at list plus 30 per cent., previous prices being list, plus 60 per cent.

Copper Boilers Also Down

Montreal.

COPPER BOILERS.— Copper boilers were formerly quoted at list plus 25 per cent. These are now quoted at net list, a reduction of about 20 per cent.

Ready Roofings at Revised Prices

Montreal.

READY ROOFING. — Local prices have not been changed since the beginning of the year on prepared roofings. Business continues to improve on these lines and although the season for roofing is yet early, dealers report that many shipments have been made to outside dealers. Quotations are as follows:

Plus Roofing—	Car lots	Less
1 ply	2 10	2 25
2 ply	2 55	2 70
3 ply	3 00	3 15
Eureka—Standard weight—		
1 ply	1 75	1 90
2 ply	2 20	2 35
3 ply	2 65	2 80
Starex Roofing—		
1 ply	1 65	1 80
2 ply	2 00	2 15
3 ply	2 35	2 50

Waste Materials Continue Dull

Montreal.

WASTE MATERIALS.—Business remains dull in waste materials, however more enquiries are coming to hand and this is thought by dealers to be a sign of an improvement in the near future. Prices remain unchanged from last week, with quotations as follows:

DEALER'S BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 07
Red brass	0 12½
Light brass	4 50
Scrap zinc	0 05
Lead, heavy	4 00

12 gauge	10 50

English Standard—	Queen Head	Fleur-de-Lis
28 gauge	13 00	12 00
26 gauge	12 75	11 75
24 gauge	12 15	11 35
22 gauge	11 80	10 90
18 and 20 gauge	11 10	10 75

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Ingot Metals Unimproved

Montreal.

INGOT METALS.—The general condition of ingot metals remains unchanged from last week, being quiet and unimproved. Evidently there is not likely to be very much advance or improvement for some time yet.

TIN.—Tin continues irregualr in London, with no disposition to advance, and will not likely see higher prices until consumption improves. The local price is a little easier and quoted at 38 cents.

COPPER. — There is really little change in copper, although it is rather dull with a tendency toward easier prices. A quiet market is looked for with local prices at 18¾ cents for electrolytic and 18½ cents for casting.

LEAD.—This metal has been quiet but has shown no sign of weakness, and in the opinion of local dealers it is only a matter of time until prices will improve. Local price, 6½ cents.

SPELTER.—Spelter remains steady in London, but is again weaker with lower prices in the United States, having touched 5 cents in the latter market. Price is, however, unchanged at 7¾ cents here.

ANTIMONY.—With lessened imports having a strengthening effect on this metal and causing it to be somewhat firmer last week, it again shows signs of signs of weakness with a lower price of 8 cents quoted.

ALUMINUM.—Aluminum still remains quiet and unchanged at 34½ cents.

Toronto Markets

TORONTO, Feb. 3.—The outstanding feature of the markets this week is another reduction in the price of wire nails. This is the second time within five weeks that the price has been reduced on these and each decline has been of the same amount. Fence staples, too, have lower prices, and they have again declined at the same time as nails. Both bright and galvanized are affected. Other special changes include new lower prices on dry cell ignition and multiple batteries. Standard compression goods are reduced in price and new lower quotations are again made this week on fuel oil.

Sheets and plates are holding at recent declines. Pipe and pipe fittings are unchanged. Bar iron and steel are quiet without showing any change. Lead products have become steadier, and ingot metals are dull and quiet with tin and spelter at lower levels.

Business shows signs of picking up in some lines, and other goods which should be moving at the present time are slower.

Dry Cell Batteries Lower

Toronto.

IGNITION BATTERIES. — A reduction of approximately 12 per cent. has been made in the price of dry cell batteries. The No. 6 Columbia and the Reliable are now 5 cents cheaper. Quotations are as follows: Less than 12, 50 cents; 12 to 50, 45 cents; 50 to 100, 43 cents; barrel lots of 125, 39 cents; barrels with contract, 36½ cents.

Hot Shots Also Reduced

Toronto.

HOT SHOT BATTERIES.—There is a decline also in the price of Hot Shot multiple ignition sets and these are now quoted at a reduction of 20 to 25 cents; new prices are the following: No. 1461, $1.95; No. 1561, $2.35; No. 1562, $2.35.

Gas and Coal Oil Hold

Toronto.

GASOLINE AND COAL OIL. — No change has been made in quotations on gasoline or coal oil, although it is probable that a reduction will shortly be made in gasoline quotations. Crude oil prices are down and further reductions have been made in fuel oil as noted elsewhere. Present quotations are 42 cents per gallon for motor grade gasoline and 28 to 31 cents for coal oil.

Paraffine Wax Lower

Toronto.

PARAFFINE WAX.—A reduction has been made in the price of paraffine wax, and this is now being quoted one cent per pound lower.

Fence Staples Down Again

Toronto.

FENCE STAPLES. — Another reduction has been made in the price of fence staples and these are 50 cents a keg lower on bright and galvanized. The last change was a month ago when they were reduced 40 cents per 100 pounds. Present quotations for bright fence staples are $5.75 and for galvanized $6.25 per keg. The usual extras are charged for smaller quantities, viz., $1.00 per 100 pounds for 25 and 50-pound boxes.

Standard Compression Work Down

Toronto.

COMPRESSION GOODS.—The reductions which have been foreshadowed in recent issues of Hardware and Metal on brass compression goods have taken place and lower quotations are made on these goods this week. The amount of decline varies with different lines, and standard compression work is now

ANOTHER REDUCTION OF 50 CENTS PER KEG ON WIRE NAILS

Another decline of 50 cents per keg has been made this week in the price of wire nails. This is the second reduction recently, the previous decline taking place five week ago and was of the same extent. The new base price Toronto is $5.25 per keg.

quoted at 34 per cent. off list instead of 25 per cent. Following are present quotations:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	30%
Do., Fuller	30%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, stand.	34%

Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

F. O. B. factory, Toronto.

Copper Rivets—Ten Off

Toronto.

COPPER RIVETS AND BURRS.—A reduction in the price of copper rivets and burrs was announced last week and new net prices were quoted. These are figured at 10 per cent. off list for rivets and burrs, and list plus 35 per cent. for burrs only.

Wire Nails Again Lower

Toronto.

WIRE NAILS.—Another reduction of 50 cents per keg has been made in the price of wire nails this week. The previous alteration in nail prices was announced in the January 1 issue of Hardware and Metal, and was also 50 cents per keg, so that the base price is $1 less or 16 per cent. below that prevailing during the latter half of last year. The new base price is $5.25 per keg.

Fuel Oil Down Again

Toronto.

FUEL OIL.—A fairly heavy reduction, amounting to about 20 per cent. in the case of barrels, and 30 per cent. on tank cars, has been made in the price of fuel oil this week. The price per gallon in barrel lots is now 11.20 cents, a decline of 3 cents, and tank cars are now quoted at 9.20 cents, a reduction of 4 cents. Quotations on fuel oil have been steadily declining. Prices six months back were 20 and 18 cents, or practically 100 per cent. above to-day's quotations.

Lead Products Holding

Toronto.

LEAD AND ZINC PRODUCTS.—Wholesalers report a fair sorting up business in lead products at present. Prices show no notable change from previous quotations and most lines are holding at recent reductions. Following are current quotations:

Lead pipe, list, per lb.	0 13½
Lead waste pipe, list, per lb.	0 14½
Do., over 8 in., list, per lb.	0 15½
Lead pipe is subject to a discount of	10%.
Lead traps and bends	Net
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 10½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 27
Do., commercial, lb.	0 24½
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 25
Zinc sheets, per lb.	0 18

Corrugated Sheets Unchanged

Toronto.

CORRUGATED SHEETS.—Sales are seasonably light on these and quotations are held at recent declines. Stocks are in better shape now, and wholesalers report receiving shipments of galvanized sheets which should have arrived months ago. Quotations are the following:

Corrugated Sheets—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

50 cents per square extra for one inch corrugation.

Pipe Fittings Are Held

Toronto.

PIPE FITTINGS.—These are being held at recent changes, and buying is a little light just now. Stocks are reported to be in fair shape now. Quotations are as under:

Cast iron fittings	10%
Plugs	20%
Bushings	25%
Unions, ¼-in. to 2-in.	35%

Nipples, blk. and galvd., ⅛ to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B.	0 26	0 36
Class C.	0 17	0 26

Wrought Pipe Unchanged

Toronto.

WROUGHT PIPE.—No changes have been made in pipe quotations, and sales, though a little quieter, are still good for this time of the year. The shortage which existed for the greater part of last season is said to have been for the most part overcome and retailers have been enabled to accumulate some reserve stocks. Quotations are as per list No. 48 on current market pages.

Iron and Steel Steady

Toronto.

IRON AND STEEL.—Quotations on bar iron and steel are unchanged this week. Sales are seasonably light and wholesalers report fairly good stocks.

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter	$ 5 25
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter	5 25
Common bar iron, ¼ in. and heavier	4 75

Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 00
Hoop steel	6 00

No Change on Sheets

Toronto.

SHEETS AND PLATES.—Business continues fairly quiet in these lines, though this is a recognized condition during this month. Prices are holding at recent declines, and some wholesalers are of opinion that a resumption of buying to any large extent would likely cause a firming of prices.

Reports from the States indicate that several mills that have been closed down since early in December have started operations again.

Following are current quotations:

PLATES

10 gauge	6 20	....
12 gauge	6 25	....
14 gauge	6 30	....
16 gauge	6 40	....

BLACK SHEETS

14 gauge	6 30	7 70
16-gauge	6 40	7 75
18-20 gauge	6 75	7 80
22-24 gauge	6 80	7 85
26 gauge	6 85	7 90
28 gauge	7 00	8 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	9 50	10 50
U. S 28	9 10	10 20

22 and 24	8 65	9 70
18 and 20	8 50	9 55
16	8 35	9 40
12 and 14	8 30	9 35

An extra is now charged on galvanized sheets. 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Lace Leather Easier

Toronto.

LACE LEATHER.—A decline of about 12½ per cent. has been made in the price of lace leather, and cut laces are now quoted at $2.10 per pound, and side lace leather at $1.75. Leather belting is still quoted at 15 and 10 per cent. off list for standard and 15 per cent. for extra quality.

Rope Quotations Held

Toronto.

ROPE.—This is a quiet time for rope and cordage, but a number of small orders are reported and bookings are said to be slowly improving. Prices for binder twine for this season have not been announced yet, but will likely be issued within the next few weeks. They are expected to be lower than last year's prices, following the reduction in rope and other cordage.

Waste Materials Dull

Toronto.

WASTE MATERIALS.—More frequent enquiries are reported, although business in waste materials is much below normal. Scrap iron is now very slow and melting steel and cast scrap are holding unchanged, but none too firm. Lead is holding but other metals are dull. Following are buying prices for large quantities but are strictly nominal.

WASTE MATERIAL

No. 2 busheling		$13 00
Stove plate, per ton	19 00	20 00
Yellow brass	6 00	7 00
Red Brass		10 00

No. 1 machinery cast	24 00	25 00
Heavy melting steel	15 00	16 00
Heavy copper	10 50	11 50
Heavy copper	0 11½	0 12½
Scrap zinc	4 00	4 50
Light brass	4 25	4 75
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	2 00	3 00
Overseas lumbermen's rubber boots	1 50	2 00
Bicycle tires	0 01	0 01½
Tea lead	2 00	2 25
Automobile tires	0 50	1 00

Ingots Dull: Tin Declines

Toronto.

INGOT METALS. — Very little improvement is shown in ingot metal markets this week. Non-ferrous metals are reported to be dull generally with drooping tendencies. With the exception of tin and spelter, which are both lower, prices are maintained.

TIN.—In spite of an advance in sterling and a corresponding rise in tin prices in London, the market in this metal shows little signs of strength, and prices have dropped again. Quotations here are 2 cents lower at 43 cents.

COPPER.—The market appears depressed and shows little life, and business is reported light. Quotations here are unchanged at 19 cents for casting copper.

LEAD.—There is reported to be a better consuming demand for lead than for most metals in outside markets, and quotations fluctuate from day to day. London markets are firmer and with a rise in sterling it is no longer profitable to import. The price is holding locally at $7.00.

SPELTER.—This metal is dull locally but is reported as more active in outside markets. Quotations are easier and are $7.00.

ANTIMONY. — No change has taken place and this metal is dull and unchanged at 8 to 9 cents.

ALUMINUM.—This market is said to be quiet and dull. The low rate of foreign exchange has been the means of a large increase in the imports of this metal in United States markets, but an improvement in sterling has stiffened values considerably. Quotations are held unchanged here at 35 to 37 cents.

London Markets

LONDON, Feb. 3.—There are several lines this week that are quoted at lower levels and the most important changes are in wire nails, fence staples, linseed oil, window glass, shellac and copper rivets. The reductions on wire nails and staples are the second decline in a short time.

Trade conditions in this district remain unchanged. There is a fair volume of business being done, and it seems to be apparent that there will be more as soon as buyers become convinced that prices are more settled.

Collections continue fairly good.

Linseed Oil Down

London, Ont.

LINSEED OIL. — Reductions have been made again in the price of linseed oil, and the new quotations are 3 cents per gallon less. Business is quiet in this commodity. Following are quotations:

	Raw	Boiled
1 to 2 bbls.	1 07	1 10
3 to 5 bbls.	1 06	1 09
6 to 9 bbls.	1 04	1 07

Less barrels, add 15c per gallon.

No Change in Turps.

London, Ont.

TURPENTINE.—No change has been made this week in turpentine quotations and prices are the following. Sales are seasonably light.

1 barrel lots	1 30
2 to 4 barrel lots	1 29
5 gal. lots	1 45

Wire Nails Reduced Again

London, Ont.

WIRE NAILS.—A further reduction has been made in wire nail prices and they are again lowered 50 cents per keg. The base price here is now $5.25 per keg. Freight equalized on Owen Sound and Collingwood, $5.35 base; Windsor, $5.25 base. Carload freight allowed.

Fence Staples Down 50 Cents

London, Ont.

FENCE STAPLES. — The quotations on fence staples have been reduced again, and they are now 50 cents per 100 pounds lower. This applies to both bright and galvanized. Following are prices and extras for smaller quantities:

Bright Staples, $5.75 keg; 25-lb. boxes, $6.75 per 100 lbs. Galvd. staples, $6.75 keg; 25-lb. boxes, $7.75 per 100 lbs.; Fence hooks, $6.75 keg; 25-lb. boxes, $7.75 per 100 lbs.

Cut Nails Unchanged

London, Ont.

CUT NAILS. — There has been no change made in the price of cut nails, and these are still quoted at $7.15 per keg, base, f.o.b. London.

Window Glass Now 60% Off

London, Ont.

WINDOW GLASS.—Prices have been very unsettled on window glass during the past week or so. Various quotations have been received from different sources from day to day, each one being a little lower than the previous one. The discount at present being quoted here is 60 per cent. off list for case lots and 50 and 10 per cent. off cut light list.

Copper Rivets Are Lower

London, Ont.

COPPER RIVETS.—New lower prices are quoted on copper rivets, and present discounts are 10 per cent. off list for rivets and usual proportion of burrs. For burrs only the new discount is list plus 35 per cent., instead of plus 50 per cent.

Putty Remains Unchanged

London, Ont.

PUTTY.—No change has been made in putty prices and quotations remain as follows. The demand is only light at present.

Standard, 100-lb. drums, $8.05 per 100 lbs.; 25-lb. drums, $8.30; Pure, 100-lb. drums, $10.55; 25-lb. drums, $10.80.

Shellacs Show Reductions

London, Ont.

SHELLAC. — New and lower prices are being quoted here on shellac, and present quotations are the following:

	Orange	White
1 gal. jugs, gal.	5 10	5 60
½ gal, per gal.	5 25	5 75
¼ gal., per gal.	5 30	6 00
1 pint bottles, doz.	8 90	9 90
½ pint, doz.	4 70	5 25
¼ pint, doz.	2 90	3 10
⅛ pint, doz.	1 60	1 75

Copper Kettle Prices Lower

London, Ont.

COPPER KETTLES. — New lower prices are quoted for nickel plated copper tea kettles, and the following are the new net prices figured at 30 per cent. above list:

No. 50, $20.15 doz.; No. 60, $24.05; No. 70 or No. 7, $27.88; No. 80 or No. 8, $29.51; No. 90 or No. 9, $31.20; No. 750 Model, $28.36; No. 900 Model, $35.46.

New Copper Boiler Prices

London, Ont.

COPPER BOILERS. — Prices have been reduced on all copper wash boilers and the net price on these is as follows:

Heavy No. A—No. 8 or 80, $5.50 each; No. 9 or 90, $5.80 each. Light No. B—No. 8 or 80, $4.75 each; No. 9 or 90, $5 each.

Calf Meal Lower

London, Ont.

ROYAL PURPLE CALF MEAL.—New quotations on Royal Purple calf meal show a decline in price. New quotations which follow are 20 cents per 100 pounds lower.

100 lbs. bags, $4.70 per 100 lbs., net cash; 50-lb. bags, $4.75; 25-lb. bags, $4.80.

Next Season's Skate Prices

London, Ont.

SKATES.—Although it is a far cry to the winter of 1921-1922, prices for the Starr skate for fall booking of this year are now issued, and are the same as present prices. Following are the quotations:

—Star Make—Demon, No. 153, $1.70 pair; Demon, No. 150, $1.90; Bull Dog, No. 154, $2.10; Acadia, No. 156, $2.10; Beaver, No. 157, $2.75; Beaver, No. 162, $3.25; Climax, No. 173, $3.50; Velox, No. 181, $6.50; Regal, No. 189, $5; Tubes, No. 1904, $6; Dreadnought, No. 193, $4; Regis, No. 194, $3.25; Imperial, No. 196, $6; Acme Spring, No. 100, $1.75. Less 30%.

English Horse Clippers Reduced

London, Ont.

HORSE CLIPPERS. — Prices have been revised on the English makes of hand horse clippers, and these are now slightly lower. Newmarket are quoted at $3.10, and Handicap at $2.60.

Lower Dry Cell Prices

London, Ont.

DRY CELLS.—New prices are issued on dry cells, and constitute a reduction of about 3½ cents each. Following are the new quotations:

	No. 6 Regular	No. 6 Ignitor
Barrel lots, each	0 38½	0 39
Less than 125, each	0 42	0 43
Less than 50, each	0 44	0 45
Less than 12, each	0 50	0 50

These prices are f.o.b. Toronto. When shipped from London, add 1.35 per 100 freight.

English Shears Cost More

London, Ont.

ENGLISH HEDGE OR GARDEN SHEARS.—The new prices for spring shipping on English hedge or garden shears are a little higher than previous prices. Quotations are the following:

Plain, No. 10 x 8 in., $1.75 each; notched, No. 101 x 8 in., $2; Plain, No. 100 x 9 in., $2; Notched, No. 101 x 9 in., $2.25; Long Handle, No. 106 x 9 in., $3; No. 1062 x 9 in., $4; No. 105 x 9 in., $3.50 each.

Tinned Spoons and Forks Lower

London, Ont.

TINNED SPOONS AND FORKS.—New prices are made on No. 900 line of tinned spoons and forks and the new quotations are slightly lower.

No. 900, Tea Spoons, $4.25 gross; No. 900, Dessert Spoons, $9; No. 900, Table Spoons, $9.25; No. 900, Medium Forks, $9.60.

Sheep Shears Are Higher

London, Ont.

SHEEP SHEARS.—The English make of sheep shears are costing more and new prices are as follows:

No. 5 G x 6 in., bent, $10.35 doz.; No. 5 G. x 6½ in., bent, $10.85; No. K20 x 6½ in., bent, $13.75; B.B.A. x 7 in., straight, $28.50.

Trimo Wrenches Reduced

London, Ont.

TRIMO WRENCHES. — Reductions have been made in the price of Trimo pipe wrenches, and the new discount is 35 per cent. off list.

Harness Snaps Are Down

London, Ont.

HARNESS SNAPS. — New lower prices are out on harness snaps and are from 5 to 20 per cent. below old quotations.

Winnipeg Markets

WINNIPEG, Feb. 3.—Fewer reductions are noted this week in prices here, and the most important changes are the lower prices on window glass and building papers. Eavestrough and conductor pipe have dropped in price this week and lower quotations are made on Potts irons and iron handles. Shot guns, rifles and ammunition have declined in price, and reductions have also been made here on soldering coppers, metallic shingles, corrugated iron, cast iron soil pipe, and fittings.

Linseed Oil Unchanged

Winnipeg.

LINSEED OIL.—There has been no change in the local prices of linseed oil. Raw linseed oil is quoted at $1.27 per gallon with boiled oil at $1.30.

Plate Glass Lower

Winnipeg.

PLATE GLASS.—Plate glass is reported lower this week and the discount is now 30 per cent. f.o.b. Winnipeg.

Turpentine Shows No Decline

Winnipeg.

TURPENTINE. — Turpentine has shown no change this week in price and is quoted at $2.00 per Imperial gallon in one barrel lots.

Building Paper is Reduced

Winnipeg.

BUILDING PAPER.—A slight reduction has been recorded on building paper this week and new quotations are as follows:

Building Paper—Plain, Sunrise, $1.10; No. 1, $1.25. Tarred — Anchor, $1.45; O.K., $1.45. Blanket Felt, $7.40.

Eavestrough and Conductor Pipe Down

Winnipeg.

EAVESTROUGH AND CONDUCTOR PIPE.—These lines have remained firm for some time and prices on raw material have not been greatly reduced, but a reduction is made this week, and following are the new prices:

Eavestrough—O.G. Square Bead—8 in., $7.20; 10 in., $7.88; 12 in., $9; 15 in., $13.05. Half-round Bead—8 in., $7.52; 10 in., $8.28; 12 in., $9.95; 15 in., $13.68.

Conductor Pipe, Galvanized.—2 in., $9; 3 in., $10.80; 4 in., $13.73; 5 in., $18.90.

Vaughan Post Hole Augers Lower

Winnipeg.

POST HOLE AUGERS.—Lower prices are recorded this week on Vaughan post hole augers and are as follows: 5 in., $18.00 doz.; 6 in., $19.35; 7 in., $21.25; 8 in., $23.15; 9 in., $26.00.

Soldering Coppers Again Drop

Winnipeg.

SOLDERING COPPERS. — Another drop in the prices of soldering coppers has been recorded this week and is as follows:

3 lbs. and over, 52c per lb.; 2½ lbs., 53c; 2 lbs., 54c; 1½ lbs., 55c; 1 lb., 60c.

Metallic Siding & Shingles Down

Winnipeg.

METALLIC SHINGLES AND SIDING.—A slight reduction has been recorded this week on metallic siding and shingles and they are quoted as follows:

Metallic Siding—Medium, galvanized, $10.13; painted, $7.88. Metallic Shingles—Medium, galvanized, $11.70; painted, $9.45.

Corrugated Iron Down

Winnipeg.

CORRUGATED IRON. — Reduced prices are recorded this week on corrugated iron, both galvanized and painted. The new prices are as follows:

Galvanized, 28 gauge, $9.90; 26 gauge, $10.56.
Painted, 28 gauge, $7.65; 26 gauge, $9.

Window Glass Down

Winnipeg.

WINDOW GLASS.—Prices are reduced on window glass this week. This is the first revision on this line for months. The prices quoted this week are:

16 oz., 100 ft. cases—0 to 25, $10; 26 to 40, $12.15; 41 to 50, $13.10; 51 to 60, $13.50; 61 to 70, $14.

21 oz., 100 ft. cases—25 to 40, $18.35; 41 to 50, $19.80; 51 to 60, $20.40; 61 to 70, $21.15; 71 to 80, $22.10; 81 to 85, $25.35; 86 to 90, $26.55.

Lower Prices on Metallic Cartridges

Winnipeg.

METALLIC CARTRIDGES. — Lower prices have been recorded this week on metallic cartridges, and are as follows: Dominion, 30 and 20 per cent. off list; Winchester or Savage, 40 per cent. off; U.M.C., 40 per cent. off.

Cast Soil Pipe Declines

Winnipeg.

CAST IRON SOIL PIPE AND FITTINGS.—A decline in price on cast iron soil pipe and fittings has been recorded this week and the following are the latest quotations:

C.I. Soil Pipe—2 and 3 in. 5% off; 4 in., 17½% off; 5 and 6 in., 10% off; 8 in., 10% adv.
C.I. Soil Pipe Fittings—2 to 6 in., 35% off; 8 in., 10% adv.

NEW GLASS LIST ADOPTED IN MONTREAL

The discounts on box glass list have shown variations lately between the Toronto and London quotations, and Montreal wholesalers have this week adopted a new list and are quoting 33 1-3 per cent. discount off that list. Quotations in Toronto and London markets are now 60 per cent. off list which was adopted early last year.

Pittsburgh Markets

PITTSBURGH, Feb. 3.—A slight increase in production on the part of the independent steel mills has been marked this past week, but it has been due more to the fact that several mills which have been idle for some time have accumulated sufficient orders to enable them to resume operations than to increase in demand. There is said to be a slight amount of price cutting in some finished steel products but not to any great extent, and it seems unlikely that there will be any real or general adjustment of prices for a while yet. Before that occurs it is probable that there will be a more general wage reduction, and up to the present only a limited number of the independents and none of the Corporation mills have done anything in this regard, feeling that there is little to be gained at the present time by doing so.

PITTSBURGH, February 3. — There has been a slight increase in production by independent steel mills as a whole, the average rate of output by independents now being in the neighborhood of 30 per cent., against a 25 per cent. average for several weeks. The increase in production, however, does not seem to reflect any definite increase in demand, but seems due rather to several mills chancing to resume work at the same time, after a spell of idleness in which they allowed orders and "releases" to accumulate, the releases being withdrawals of instructions previously issued to discontinue shipments on old orders. At some time in the future several mills may chance to go down entirely at the same time, and then a particularly low operating rate will be shown.

The Steel Corporation is operating at an average of about 90 per cent., on the basis of the steel ingot production. Operations have decreased slightly of late by the American Steel & Wire Company, Illinois Steel Company (operating also the Gary plant) and the Tennessee Coal, Iron & Railroad Company. The National Tube Company continues to operate full. The Carnegie Steel Company has been maintaining an average output of ingots 96 per cent. of rated capacity, and last week blew in an additional blast furnace, making 48 Carnegie stacks in operation, the largest number for months. The American Sheet & Tin Plate Company, an important subsidiary of the Steel Corporation, but one that makes very little steel, maintains its former rate of operation at its tin plate mills, but has tapered off slightly in sheet mill operations.

There is no certainty that the Steel Corporation will be able to maintain even approximately its present rate of operation for any length of time. The large mass of business the Steel Corporation accumulated on books last year has proved very sound except for a small volume of cancellations, much sounder than the independent steel producers expected would prove to be the case whenever the steel situation should turn easy, but that would not prevent the buyers from requesting that shipments be made at a slower rate. The consumer may be able and anxious to take every ton on his contract, but his rate of operation might be such as to require that deliveries originally intended to be completed by June 30 should be strung out to December 31.

Prices

There is some price cutting in a number of the finished steel products, but the cutting does not amount to much in either volume or extent. As to volume, the Steel Corporation is probably booking more business than the independents, and of course its prices are absolutely firm, while some at least of the independents are holding strictly to regular prices, yet are booking an order here and there. As to extent, the maximum shading, where there is any at all, is probably only $2 or $3 a ton.

However, this does not indicate that present prices are going to hold. There is absolutely no prospect that they will. The point is that the time is not ripe. Some day there will be a readjustment in prices to a level that will suit buyers, on the basis of the general liquidation that is now in progress. No readjustment to the eventual bottom could be made now, for it is still to be ascertained how far costs of production can be reduced, and even if the mills could name bottom prices now they would be quite indisposed to do so since buyers would not take hold freely at this time no matter what prices were named, and there is a tactical advantage in holding off from making reductions, or at any rate the last of the reductions that will have to be made.

Wages

Possibly it is largely because mills do not consider it advantageous to reduce prices at this time that they are so slow in reducing wages. No employer pretends that wages should not come down, and by a large amount, yet less than half the independents, in point of capacity, have reduced wages to any noteworthy extent, while the Steel Corporation appears not even to have considered the matter. The steel producers doubtless feel that if there were such general reduction in wages buyers would at once clamour for much lower steel prices, and there might be more lost than gained. Particularly in the Pittsburgh and Youngstown districts wage reductions have been lacking, though of course there has been some reduction in wage costs, by less efficient men being let go, and by men previously drawing bonus or special wages being released, to be engaged afresh at standard rates.

Prices and Costs

That there is room, eventually, for very considerable declines in prices is shown by the Steel Corporation's earnings reports. The year 1920 shows $177,000,000 earnings, after allowance for all taxes including the federal income and excess profits taxes, and after paying interest on bonds of subsidiary companies. That is 10 per cent. more than the corporation's earnings in the best year before the war and about two and one-half times the earnings in the poorest year. Yet the corporation was greatly handicapped in 1920. It had an average operation of only about 82 per cent., while in 1916 it had a 100 per cent. operation. Its costs were high on account of conditions in general, and there was the particular disadvantage that the costs rose to an extent by sympathy with the high costs of the independent mills, the latter caring little about costs since they advanced their selling prices. The corporation got nothing by increased selling prices but lost something by increased costs. The independents used to claim that they had to have their high prices because they were at a disadvantage by comparison with the Steel Corporation, and when pressed for particulars the chief item they mentioned was "overhead," just what before the war it used to be said distinguished the Steel Corporation. How the tables came to be turned so suddenly has never been satisfactorily explained. There is room for suspicion that many of the references to the high overhead of the independents included large dividends, bonuses, etc., in overhead. Now the independents are largely idle, and they are forced to lose the alleged overhead.

Pig Iron and Coke

Valley foundry iron has become readily available at $30, furnace, or $1.50 decline, Bessemer and basic being altogether inactive and therefore remaining at $32 and $30 respectively. Most of the merchant furnaces are idle and the few in operation are facing the prospect of having to blow out.

The better balanced mentally of the merchant furnacemen are taking no interest in pig iron prices at this time. It is a matter of indifference whether the quotable market is one thing or

Selling Paint to the Farmers

Before the Busy Spring and Summer Season Arrives is the Best Time to Urge the Buying of an Assortment of Paints and Varnishes to Have on Hand for Ready Application When Needed.

IN discussing with Hardware and Metal means of developing trade in paints and varnishes, some merchants located in rural districts, where farm business is an important consideration, have raised a number of objections to the application of the ordinary selling methods to this class of business. These merchants point out that farm trade is unique in so far as the use of paints and varnishes is concerned and as such it must be treated. For instance, there is not much point in advertising for paint business from farmers in the spring, when the farmers' busy season is commencing. Nor is there much point in going after this business on a large scale during the summer or early fall months, when the farmer is busy cultiating and harvesting his crops. In the late fall many merchants find that the farmer is not always in a good mood to consider painting. He wants a rest after his hard summer's work and if his crop has been poor he will not be a good prospect for paint business. During the winter a certain amount of painting may be done, this especially confined to the painting of implements and other interior work.

Right now, however, is a good time to approach the farmers for paint business in a similar manner to that done by the Roland Hardware Co., of Roland, Man., and as outlined in the advertisement shown herewith. This firm follows the line of reasoning that the farmer can readily see the value of paint and varnish for protective purposes and for prolonging the life of his implements and buildings, but he will not take time off during the seeding, cultivating and harvesting seasons to figure on what is required, secure the necessary materials and spend time making the application.

Therefore the suggestion is put forward that every farmer keep a stock of certain lines on hand throughout the summer, the stock to be kept where it can be readiy secured. The idea is that if the farmer has a few cans of buggy paint, barn colors, etc., on hand he will not hesitate to make the necessary application when the requirement becomes evident. There will be practically no waste of time involved and the life of the implement, the metal work or other part receiving the application of paint or var·

Continued on page 60

Roland Hardware Co.'s Bulletin

EACH DAY SEES farming placed more firmly on a business basis, which is another way of saying the business of farming is gradually becoming more efficiently handled. Within the last few years farmers have begun to realize the possibilities in a can of paint. Only by applying an occasional coat of paint can a man hope to prolong the usefulness of his implements and buildings. It has been proved over and over again that paint, because of its ability to lengthen the life and usefulness of the surfaces to which it is applied, pays larger dividends than gold mines do.

Last spring a friend of ours told us that he made 300 per cent. on the paint and time he used in repainting his flivver before selling it.

Here is an assortment that should be in every farm store —ready for use when they are needed.

Two-quart cans of buggy paint in red and black, for painting wagons, etc. A small can of aluminum paint, for interior iron work, such as stalls, stanchions. A half-gallon can of protective paint, for metal buildings. A good graphite paint is the best for this purpose. Paint over regularly all metal parts exposed on such things as hoops, turnbuckles on silos, outside hinges, door hangers, iron hitching-posts, etc. A small can of implement or spar varnish. A gallon can of barn color or house color for general repair work.

The policy of this store is to supply you with satisfactory goods at a satisfactory price. When we say satisfactory goods we mean goods made to give service. When there is an argument between quality and price, quality always wins with us. When by paying five per cent. more we can secure twenty or even ten per cent.. more service for you, we never hesitate about paying the extra five. Our customers are our friends and it would not be friendly to sell you a scamped article in the name of a bargain when we could sell you real satisfaction at a small difference.

Roland Hardware Company, Limited
Roland and Rosebank

LINKING up an appeal for more painting on the farm with the progress being made by farmers in general, this ad. by Roland Hardware Co., Ltd., Roland, Man., shows how this firm goes after paint business in a farming district.

The fact that the usefulness of implements and buildings can be prolonged by the occasional application of a coat of paint is emphasized, it being pointed out that the adequate use of paint will pay larger dividends than do gold mines (this means mines of paying variety). Mention is made of the value of painting an automobile. Many automobile owners have laid up their cars for the winter and will bring them out for a clean-up in the spring. The early mention of enamels and varnishes for this purpose should help to develop much business. An assortment of paint which should be in the storehouse of every farmer, where it can readily be secured for use on implements or buildings, is outlined. This includes buggy paint, aluminum paint, protective paint for metal buildings, implement or spar varnish, barn color or house color for general repair work. During the busy season the farmer has little time to think of painting, but the value of having such materials on hand where the necessary application can be made with no waste of time, can readily be appreciated.

EVERYWHERE ON EVERYTHING

Glidden Flat Wall Finish Insures a Steady Profit

"Save the surface and you save all" Paint & Varnish

There is always a good market for flat wall finish — especially the Glidden kind. The remarkable performance of this Glidden product wins steady customers, and steady customers mean steady profits the year around.

Glidden Flat Wall Finish presents a wonderful opportunity for the dealer. Painted walls are growing in popularity each year as people of all classes are beginning to see their advantages. They are not only sanitary, but more attractive than wall paper. Walls painted with Glidden Flat Wall Finish can be renewed frequently by merely washing them with soap and water. Being absolutely waterproof, it does not lose its soft, rich tones.

Glidden Flat Wall Finish comes in white and fourteen delicate shades; it's an ideal finish for rough or smooth plaster, as well as wood, cloth, metal or wallboard surfaces. *Write to-day for dealer proposition.*

The Brush Department

Paint Brush Makers Are Busy

Effects of Unemployment on Brush Business—"No Price Reduction During Spring Business"—Famine in China May Make Long Bristles High in Price.

"THE paint brush makers are all busy, it being an exceptional trade in this regard," said W. G. Meakins, Meakins & Sons, Ltd., Hamilton, Ont., to Hardware and Metal. "The reason of this is," continued Mr. Meakins, "that poor times or in other words, a poor demand for other lines of merchandise, immediately brings on a large demand for common and medium priced paint brushes. The reason of this is a very simple one which can be noticed by every brush maker all over the world. It simply means that in Canada there are a great many workmen either completely out of work or working only part time. They own their own homes. They do not want to be lying around doing nothing. They have been intending to get their house painted, but on account of high prices have not wanted to have the work done by a painter. They are now out of work themselves. They quite realize that they cannot do as good a job as a qualified painter, but they go and buy a medium paint brush or possibly two. They also get enough paint to do the job, and they do all their own work. The retail hardware man should put paint and brushes to the front in hard times, as in many districts we notice they sell nearly double the quantity of medium and cheap brushes as they do in good times.

No Price Reduction During Spring

"In reference to the price of paint brushes, there will be no reduction in the price of paint brushes during the Spring business. The reason of this is that all paint brush makers have to buy their bristles practically a year in advance. The bristles come from China, are gathered in the back country and brought down to the ports where they are washed, sorted to size and prepared for shipment. These bristles are offered by the firms in China in March, April and May of 1920 and are shipped during the summer mostly in the months of July, August and September, and are received by the paint and brush manufacturers in October, November and December, and made up into brushes for the following spring, so that by the last of December every paint brush maker has all his bristles that he expects to require during the spring season, already in; probably most of the bristles further prepared for putting in brushes; many of his orders already made up and in many cases shipped. The brush maker, therefore, makes up his prices in August or September, as soon as all his contracts are made for bristle, and those prices practically must remain stationary for a year.

Prices After July, 1921

"Rearding the trend of prices after July, of 1921, bristles in China have held very firm, although the price of silver for which the native is paid for his raw bristle has gone down in value materially. The actual price of the dressed bristle in China has gone down very little, the whole matter being that the Chinaman is asking more for his raw stock than what he formerly got. The famine is going to have a very bad effect on the price of bristles and will probably make them much higher in price in a year or two from now, the reason being that the pigs will be killed much younger than they would ordinarily be killed and in consequence there will be a shortage, more especially of longer sizes, as the boar must be several years old that produces bristles from 4 to 5 or 6 inches inches long. This tendency is even showing at present with a lowering in price of short sizes for the 1922 trade and the great advance that is going on in long sizes. We have received word from China that due to the famine the bristle output this year will run 40 per cent. below the average.

"It is very difficult to state what the prices will be in July or August. Under the present circumstances, it is in this month that all the brush makers must necessarily make up their prices for the following year and although every brush maker is hoping for lower prices, the fact points to higher prices, as the prospect of a shortage, on account of the famine, seems to be growing. Although the native is paid in silver the goods are all sold in pounds, shillings and pence, and the constant advance, for which we are very glad in one sense as we would like to see the sterling exchange up near par, will, however, without doubt, make a higher price in Canadian money for their bristles, as sterling exchange advances. Therefore, the prospect of lowering prices seems a little remote as far as the paint brush industry is concerned."

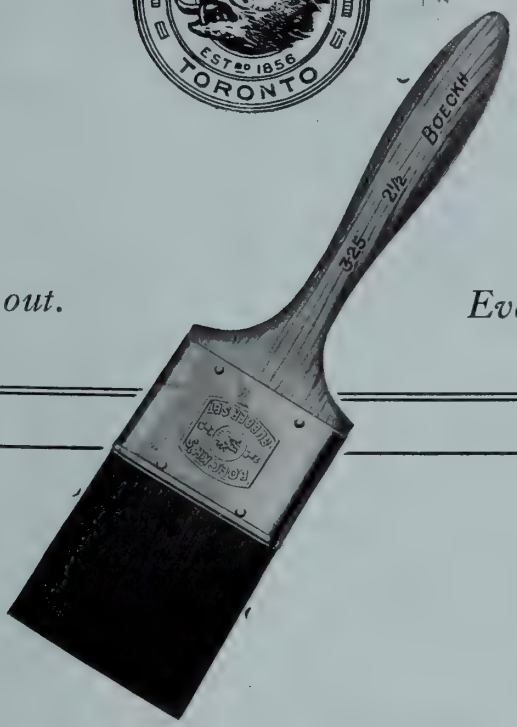
W. H. GERKE

who, as announced in last week's issue of Hardware and Metal, has resigned the position of general manager of the Martin-Senour Co. in the U.S. to enter business for himself.

1921 May Beat Building Records

TORONTO. — City Architect Price looks forward to 1921 being the biggest building year in the history of the city.

"I am informed by an architect," he said to-day, "that there is $35,000,000 of work in sight."



The largest building year was 1912 when the permits issued totalled $27,401,761. Next came 1911, with $24,374,539, and then 1913 with $27,038,624. There was a drop to $20,694,288 in 1914. During the past five years the permits issued represented the following value: 1915, $6.651,889; 1916, $9,881,671; 1917, $7,163,556; 1918, $8,535,331; 1919, $19819,436.

Selling Paint to Farmers

Continued from page 58

nish may be greatly prolonged by thit attention.

The farmer is now in a receptive mood for such suggestions, and the dual suggestion might be put forward in the advertising, namely, the value of the frequent use of paint on the farm and the advisability of having a handy stock of well assorted paints, varnishes and specialties for use during the summer months.

The bristles can't come out.

Every Brush Guaranteed.

BOECKH'S

Service to the Merchant

We can sympathize with the anxieties of the merchant who wants a stock and has no confidence in certainty of delivery. There are many advertisements of "promptest shipment," "highest quality," "best service," and many other worn-out and empty phrases. We make no such vague and general claims.

On orders placed *now* we guarantee shipment in time for the busy spring season. You will have the goods when you need them; not after the demand is over. At the same time we want to remind you of the well-known Boeckh service of careful attention to orders sent by mail or otherwise. It has been tested by time.

The Boeckh Company, Ltd.
Toronto, Canada
Established 1856

New Box Price List on Window Glass

Lower Levels Reached on All Sizes, But Larger Declines Are on Cases of Star or Single Thick Glass.

THE opinion is expressed that the lower quotations now in effect on window glass are based on the state of the Belgion market, where the low exchange value of the franc has had a weakening effect. Supplies from Belgium to-day are also quite adequate to meet present day requirements, these deliveries showing a great improvement in recent months.

Whether prices will remain firm at the new low levels seems doubtful. However, an easier tendency is improbable unless price-cutting becomes evident. This condition will not likely be brought about as a loss has already been sustained on stocks on hand to acquire the low quotations now given. Keen competition among importers, jobbing houses and local manufacturers, each after a larger share of the glass trade, may have uncertain results. Viewing it from a productive or replacement basis, slightly higher prices may be looked for. The value of the franc has gained on the New York and Montreal markets since present stocks were bought, and if a continued gain is made Belgian glass will cease to be the cheapest market on which to buy.

On the new list prices now in existence, a reduction of nearly 50 per cent. is made on the first cut of star or single thick glass. Where a case under 25 inches formerly cost net $13.93, new quotations now show it at $7.33 net. Double diamond or 24 oz. glass under 60 inches, was formerly net $21.56, while the new quotation for the same size is $16.00, a reduction of nearly 25 per cent. List prices are shown elsewhere in this issue.

NO WORD OF PRICE CHANGES ON PAINT

Up until time of going to press no announcement concerning price changes on paint or varnish has been forthcoming from the afternoon session of the meeting of the Canadian Paint, Oil and Varnish Association being held in Montreal. No changes were decided upon at the morning session.

Promotion on Brandram-Henderson Staff

Montreal.—C. V. Johnston has been appointed assistant sales manager, central division of Brandram-Henderson Limited, at Montreal.

Mr. Johnston has had a wide training for his new duties. During his association with the company he has been a salesman, and for the past three years has acted as secretary to W. S. McLennan, general sales manager. He will have supervision of sales for Eastern Ontario and the province of Quebec.

Ready For the Export Trade

Guelph, Ont.—The International Malleable Iron Company, Guelph, have installed, in an addition to their plant, complete equipment for the machining of their malleable and cast iron pipe fittings and malleable and gray iron castings. This plant has practically doubled in capacity in the last five years. The company's sales organization includes the following representatives: Halifax, Geo. D. Hatfield, Bedford Chambers; St. John, N.B., H. G. Rogers, 147 Prince William Street; Winnipeg, Harry F. Moulden & Son, Confederation Life Building; Vancouver, Cyril Ames, Wilton Block. The Toronto and Montreal fields are taken care of from the head office, Guelph. Arrangements are being made whereby the company will be capably represented in the development of fittings business in foreign markets.

Expect Early Activity in Naval Stores

PRIVATE transactions between factors and dealers go on in a moderate way, but no fresh stimulus has come to the situation, here or in any other market, says the Naval Stores Review, Savannah, Ga. Consumers come in lothfully and buy sparingly, seem to hesitate at all times as to what their policy shall be with regard to turpentine and rosins, and put off the actual purchase until forced in by immediate necessities. Until this spirit changes for one of more confidence the hand-to-mouth policy in buying is apt to continue. Spring time will draw on rapidly now and with it there generally comes a more insistent and a larger volume of demand that eats up the early offerings from the woods. Dealers feel that by March the betterment in general business conditions throughout the country will have become more manifest, that with easier money markets and depleted stocks in retailers' hands a spurt in the movement of naval stores into general trade is then assured, and the beginning of the general uplift will be noticeable. There is no foreign demand to speak of just now, but while the present season will close with conditions disorganized in large consuming countries as a result of the value shrinkages and the atmosphere of doubt in business circles the coming season is apt to see as a whole exports fully equal to if not above those of the current naval stores year.

Price Tendency From 1913-1921

SOME indication of the trend of prices on a number of basic lines in the hardware trade from 1913-1921 is gleaned from the table shown herewith as prepared by the Commerce Monthly. The quotations are on U.S. products but the range on Canadian products has been approximately the same.

	1913	1914	1915	1916	1919	1920	1921
Copper	17- 16.37½c	14.12½- 11.37½c	13.75- 18.00c	23.62½- 28.50c	20.00- 22.25c	19.25- 16.25c	13.25c

Weekly Paint Markets

Montreal

MONTREAL, February 3rd.—An outstanding feature in this week's markets is the issuing of a new box price list on window glass. This new list shows reductions from 20 per cent. to 50 per cent. on the different cuts. The demand continues very light on glass and whether these new prices will stimulate business is a question.

Linseed oil has declined five cents a gallon, and turpentine ten cents per gallon. White lead and putty hold, with prices unchanged, shellac continuing to be very unsettled.

An increased volume of business is noted in paint and varnish and allied products. Sales are somewhat smaller than last year's spring bookings, but are regarded as satisfactory by the paint manufacturers.

New Window Glass List

Montreal.

WINDOW GLASS.— Following the unsettled condition of the window glass market, new lower prices are now in effect, and a new box price list is now issued. A keen competition has been in evidence for the past few weeks between the importers of Belgian glass, American glass and our own Canadian manufacturers. Whether any further reductions will be made is very hard to determine at the present time, but considering the recent advance in the Belgian franc, the freight rate and exchange from America, lower prices are hardly probable.

Below is the new box price list:

United inches	Star or 16 oz.	Double or 24 oz.
Up to 25	11 00	16 40
26 to 40	14 00	20 90
41 to 50	15 00	23 00
51 to 60	16 00	24 00
61 to 70	17 00	25 00
71 to 80	.....	27 00
81 to 84	.....	34 00
85 to 90	.....	36 50
91 to 94	.....	37 25
95 to 100	.....	43.75

Discount box glass, Montreal, 33 1-3%.

Cut size sheet glass, 60% off list of November, 1919.

Linseed Oil Again Reduced

Montreal.

LINSEED OIL.—A further decline of five cents a gallon has been made in linseed oil this week. The flax market is very uncertain, with fluctuations from week to week. If a continued weakness is shown on the flax market, even lower prices than now quoted may be expected. The demand continues light, although sales are somewhat improved from the last few weeks.

1 to 2 barrels	1 04	1 06½
5 to 10 barrels	0 97	1 00

Turpentine Still Lower

Montreal.

TURPENTINE.—Quotations on turpentine this week show a reduction of from 10 to 12 cents a gallon. The market on this product may well be described as stagnant, practically no sales being made. This may be expected, however, considering the easing of the turpentine market. An improvement may be looked for with slightly higher prices when the season opens and the demand becomes much heavier.

Local quotations are as follows:

Turpentine—	Per Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 12
Broken lots	1 16

White Lead Continues Firm

Montreal.

WHITE LEAD IN OIL.—Prices remain unchanged on white lead in oil with very little business offering. The new quotations given out at the first of the year have held very firm with no change having been made.

These quotations are as follows: $16 per 100 lbs. in 5 ton lots, $16.50 in one ton lots, and $16.85 in less than ton lots.

Putty Holds Unchanged

Montreal.

PUTTY.— Prices on putty continue firm and unchanged. Very few sales are being made, this however is considered only seasonable.

Quotations are:

Standard Putty—	5 tons	1 ton	Less ton
Bulk barrels, 800 lbs.	$6 00	$6 25	$6 60
Bulk drums, 100 lbs.	7 00	7 25	7 60
Do., or tins, loose, 25 lbs.	7 25	7 50	7 85
Bulk tins, cased 25 lbs.	8 00	8 25	8 60
Bulk drums or tins, loose 12½ lbs.	7 50	7 75	8 10
Bulk tins, cased 12½ lbs.	8 25	8 50	8 85
Bladder barrels, 400 lbs.	8 25	8 50	8 85
Do., cases, 100 lbs.	8 50	8 75	9 40
Tins, 1 lb.	10 60	10 85	11 20

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Paint Sales Improving

Montreal.

PAINT AND VARNISH.—With the approach of the spring painting season, sales of paint and varnish steadily improve. Deliveries of spring orders are being made now and although not as large as last year, business continues quite favorable.

Shellac Market Still Unsteady

Montreal

SHELLAC. — The shellac market continues very unsteady, with different prices quoted by the various manufacturers. A slight decline may be noted from last week's prices, although it still remains difficult to determine the prevailing market quotations. Orange shellac in barrels, $5; in one gal. jugs, $5.25; white, in barrels, or 5 gal. jugs, $5.75; in one gal. jugs, $6.

Toronto

TORONTO, Feb. 3.—Business continues quiet in paint and varnish and allied products, although a slight improvement is noticed each week by the manufacturers in the number of orders received.

No changes of any note are recorded this week in prices, the chief probably being easier quotations on shellacs. Linseed oil and turpentine continue quiet and show a continued tendency towards lower levels.

White lead in oil, putty and other lines are holding unchanged.

Window glass is selling at the lower quotations noted last week and the decline in this line seems to have become general.

White Lead Holding

Toronto.

WHITE LEAD IN OIL.—No changes have been made in white lead prices and quotations remain at prices made three weeks ago, which will be found on current market pages.

Business continues quiet and although it is believed by some that the trend of the market will be upward, others are looking for the reverse, and expect that there will be further reductions in prices.

Prepared Paints Move Slowly

Toronto.

PAINT AND VARNISH.—Business in prepared paints and varnish is said to be showing a slight improvement each week, but the paint manufacturers are not disguising the fact that the volume of busi-

How About Your Spring Stock?

MOORE'S Guaranteed PAINTS

If interested tear out this page and place with letters to be answered.

ness is below that of last year. This is regarded as the result of careful buying by the retailer and no fault is found with that, but there is a considerable amount of holding off on the part of buyers and the result will be it is expected that there will be a sudden demand on wholesale stocks when the season opens up. No changes are reported in prices.

Lower Shellac Prices

Toronto.

SHELLAC.—An easier tone is reported in shellac markets and quotations are showing some declines. Barrel prices on orange are now $5 per gallon, and $5.50 for white. Quotations are $5.50 for orange and $6 for white in gallon jugs. Business is quiet at the present time on this line.

No Change in Putty

Toronto.

PUTTY.—Prices are held unchanged on putty and no alteration seems to be expected in quotations. Sales are light, and are reported to be if anything below the average for the time of the year. Quotations are the following:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 05
Do., 25-lb. irons	8 30
Do., bladders in bbls.	9 30
Do., less quantities	9 55
Pure, in 100-lb. drums	10 55
Do., 25-lb. irons	10 80
Do., bladders in bbls.	11 80

Glass Low; Prices Hold

Toronto.

WINDOW GLASS.—There is little change in the window glass situation this week. Quotations of 60 per cent. off list have become general for Belgian glass, and sales are reported to have shown a little improvement. Although stocks on the whole are not believed to be heavy the decline in price will mean a big loss to some of the wholesalers.

Turpentine is Easier

Toronto.

TURPENTINE.—A lower tendency appears probable in turpentine this week and Southern primary markets show unsettled conditions with prices nominal. Trade is still quiet and inactive, and quotations here are 10 cents lower.

Turpentine—	Per Imp. Gal.
1 barrel lots	$1 20
2 to 4 barrel lots	1 19
5 gal. lots	1 35

Lower Tendency on Oil

Toronto.

LINSEED OIL.—The market trend in linseed oil is lower again this week, and quotations are down 7 cents. The present price of oil is regarded as very low and though there is a possibility that even lower quotations may be made it is felt that at present prices there is little inducement for buyers to stay out of the market. Following are the latest quotations:

	Raw.	Boiled.
1 to 2 barrels gal.	1 00	1 03
3 to 5 barrels, gal.	0 99	1 02
6 to 9 barrels, gal.	0 97	1 00

Less quantities add 15 cents per gallon.

Selling British Made Goods

(Continued from page 43)

should be an incentive to double our membership, as the governing authority of such an enormous organization is, in time, bound to prove beneficial to our mutual interests.

Central Office

For the purpose of co-ordinating the business of the Montreal and Toronto branches, especially in dealing with overseas correspondence, it was unanimously decided by your respective councils to establish a central office at 39 Richmond St. East, Toronto, which is now suitably furnished in order to afford greater convenience and accommodation for businessmen interested in British manufacturers, and who wish to get in touch with the Association.

Excise Taxes

When the new excise taxes were enforced this association added its protest to those of other representative bodies, as a result of which modifications were made to advantage of the importers of British-made goods.

Customs Valuation of Invoices

During the past year the question of the value of invoices for duty purposes arose, and in order to meet the suggestions from various members a deputation consisting of Montreal and Toronto branches waited upon the commissioner of customs at Ottawa, with the result that the authorities decided in July last to accept for the purpose of appraising duty the pound sterling at the current rate of exchange. This is one achievement which the members, their customers and the British exporter should appreciate, and I consider this action alone should justify the association's existence.

Chamber of Commerce

A welcome was extended by this association to the deputation of the Allied Chamber of Commerce of the Empire who visited this Dominion in September last, and a communication was received from Lord Desborough, president of the Imperial Chamber, thanking the association and regretting the short duration of their stay with the many calls made upon the delegates would not permit of a special meeting being held.

Election of Officers

The elections of officers resulted as follows:

President of both Montreal and Toronto branches, Major John Harris.

First vice-president of Toronto branch, C. W. Beal.

Second vice-president, Harold Wilson.

The president of the two organizations, Toronto and Montreal, is elected alternately from these places, the selection coming this year to Toronto as it had the greatest paid-up membership. Members of the Toronto council were elected as follows: Messrs. R. D. Harling, W. G. Patrick, W. Bruce Morrow, Arthur C. King, R. W. Paton, James Haywood and John Wilson.

Pittsburg Markets

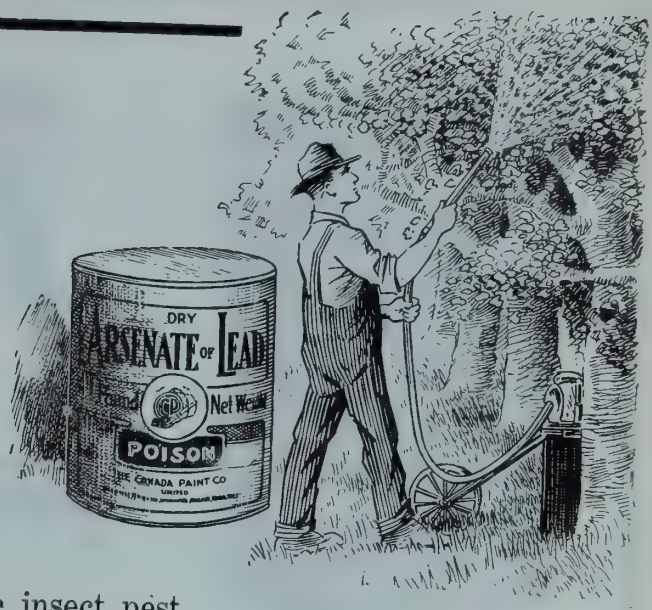
(Continued from page 57)

another. What they are thinking of is costs. The costs will have to be reduced, there being confidence that when costs are made right the market will take care of itself. There is coke, for instance, now held at $6.00 as a contract price, though odd lots for spot shipment can be picked up at $5.00 or less. Two or three months ago the Connellsville coke operators were talking about holding out for one price or another, even prices higher than $10, and keeping their ovens idle until furnacemen should become willing to step up to the counter and buy at the seller's idea. Now the coke operators are hoping for reductions in costs. They need hardly anything but two things, contentment with lower profits and lower wage rates.

Want Duty on Fluorspar Imports

Belleville.—Hastings county council has gone on record as favoring a memorial to the Finance Minister, urging that at the next session of the Federal Parliament legislation be passed imposing a duty of $5 per ton on imports of fluorspar. This is one of Hastings' most important mining industries, and it has almost been killed by the lack of a permanent market. To-day there is a duty of $1.50 on fluorspar entering the United States and it is proposed to have this raised to $5. United States fluorspar is admitted into Canada free.

Increased Imports of Gasoline And Oil



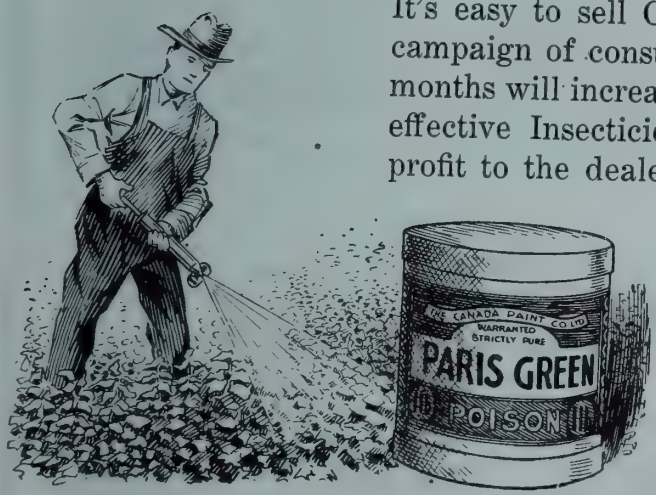
Canada has increased its consumption of gasoline and crude oil in the two years since the war. In the first 11 months of last year 1,262,000 barrels of gasoline were sent to Canada from the United States, while in the same period of 1918 the exports to the Dominion amounted to only 662,000 barrels. At the same time the quantity of crude oil sent to Canada from the United States increased from 4,226,000 barrels in the 1918 period to 6,040,000 barrels in 1920, or nearly fifty per cent.

Nails Added to U.S. Tariff Bill

The latest acquisition to the U. S. emergency tariff bill is nails. Senator Moses suggested this measure to protect the U. S. nail industry.

Canada's trade with the U. S. in nails has been of fairly large proportions recently. Figures for November, 1920, show exports of Canadian nails to the U. S. of 151,892 cwt., valued at $994,436.

The Quality of the Insecticide is Everything



The mere spraying of fruit trees and vegetable plants is not by any means an assurance of protection against the destructive insect pest.

Best results can only be obtained by the use of first quality sprays.

DEALERS HANDLING

C.P. INSECTICIDES

are in a position to meet the spraying requirements of every farmer and fruit grower with the right quality spray for every purpose. The poisoning strength and killing power of these Insecticides assure complete control over the insect menace without the least injury to foliage or fruit.

It's easy to sell C. P. Insecticides. A well-placed campaign of consumer advertising during the coming months will increase the already big demand for these effective Insecticides and bring added prestige and profit to the dealer selling them.

C. P. Insecticides include

DRY LIME SULPHUR

Floglaze

Registered

"The finish that endures"

Floglaze can be used for finishing and refinishing a thousand and one articles of domestic use in and about the home. It can be used for an infinite number of purposes on the farm and in the workshop, for the decoration of walls and the protection of exterior architectural surfaces. Whether the material is of wood, metal or concrete, Floglaze can be used to finish or re-finish it with a brilliant, glossy, hard-wearing surface.

Floglaze is adapted to a multitude of uses.

By adapting Floglaze to a multitude of uses rather than devising a special line for every special purpose the retail paint and varnish department can be relieved of any necessity of making too great an inroad on capital investment, and overhead charges can be greatly reduced. By increasing the number of uses of Floglaze, turnover becomes more frequent and profits larger.

Floglaze has made history in the Canadian paint and varnish market. No other proposition has the same sound technical and practical experience in its make-up. No other proposition has the same unique advertising and marketing features. No other proposition offers the same opportunity for profit.

THE FARMER DOES BUY AT HOME

We know he does for our dealers in small centres send in many orders.

Now when the farmer is thinking of spraying is the time the livewire hardwaremen should start to talk Spramotor.

There are so many proofs that the Spramotor method is the quickest, the most effective, the farmer will need but a little encouragment, and the sale is made.

Don't Leave Business That is Yours to Some Other Agent, Mr. Hardwareman. Become our agent—we want you if you are reliable.

Making Friends For You

The good folks in your town who read the Atlantic Monthly, Century, Country Life in America, Harper's, House Beautiful, Review of Reviews, Scribner's or World's Work are finding many appealing suggestions in those charming Tommy and Betsy advertisements.

Vitraliting the kitchen chairs, the thought in the April issues, will make good sales for you — if you have Vitralite Tints. Perhaps you don't know about the introductory proposition, but we'll mail the whole story if you say so.

Introducing

TRADE
ELASTICA
MARK.

PAINT AND VARNISH PRODUCTS

to

Western Canada

The International Varnish Co., Limited, manufacturers of ELASTICA Paint and Varnish Products, is well and favorably known to the Western hardware trade as manufacturers of the highest grade Varnishes and Varnish products.

Some years ago this Company, having such wide distribution of their Varnish products and having the very best facilities, decided to branch out and enter the paint manufacturing field also. Such success has been met with throughout Eastern Canada in introducing the full line of ELASTICA PAINTS AND VARNISHES that it has now been decided to open a branch warehouse and office at Winnipeg to serve the provinces of Alberta, Manitoba and Saskatchewan with the full line of ELASTICA products.

The Winnipeg branch will be open for business at once, and will be in charge of Mr. J. P. Cookson, who has been connected with the Paint and Varnish industry in the West for many years past, and whose knowledge and experience of the needs of the Western trade make him the ideal man for the position. We invite dealers in the Western field to write our Winnipeg office for an ELASTICA agency proposition.

TINKER TOM'S TALKS.

No. 297

What do you know about the Galvanized coating on Sheets?

As a user of Galvanized Sheets, you naturally want value received. *Do you know what real value is?* Granted a good workable black sheet to begin with—

It must be thoroughly pickled to remove scale.

It must be absolutely cleaned after pickling.

The flux to prepare sheet for coating *must be exactly right.*

The zinc itself *must be virgin metal.*

The heat *must be exactly right* at all times.

All these go to make a perfectly coated Sheet and don't forget that the *weight of coating determines the amount of service you'll get.*

Every Premier Galvanized Sheet is made in the above way, and there's no skimping on the weight of metal coated on Premier Sheets.

TINKER TOM

GLASS

Service

We can give you prompt deliveries and careful packing. It makes no difference whether your order is large or small, the same careful attention is used. We have complete stocks of all lines at any of our warehouses; plate glass, bevelled plate mirrors, wired, leaded, and window glass. A post-card will bring our catalogue and price list.

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Two Washing Machines That Sell

They Bring Relief for the Housewife and Sales for the Dealer

Wizard

WIZARD

High Speed, Ball Bearings, Cut Gears. Tub is Made of Selected Louisiana Cypress. Handsomely Finished With Most Lasting Materials. With Wringer Attachment and Double Socket for Handle.

Wizard—Same style as Quality Washer, but made in Canada.....each $28.20

WEIGHT EACH 95 LBS.

The Wizard washing machine runs **EASIER** and with **LESS NOISE** than any other washing machine. Tub is extra large, capacity being about one-third more than any other machine. All gears are protected with shields—proof against accidents.

POWER PULLEYS

For Wizard or Eclipse Vacuum Washing Machines

Power Pulley—Diameter of Pulley 8 inches, with a 2-inch face, weight 5½ lbs., each $2.05

The illustration shows how easily the Wizard or Eclipse Vacuum Washers can be attached to any line shaft and operated by Gasoline or Steam Engine. The Pulley is held firmly to Fly wheel by Iron clamps, bolted to the spokes of the Fly wheel and is easy to put on or take off.

Modern housewives demand relief from the slavery of the old-style, health-destroying wash tub. The two machines herewith illustrated will bring that relief, with improved health. You will find them profitable lines to handle.

Sanitary Diamond "A."

SANITARY DIAMOND "A"

The spiral cut gears make the "Sanitary" machine as noiseless as it is possible to attain.

All gears are covered, guaranteeing safety in operating. The lid has assisting springs, so that the lifting of the cover is made easy. The cover lock used on the "Sanitary" is superior to any used on washing machines.

The construction of the "Sanitary" makes it easy to wash either the heaviest blankets or most delicate laces. In operating the "Sanitary" machine there is less wear on the clothes than even by the old washboard and tub method.

The tub is made of the best quality Cypress, and is handsomely finished.

HARDWAREMEN WILL BE WELCOMED AT BOOTH NUMBER 4 AT THE

HAMILTON CONVENTION

You will be welcome anyway, of course, and a visit to Booth 4 will net you a cordial reception and a renewal of acquaintance with Canada's best rope.

Nobody is going to thrust Lion Brand Manila Cordage on you, but it will be a splendid opportunity to see this celebrated rope, to examine it, and compare it with others.

The several lines of Binder Twine—"Blue Ribbon," "Red Cap," "Tiger" and "Standard"—will be there to remind you of the needs of your farming customers. See these Binder Twines with the most strength and yardage, and free from bunches and knots.

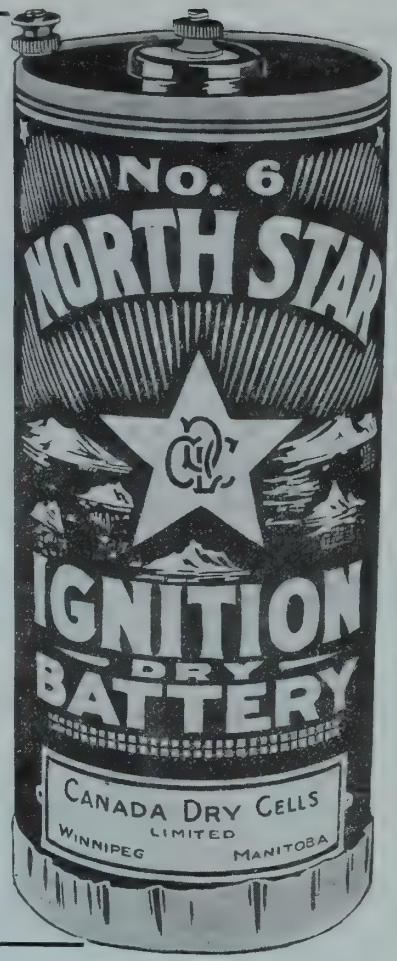
We Guarantee Every

North Star Battery



We guarantee every North Star Battery to be perfect in workmanship and material, and to last longer than any battery made in Canada.

We are using methods in constructing dry cells known only to us, and users are getting the benefit.

North Star Batteries will not swell like mushrooms, because a specially prepared compound is used in manufacturing them.

Our guarantee is that if the consumer is not satisfied we stand the loss, and do it cheerfully.

Sold everywhere by leading jobbers.

Advertising that reaches *your* customers

This year's advertising of the famous Barrett Products will cover Canada like a blanket.

35,000,000 Advertisements. Think of it!

And they will reach consumers of every class, all over the Dominion:

6,500,000 advertisements in leading farm papers going to the farmers of Central and Western Canada. (12 issues, 545,000 circulation each issue)

5,750,000 advertisements in weekly newspapers going to farms and small towns of Quebec and Maritime Provinces. (28 issues, 206,000 circulation each issue)

23,500,000 advertisements in Montreal daily newspapers, covering Montreal City and adjacent territory. (Twice a week, 251,000 circulation each issue)

250,000 advertisements in leading technical magazines reaching railroads, manufacturers, contractors and other large consumers. (12 issues, 20,500 circulation each issue)

These advertisements will be attractive in appearance and filled with strong selling arguments. They will tell why Barrett Products are superior to all others—why they give unfailing satisfaction and save money for the user.

They will bring a big volume of new business to every dealer who is ready to supply the demand.

This is an opportunity you can't afford to miss. If you have not already received a copy of our latest Price List, write for it today.

The well known Barrett Products which will be featured in our big consumer advertising campaign, include:

Everjet Elastic Carbon Paint
Everlastic "Rubber" Roofing
Everlastic Liquid Roofing Cement
Plastic Elastigum Patching Cement
Liquid Elastigum
Creonoid (Fly Oil) Cow Spray and Lice Destroyer

WINNIPEG, VANCOUVER
HALIFAX, N. S.

The Playtime

is a dolly-type washer which meets every demand for a combination hand and engine drive machine.

It especially appeals to up-to-date farmers who are not yet prepared to invest in the higher-priced "Seafoam" washing and wringing outfit.

Without alteration it can be belted to the flange fitted on fly-wheel. Should the power stop at any time it is ready for hand use.

The cover can be raised and lowered without removing the belt.

Tub is made of Cypress, corrugated and waterproofed inside, heavily hooped and durably finished. Its reputation has been established for some years.

Remarkably low in price.

Descriptive folder on request.

A FEATURE OF THE HARDWARE CONVENTION WILL BE

"DURO" Aluminum Ware

To every dealer who attends the Convention a most cordial invitation is extended to visit the home of "Duro" aluminum ware, just four short blocks from the Armories.

We would like you to see how "Duro" is made, and we are sure you will find the process mighty interesting.

A few of the "Duro" features are the perfect finish of every piece—99% pure—complete line and shipments made same day as order is received.

"Duro," though a youngster, is setting the pace in the quality race—all the big jobbers handle "Duro."

DURO

TRADE M MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

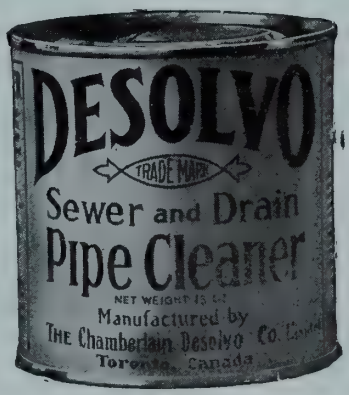
Our novel line of Aluminum Tea Sets are immensely popular; the prices are lower than similar sets in enamel ware and compare favorably with china.

VIKO

165 Tea Set

Aluminum Cooking Utensils and Specialties



For a durable and serviceable line of Aluminum Tea Sets that will stand the wear and tear of children's rough play, stock, sell and push the famous Viko line. These well-made sets are popular with children and, when displayed in your windows, create a favorable impression on the kiddies, who soon influence their parents to purchase. The Viko line is a profitable line to handle.

BOLINDER'S

FOOD CHOPPING and MINCING MACHINES

THE "BOLINDER" FOOD CHOPPERS

Adjustable for chopping meat—coarse, medium or fine. Can be used to the same advantage for mincing fruit, vegetables, eggs, cheese, etc. Ahead of every other make on account of their many-sidedness.

Food Choppers made in 4 sizes.

The "BOLINDER" Mincing Machines

Are of the very highest standard. All surfaces are smooth to prevent the accumulation of dirt and to facilitate cleaning.

Made in 9 sizes

Both machines are constructed on the American system and all parts standardized to interchange with other machines of the same type.

The **Cutters** are of case-hardened Swedish steel, specially tempered and practically blunt-proof. The **Tinning** is extra heavily coated by expert workmanship with purest tin.

Exclusive selling rights granted to dealers where we are not actively represented.

For catalogues, prices and terms please write.

Pruning Shears of Quality

The Ratchet Lock-Nut Makes Blades Very Secure

No. 4773—AMERICAN RIESER PATTERN

When buying a "Henry Pruning Shear" you can be assured that they are the best for actual service, workmanship and materials made in the United States.

A fine, highly finished shear and very serviceable. Crucible steel blades, carefully tempered, oval bevel, ratchet, lock nut, refined malleable iron handles, double flat bronze springs, full polished throughout.

When Answering Advertisements Kindly Mention this Paper

Here's a Money Maker!
MAPLE EVAPORATOR
AND
WELDED STEEL SAP PAN

This evaporator fills the popular demand for a handy, efficient, up-to-the-minute machine at a reasonable price.

It is specially made to meet the requirements of the small farmer who wishes to get all the money profits out of his maple bush without too heavy an outlay for apparatus.

Welded Sap Pan—no solder about it to melt or leak—a pair of handles on each side and heavy angle steel around top.

Standard sizes: 6″ x 24″ x 5′; 6″ x 30″ x 7′; 6″ x 24″ x 7′; any size to order.

Placed on market last year and proved a great success.

Write us for trade prices and further particulars regarding these two money makers—we also manufacture steel baths, tanks, sanitary closets, dairy equipment, etc.

Send list of prospective buyers and we will mail literature to them.

The Steel Trough and Machine Co., Ltd.
Tweed, Ontario, Canada

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail-holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough, leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a source of Good Revenue

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

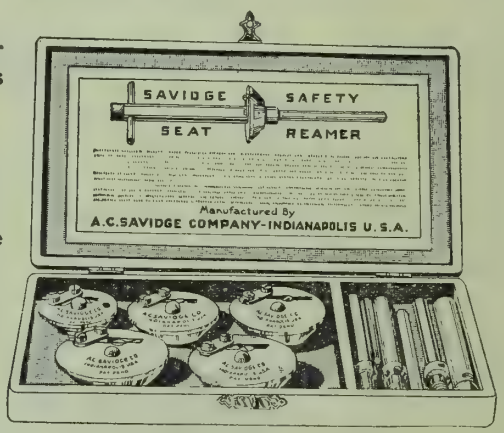
HERCULES



SAVIDGE LINE VALVE TOOLS

The only Lathe built that will operate with full efficiency on a hard steel valve.

SAVIDGE Lathes operate on the true lathe principle. Cutting knives are of high speed steel and will not dull. The hardest tungsten steel valve may be turned to perfect accuracy, insuring an absolutely gas tight seat. Will save hours of grinding—in labor.

A Reamer which has positive cut--cannot dig in, chatter, nor gouge --works like a wood plane.

SAVIDGE Reamers cut on the principle of the safety razor, removing only the high spots and a minimum of the seat. Depth of cut is controlled and positive—will not leave ridge, chatter nor turn out—cutter of high speed steel. The only Reamer Set built on scientific principles. Adapted to practically every standard size.

HEAVY DUTY SPARK PLUGS

Most complete and efficient line of spark plugs built in America.

The manufacturers of the HERCULES line have been builders of spark plugs since 1910.

In the HERCULES they are offering the most complete and efficient line on the market. Stone-like insulators, flexible assembly, spring gland patented construction, solid alloy electrodes and other features place them in advance of the requirements, even of the present day high speed and high compression motor, or of the heavy voltages developed in present high tension ignition systems.

Long on the market, and of standard recognition by the trade throughout the American Continent.

Special Types

Specials for airplanes, tractors, commercial vehicles, motorcycles, marine and stationary motors, as well as for every type of passenger car, are offered in the HERCULES line.

Display

In conjunction with HERCULES spark plugs, its manufacturers offer, without charge to the dealer, the most complete and elaborate line of printed matter, window and counter display, road signs and other co-operative helps, ever offered in conjunction with any accessory. Write your jobber regarding HERCULES special display assortment, including cabinet illustrated.

Big Polarine Sales Ahead—

There will be more than 400,000 automobiles and trucks operating on Canadian highways this spring. More than 35,000 tractors will be out in the fields at the first sign of Spring.

It promises to be a record-breaking year for Imperial Polarine dealers. Are you ready with adequate supplies to meet the demand from motorists and tractor owners in your territory?

These owners know the savings in fuel, oil and upkeep that are possible with Imperial Polarine oils. They represent a ready-made market **at your door** for hundreds of dollars worth of Imperial Polarine this year.

Every Imperial Polarine sale nets you a good profit. The complete satisfaction of users brings repeat orders—and boosts your sales of other lines. The Imperial Oil salesman will gladly furnish details regarding our attractive Polarine dealer agreement.

"Automotive Lubrication" is a new booklet full of valuable information for dealers. Write to 56 Church Street for your copy.

CRANK-CASE SERVICE
WE SELL IMPERIAL Polarine

Crank-case service is a big factor in increasing Polarine sales. It is a proved business-builder and one no Imperial dealer can afford to pass up. Talk it over with the Imperial Oil salesman.

This button protects you against your own carelessness

Pushing a Little Button Locks the Defender Instantly Without a Key

NO Ford owner can resist the temptation to lock his car EVERY time he leaves it, after he has once installed a Defender Steering Wheel Lock for Fords. After one day's use it becomes as mechanical as shutting off the ignition.

The Defender is thief-proof. It cannot be unlocked without the proper key. It effectively resists a hammer, saw, file or drill—and a Defender-locked Ford cannot be driven away.

Every Defender lock bears the label of the Underwriters' Laboratories, decreasing an owner's theft insurance cost 15 per cent.

The Defender completely eliminates the possibility of accidental locking while driving.

"Perfect" is a Bold Word

But, nevertheless, we use it in describing the

LONDON ENGINE

Perfect in design, workmanship, material and efficiency — perfect with the same degree of accuracy as the shells turned out by our mechanics, expert mechanics, during the war years.

Reliable Dealers Everywhere!

The "London" is a fully guaranteed engine that will bring prestige with its sale.

London Gas Power Co., Ltd.
29 York St. London, Canada.

Acornette Pump Connection

ECONOMY!

The Improved Acornette makes a timely appeal to motorists because it gives them more for their money.

The Acornette design prevents tire buckling and retards chaffing of the rubber washer. The result—Acornette grips the tire valve tighter and the washer lasts longer.

"Thru your jobber—his service is economy."

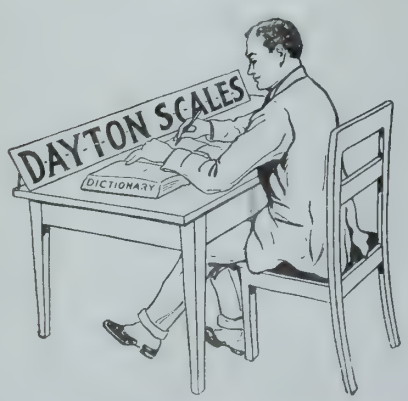
$2500.00 IN CASH PRIZES

International DAYTON SCALES Word Contest

$300 First Prize $200 Second Prize $100 Third Prize
$75 Fourth Prize $50 Fifth Prize $20 Sixth Prize



30 Cash Prizes of $15.00 each
25 Cash Prizes of $10.00 each
111 Cash Prizes of $5.00 each
200 Cash Prizes of $2.50 each

Here it is—here are the words—D-A-Y-T-O-N S-C-A-L-E-S. How many words can you make up from the letters that spell DAYTON SCALES? How many words? The more the better! Get busy quick! Contest ends March 15, 1921.

Just a little brain work should win a Good Cash Prize—No Entry Fee—No Risk—Nothing to Pay—You are on your mettle.

THINK OF IT!	372 Cash Prizes $2,500.00	COME IN AND WIN

This Dayton Scale Word Contest is open to the Retail Merchants and their Clerks in Canada and Newfoundland of the five kinds of stores that use any kind of scales or meat slicers or cheese cutters—groceries, meats, confectioners, hardware and general stores. Just comply with a few simple rules. You should earn a nice fat check just as well as "the other fellow." Get out your paper—sharpen your pencils, sharpen your wits, too. Here goes: Examples of words you find in "D-A-Y-T-O-N S-C-A-L-E-S—day, ton, tones, cat, son, ale, candy, scanty, etc. Letters can be used only the number of times they appear in the two words. For instance, the letter "A" and the letter "S" may be used twice in any word. The other letters only once in any word.

IT COSTS YOU NOTHING TO ENTER

The rules are simple. If you have not already received our circular, write to us TO-DAY. We will send you Entry Coupon Cards to send in with your answer. In the meantime you can get our list under way and focus your thought on the words—D-A-Y-T-O-N S-C-A-L-E-S. Mail us your list with one of the Entry Coupons in time to reach us before March 15th, 1921.

Prizes will be awarded by an impartial committee of judges as soon after the close of the contest as possible. List of winners will be announced in trade publications nearest to June 1st.

Prizes will be distributed as soon as possible after close of Contest, March 15th, 1921

Sells To The Market That Is Never Oversold

MANY persons have more aches and pains than they know what to do with—or do for. Some suffer in silence. More and more raise their voices to demand the Universal Electric Pad.

Suffering never comes according to fixed schedule. There is no particular day, week, month or year to sell the Universal Pad. It is an every-day seller for every-day use in every community. Every home needs one, every hospital, asylum and sanitarium needs many.

Sells On Its Quality — Stays Sold On Its Service

Sell the "Universal" as a pain reliever—sell it as a bed warmer. Sell to the market that is never oversold.

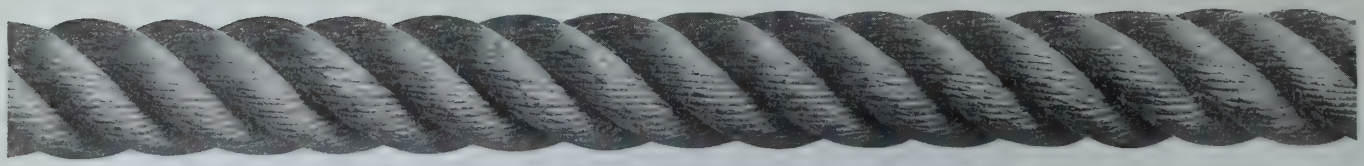
"America" Trolley Hanger

Largest Hanger Sales in the Dominion

The America is easily the most popular for warehouse, factory, garage and barn doors. America operates in the Hatch Trolley Track — the only track supported by the famous corrugated track brackets. Much stronger and better than the plain track brackets.

The America moves smoothly on tandem trucks and hardened roller bearings. Apron 6 in. long, 3¼ in. wide. This efficient hanger appeals to customers because of the simple adjustments, anti-friction, forged steel yokes, and ability to stand hard usage.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.



Packed one pair in a box complete with Screws and Bolts

Weight per dozen pairs, without Brackets, 95 pounds.

PLYMOUTH ROPE

Construction Features Show Durability

A careful reading about how Nesco Perfect Oil Cook Stoves are built will acquaint the reader with special features and show that the stoves are built for service. Thus retailers and their salesmen can more surely make sales. The feed pipe line is made from heavy wrought iron pipe. To avoid danger of leaking and possibility of breaking at the joint, this pipe line is welded to the sub tank. The upright branch pipes for each burner are welded to the main line. There is no solder to crack and allow leaks. Then the sub tank. This tank is one piece drawn into shape and heavily lead coated. Where the pipe line enters there are heavy flanges that fit around the pipe, one inside the tank, the other outside. For support a steel bracket is fastened to the sub tank and to the stove top.

The Four Burner NESCO

The stove itself is very substantial; extra heavy steel is used throughout. The stove top is reinforced with "U" bars welded to the underside. The legs are straight, fully supporting without jarring; they do not spread out and cause tripping when working around the stove.

Sturdy expresses the impression one gets when looking at the stove.

Stove tops are 31 inches from the floor —just right for cooking; 17½ inches is the width, while the stove body is 14 inches wide. An extra shelf 8 x 10 sets over the glass supply tank.

Stove holes are round—so are cooking utensils—so is the flame, a natural shape.

NESCO PERFECT

OIL COOK STOVES

The japan finish is beautiful. All the horizontal surfaces are jet black, the uprights, except the legs, are a beautiful Nesco Grey, with sort of a greenish hue —suggestive of cleanliness, the kind that can be cleaned and that looks beautiful. Thus, you see, the stove is built for service.

Combine these construction features with burning qualities and the exclusive Rockweave Wick and you have a stove that sells satisfaction—the sort that helps your reputation and profits.

Such is the

NEW IDEA

WARM AIR FURNACE

The Best Furnace Ever Made

FULLY GUARANTEED

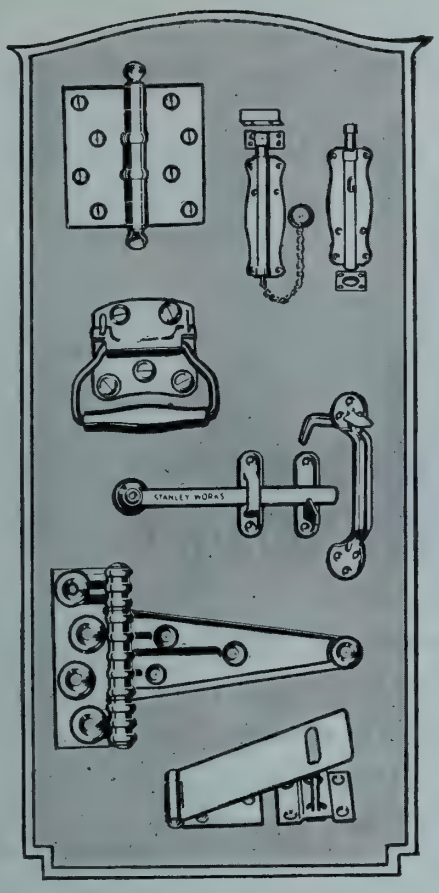
BURNS COAL OR WOOD

A few of its many qualities:

1. Has more heating surface than any other furnace. The large, roomy ash-pit prevents the ashes from banking up and burning out the grates.

2. The New Idea has a heavy flanged cast fire-pot which is guaranteed for five years.

3. Ball Bearings Duplex Grate, so simple in construction that a child can operate it. The Duplex grate enables one to dump ashes and clinkers easily and with no waste of live coals.



Further information upon request. Write for our new catalogue which describes and illustrates all of our furnaces, stoves, ranges and Builders' Hardware.

This $2 alarm clock rang up a $50 sale on the cash register

HENDERSON ran a progressive little store in a middle-western town. One morning he received a shipment of Westclox from La Salle, Ill., all bright and shiny and smart looking with their attractive orange and buff Westclox tags.

He decided to put some of them in his front window. They made a good looking display.

Half an hour later a woman stepped into his store. She was a stranger to Henderson; he'd never seen her before. She wanted a clock. The window had flagged her and brought her in.

After buying the clock she sauntered through the store looking at other merchandise. Before she walked out with her two dollar clock, Henderson had an order to send up fifty dollars' worth of goods he never expected to sell her when she came in.

Not so bad.

But the interesting thing about the sale was this: The woman didn't know Henderson. But she *did* know Westclox. And Henderson's display of the well-known, advertised clocks helped him make a large sale and a good new customer!

Western Clock Co., Ltd., makers of Westclox

Peterborough, Ontario

Used Universally--

Imperial Floor Dressing comes in one and four-gallon lithographed sealed cans, and in half-barrels and barrels. Ask the Imperial Oil salesman for prices and a demonstration.

IMPERIAL
FLOOR DRESSING

Imperial Floor Dressing is a great boon to storekeepers and dealers. It catches and holds at least 90% of the dust that would otherwise settle on goods and display shelves and detract from their appearance

Imperial Floor Dressing is a sanitary, wood-preserving preparation that definitely lays dust. It will not gum or evaporate, and it keeps floors and fixtures looking their best at all times.

Imperial Floor Dressing is conveniently applied and surprisingly economical. One gallon treats from 500 to 700 square feet. A single application is all that is needed for weeks.

Imperial Floor Dressing is a big seller for use in hospitals, churches, schools, billiard halls and institutions of every kind. Its use on your own floors is the best demonstration you can make. That alone will create a steady, profitable demand for this high quality dressing.

Ask the Imperial Oil salesman about Imperial Floor Dressing.

Joe Simpson Is Going to Do a Big Business this Spring

When Joe Simpson, the Hardware man,
Sold Ed. two "Gutta Percha" Cord Tires, last fall,
He sure made a friend of Ed. for life.
Ed. drives a lot and spends no time
Lookin' for soft spots and good roads,
So that tires don't last very long with him.
But it seems he's satisfied at last.
Been driving all winter when roads are hard,
And mighty "bumpy," and rough with frozen ruts,
And it don't seem to have made any impression
On his "Gutta Perchas" at all,
For he hasn't had a bit of trouble
With those two Cord Tires yet.
Ed. thinks They're the only tires, an' says,
It will take a mighty good salesman
To sell him anything else again.
'Pears like everybody in the county
Has heard Ed. boostin' 'em, too.
So it looks like Joe Simpson
Is in for some Big Business this Spring
From Ed's friends.
Which shows that it always pays the dealer,
To sell tires which makes friends for him,
And because of their high quality
Advertise themselves to others.
People will always come to you, if you carry
"Gutta Percha" Cord and Fabric Tires.

RAJAH PRIMER

$6.50 Each With Standard Fittings.

SAVING ON BATTERIES COVERS COST

The Rajah Primer is designed to add a small amount of gasoline to the regular mixture to enrich it in its flow through the intake manifold from the carburetor to the motor **without requiring the choke to be closed.** Closing the choke cuts off the needed supply of air to make the best combustible mixture. The valve is attached to the intake manifold above the carburetor, the gasoline being supplied by gravity or pressure from the regular supply system—preferably from the bottom of the vacuum tank—the quantity used being always under the control of the operator.

MAKES STARTING INSTANTANEOUS

The construction of the valve and its operation is such that a quick start is certain under all conditions of weather—thus reducing the strain on both starter and batteries. Also through the valve a small amount of gasoline can be fed drop by drop into the intake to heat up the motor, until the carburetor begins to function properly. The "Rajah" reputation is behind this product, which is sufficient guarantee that in so far as accuracy and care in workmanship are concerned this device is as nearly perfect in every detail as it is possible to make it.

The Rajah Primer is manufactured under U.S. Letters Patent.

RAJAH SPARK PLUGS

½" No. 2.
Specially adapted for Ford, Overland, Studebaker. Can also be used in any motor made for ½" Standard plug.

Price, Plug $1.25
Price, Porcelain .60

Race drivers use Rajah Plugs for a quicker pick-up, more power and higher speed. Special button top and quick detachable Rajah Terminal eliminates old style inconvenient Thumb Screw. Simple construction, easily taken apart, cleaned and replaced. Parts interchangeable. Sturdy electrodes. Patented knife edge bushing adjusts itself to shoulder of porcelain, and permits heat expansion without injury to porcelain. Insulation highest grade, hardfire, heat-resisting porcelain.

For all pleasure cars, trucks, tractors, marine, stationary, motorcycle and airplane engines.

⅞-18 Giant
Also ½", ⅞-18 Long and ⅞-18 Extra Long—firing point 1¼".
A big, sturdy heavy duty type of plug for pleasure cars, trucks, tractors, marine and stationary engines. Exclusive equipment Advance-Rumely Tractors.

Story for Week Dated Feb. 12, 1921 **Hull in 1851** **Being No. 44 in the Series**

The Wonders of the Non-stop Rewinder for Toilet Papers

THERE is something almost bewildering about the unceasing speed with which the machinery at the Eddy plant deals with the output of all kinds of toilet papers.

Manufactured with scrupulous care by the paper mills, out of the very purest of pulps, these papers arrive in their various grades, at the toilet paper factory, in long rolls. In this form the toilet paper is still uncut, unperforated, and in great unwieldy widths, quite unsuitable for sale.

By what seems to be about the speediest of all the marvellously swift E. B. Eddy processes there are turned out in the toilet paper factory, by thousands, the neat rolls and packages of toilet paper which almost sell themselves. To transform the larger rolls of toilet paper into these neat packages requires the services of the machine called "The Non-Stop Rewinder." The Eddy Company have a battery of these rapid machines, and it takes a small army of very efficient girls to keep pace with them.

As fast as rolls of wide, uncut toilet paper are fed into one side of these machines, rapidly revolving spindles rewind the paper into rolls of the right size. During the process the perforation is done exactly at the right intervals, and without one instant's pause the machine can be relieved of its completed winding, while it hurries on with another job of the same kind.

Working as fast as the machines, and as lightly and truly, the girls of the factory staff seize the newly-wound rolls from the boys who take them off the machines, and in a trice they are wrapped securely in their labelled wrappers. Another group of girls takes care of the packing, and as a result of organization and machinery, the toilet paper factory turns out its 1,200 rolls an hour. The flat package toilet papers are put up almost as fast, the "Onliwon" principle being applied to one or two special lines in the same manner as with the tissue paper towels.

Toilet Paper

EDDY'S make millions of sheets of toilet paper every year, yet this huge quantity is only a small fraction of the tremendous output of papers, matches, indurated fibreware, etc.

Meet Me at the Convention

You Need a Complete Line We Have It

IN THE "1900" line of Washers there is a type of machine for every demand. Our National Advertising creates a steady demand for every type. The reputation of this old-established line is a factor in sales making—and a feature no other line of washers on the market can approach. And the quality of the line always has been—and always will be—so maintained as to merit that reputation.

Consider the unlimited possibilities in a line embracing so many types of machine—each a leader in its class!

1.—A highly-perfected Electric, All-Metal Washing Machine made in two sizes—the 1900 "Cataract."

2.—Also a Wooden Tub, medium-priced electric machine. (Both types of these electric machines may be operated by other power, such as gasoline engine.)

3.—The unexcelled "1900" Water Power Machine is the most popular machine of its type—exceptionally well made and efficient.

4.—We have the best-designed hand machine on the market—the "1900" Gravity, known to dealers everywhere as a ready seller. Its merits have become better and better known each year that it has been on the market, and to-day its supremacy among washers of its type is generally acknowledged.

5.—We also have a medium-priced hand machine, the "Success," which merits the high opinion in which it is held among those who have compared it with others selling at the same price.

6.—Our assortment of high-grade wringers are worthy members of the "1900" line. All washers and wringers are strictly Canadian made.

7.—Rounding out the "1900" line there is a high-grade Ironing Machine which we carry in stock in a great variety of sizes.

Dealers and the public have always a standing invitation to visit us and see our process of manufacture—but we especially ask you to remember that this complete "1900" line will be on display at the Hamilton Convention. There we hope to have the pleasure of meeting visiting dealers and showing them the merits of our line in detail.

The Bee To the Jam Pot

The bee zooms through the air and tumbles into the jam pot. Fills to his capacity, backs up, takes to the air—and is gone.

In a well-hidden hive some distance away—in an old hollow tree perhaps—he buzzes to other busy bees his excited story of a potful of wonderful sweetness.

And in a few minutes two, three, four bees zoom through the air—tumble into the jam pot. One by one as they fill, they back up awkwardly—balance a moment—and are gone!

Back they come again—***each bee bringing others.***

And bees are like women. Only women are even more wise.

Your store is the jam pot. The public are the bees. But what of the jam?

Do women when they buy an electrical appliance from you come back for more? And do they bring or send their friends to buy as the bees do?

If so, you must be a New Canadian Beauty Dealer. For Canadian Beauty Appliances ***once*** sold—***stay*** sold—and ***sell more*** appliances.

The secret is—***quality***. The New Canadian Beauty line just ***sparkles*** with quality. The high quality of its appearance wins woman to buy in the first place. The quality inside—the kind that is built in—that you can't see—keeps her completely satisfied.

Stock this splendid line. Take advantage of our big advertising campaign. The season ahead is going to be a fine one for New Canadian Beauty Electrical Appliances.

Order through your jobber or direct from us.

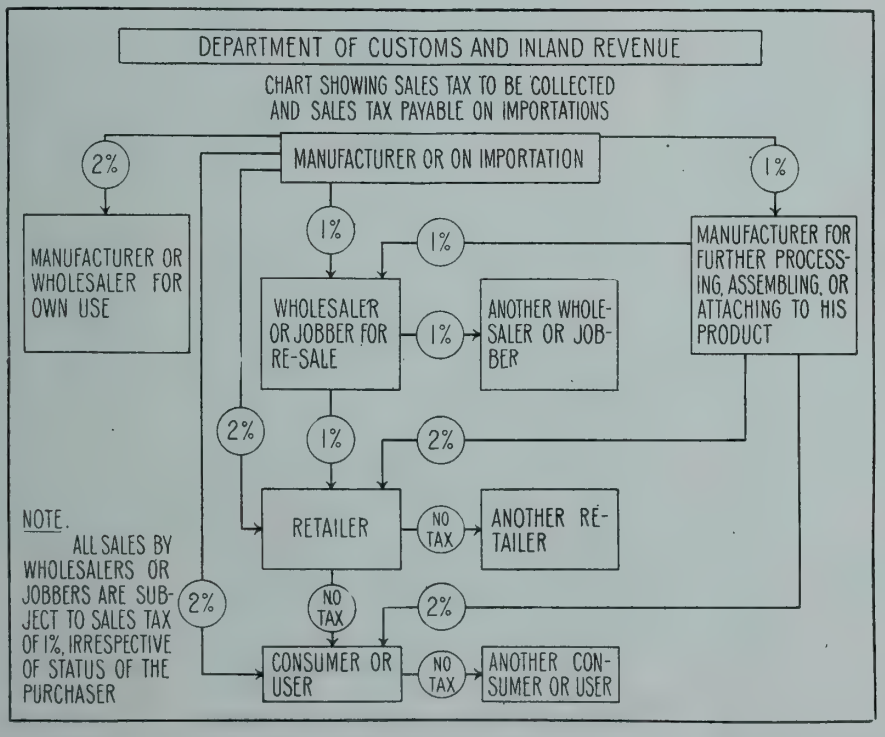
Early Action on Tax and Tariff Matters

Pending Session of Federal Government to be Important One From Standpoint of Hardware Trade—Test Case Being Instituted to Prove Status of Tinsmiths—Excess Profits Tax Likely To Be Discarded—Fifteen Arguments For the Turnover Tax

LLOYD HARRIS, former chairman of the Canadian Trade Mission to London and a well known Canadian manufacturer recently made the statement "the Government does not know anything about business because it is not the function of Government officials." In view of this fact and with the Federal Government about to commence upon the deliberations of another session, the hope is expressed by every hardware merchant that the members will have had quite enough experience with injudicious measures of taxation and will benefit thereby to the extent that in framing substitute taxation the counsel of experienced business men will be sought. The budget last year, in so far as taxation was concerned, contained many evidences of ill judgment which brought about a great unrest among the retail trade and resulted in many changes having to be made and the final abolition of the source of contention.

Taken as a whole the forthcoming session may prove to be one of the most important sessions yet held by the Parliament of Canada as regards its decisions in taxation and tariff matters.



Papers Served for Test Case

One of the developments in the past day or so, of interest to those hardware merchants who operate tinshops, is the institution of the long-promised test case to determine whether the tinsmith is a manufacturer, a contractor or a retailer. The basis of contention on this point has been outlined fully in past issues of Hardware and Metal and the culmination of the test case proceedings will be awaited with interest.

The Government is prosecuting a tailoring firm in Ottawa on the grounds that it and a great many other firms which should be classed as manufacturers, have refused to take out the manufacturers' license and collect sales tax as such. Papers have been served on this firm and similar service is said to have been made upon a Vancouver firm. The result of this case will affect thousands of manufacturing retailers throughout Canada, among whom tinsmiths form an important section.

No Unjust Discrimination

The activity of the merchants in opposing this measure is a fair indication that the merchants will not stand for any unjust discrimination. It was undoubtedly largely due to the protests of merchants that the luxury tax was removed, that the present action regarding tinsmiths is being instituted and that other reforms have been made. It is likely, therefore, that more consideration will be given to the opinions of business men in framing future tax legislation.

This chart will provide the retailer, wholesaler and manufacturer with a handy reference as to the collection of the sales tax and the taxes payable on importations. Such a chart is provided only for the use of officials of the Inland Revenue Department, but to serve as a guide to the trade Hardware and Metal has secured permission to reproduce it. (Clip it out and keep it handy).

May Eliminate Profits Tax

It has been felt by merchants in various fields that the business profits tax in Canada should be the next to be eliminated. Such action is also reported to be the feeling of the Minister of Finance and some such action is looked for. In this connection it

Continued on page 56

Looking from front to rear of the Mills (Barton St.) Store, Hamilton

SOME NOVEL DISPLAY IDEAS

A large stock, well assorted and attractively displayed is evident in this view of the Mills Hardware Company's Barton St. store, Hamilton, Ont. The pyramid fixtures used down the centre of the store are here shown with their stock of kitchen utensils suspended rather than merely placed on them, in order to avoid the chipping so often experienced. The pyramid display table also allows the stock on all parts of it to show to equal advantage, while the ordinary table hides stock on the lower shelves. Small display racks will also be noted with a range of meat choppers and other kitchen utensils arranged upon them. These racks can be placed at any convenient point, oftentimes carrying a display of specials right opposite the store entrance. They are handy and their value has often been proved in this store.

Building a Branch

Most Saleable Articles Grouped on Ground Floor—Wire Baskets and Price Tickets Stimulate Sales of Small Goods—Put the Goods Within Customers' Reach—Samples on Each Drawer Containing Stock.

A BRANCH hardware store which from the standpoints of size, modern equipment and extent of trade would do justice to the exclusive management of any hardware merchant is that of the Mills Hardware Company, of Hamilton, Ont., the branch being located at 425 Barton Street East. A glance through the store from the rear and from the front, as shown in the views herewith, indicates a complete and well assorted stock of hardware arranged to minimize the amount of customers' time required to "shop." Many unique features have been adopted to give better display in smaller space and to bring the customer in closer touch with the stocks carried.

Practically every saleable article in the store has been grouped on the ground floor in order to save the time and steps of both customer and clerk. This point has been given special attention by the management and the store reflects the value of such an arrangement.

The tool department extends down the right hand side of the store to the customer entering. A large number of attractive show cards are used, these being suspended from the ceiling and on a level with the customer's eye where they will receive most attention. Plainly price marking the various tools and putting them within easy reach so that the customer may handle them has resulted in greatly helping sales of tools, according to the statement of the management.

Uses Wire Baskets

It will be noted that on the top of the display cases wire baskets are placed to contain fast-selling lines of tools. This plan, originally adopted by the 5, 10 and 15 cent store, has always proved a good method of moving stocks rapidly and has recently been adopted by a number of hardware stores to good advantage for showing certain lines. The Mills store has also proved the value of this plan.

"Let the customer see and handle the articles and the sale is half made," says Mr. Mills.

Samples of the tool stock are affixed to the individual drawers which extend from the level of the counter to the ceiling. This plan of affixing a sample

View from the rear of the Mills (Barton St.) Store, Hamilton, Ont.

Hardware Business

Pyramid Displays in Centre of Store Allow Better Showing of Utensils—Kitchenware is Suspended in Order to Avoid Chipping—Sells Much Wallpaper and Also Border for Use With Wall Finishes—Educating the Staff

to each drawer in which stock is kept greatly facilitates the location of what is required and aids new clerks. Below the level of the counter in the wall fixtures are shelves to carry surplus stock and to have reserve supplies of fast-moving lines close at hand.

The left hand side of the store is devoted entirely to paints and sundries. The wall fixtures in this department consist of large shelves and a large, well assorted stock is always on hand. Generous use is made of color cards and other paint advertising matter.

Brushes are shown in an attractive display along the counter over which the paint is sold. This has been found to be the best location for displays of brushes because of the fact that the customer generally links up the requirement of a brush when purchasing paints.

Pyramid Display Tables

The central display facilities in the store are devoted to tinware, graniteware and household requirements. Circular pyramids have been found very useful in arranging attractive displays of these lines. Small display tables are also made good use of in supplementing the pyramids, as shown in the views herewith. Sometimes groups of special bargain lines are arranged on these small tables and placed within easy reach of the customer. A grouping of aluminumware pots at 99 cents can be noted in this picture.

Most of the articles shown on these stands are suspended from hooks, thus eliminating the danger of chipping, which is generally troublesome to the hardware merchant in displaying such lines. An outstanding advantage of the pyramid is that goods can be seen at all parts of it, from the floor up, whereas when tables are used the goods underneath are practically hidden from view.

Wallpaper

The other view of the store taken from the rear shows how the bins, baskets, racks, etc., for display are carried out right through the whole store. This view also shows several racks of wallpaper. Just here it may be pointed out

Continued on page 74

USE RACKS FOR SHOWING SMALL LINES

The idea of using small wire baskets for displaying many lines of small hardware goods has been adopted in the Mills Barton St. store to good advantage. Grouping of a number of lines of small tools, for example, in these baskets, with price tickets prominently shown, has resulted in a rapid movement of the lines so treated. This view of the store looking from the rear to the front shows wallpaper samples displayed on easels. Many hundred yards of border paper have been sold to use in connection with wall finishes. The plan of showing samples of the stock on each drawer in the wall display cases is followed. This gives a neat appearance to the store and assists clerks in locating the stock. The ten doors forming the back of the display windows are also used for showing samples of stock so that not an inch of valuable space is neglected.

Prize Winners Hardware and Metal Christmas Window Display Contest

Following are the prize winners in Hardware and Metal's Annual Xmas Window Display Contest. The eight cash prizes will be mailed to the winners. We congratulate the winners in securing prizes in what was probably the largest and most successful window display contest ever conducted by Hardware and Metal.

Prize Winners---Places 5000 and Over

First Cash Prize.—Joseph T. Thompson, Mills Hardware Co. (King Street store) Hamilton, Ont.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143-153 University Avenue **TORONTO, CANADA**

Montreal Branch, Southam Bldg. **Winnipeg Branch, Union Trust Bldg.**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

FIRST PRIZE WINDOW—OVER 5,000

as dressed by J. Thompson, Mills Hardware Co. (King St. store), Hamilton, Ont. A range of Christmas gift lines suitable for any member of the family is shown, with each article plainly price-marked. The generous use of glass shelving at the sides and on pedestals throughout the display allows it to be built up so that a greater range of goods is shown without detracting interest. This arrangement is pleasing and effective. The background is of painted wallboard. The display is reported to have brought good results.

FIRST PRIZE WINDOW—UNDER 5,000

as dressed by C. H. Johnston, of Gibb, Brown & Odell, Ltd., Hanna, Alberta. Seasonable goods in a wide range are tastefully displayed and many useful gifts for various members of the family are shown without any appearance of overcrowding. Price tickets are used generously, as are also window cards and advertising literature. The three pyramids make an effective background for the display; a novel means is used of showing pocket cutlery, and the Christmas decorations are not overdone.

Any Profit in Gasoline From Pump?

A Western Hardware Merchant Complains That the Volume Of Gasoline Varies With the Temperature—Oil Company Officials Say Biggest Sale is in Summer When Volume of Gasoline Exceeds Gallonage on Temperature Basis

DISCUSSING the points outlined in this letter from "A Western Hardware Merchant" in regard to the sale of gasoline from a curb pump, an official of the Imperial Oil Company pointed out to Hardware and Metal that it was an established fact that all petroleum products, like many other liquids, expanded in volume when heated and contracted when cooled. Thus a measurement of gasoline from an ordinary curb pump would not pump out as many gallons of gasoline from the tank in the winter as in the summer season.

Two Means of Delivery

Two means of delivering gasoline are followed by this company and by all other oil companies. In the city delivery is by tank wagons where the measurement process is used. Under this system and because of the fact that the average temperature is the same when the wagon is filled as when it is delivered there is little or no deficiency in volume in what the city hardware merchant receives and what he sells. The system of delivering gasoline in the rural districts is, however, by means of drums. It is quite evident that this is the only means of delivering gasoline to districts inaccessible to the tank wagons. The drums are filled by weight. This is thought to be the most equitable plan. Using tank wagons the weight system, obviously, could not be used.

Weighed at 60 Degrees

The basis of the weight system is gasoline at 60 degrees. It is quite apparent that if the temperature of the atmosphere is above this, the gasoline will have greater volume than when the temperature is below this point. This is where the difference comes in. It is pointed out by the official referred to that the merchant stands to gain by this process, rather than lose, because of the fact that his biggest sales come in the summer season, when if the temperature is above 60 degrees the gasoline sold him by weight will have larger volume than if sold by measure. On this basis it is figured that while there may be some slight deficiency in the cold weather this is more than evened up by the advantage in the summer, and meanwhile the oil companies claim to have no better means of delivery. This one company, it was stated, has over five hundred distributing centres located throughout Western Canada in order to minimize any difficulty in the supplying of gasoline to the trade.

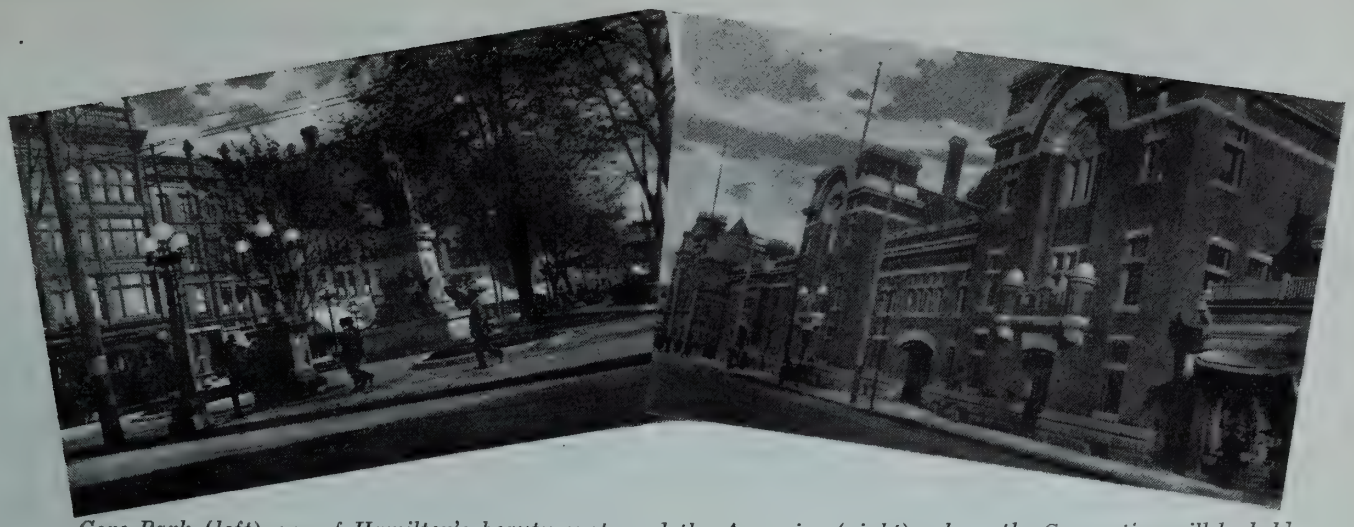
"IS THERE ANY PROFIT IN SALE OF GASOLINE FROM CURB PUMP?"

1.—Does the average hardware merchant include the sales of this along with the general line of business, or does he really know the truth, that he is handling gasoline practically at a loss?

2.—How many (I will venture to say very few) hardware merchants in the country take the reading of the pump when the tank is empty and add the gallonage of the drums put in and test same out. If they do they cannot get the gallonage to pan out. Every hardware man should do this and see the results. They will surprise him.

3.—In buying gasoline does the merchant buy a gallon of expanded gasoline and sell a gallon of contracted gasoline, thus losing in gallonage or losing in supposed profits which do not exist.

4.—Why should the merchant sell a larger gallon than he receives? The Government sends a man around to test these pumps this merchant pays for. Why then cannot he demand his pumps tested with a gallon of gasoline heated up to 60 degrees temperature or somewhat on the basis he buys?



5.—I know of a certain garage man who could not get his drums to come out to nearly what they were marked, and he took the matter up with the Provincial Government, and they informed him that he would have to take the matter up with Ottawa or the civil courts. Then—which is the strongest, the oil companies or the Government.

6.—There is no doubt a certain loss by evaporation, but nothing like there used to be when gasoline was up to a higher test, nor yet is there any such a difference as this.

7.—I have heard it often said that if one were to draw off the contents of a drum of gasoline (in a gallon-tested Imperial measure) in the summer time, and kept tab of same, he would find it considerably short.

8.—I would like to present this matter to the earnest consideration of all hardware and garage men in your magazine and hear their views on the matter from merchants who are really in the business to show a profit, or who really care enough about their business to know if they are handling gasoline at a profit or really a loss.

A WESTERN HARDWARE MERCHANT.

Gore Park (left) one of Hamilton's beauty spots and the Armories (right) where the Convention will be held.

Attractions of the Convention City

Comfortable and Adequate Accommodation for Convention Sessions and Exhibits—Social and Entertainment Facilities Combined With Importance of Hamilton as an Industrial Centre Make It a Suitable Gathering Place for Ontario Hardware Merchants

THE City of Hamilton, where the convention of the Ontario Retail Hardware Association will again be held this year, has much to recommend it as a suitable centre for a gathering of hardware merchants from the province. It is well located with reference to the important trading centres of the province; it has attractions from the standpoint of beauty and social atmosphere, and it is also an important manufacturing centre, particularly in so far as the manufacture of hardware is concerned. The delegates to the convention to be held from February 14-18 inclusive, will have an opportunity on the closing day of the session to visit a number of the manufacturers in Hamilton, whose products are handled by the hardware trade.

There are many beauty spots in Hamilton, though these are of course seen to best advantage in the summer season. The city also boasts of good hotel accommodation, theatres, restaurants, etc., so that the social requirements of convention delegates should be well taken care of.

Will Use New Armories

The new Armories, on James Street, one of the most recent additions to Hamilton's larger buildings, has been secured by the officials of the association as a meeting place for the majority of the sessions and also for the exhibits to be shown by approximately seventy manufacturers. The building is shown herewith. Here an orchestra will play every afternoon and hardware merchants may visit the various booths, renewing acquaintances and discussing trade questions with those whose products they sell. The other photo shown above is of Gore Park, one of the beauty spots of Hamilton, located in the centre of the city's wide main street.

The natural advantages which the city possesses have done much to bring Hamilton to the important position it now occupies as a manufacturing centre. No effort has been spared by the city officials and by the industrial leaders already located in Hamilton to secure new industries and these efforts have been well rewarded.

Terminal Facilities

The city is well located as a terminal for railway and lakes transportation. Recent work for the development of its harbor facilities have cost the city in the neighborhood of twenty million dollars. This development provides for the reclaiming of nearly nine hundred acres of land to be used for industrial purposes and to provide dockage, supplementing the present facilities. Some idea of how this development will improve the city's shipping facilities is gleaned from the fact that docks of six miles in extent are provided, having slips six hundred feet long and two hundred feet in width.

The Birmingham of Canada

Evidence of the city's great industrial activity is seen by a glance at the profusion of tall smoking chimneys. Truly Hamilton may be classed as the "Birmingham of Canada," with its industries numbering nearly five hundred and employing more than thirty thousand workers. Cheap electrical power through its close proximity to Niagara has been an important factor in developing Hamilton industrially.

From the standpoint of a home city, Hamilton is not found wanting, with its attractive residential districts bordering the Mountain and its outskirts reaching out toward the fruit land of the Niagara peninsula. In schools, churches and other educational mediums, Hamilton also ranks well according to its population.

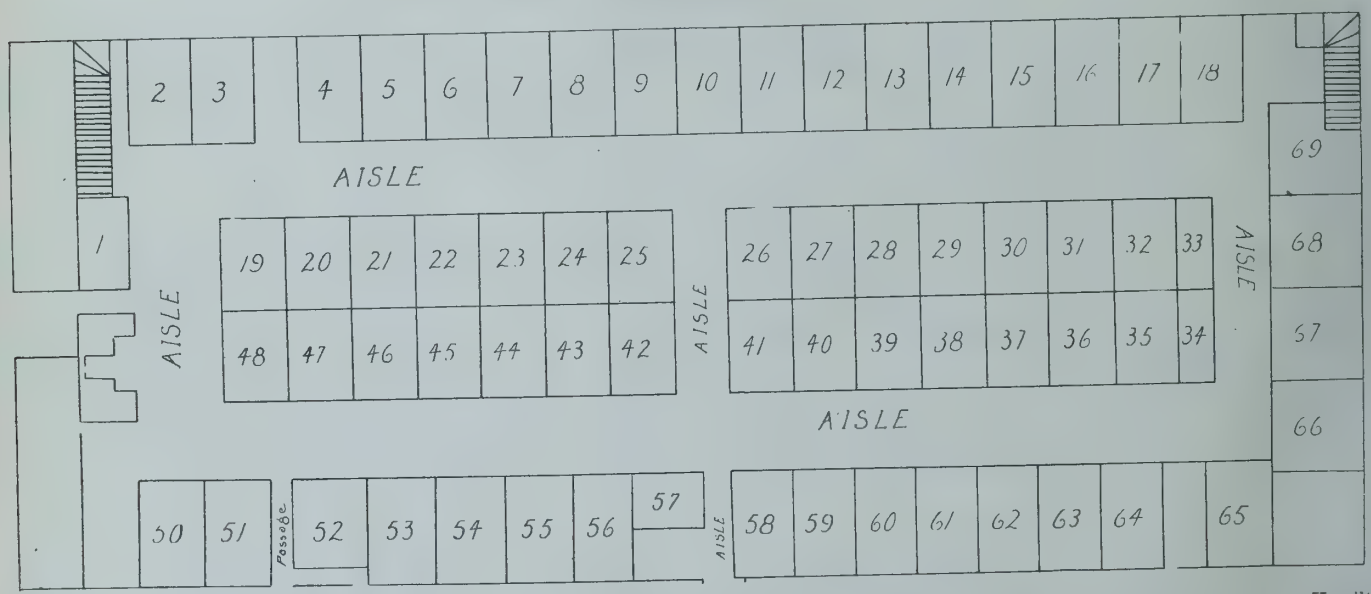
All Set for the Hardware Convention

Many Interesting and Important Topics to be Discussed by Authorities—Free Discussion by Retail Merchants is to be the Keynote

WHEN the curtain has rung down on the closing session of the 16th annual convention of the Ontario Retail Hardware Association in Hamilton next week, it will be too late for the hardware merchant, eligible for attendance, to calculate the advantages he would have secured by gathering with his fellow tradesmen and solving together the difficulties facing the trade. Now is the time to calculate the advantages of such a convention and to act on these calculations. Present conditions in the trade are unsettled, many hardware merchants are asking what policy to follow in solving the problems presented. These will all come in for full discussion during the gatherings and a definite line of action be decided upon.

At least two moving pictures of industrial processes interesting to hardware merchants will be shown, thus encouraging a detailed knowledge of lines being sold in this trade and visits will be paid to Hamilton hardware industries, where further knowledge of hardware lines in process of manufacture can be gleaned.

Then there will be brief, pointed addresses by leaders in various branches of manufacture, wholesale and retail trade, dealing with conditions and the problems facing each department. The outlook in iron and steel trade will be dealt with by Robert Hobson, president the Steel Company of Canada, and other branches of manufacture will be outlined by J. M. Taylor, president Taylor-Forbes Co.; B. J. McCormick, general sales manager Canada Foundries & Forgings, Ltd.; Col. A. M. Hatch, Canada Steel Goods Co.



The paint and oil trade will be outlined by W. J. Lortie, Toronto manager Dominion Linseed Oil Co.; John Irwin, McArthur-Irwin Co., Montreal.

Conditions in the wholesale hardware trade will be outlined by Col. Robert Starke, president Canadian Wholesale Hardware Ass'n, and by S. H. Alexander, Wood, Alexander & James, Hamilton, Ont.

The retail trade will be dealt with by Nelson Mills, vice-president of the O.R.H.A.; G. E. May, Toronto; F. B. Smith,

Convention Program of Ontario Retail Hardware Association

SIXTEENTH ANNUAL CONVENTION FEBRUARY 14-15-16-17-18 HAMILTON, ONT.

MONDAY, FEBRUARY 14TH

At Royal Connaught Hotel

2.30 p.m.—Meeting of Executive.

4.00 p.m.—Registration and enrollment of members.

7.30 p.m.—Reception and Smoker. For Members, Exhibitors, Travellers and Visitors.
Moving Picture. Industrial.

Note—All further Sessions will be held in Lecture Hall at Armouries. Members are specially requested to be prompt in attendance at opening of sessions, in order to carry program through on schedule time.

TUESDAY, FEBRUARY 15TH

In Lecture Hall—Armouries Building, James St., N.

9.00 a.m.—Opening of Business Sessions.

9.30 a.m.—Greetings from Mayor, and from Representatives of Manufacturing and Wholesale Trade.

10.00 a.m.—President's Address—Mr. Ed. Wanless.
Secretary's Report—Mr. W. F. Macpherson
Treasurer's Report—John Caslor.
Auditors' Report—Messrs. Matthewson and Peacock.

Receiving and Disposal of Reports of Officers. Appointment of Resolution and Convention Committees.

11.00 a.m.—Visit New Warehouse of Wood, Alexander & James, who extend to all an invitation to inspect their New Warehouse.

Tuesday Afternoon.

1.30 to 6.00 p.m.

Visit Exhibits in Armouries.

For practical education in the lines of goods you sell, a close examination of the various excellent Exhibits, is easily one of the best features of the Convention. There you will meet the Travellers you know, Salesmanagers with whom a personal acquaintance is a decided advantage, General Managers and Company Presidents, all of them ready to discuss business affairs and brim full of practical pointers in sales promoting.

SPEND LOTS OF TIME WITH THE EXHIBITORS.

Tuesday Evening.

7.30 p.m.—Presentation of report of Executive Committee on Permanent Secretaryship.
A conception of the duties and scope of an Asso-tion Secretary.—President Wanless.
What the Secretary owes to the members and what the members owe to the Secretary.—Secretary Macpherson.

8.00 p.m.—Notice of motion from 1920 Convention.
Discussion and disposal of report of Executive Committee.

8.15 p.m.—Nomination of Officers.

8.20 p.m.—A Game of Cards Every card headed, "What I want to know about the Hardware business." All questions to be answered first by the members, then by the President or Secretary.

9.15 p.m.—A film story of Plymouth Rope and Binder Twine. Produced by the Plymouth Cordage Company, North Plymouth, Mass., who have kindly consented to come and put on for our Association. and which will surely be appreciated by the members. Shown in nine parts:—
1—Growth and cultivation of Manila Fibre.
2—Production of Sisal Fibre.
3—Factory Panorama—arrival of hemp steamer, docking and unloading scenes.
4—Opening the fibre—its preparation and spinning. Tarring and putting up Lathyarn.
5—How Binder Twine is made. Spinning, testing for length and strength, balling, sacking, warehouse facilities for shipping. Harvest scenes.
6—Machine-made Rope.
7—General Factory scenes. Binding off coils, shipping, etc. End of the day.
8—Old-time method of hand spinning by a rope maker 90 years young.
9—Modern Rope-walk practice.

WEDNESDAY, FEBRUARY 16th.

Lecture Hall, The Armouries.

9.00 a.m.—Reports of Convention Committees.

9.30 a.m.—Business prespects for 1921.
"The Iron and Steel Market"—Robert Hobson, President the Steel Company of Canada.
"Manufactured Products"—John M. Taylor, President Taylor-Forbes Company; B. J. McCormick, General Sales Manager Canada Foundries & Forgings; Col. A. M. Hatch, Canada Steel Goods Co.
"Paint and Oil Trade"—W. J. Lotie, Toronto Manager Dominion Linseed Oil Co.; John Irwin, of McArthur-Irwin Co., of Montreal, representing the "Save the Surface" Campaign Committee.
"The Wholesale Trade"—Colonel Robert Starke, President Canadian Wholesale Hardware Assn.; S. H. Alexander, Wood, Alexander & James, Hamilton, Ont.
"The Retail Trade"—Nelson Mills, Vice-President O.R.H.A.; G. E. May, Toronto; F. B. Smith, Belleville, G. A. Binns, Newmarket; A. J. Wright, Hamilton.

11.30 a.m.—Mutual Fire Insurance as carried by Retail Associations—Mr. Norman S. Jones, Manager for Canada Northwest Mutual.

Wednesday Afternoon.

1.30 p.m. to 6 p.m.—Visit Exhibition in Armouries. Music by Orchestra.

7.30 p.m.—Complimentary Banquet tendered by Wood, Alexander & James, of Hamilton.

THURSDAY, FEBRUARY 17th.

Lecture Hall—The Armouries.

9.00 a.m.—Reports of Committees.

9.15 a.m.—Election of Officers.

9.30 a.m.—The Chain Store Proposition—F. A. Maycumber, Sales Manager Winchester Repeating Arms Co., New Haven, Conn.

10.00 a.m.—Co-operative Buying—Mr. William Hargreaves, Manager Drug Trading Company, Toronto.
Questions and discussion of addresses on chain stores and co-operative buying.

11.00 a.m.—Exhibitors' hour. Short, pithy addresses by Exhibitors and Salesmen on "Selling Points."

12.30 p.m.—Entertainment

Thursday Afternoon.

1.30 to 6 p.m.—Visit Exhibits in Armouries.

7.30 p.m.—A talk on advertising to bring results.

8.00 p.m.—Members' Session Question Box. Answers to cards on file.

Smoker and entertainment.

FRIDAY, FEBRUARY 18th.

9.30 a.m.—Visit to Factories. Hamilton is the centre of hardware manufacturing industries and a visit to the various factories is both instructive and enjoyable.

Hints on Seasonable Advertising

The reproduction of some sample advertisements herewith will give some idea of the lines being advertised by others in the trade in all parts of Canada, and will impart some ideas or suggestions which others may incorporate in their local advertising.

THE three illustrations herewith show timely ads. written by Canadian hardware merchants, each making good use of their space by the generous use of illustrations, brief descriptions, prices and some distinctive features.

Hall Bros., Cornwall, Ont., brighten up their advertisements with a little illustrated talk, headed so as to arouse interest. A brief sketch is made of some interesting occurrence and is linked up with some message about the store. This one reads: 'Twas said—A farmer had persuaded one of his town friends to accompany him in the two-wheeled cart on a jaunt into the country. The horse seemed to resent the stranger aboard and taking the bit between his teeth, bolted. "I say, Bill," said the townsman, "I'd give five dollars to be out of this." His friend replied, "Don't be so free with your money, you may be out for nothing in a minute."

"Figuratively speaking, you'll not be sorry that you climbed in our wagon when you buy hardware of us—we don't say that you'll get something for nothing, but we do claim that there's full value for every dollar you spend here and you'll get lots of satisfaction out of every article from this store. If you want to journey on the high road to real economy you're welcome to ride with us."

Stanley Mills & Co., Hamilton, Ont., devote good-sized space to an ad. on aluminum ware, emphasizing the point that the initial cost is the only expense and the durability of these utensils saves the continual buying of new utensils. Aluminum tea kettles, dishpans, soup strainers, coffee percolators, casseroles, sauce pans, double boilers, stew kettles, covered roasters are dealt with separately and well illustrated. An invitation is extended the reader to visit the kitchen department.

A miscellaneous grouping of articles is found in the ad by **The Northern Hardware Co., Edmonton, Alta.** Toilet clippers, shaving brushes, wash boilers, shaving soap, paint brushes, razor hones, butcher saws and cleavers are all mentioned. Here again illustrations are used profusely and the division of the ad into small sections giving a brief description and prices on each line illustrated, makes a very attractive layout.

Fireplace furnishings are featured in an ad. by **Rice Lewis & Son, Ltd., Toronto.** An illustration of a shovel, tongs, poker and brush on a stand is shown and the ad reads: "This is the season when the joy of sitting round a grate fire can hardly be exaggerated, and at the end of a busy day it adds considerably to the pleasure and comfort of life to admire a beautifully-designed set of furnishings. We have a variety of designs and styles, particularly featuring the antique copper finishes in fenders and combination fire sets, basket grates, screens, andirons, coal boxes and hods. In black, brass and bronzed finishes."

"Glowing, grateful heat—anywhere—anytime," is the heading on an ad featuring oil heaters, by **W. H. Thorne & Co., Ltd., St. John, N.B.,** which continues: "An oil heater is all that is required to take the chill from the bedroom while you and the kiddies are dressing in the mornings. The easiest and most economical way is to use a ——oil heater which is clean, convenient, odorless, smokeless and absolutely safe (you can't turn it too high). It

can be easily carried from room to room. There are several styles of —— heaters which you'll find in our Oil Heater section."

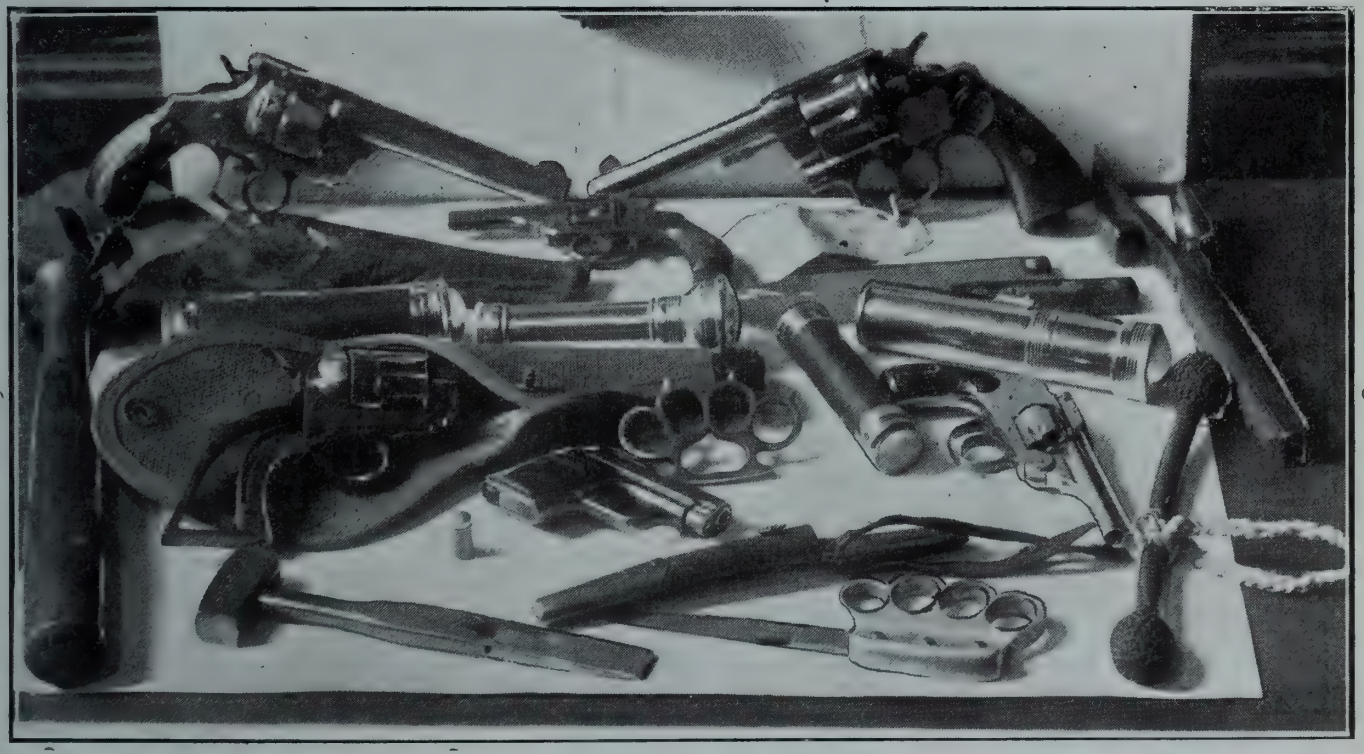
"Our stove experience is at your service," reads a stove ad by **J. R. Myers & Sons, Ltd., Stratford, Ont.**, which continues: "If you want a new stove installed or your present one repaired, we can give you excellent satisfaction in either case. We recommend the —— range for heavy work and the —— for small kitchens because they are properly constructed. They produce the most heat with the least fuel. Their popularity is due to the satisfactory service they are giving."

This ad also mentions waffle irons under the heading "Waffles for breakfast—hurry." Continuing: "There will be some scramble when mother announces waffles for breakfast, if they are made in one of our new waffle irons. They make it easy to cook delicious cripsy waffles, in short order. Substantially and durably made—easy to turn over.

"Labor-saving house wares for the farm home" is the subject of a recent advertisement by **Dundas Bros., Cobourg, Ont.**, which points out that the work for the woman in the farm home may be made much easier by the use of proper articles to save labor. Under this heading are listed washing machines, wringers, ironing boards, oil heaters, heaters for the car or buggy, lamps, sweepers, furniture polishes and floor mops, bread mixers, covered roast pans, food choppers, etc. It points out that a complete line of up-to-date cooking utensils will save a lot of kitchen work and worry.

A section of the ad is devoted to **ranges.** Under an illustration of the particular line handled in this store is the heading, "Make it your kitchen partner." Continuing, the ad. says: "If your kitchen is equipped with a ——— range this winter you can produce cooking and baking results par excellence. There are many users who attest to the ability of this range. They state with enthusiasm that it lessens anxiety and adds more interest to every meal. We are very anxious that you should see one of these ranges —you are therefore cordially invited to visit our store and have the ———— range demonstrated. You will be under no obligation."

ALL SET FOR THE HARDWARE CONVENTION



(Continued from page 44)

Belleville; G. A. Binns, Newmarket, and A. J. Wright, Hamilton. Then the exhibits of manufacturers will provide an opportunity of ready intercourse with the representatives of many firms whose products are handled in the trade.

Other special speakers secured for the occasion include: Norman S. Jones, manager for Canada of the Northwest Mutual Insurance Co., speaking on mutual fire insurance for retailers; F. A. Maycumber, sales manager Winchester Repeating Arms Co., New Haven, Conn., speaking on the chain stores; Wm. Hargreaves, manager Drug Trading Co., Toronto, speaking on co-operative buying.

There will be much instructive data of value to retail hardware merchants in these addresses and every merchant attending will have an opportunity of discussing any points of special interest. The keynote of the whole convention is to be a free exchange of ideas among retail hardware merchants. The gathering is in the interests of hardware retailers and a large turnout will be the best evidence that the plans and the work done by the officials has been appreciated.

No! This is Not a Window Display

These articles, or at least some of them, may have figured in the display of a hardware store at some time, but the group shown herewith represents a collection of flashlights, revolvers, cartridges, knives, knuckle dusters, jimmies, and other weapons of violence as taken by the Toronto police from burglars and hold-up men whose recent depredations in this city have caused much alarm. Some of those from whom these articles were taken will spend the next few years behind another kind of hardware.

Hardware Letter Box

RECORD VISE

James Cowan & Co., London, Ont.—Can you tell us who handles a vise called the Record?

Answer.—This vise is made by the C. & J. Hampton Co., Ltd., Sheffield, England, and can be procured from the Aikenhead Hardware Co., Ltd., Toronto, Ont.—Ed.

* * *

PEERLESS INCUBATOR

The Disney Hardware & Implement Store, Whitby, Ont.—Would you be good enough to give us the name of the manufacturer of the Peerless Incubator?

Answer.—The makers are the H. M. Sheer Co., Quincy, Illinois.—Ed.

* * *

COOPER'S SHEEP DIPPING POWDER

Smith's Hardware, Newmarket, Ont. — Would you be good enough to inform us where we could procure Cooper's Sheep Dipping Powder?

Answer.—The manufacturers of this preparation are Wm. Cooper & Nephews, 152 West Huron St., Chicago, Ill., U.S.A., and the Co-operative Wool Growers, Ltd., Simcoe St., Toronto, Ont., are the exclusive agents for Canada.—Ed.

* * *

TRUNK AND SUITCASE HARDWARE

John Fennell & Son, Kitchener, Ont.—Can you give us information of manufacturers of trunk and suitcase hardware, that is hinges, locks, latches, etc?

Answer.—The Canadian Yale & Towne, Ltd., St. Catharines, Ont.; Peterborough Lock Mfg. Co., Ltd., Peterborough, Ont.; F. A. Mahon, Jr., Montreal, Que.; Brainerd Mfg. Co., East Rochester, N.Y.; McKinney Mfg. Co., Pittsburgh, Pa.; Stanley Works, New Britain, Conn.; Worcester Metal Goods Co., Shelton, Conn.; Eagle Lock Mfg. Co., Terryville, Conn.; American Brass Novelty Co., Grand Haven, Mich.; Aetna Brass Mfg. Co., Cleveland, O.—Ed.

* * *

AUTOMOBILE TIRE COVERS

Sumner & Co., Ltd., Moncton, N.B.—Would you let us have the address of any firm manufacturing automobile tire covers in Canada?

Answer.—Cutten & Foster, Ltd., Church St., Toronto, Ont.; The Woodworth Mfg. Corporation, Niagara Falls, Ont.—Ed.

* * *

REPAIRS FOR QUEEN OAK

W. J. Roche, Sturgeon Falls, Ont.—Where can we procure repairs for the Queen Oak coal heater?

Answer.—Our information is that this stove is not now being made and patterns have been destroyed, but if you could send parts to McIntyre & Taylor, 501 Queen St. W., Toronto, they would be able to supply you with repairs.

* * *

REPAIRS FOR PEERLESS OAK

G. M. Fischer, Green Front Hardware, Preston, Ont.—Will you kindly inform me where I can get repairs for the No. 16 Peerless Oak Heater.

Answer.—We understand that the Beach Foundry Co., Ltd., Ottawa, Ont., and Tudhope Anderson & Co., Orillia, Ont., both made a Peerless Oak Heater, but they are both out of date now, and repairs cannot be had. McIntyre & Taylor, 501 Queen St. W., Toronto, could make your castings if they had the old parts for a pattern.

* * *

ACCOUNT COLLECTION SERVICE

Subscriber.—Can you give the names of account collecting agencies where slow pay accounts may be placed for collection?

Answer.—We suggest the Nagle Mercantile Agency, of Laprairie, Que., who make a specialty of this work. The Ontario Retail Hardware Association, of which W. F. MacPherson, Prescott, is secretary, also run a collection service for their members.

* * *

SUNBEAM OAK HEATERS

W. A. MacLaren, Hensall, Ont.—Kindly advise where we can procure repairs for the Sunbeam Oak Heaters.

Answer.—The Sunbeam Oak Heater is made by the McClary Mfg. Co., Ltd., London, Ont., Toronto, etc., who can supply all repairs.

* * *

GAINADAY ELECTRIC WASHER

Andrew Gwack, Cudworth, Sask.—Kindly tell me who makes the Gainaday electric washing machine.

Answer.—The Pittsburgh Gage & Supply Co., 30th & Liberty Ave., Pittsburgh, Pa.

* * *

DISH-WASHING MACHINES

The Coslett Hardware Co., Fort William, Ont.—Will you advise us where we can procure dish-washing machines?

Answer.—Dish-washing machines suitable for domestic use can be procured from the following: The Hurley Machine Co., 413 Yonge St., Toronto, Ont.; The Walker Dish-washer, made by the Walker Dish-Washer Co., Syracuse, N.Y.; The Ross Sales Co., 651 Yonge St., Toronto; the "Drumfire," made by the Dietz Mfg. Co., Cincinnati, O.; The Walcott Mfg. Co., Hartford, Conn., maker of the "Mermaid"; the Whirlpool Mfg. Co., Philadelphia, Pa., maker of the "Whirlpool"; Fearless Dish-washer Co., Rochester, N.Y., maker of the "Fearless"; F. G. Street & Co., New York City, U.S.A., maker of the "Victor."

* * *

SHEET IRON MAIL BOXES

Codere & Fils, Ltd., Sherbrooke, Que.—Kindly give us the name and address of the manufacturers of sheet iron mail boxes?

Answer.—If this inquiry refers to the mail boxes used for rural mail delivery routes, the information is that these are made for the Post Office Department and supplied by them to user for a stated amount. W. H. Banfield & Sons, Ltd., Toronto, have made these for the Department here.

* * *

EVAPORATORS AND PANS FOR SAP MAKING

Stanley Hunt, Marksville, Ont.—Will you kindly send me the names and addresses of firms making sap pans and evaporators for maple syrup making?

Answer.—The Steel Trough & Machine Co., Ltd., Tweed, Ont.; Small Bros., Dunham, Que.; The Grimm Mfg. Co., Ltd., Montreal; J. A. Desjardins, Rigaud, Que.

* * *

RED DOT HOCKEY PUCKS

Sumner Company, Ltd., Moncton, N.B.—Kindly advise us who the makers of the Red Dot hockey pucks are?

Answer—The Red Dot brand is owned and registered by the Cragg Bros. Co., Ltd., Halifax, N.S., and all enquiries for same have to be made through them.

* * *

REPAIRS FOR NEW EMPRESS

Thos. D. Pierce, Port Rowan, Ont. — Where can I get repairs for the New Empress range?

Answer.—The New Empress range was made by the D. Moore Co., Ltd., Hamilton, Ont. If they are now unable to supply repairs you can get castings from Grundy Bros., Strathroy, Ont., and from McIntyre & Taylor, 501 Queen St. W., Toronto.

* * *

CHARCOAL IN BAGS

Nelson & Co., Acton, Ont.—Where could we buy charcoal in bags in Toronto?

Answer.—The Standard Chemical Co., Ltd., Royal Bank Building, Toronto; The Charcoal Supply Co., 380 Queen St. W., Toronto.

* * *

MILK BOTTLE HANGER

Dunlop & Co., Ltd., Pembroke, Ont.—Can you give me the address of a firm manufacturing a milk bottle hanger?

Answer.—The Beacon milk bottle holder is manufactured by the Moers-Wright Co., 1400 Broadway, New York City, U.S.A.

* * *

HAPPY THOUGHT RANGES

Warner & Coulter, Lucky Lake, Sask.—Kindly give us name of manufacturers of Happy Thought range and where located?

The McClary Co., Ltd., London, Ont., are now operating the plant of the Wm. Buck Stove Co., at Brantford, Ont., and can supply Happy Thought range or repairs. The McClary Mfg. Co. have a branch at Saskatoon, Sask.

* * *

ALUMINUM

Thompson & Sutherland, Limited, North Sydney, N.S. — Kindly advise best place to buy aluminum suitable for match plates, also pure aluminum?

Answer.—The British Aluminium Company, 265 Adelaide St. W. Toronto; Canada Metal Co., Toronto, specialize in these lines and can supply your requirements.

* * *

STORE FRONT CONSTRUCTION

W. J. McKeeman & Sons, Glamis, Ont.—Can you let us have names and addresses of any firms who make store fronts?

Answer.—The following are firms who specialize in wood and metal store front construction and also the metal work for glass store fronts: Metal Store Front Construction for Glass—The Hobbs Mfg. Co., Ltd., London, Ont; The Consolidated Plate Glass Co., Ltd., Toronto. Metal Store Front Construction—The Beaver Brass Mfg. Co., Ltd., Toronto; Kawneer Mfg. Co., Ltd., Guelph, Ont.; Metallic Roofing Co., Ltd., Toronto. Store Front Construction, Wood—H. J. Sinclair Mfg. Co., 165 King St. E., Toronto; The R. Laidlaw Lumber Co., Ltd., Toronto.

* * *

GOODS ENTITLED TO BRITISH PREFERENCE

W.H.M., Hamilton, Can.—Please advise if you can, the percentage of labor necessary on a product to entitle it to the British Preferential Tariff?

Answer.—We presume you refer to the amount of labor in the countries entitled to the benefits of the British Preferential Tariff, and which is covered in Clause B. on the customs forms as follows:—

"(B) That each article is bona fide the produce or manufacture of a country entitled in Canada to the benefits of the British Preferential Tariff and specified on the invoice as its Country of Origin, and that each manufactured article on the invoice in its present form ready for export to Canada has been finished by a substantial amount of labour in such country and not less than one-fourth the cost of production of each such article has been produced through the industry of one or more British countries."—Ed.

* * *

WOOD CARVING TOOLS

John Fennell & Son, Kitchener, Ont.—Kindly let us have a list of manufacturers of wood carving tools?

Answer.—The Miller Falls Co., Miller Falls, Mass.; Buck Bros., Millbury, Mass.; Holland Carving Tool Works, Holland, Mich.; Peter A. Frasse & Co., 417 Canal, New York City, U.S.A.

INCUBATORS AND BROODERS

The Disney Hardware & Implement Store, Whitby, Ont.—Kindly give us the names and addresses of different firms handling incubators and brooders?

Answer.—These are handled by many wholesale hardware firms, such as Wood, Vallance & Co., Ltd., and J. H. Ashdown, Ltd., Winnipeg; also by wholesale seed firms, including Wm. Rennie Co., Ltd.; Steele Briggs Seed Co., Ltd.; J. A. Simmers, Ltd. Following is a list of some of the manufacturers of these goods: Collins Mfg. Co., Toronto, Ont.; Brett Mfg. Co., Ltd., Winnipeg, Man.; Brandon Heating & Plumbing Co., Ltd., Brandon, Man.; La J. A. Gaulin Compagnie, Ltd., Beauport, Que.; Model Incubator Co., Ltd., Toronto, Ont.; The Buckeye Incubator Co., Springfield, O.; Reliable Incubator & Brooder Co., Quincy, Ill.; Des Moines Incubator Co., Des Moines, Ia.; Prairie State Incubator Co., Homer City, Pa.

CAST MACHINERY SCRAP

Ryan & Co., Amherstburg, Ont.—Can you put us in touch with dealers in machinery scrap metal?

Answer.—The Union Iron & Metal Co., Toronto; Frankel Bros., Ltd., Toronto; Toronto Metal & Waste Co., Toronto; The Northern Iron & Equipment Co., Montreal; A. Spergman, Kingston, Ont.; London Iron & Steel Co., London, Ont.

* * *

ICE CREAM TUBS AND CONTAINERS

The Campbell Hardware, St. Thomas, Ont. —Kindly inform us where we can buy ice cream tubs and containers for shipping ice cream in?

Answer.—Wood Tubs (Cedar)—Fletcher Mfg. Co., Ltd., Toronto, Ont.; C. N. Huehn, Waterloo, Ont.; The Sweeney Cooperage Co., Victoria, B.C. Metal Containers—A. Aubry & Fils, Ltd., Montreal, Que.; The Thos. Davidson Mfg. Co., Ltd., Montreal, Que.; The Fletcher Mfg. Co., Ltd., Toronto, Ont.; The Sheet Metal Products Co., Ltd., Toronto, Ont.; The McClary Mfg. Co., Ltd., London, Ont.

* * *

WINCHESTER STORES AND FACTORIES

T. E. P., London, Ont.—Can you give the names of manufacturing plants taken over by the Winchester Arms Co., and announced in your paper some months ago. Can you also advise number of stores opened by Winchester Co. exclusive of agencies run in conjunction with retail stores?

Answer.—The plants of which we had a record as being taken over by the Winchester Repeating Arms Co. are:—Barney & Berry, Inc., skates, Springfield, Mass.; Eagle Pocket Knife Co., New Haven, Conn.; Napanoch Knife Co., Napanoch, N.Y.; wrench business of Page Storms Co., Drop Forge Co., Chicopee, Mass.; Lebanon Machine Co., Lebanon, N.Y.; Morrill Target Co., Omaha; E. W. Edwards & Co., Bangor, Maine, makers of fishing tackle; bait and reel department of A. B. Hendryx, New Haven, Conn. So far as we know, exclusive Winchester stores have been opened in eight United States cities, but none in Canada. U.S. cities are as follows: Boston, Providence, R.I.; Lawrence, Mass.; Troy, N.Y.; Pawtucket, R.I; Springfield, Mass.; New Haven, Conn; New York, N.Y. —Ed.

* * *

CANADIAN HARDWARE AND IMPLEMENT UNDERWRITERS

Porteous Hardware Co., Ltd., Grand Prairie, Alta.—"Can you give us particulars of Canadian Hardware and Implement Underwriters Association of Winnipeg? Do you think they are financially strong enough to warrant giving them considerable business? The Toronto Saturday Night wrote them up on the 19th January. Your opinion will go with us. We also wish to express our gratification for the real up-to-date information that is found in Hardware and Metal each week."

Answer.—Our information regarding this company is such that we do not think that you need to have any hesitation in placing business with the Canadian Hardware and Implement Underwriters, of Winnipeg. We have made inquiries concerning this company from reliable sources, and the replies have in each case confirmed our opinion. The company is favorably regarded in financial circles. We understand the company is associated with Retail Hardware Mutual Fire Insurance Company, of Minnesota; Minnesota Implement Mutual Fire Insurance Co., of Minnesota; Hardware Dealers Mutual Fire Insurance Co., of Wisconsin.—Ed.

TOY AND GAME MANUFACTURERS

Bennett B. Smyth, Halifax, N.S.—Could you send a list of toy and game manufacturers?

Answer.—A complete list of manufacturers in Canada would contain seventy or more names. Following are a few of the toy and game manufacturers:

Toy Manufacturers—The Thos. Davidson Mfg. Co., Ltd., Montreal, Que.; J. H. Hanson Co., Montreal, Que.; F. J. Appleton & Sons, London, Ont.; Gendron Mfg. Co., Toronto, Ont.; J. E. Beauchamp & Co., Montreal, Que.; Walter Bentley & Co., Niagara Falls, Ont.; A. C. Gilbert-Menzies Co., Toronto; The Biscoe Doll Co., Ltd., Toronto, Ont.; Canadian Toys, Ltd., Hamilton, Ont.; Canadian Novelty & Wagon Co., Preston, Ont.; John Chantler & Co., Toronto, Ont.; Dominion Toy Co., Toronto, Ont.; Emery Mfg. Co., Toronto, Ont.; Macdonald Mfg. Co., Ltd., Toronto, Ont.; Murrayville, B. C., Toy Co., Murrayville, B. C.; Reliance Toy Co., Toronto, Ont.; Schultz Bros., Ltd., Brantford, Ont.; Geo. R. Smith, Dunnville, Ont.; Victoria Toy Co., Victoria, Que.; Western Toy Mfg. Co., Ltd., Vancouver, B.C.; Soren Bros., Toronto.

FIRE ARMS LEGISLATION

Wood, Alexander & James, Hamilton.—"Please refer to page 46 of Hardware and Metal.

"We note a paragraph headed 'Drastic Gun Regulations' which states that it is a criminal offence to sell a rifle without a permit, also under the list of weapons which a permit is required for before they can be legally carried you mention a rifle.

"To our knowledge it is not necessary to secure a permit to purchase a rifle from a retail hardware merchant, neither is it necessary to obtain a permit to carry a rifle for sporting purposes.

"We believe the information contained in this paragraph conveys a wrong impression, and we would ask you to take up this matter with your source of information and if the details are not correct to make a further explanation of the paragraph."

Answer.—Owing to the recent increase in crime, especially in hold-ups involving the use of firearms an act to amend the Criminal Code, assented to by the Federal Government on July 1, 1920, has been brought into prominence just recently by Chiefs of Police in various cities in Canada in an effort to reduce the number of acts of violence.

The amendment to paragraph (a) of section 118 of the Criminal Code and to paragraph (d1) of the said section, as enacted by chapter 46 of the statutes of 1919, provides for the repeal of these sections and the substitution of the following paragraphs, providing for the prosecution of anyone who

(a) not having a permit in form seventy-six, has upon his person, elsewhere than in his own dwelling house, shop, warehouse, counting-house, or premises, or is carrying concealed, a sheath knife, bowie knife, dagger, stilletto, metal knuckles, skull cracker or other offensive weapon that may be concealed upon the person; or

(aa) has in his possession any cannon, machine gun, rifle, gun, revolver, pistol, bomb, or other firearm, or any air gun or any device or contrivance for muffling or stopping the sound of the report of any firearm, without having a permit therefor, which permit may be issued in the same manner, by the same person, and as near as may be in the same form, as in the case of the other permits referred to in this section.

Other amendments now being enforced by the police deal with the necessity of having a permit from the police department before any of the above mentioned weapons can be purchased.—Ed.

ARE TINSMITHS MANUFACTURERS

Hardware Merchant, Fort William, Ont: (Question)—"We carry on a retail hardware business and in connection with same, we have a small tinshop and keep a man part of the season to put up stoves, make stove pipes and between times does small repair work. We do no sheet metal or outside work but sometimes make up special pans and cans to order. We pay 2 per cent. to the manufacturer on our purchases and 1 per cent. to the jobber. Kindly advise through the columns of your paper if we would be considered as a manufacturer and should we collect sales tax on what our man does in the tinshop?"

Answer.—Up until this week the government has been interpreting the strict letter of the regulation which would classify you as a manufacturer. This week, however, there is a tendency to change this policy, possibly in view of the test case being instituted by the merchants to prove the validity of this classification. If your manufacture of stove pipes, eavestrough, etc., is mere for jobs which you have contracted for you are selling direct to the consumer and are classed as a contractor and not a manufacturer. A contractor is classed as a retailer, therefore you, as a retailer should pay 2 per cent. to manufacturers on your purchases, and 1 per cent. to jobbers on purchases. No sales tax will be charged by you to consumers providing you are definitely classed as a retailer. This will depend upon the percentage of manufacturing to retailing in your case. To establish this point you will have to put the details before your nearest collector of Inland Revenue. Local collectors have been given authority to make a ruling in such cases.—Ed.

* * *

EUREKA ANTI-SPLASHERS

J. T. Jacques, 64 St. Joseph St., Quebec, Que.—Kindly let us know who are the makers of the "Eureka" Anti-Splashers for plain and hose end bibbs?

Answer.—The information is that these are made by the J. H. Seed Filter & Mfg. Co., Franklin St., New York City, U.S.A., and they can be procured from Lyons & Marks, Yonge St., Toronto, Ont.

* * *

ELECTRIC DISH WASHERS

Matthews Hardware Co., Burlington, Ont. —Kindly let us have a list of manufacturers of electric dish washers?

Answer.—The Walker Dish Washer, made by Walker Bros. Co., Syracuse, N.Y., can be had of the Hurley Machine Co., 413 Yonge St., Toronto, Ont.; The Drumfire Washer, made by the Dietz Mfg. Co., Cincinnati, Ohio, can be obtained from the Ross Sales Co., 651 Yonge St., Toronto, Ont. Other makers include: F. G. Street & Co., New York City, U.S.A.; Insinger & Co., Philadelphia, Pa.; The Walcott Mfg. Co., Hartford, Conn.; The Electric Maid Co., Davenport, Ia.; The Whirlpool Mfg. Co., Philadelphia, Pa.; Redmon, Edgar & Redmon, Cedar Rapids, Iowa; The Fearless Dishwasher Co., Buffalo, N.Y.

* * *

GAINADAY ELECTRIC WASHER

Andrew Gwack, Cudworth, Sask.—Can you tell me who is the maker of the Gainaday Electric Washing Machine?

Answer.—The Pittsburgh Gage & Supply Co., Pittsburgh, Pa., 30th and Liberty Sts.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, FEBRUARY 12, 1921

THE DOMINION Government meets at Ottawa within the next few days. Let us all hope that never again will we have a budget containing such perplexing, ridiculous and unworkable tax features as the one brought down at the last session.

* * *

LET US also hope and pray that the "powers that be" consult business men in all branches of trade and particularly the retailers before deciding upon the new forms of taxation which we understand are now in the process of governmental consideration.

* * *

A TORONTO merchant recently sent out calendars to his customers. On the calendars is painted a quaint little house and below is the inscription, "The Dearest Spot On Earth." Some of his customers are wondering whether this refers to the house or the store.

* * *

SHATTERED almost in its inception, the United States Government employees' store scheme, which was expected to make the retail merchant superfluous to the army of Government clerks in Washington, D.C., already has begun to disintegrate. Its affairs, which have been going from bad to worse, have now reached the verge of a smash, in which the "co-oppers" face the necessity of putting up out of their own pockets a deficit of more than $8,000. Costs money to learn how to run a retail business.

* * *

THERE has been a noticeable improvement in the "business feeling" during the past couple of weeks. This is particularly true regarding the hardware trade. The hardware trade is in better shape than almost any other class. The hardware trade of Canada has been built up on a firm foundation, selling necessities, not luxuries. In the temporary suspension of buying caused to a considerable extent by much idle gossip and some careless newspapers, the hardware trade has naturally felt the slump in a small degree. The turn of the tide is at hand and if manufacturers and wholesalers are ready to do their part in bringing things back to normal, as many already have, they will find the retail hardware trade willing to meet them half way.

* * *

A TRADE paper is complaining editorially that it is being overlooked by retailers who are alleged to have sent pictures of their stores, etc., to a paper located at a distant point and asks why they do not send material of this kind to a paper nearer home. As the gentle hint obviously refers to some illustrated articles which have appeared in Hardware and Metal, we hope we may be pardoned for replying. Hardware and Metal secured these feature articles by getting out and hustling for them, paying railway fares, photographic costs, etc. Thirty-three years' experience in publishing trade newspapers has taught us that the best way to get news, market information, feature articles, etc., is to go after them. Some people say "that all things come to him who waits," but here's a rule that's slicker: "The man who goes for what he wants will get it all the quicker."

Sell With a Conscience

THE ASSOCIATED Advertised Clubs of the World have handed out some good, sound advice, some of which has previously been published, but is worth repeating at this time. Goods and services, states the Club, no longer sell themselves. They must be sold. Good salesmanship is the order of the day. It is a help-the-buyer kind. It puts Service on a par with Profit. Its aim is to attract buyers by making buying attractive. Merchants and all sellers are not merely getting business, they are building it on foundations of integrity. Just recently the president of a national business spent thousands of dollars to apologize to the public for misstatements in advertising published in hundreds of newspapers by his company. He said policies of truth telling and fair treatment must be maintained by his company at any cost because he valued the confidence of the public and the goodwill of his business too much to have it impaired by wrong practices.

Legitimate business believes in "playing fair" and "dealing square." It aims to safeguard the interests of the purchaser in all transactions. With the spirit of Service as a guiding force, business is worthy of your faith on which its activity relies. There is the hub of the whole matter.

Some say there has been a breaking down of faith by the recent scramble to "get while the getting is good." Even if that is so, we must dismiss from our minds that phase of reaction from war endeavors and declare for new, high standards. To-day, let us start putting our shoulders to the wheel, all together. Let us Work a little more, Think a little harder, Buy without forebodings,—and Sell with a Conscience. We must keep a clear eye out for the other fellow's interests as well as our own.

The one rule that assures a full measure of prosperity is the Golden Rule. It is simple, sure, safe. Work this rule and let it rule your work.

Value of the Convention

THERE probably was never a time when the retail hardware trade needed counsel and direction as much as it does right now. For a number of years the trade experienced unprecedented conditions. Following on the short-lived depression after the declaration of war, business became active, prices commenced upon a long upward trend and it was comparatively easy for the merchant to make money, provided he could secure the stock. The crisis was reached a few months ago and the turning process commenced. Whether or not the most serious part of the new phase has passed is not so much the question as what policy is best to follow in the retail hardware trade now that prices are gradually adjusting themselves to lower levels.

Many problems come up in connection with the present movement and merchants can only look to authorities in their trade and to a free discussion among their own kind to arrive at a definite line of action which will carry them over the readjustment period with a minimum of business dislocation. These are the problems to be discussed at the forthcoming convention of the Ontario Retail Hardware Association. This is why every hardware merchant in the province should be in attendance.

Conventions are an excellent means of exchanging ideas on trade subjects and it is only by means of a large attendance that a representative and authoritative opinion can be secured as to the best policy to follow. The few days spent at a convention can well be spared, particularly at a time like the present, and it is hoped there will be a large representation of Ontario hardware merchants meet in Hamilton next week.

The Proposed Tax on Turnovers

Effect of the Turnover Tax on Everyone Along the Line From Manufacturer to Retailer—The Effect Upon the Distribution of Hardware

An article in Hardware Age by Fayette R. Plumb, past president National Hardware Manufacturers' Association of the United States

THE question of what form of taxation will supersede the now extinct luxury tax on the retail trade is uppermost in the minds of hardware merchants at the present time. A number of forms of turnover tax have been suggested in Hardware and Metal in the past, and continuing the effort to put before the trade all the facts concerning this form of taxation the following article by Fayette R. Plumb is reproduced:

Considerable publicity has been given to the proposal that a tax should be levied at a small rate on every sale or turnover of goods, wares and merchandise. This proposal has been expanded to include sales of services, real property, capital assets, etc., and on rent and interest. Some, seeing the objections to a tax on every sale at each turnover, propose a tax on all final sales. Generally, however, most sentiment has crystallized behind the proposal for a tax at a small rate, spoken of as at 1 per cent., on the sale at every turnover of goods, wares and merchandise.

It is claimed that such a tax would produce sufficient revenue to abolish practically all other taxes on business and to considerably reduce the higher surtaxes on personal income. To accomplish these purposes the tax would have to produce a revenue of about two billion dollars. Such a proposal makes a very strong appeal. The ordinary business man visualizes himself drawing a check once a month or once a quarter for one per cent. of the amount of his sales for the preceding month or quarter and being rid of his tax worries thereby. In the first place, the rate of the tax to produce this much revenue would not be 1 per cent., but 2 or three per cent., depending on how many exemptions from the tax were made by Congress. Business men are also attracted by the argument that they would be paying their taxes currently and not piling up a liability for a whole year which they would have to pay in the following year. The matter of paying a sales tax would be simple compared to the complexities of the excess profits tax, but nearly everybody agrees that the excess profits tax should be repealed. The "pay-as-you-go" principle would have this disadvantage, that in the first year it was applied a business would have double taxes to pay—the sales taxes for the current year and the taxes levied against income and profits of the preceding year.

How It Would Work Out

The strong appeal which the sales tax makes is that business organizations will simply act as collecting agencies for the government; that the tax will be passed on to the consumer. It is generally suggested that it should be added as a separate item at the foot of each invoice. This sounds easy and might have been possible on an advancing market where there appeared to be no limit to the prices consumers would pay. At the present time, however, the effort of every line of business is to so reduce its costs as to be able to sell its product at prices which consumers will pay.

Even a tax of 1 per cent. on his gross sales would under normal conditions be as much as a tax of 40 per cent. of the net profits of the average hardware jobber. This is based upon the fact that the average hardware jobber turns his capital four times a year and makes a net profit of 2 1-2 per cent. at each turnover. Could the average hardware jobber pass on to the retail trade a tax equivalent to 40 per cent. of his net profit, which the mail order houses do not have to pay? Suppose the rate were 2 per cent. or 3 per cent. What would be likely to happen? The tax proposed would be levied on each turnover in the case of hardware, for instance, on every sale of every item entering into the cost of making the article from the ore in the ground and the timber in the forests to and including each sale of the finished article.

What would the final invoice look like by the time it reached the retailer if every time the tax was paid it was added and passed on? What would a hardware jobber do if one manufacturer added a cumulative tax of, say, 5 per cent., to his invoice and another manufacturer added 2 per cent. covering invoices for a competing article? This would occur if all the taxes were passed on, because certain manufacturers would avoid payment of the tax from the fact that they carry on several consecutive processes, whereas in other cases the tax would have to be paid on the sale after each process.

How would a manufacturer selling the hardware jobber who in turn sells the hardware retailer compete in getting his goods to the consumer on an equal basis with a manufacturer who sold directly to one of the large mail order houses, or to a co-operative association of retailers, or who might, for instance, have his own chain of retail stores or retail selling agents? In such a case the product of the manufacturer distributing through regular established channels would be subject to a tax on his sale to the wholesaler, a tax on the sale by the wholesaler to the retailer, and a tax on the sale by the retailer to the consumer. The catalogue house who manufactured their own hardware would pay only one tax instead of three, namely, that on the sale to the consumer. The manufacturer with retail stores would also pay only one tax. The catalogue house or the association of retailers who bought directly from the manufacturers would avoid paying the tax which the jobber would have to pay, and this would be equivalent to penalizing the average jobber 40 per cent. of his net profits if the tax were at only a 1 per cent. rate.

The Jobbers' Side

What effect would such a tax as this if continued for any length of time have on the distribution of hardware? Would not certain hardware jobbers demand either that the manufacturer should pay their tax as well as his own, or else that he should place his goods with them on con-

Continued on page 78

Some Technicalities in Sales and Income Tax Explained

A number of important rulings on points in connection with the sales tax and income tax have been made as a result of investigations conducted by the legal department of the Canadian Manufacturers' Association. Some of those points most interesting to the various branches of the hardware trade are as follows:—

PURCHASES BY MANUFACTURERS WILL BE SUBJECT TO A SALES TAX OF 1% IN THE FOLLOWING CASES:

Where a Manufacturer purchases from another Manufacturer material which is to be used and incorporated in or attached to his finished product and certifies to that effect.

Where a Manufacturer purchases goods from other Manufacturers for resale in the condition as purchased and certifies to that effect. In such cases the Manufacturer is regarded by the Department of Customs and Inland Revenue as a Wholesaler or Jobber.

When ordering goods for processing, or for resale in the condition as purchased, the Department states that the purchaser should:

(a) Endorse a certificate on his order showing for what purpose the goods are being purchased, and also

(b) Endorse on his order the number and nature of the license he holds.

A combined form of certificate may be used, and one which has been approved by the Department reads as follows:

"Sales Tax License No. for

We hereby certify that the goods or materials on this order are to be used and incorporated in, or attached to our manufactured product, or are for resale in our capacity as wholesalers or jobbers, and are therefore subject to a Sales Tax of 1 per cent. only."

Purchases by Manufacturers from Wholesalers are subject to Sales Tax of 1 per cent., irrespective of the use to be made thereof and no certificate is required.

PURCHASES BY MANUFACTURERS WILL BE SUBJECT TO A SALES TAX OF 2% IN THE FOLLOWING CASES:

Where a Manufacturer purchases goods or materials from another Manufacturer and does not quote his Sales Tax License and does not certify either that the materials are to be used, incorporated in or attached to his finished product, or that the goods are to be resold in the condition as purchased.

Where a Manufacturer purchases machinery, equipment or supplies to be installed or consumed in his own factory or plant. In such cases the Manufacturer is regarded by the Department of Customs and Inland Revenue as a Consumer.

PURCHASES BY WHOLESALERS FROM MANUFACTURERS

The Department of Customs and Inland Revenue has ruled that where a Wholesaler purchases goods from a Manufacturer for resale, he must quote the number of his Sales Tax License and also certify that the goods so purchased are for resale.

The following form of certificate, for use by Wholesalers has been approved:

"Sales Tax License No. for

We hereby certify that the goods or materials on this order are for resale in our capacity as Wholesalers or Jobbers and are therefore subject to a Sales Tax of 1 per cent. only."

When Wholesalers do not endorse this or a similar certificate on their orders, and when Wholesalers purchase goods for their own use from the Manufacturers thereof, the rate of Sales Tax applicable is 2 per cent.

SHIPMENTS TO THE UNITED STATES—RULING OF THE UNITED STATES CUSTOMS RE SALES TAX AS PART OF VALUE FOR DUTY

On shipments of merchandise from Canada into the United States, except of those articles which are exempt from Sales Tax, the United States Customs are insisting on payment of duty on an additional value of 1 per cent. on account of the 1 per cent. Sales Tax imposed by the Canadian Government on sales to wholesalers.

The matter was taken up with the Treasury Department at Washington and the following reply was received from the Chief of the Division of Customs:

"In reply I have to advise you that inasmuch as the law requires that the manufacturers and wholesalers or jobbers shall collect the tax and shall specify the same in the invoice, the Department is of the opinion that this constitutes a part of the price at which the goods are sold upon delivery to the purchaser, and on August 2nd last so instructed collectors of customs.

"In a recent case on which an appeal for re-appraisement was taken the general appraiser in passing upon the value used the following language:

"'Add to appraised values 1 per cent. for Canadian home consumption tax. See ch. 71 Sec. 19-BBB of the Act of 10-11 George V entitled "An Act to amend the Special War Revenue Act, 1915".'"

It would appear that the United States Treasury Department takes the view that because the exemption from Sales Tax is spoken of as a "drawback" in the Act, it must be included in the value for duty purposes, the same as any other export drawback.

If those who are exporting from Canada to the United States will endorse on invoices of commodities not specifically exempted from the Sales Tax, a statement to the effect that the goods are subject to a Sales Tax of 1 per cent. when sold in Canada to wholesalers, but that the Sales Tax is not applicable on export shipments, it appears such a notation will comply with the requirements of the United States Customs.

On shipments of commodities which are exempt from Sales Tax a statement to such effect might be endorsed on the invoices. Such a statement would, be accepted by the United States Customs as evidence that the Sales Tax did not apply and should not be added to the value on which duty is assessed.

THE NEW FEDERAL INCOME TAX LAW—LATEST CHANGES—REQUIREMENTS—PENALTIES

Exeedingly important changes were made in the Federal Income Tax Law by the Statutes of 1920.

Filing of Statements

You must not now wait until some official sends you an income tax form to fill up. The law insists on your getting it for yourself. You can get it from the Inspector of Taxation for your district, or from a Post Office.

The form, when filled up, must be sent or handed to the local Inspector of Taxation by April 30th, at latest, along with at least one-quarter of the tax itself.

Companies have also to send to the Commissioner of Finance, Ottawa, before the end of March, the names and addresses of their shareholders, with particulars of dividends, etc., paid to them (Form T4).

Employers have to send to the Commissioner of Finance, Ottawa, by March 31, returns of all employees paid at a rate of $1,000 a year or more. Fees and other remuneration of Company officials and directors, etc., all must be reported (Form T5).

Necessity of Accurate Returns

The Government does not rely on the taxpayer alone for information as to his income. It may call on any person who has had dealings with him, to produce books or other documents showing the facts; and these must be produced, under a penalty of $100 a day during default, with a possible fine of $10,000 and six months' imprisonment for making a false statement.

How Income Tax Collected

The taxpayer must not wait till he is asked for his tax; nor may he leave the calculation of its amount to the officials. He must calculate it himself and pay it without being asked. Along with the form showing his income for 1920, he must,

as above stated, send in by April 30, 1921, at least one-fourth of the actual tax which he reckons himself liable for—the rest being payable later, with 6 per cent. interest, and in three two-monthly instalments.

If he puts the figure too low, he becomes immediately and **automatically liable to heavy penalties,** even if his error is unintentional. The Government officials have no power to let him off. The law decrees the precise sum which he must be fined.

For instance:—

1. If he understates his income by a trifling amount, up to one-tenth, he must pay income on the deficiency, with 10 per cent. interest.
2. If he understates his income by more than ten but less than twenty per cent., the fine is half the amount of income omitted—not merely half the tax. If the deficiency is 20 per cent. or more, the whole of the unreported income is taken. Thus, if he states his income as $4,500 when it is $5,650, he is fined $1,150, besides, of course, the unpaid tax.
3. If he is late in sending in his return, 25 per cent. **is added** to his tax.
4. If he pays less than a fourth of the tax, as estimated by himself to begin with, or less than the proper amount in the case of later instalments, 25 per cent. **of the deficiency** (and in no case less than $5) is added to his tax. The same penalty is prescribed for not paying within 30 days any sum demanded, in addition to the tax as estimated by himself.
5. If he is asked for further information and is late in sending it, or if he fails to keep such adequate records and accounts as the Finance Minister may prescribe, he may be fined $100 a day for his default; and a false statement may be punished with a $10,000 fine and six months in jail.

Allow Plenty of Time For Possible Delay in the Mails

Along with the form, as already stated, you must send at least one-quarter of the tax itself. You can pay the rest in not more than three instalments—two, four and six months after April 30—with 6 per cent. interest from that date to the date of payment.

It is strongly advised that the first remittance, being based only on your own estimate, should be well **over** the one-fourth minimum. If possible, send a half. At any rate, add a good margin in case of error, and so obviate the risk of penalties. The more you pay, the more interest you save.

Every payment should be made by money order or certified cheque if not delivered in cash.

Notice From Taxation Officials

If your figures are accepted, you will be notified by the local Inspector of Taxation.

If the taxation officials think you have paid too much, they will return the surplus.

If they think you have paid too little, or under-stated your income, they will demand the balance of the tax which they reckon to be due (with penalties).

What Is Income

Your revenue for the calendar year 1920, from salary, bonus, business profits, rents, interest, dividends, and other income, including that received from another country.

Exemptions From All Income Tax

The following items are entirely exempt from Federal Income Taxes:—

1. Interest on any Dominion of Canada War Bonds issued free from income tax.
2. Money made by speculation outside the ordinary course of your business.
3. Legacies, gifts, and proceeds of Life Insurance Policies, but not money earned by the investment of these.

Deductions From Income on Account of Expenditure

To arrive at your net income, deduct also:—

1. Ordinary expenditure for the purpose of your business.
2. Interest on money borrowed (excluding mortgage on your own residence).
3. Taxes, insurance, repairs and depreciation on land or buildings (except your own residence).
4. Amounts paid by employees under superannuation funds or plans.
5. Carrying charges on securities, not exceeding income therefrom.

NOTE.—No deduction is allowed for subscriptions for charity. Nor may you deduct, from the profit of your chief business, your loss on a "side line."

Deductions From Tax

You are entitled to deduct from your tax:

2. Certain payments made for corresponding periods under the Special War Revenue Act or the Business Profits War Tax Act; and
2. Income tax paid to another country, if this deduction does not exceed the tax you would pay in Canada on the particular income for which you have paid the tax elsewhere, and in the case of a foreign country, if that country reciprocates by allowing a similar credit to persons receiving income from Canada. This credit is allowed by the United Kingdom and the United States.

Comparison With U. S. Law

Persons from the United States, while they will find the rates practically the same in Canada, will notice, among other differences in the law, that we do **not** tax as income the profit made by selling a capital asset at more than its cost, unless such sale forms part of their chief business.

Life insurance premiums are **not** exempted here.

Depreciation

The Finance Minister has to judge what is "reasonable" depreciation. In practice, he allows a yearly depreciation of 2 per cent. on stone or concrete buildings, 2½ per cent. on brick and 5 per cent. on wood buildings; from 5 to 10 per cent. on machinery; and 10 per cent. on office furniture and fixtures.

Depreciation is allowed on an automobile in proportion to its use in the **owner's business.**

Rate of Tax Against Companies

A normal tax of 10 per cent. on income exceeding $2,000. If the taxable income is $5,000 or over, the tax is increased by 5 per cent., making a total of 10½ per cent. in such a case.

It should be remembered that returns must still be made under the Business Profits War Tax Act, as well as under the Income Tax Act, but only the greater of these two taxes has to be paid.

When a company's fiscal year does not coincide with the calendar year, returns may be made for the fiscal year that ends during the calendar year.

The individual shareholder may be taxed on his proportion of a company's **undivided profits,** if the Finance Minister considers that their accumulation is intended to evade the law and exceeds the reasonable requirements of the business.

Company profits paid to shareholders in form of **stock dividends** are now expressly mentioned in the Act as liable to income tax. But the tax will not be levied on such profits if they had accumulated before 1917 and if the distribution to shareholders has been voted before the end of 1920.

Partnerships Not Taxed

No income tax is levied on partners collectively, but each partner individually must pay the tax on his proportion of the firm's profits.

Tax on Individuals

Every person with $1,000 a year, or $2,000 if married, who ordinarily resides in Canada, or is employed or carries on business in Canada, comes under the Act (subject to exceptions detailed in Section 5 of the Act, 1917, which applies mostly to religious, charitable, agricultural and educational institutions).

Income from pensions **not** liable to tax.

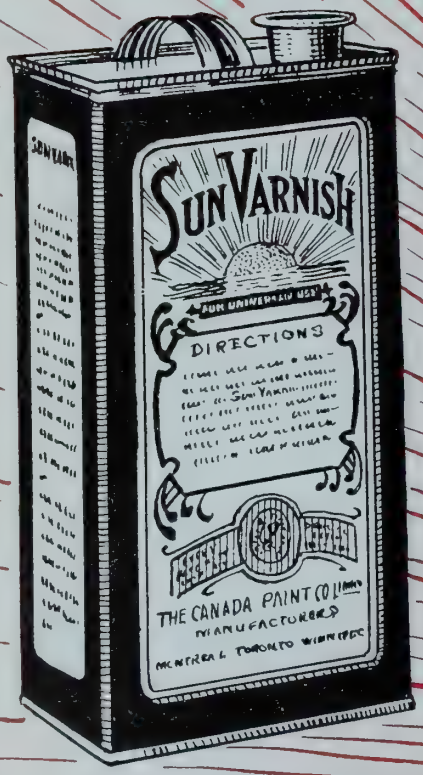
Appeal

If dissatisfied with the official assessment, you can appeal **(within twenty days of its mailing)** first to a Board of Referees and finally to the Exchequer Court of Canada.

The Board of Referees may increase the official assessment.

SUN

For All Interior Or Exterior



SUN VARNISH

A Superior Varnish of great durability, with a delicate transparency that brings out all the natural beauties of the wood.

If the radiators leak—if the rain comes in the open window—it won't hurt anything covered with Sun Varnish. Nor can hot, soapy water, alcohol, or alkali, mar the beauty of a Sun Varnished surface.

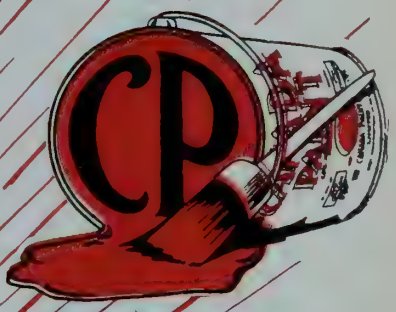
A safe varnish to recommend—economical, long wearing, easy to apply. Dries hard in 24 hours.

THE CANADA

Makers of the famous "Elephant"

MONTREAL TORONTO HALIFAX

VARNISHES



Work—Except Floors

SUN FLOOR VARNISH

Especially adapted for use on hardwood floors. Tough and elastic, it wears like iron and will not crack, chip, nor show heel marks.

Sun Varnish provides a rich, beautiful, and waterproof finish for woodwork, door fronts, window sills, bath rooms, or any other surface about the home.

See that your stocks are complete. If you are not now handling Sun Varnishes and the other C. P. lines, write our Montreal Office for particulars of the C. P. Agency offer.

Independents' Prices Below the Corporation

LEADERSHIP in the dictation of the lowest prices in steel has passed from the steel corporation to the independent producers for the first time since the war. Such complete reversal of a situation prevailing for many months has been forced by the sweeping reductions of approximately $5 to $8 a ton in many products, abruptly put in effect the past week by several leading independent companies, says the Iron Trade Review. This reappearance of aggressive competition has not resulted unexpectedly; it represents the sequel to the unbalanced condition of operations dating from the sharp contraction of the market last fall under which the Steel Corporation has been working practically at full capacity, while the independent makers barely have been able to maintain a 25 to 50 per cent. activity. Not all the independent producers yet have followed the initiative in price reductions taken several days ago by the Midvale Steel & Ordnance Co. and certain other interests, but are doing so rapidly.

All interest now is centered in the action the Steel Corporation may decide upon to meet the new market basis. Generally it is believed the matter of wage reductions is bound up closely with this position. Up to this time the leading producer has not been disposed to order any stepping down of the approximately 140 per cent. advance in labor rates established since 1914. Some falling off this week in the high gait of operations among Steel Corporation plants indicates that this question is likely to become a more pressing one soon.

Conditions in the steel market have been so upset by the week's developments that the point to which prices actually have fallen in various lines has not been defined positively. Moreover, the volume of new business actually brought out by the reductions has been so small that a real test is lacking.

Action on Tax and Tariff Matters

Continued from page 37

is interesting to note that the British tax on excess profits is to be discontinued because of its objectionable features. It is doubtful if the British tax is any more objectionable than our own. The British tax presses more heavily on the small business than on the large business, whereas in Canada the exemption is a percentage and not a fixed sum and the duty varies on a sliding scale of severity, but nevertheless the tax has many objectionable features and will likely undergo some drastic revision if not elimination at the forthcoming session.

Fifteen Arguments for Turnover Tax

What form of tax will be substituted is the important consideration and it is of interest to note that in the United States where much the same problem is presented, merchants favor the turnover tax similar to that suggested for Canada. Many arguments have been advanced in Hardware and Metal for this form of taxation and following is a brief outline of the advantages of this tax as claimed by Wm. C. Cornwell, editor of the Bache Review:

1. It meets all the objections which make the present system intolerable.

2. It is simple and easily understood, while the present system is distressingly complicated.

3. The collection of the tax is automatic and undisturbing.

4. The distribution of the burden is just; it falls like the rain. Those who consume the most and spend the most pay the most taxes.

5. It will produce all the money needed. Present tax returns are disappearing as profits decline in business.

6. It goes on undisturbed by the swing from good times to hard times and back again. The variation in the spendings of the people in either kind of period is not sufficient to seriously affect the tax returns.

7. It will not increase prices except to a very small percentage—an average of two to three per cent. Now prices are boosted (or have been), by the excess profits tax, to an average of over 23 per cent.; therefore this tax will largely reduce prices.

8. Its effect upon business and the individual will be marvelous. There will be an incentive to save money for future business extension, as the tax collector cannot get it; and for the same reason it will wake up enterprise, competition and individual achievement. All these are being strangled to death under the present law.

9. Capital will no longer rush to cover under tax-exempt securities, which it is now doing, where the recipients of this amount of income have sold all that they had and bought tax-free municipals. Much of this amount of yearly income will then be released for the industries of the country, instead of encouraging expenditures for extravagant or useless community improvements.

10. Extravagant spendings in carrying on business, now taking place because otherwise the Government would get the money, would cease, and old-fashioned business economy would again thrive. Enormous expenditures by the Government tax bureaus, including salaries of hundreds of thousands of employees (thus made unnecessary) would be stopped almost instantly, and these savings to the Government should reduce the budget.

11. The Philippines' experience is a shining example of the successful operation of the sales tax, and France and Canada contribute further forcible and favorable illustrations of its sound workings.

12. The tax load would be spread equally over the whole population, and would be borne without a hitch and without a murmur, because it would be passed along to millions of consumers who would pay the tax, nobody knowing it and nobody feeling it.

13. The taxpayer, harassed now with problems of what the ultimate tax will be, would not have to wait a year to find out under the turnover tax. He would know every day what his tax for that day was.

14. No tax ever invented is free from every objection, but the tax on gross sales is nearer perfection than any other. It is simpler in operation, less expensive to calculate, works more smoothly, yields larger revenues, and bears less heavily upon every individual than any existing method.

15. If adopted, it will free us from the worst and most destructive operation which the Government has ever imposed upon its citizens.

MUST CERTIFY GOODS ARE FOR RESALE

A number of wholesalers who, in ordering from manufacturers, do not stipulate that the purchases are for resale are being charged 2 per cent. sales tax by the manufacturer, where only 1 per cent. is charged if this is stipulated.

The Department of Customs and Inland Revenue has ruled that where a wholesaler purchases goods from a manufacturer for resale he must quote the number of his Sales Tax license and also certify that the goods so purchased are for resale.

The following form of certificate for use by wholesalers has been approved:

"Sales Tax License No. for . We hereby certify that the goods or materials on this order are for resale in our capacity as wholesalers or jobbers and are therefore subject to a Sales Tax of 1 per cent. only."

When wholesalers do not endorse this or a similar certificate on their orders, and when wholesalers purchase goods for their own use from the manufacturers thereof the rate of Sales Tax applicable is 2 per cent.

New Brockville Industry

Brockville, Ont.—A new industry, which will be in operation early this month at Brockville, Ontario, is Machinery and Foundries, Limited, recently incorporated to manufacture hand and power pumps and gray iron and brass castings. The plant of the company consists of a machine shop 275 x 50 feet and a foundry 150 x 60 feet. Forty hands are to be employed at the commencement of operations, and this number will be gradually increased to one hundred and twenty-five.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of February 16, 1901:—

"At the annual meeting of the Brantford, Ont., Board of Trade good progress was reported. Two important industries have commenced operations, including The Malleable Iron Works of The Pratt & Letchworth Co.. The Adams Wagon Co., Paris, Ont., have decided to remove to Brantford. The old Consumers' Cordage Co.'s building in West Brantford has been taken over by The Canada Farmers' Cordage Co., Ltd."

Novel Ideas for "Dollar Day" Sale

Held Simultaneously With the Motor Show, London, Ont., Hardware Merchants Have Successful Sale—Novel Ideas as Introduced in the Various Hardware Stores

LONDON, Ont. — Three factors united in making Dollar Day an unprecedented success; favorable weather, a great variety of offerings of real interest and value by merchants, and the motor show. From all parts of the district people came with money in their pockets and prepared to buy liberally. Hundreds of them came with the double purpose of buying what they wanted and visiting the motor show to look over the latest models. Many farmers motored in for fifty miles and brought with them their wives and families. There has been little snow this winter and the roads were in ideal shape for a trip of this kind. Every incoming train also brought its quota of buyers.

Dollar Day had been well advertised in advance and the merchants backed up their advertising by most attractive window and store displays. The windows of the hardware merchants never showed to better advantage. That windows are real business getters was proven by the crowds to be seen looking in, and, what was more important from the merchants' standpoint, going in to buy.

Basing their window displays and their advertising on the fact that thousands of farmers and their wives would be in the city for Dollar Day, hardware merchants made a special drive on lines of general interest. Such goods as kitchen utensils, cut glass, laundry utensils and similar lines were featured to attract the women, while saws, hammers, tools, razors, razor hones and such merchandise proved a magnet for the men.

A Combination Offer

Cowan's Colossal Hardware featured a special assortment that sold like hot cakes. The following was offered for only $1 and was featured in the firm's advertising and window displays — one wire clothes line worth 40 cents, one roll of toilet paper 25 cents, one clothes or scrub brush 40 cents, one tack claw 15 cents, one tack hammer 15 cents, one can opener 20 cents, one bottle furniture polish 30 cents, one cake of Bon Ami 15 cents, one mixing spoon 20 cents, one can of brass polish 15 cents, and one pair of canvas gloves 15 cents.

In featuring this combination offer the Cowan Company placed it right in the centre of a four-column ad. nine inches deep. "ALL FOR $1.00" stood out in heavy display type and beneath was a list of the articles with price given in large figures. Throughout the long list of offerings prices of every article were given in large figures.

The firm's window displays were, as usual, a centre of interest for hundreds of the visitors. In connection with the display, the policy of marking all prices in large figures was followed. This has been found to be especially effective where farmers and residents of the small towns are concerned. Scores of buyers, especially women, do not like to walk into a store and ask the price. Amost invariably they believe it is much higher than it actually is. Cowan's by setting it forth in big figures obviate

Gets It Coming and Going

Speaking of the government and its efficient methods of accounting, the following experience of Hardware and Metal in securing a copy of an amendment to the Criminal Code is interesting. Apparently it not only costs money to break the law, but it costs money to find out what the law is.

It was understood by Hardware and Metal that some amendment had been made to the Criminal Code in regard to the necessity of having a permit for the purchase or carrying of certain weapons common to the highwaymen who have recently been disturbing some parts of the country. The copy of the amendment on file in the office of Chief of Police Dickson, Toronto, was referred to by Hardware and Metal and meanwhile a request was made to the King's Printer at Ottawa for a copy of the amendment, which consisted of a paragraph of about fifty words.

Reply came that on receipt of five cents the copy would be forwarded (no stamps accepted). In order to make sure of the money reaching Ottawa it was necessary to secure a money order, postal note, or to register a letter, each operation costing as much or more than the money to be forwarded. At any rate, the money was sent, the copy of the amendment in both English and French was received, and just as we were about to heave a long sigh at the termination of the seeming endless process, along came a very official looking voucher with a number of attachments, which, after considerable perusal turned out to be an official receipt for the five cents.

While it was unpleasant to contemplate the necessity of having to pay to learn the laws of the country, it was nevertheless very comforting to know that such an efficient and painstaking plan of accounting is followed at the federal department of the "seats of the mighty."

News of Western Canada

Competitive Market Has Returned

Salesman Now Comes Into His Own—What of the Trend of Hardware Prices—Eliminating the Artificial Inflation of Prices

WINNIPEG, Man.—"The coming year will be one of untiring effort where the real salesman will show his true worth and work," said C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Company, in addressing a recent gathering of the sales staff.

"Customers will continually ask the question, Shall I buy now or wait? Is that article next due for a drop in price? They will always be wanting to know, with a reasonable degree of certainty, what to expect in the near future in the matter of price reduction, and the thought will govern their action in the matter of purchases. For that reason I believe that a brief summary of conditions as we see them to-day may prove both interesting and profitable. War conditions as they affect business have just about disappeared. What does this mean? If it means anything, it means that we have again returned to the usual relation of a competitive market and a competitive market means real work and first-class salesmanship to secure results," said Mr. Bamford.

"During the war and for nearly two years thereafter the exceptional demand for sugar, cotton, leather, wool, grain and farm products forced prices away up. These conditions invited speculation and speculation in turn forced the high prices of them still higher, in fact, to points far above those warranted by natural conditions. Then the markets tightened and the speculators ran for cover. The artificial props were kicked

C. H. S. BAMFORD

Sales Manager of the J. H. Ashdown Hardware Co., Winnipeg, Man., whose untiring efforts were largely responsible for the recent successful convention of the company's sales staff.

from under and in these lines prices dropped down to earth where they belonged. This, with the dropping off of wild buying, briefly explains the reason behind nearly every drastic price reduction of the past few months.

Basic Conditions Nearly Normal

"Basic market conditions to-day are almost normal; by normal I mean balanced between supply and demand. The supply may be a trifle but only a trifle below demand.

"The economic effect of war conditions was to raise all prices to a higher level. The last few months have simply served to level down the prices of these lines that had been artificially inflated. Now with prices evening up at the present level the question is will prices tend to drop from this level to a lower plane.

"The indications are that all prices will tend downward for some time to come but the decline will be gradual and slow. A substantial lowering of prices demands a world-wide surplus of supply over demand. This condition cannot be accomplished in a day but will take years of intensive production to accomplish.

Wage Agreements in Force for Some Time Yet

"Labor is another important factor to be considered in price reduction. Hardware lines are usually made by the very highest type of skilled labor, well organized and working under wage scale agreements many of which have months yet to run. In the majority of shelf hardware lines raw material and marketing amount to about 15 per cent. of their cost, 85 per cent. being labor, consequently you can see that prices cannot be a great deal lower until labor costs have dropped and a general lowering of labor will not come until supply is far in excess of demand, or, in other words, there is a world-wide surplus of supply over demand.

The sales staff of the J. H. Ashdown Hardware Company photographed at the recent convention in Winnipeg. In the front row from left to right may be seen Messrs. A. F. Dykes, (General Manager); J. H. Ashdown, (President); C. H. Bamford, (Sales Manager); R. A. Graham, Secretary-Treasurer.

Can You Make The Window Pay The Rent?

Beginning of the Year is the Time to Give Careful Consideration to the Importance of the Window — Your Window Should Pay Big Profits—What Change Will Improve Its Capacity for Display?

By ROY A. HUNTER, Vancouver

VANCOUVER.—We have just entered upon a new year and each merchant is deciding for himself what changes for the better he can make, what departments can be made to produce more, and in what direction he can increase his sales effort. The window should come in for a careful scrutiny.

Can it be made to pay the rent? What change would improve its display capacity? Is it easily kept clean?

For tips on running a hardware store, the writer hastens down to a successful merchant, but for tips on the use of windows for sales, the place to go is to a man who makes that his business, and can earn ten thousand a year, based on the profit he can make the windows earn.

Such a man is C. L. Greer, display manager for the Hudson's Bay Co., Vancouver. Discussing the sales possibilities of the even smaller-than-average store window, Mr. Greer says:

If Goods Were Locked in Cupboards

"Seventy-five per cent. of the merchandise that is sold is not absolutely needed at the time it is bought. This is true to a less extent in staple lines, but of fancy lines, where the greatest profit is made, it is just as true as it is in hardware.

"If you don't think so, imagine your volume of business if all your merchandise were kept in closed boxes till brought out on demand. Consider the splendid little memory joggers that your shelves full of attractive merchandise are. Notice almost any sale you make over the counter, how items are added, one at a time after scanning your shelves for suggestions. The more pointed the suggestion, the more impressive it is. The more real the implied desirability, the more your sales.

"Merchandise attractively presented is partially sold. If the presentation is good enough—the interest and desire of the passer-by sufficiently intrigued, the sale will be completed right there—that is—if you have the price on the article, and the would-be purchaser has the cash or the credit to negotiate.

The Feature of the Offering

"One must decide first, what is the strong feature of the offering. If, for instance, you have made a splendid purchase of a certain line and purpose to move them at $1.50 each, you will need nothing more than good arrangement of the article in the window and a large card saying $1.50 each.

"But suppose this is an article of very special quality, then you must proceed differently. You must display them in an 'atmosphere' of quality and refinement. Let them be accompanied by other smart accessories that will enhance their appeal and not detract from the interest of the goods shown for sale.

"Name the price? Yes! always. But in this case the price will be in light figures, on a small card. Not in poster style, like your $1.00 bargain.

Windows That Mean Sales

"Many retailers are still loath to advertise. The larger stores advertise very profitably—very profitably, or they certainly would not be doing it. In the same way a great many dealers hesitate to spend a few dollars for fixtures with which to make proper window displays. A few such helps are invaluable in producing an effective window. Now don't misunderstand me. By an effective window I do not mean an 'art-for-art's-sake' kind of window, I mean the window that is artfully dressed to create a demand for the articles displayed, that will be converted into actual sales over the counter.

"If you had an announcement to make about a certain line of merchandise that you wanted special attention drawn to, and had a man employed to make announcements in front of your store, would you, while he was speaking, have a dozen other people shouting out the names of a dozen other articles you had in stock?

Let it Be Only One Line

"Think that over, next time you put in a special in your front window, and then proceed to clutter up the beholder's attention with a dozen other unrelated lines. If you want attention on the quality and price of your new season's kitchenware line let it be a kitchenware window, with no other exhibits in the window to take the attention off the lines featured. Let there be an idea behind your window if you're putting in an assortment of commodities.

Should Pay Big Profits

"These are just a few random thoughts. Your windows should pay you big profits. If you have neither the time nor inclination to dress a good window every week—pay a few dollars to some one to do it for you. Check up carefully the sales you make on the lines displayed. You will be surprised."

Western Notes

Mannville & Son, hardware dealers at Prince Albert, Saskatchewan, were in Winnipeg last week on a business trip.

Prince Albert, Sask.—O. B. Manville, Manville Hardware Co., Ltd., is on a business trip which will take him to Eastern Canada.

Marshall-Wells Club Hold Social

Edmonton, Alta.—The Marshall-Wells Zenith Club held its first social and dance on the occasion of the formal opening of the recreation and refreshment rooms which occupy the whole of the ninth floor of the new Marshall-Wells building. These rooms are for the exclusive use of the employees, eatables being supplied at cost. The evening's celebrations consisted of a program, games, reminiscent of old army days, and a dance program.

The excellent program was provided by J. F. McMullen, manager, who outlined the objects of the social club in an opening address.

Cordage Co. Operating in B. C.

Vancouver.—The Canada Western Cordage Co., Ltd., are now operating at New Westminster, turning out cordage of all kinds.

This is one of the British Columbia concerns operating on a capital grant from the Provincial Government. The entire organization is made up from returned soldiers. John C. Thorn, the president, handles the sales through his company, the H. C. Thorn & Co., Ltd., with offices in the Metropolitan Bldg., Vancouver.

The company expects to sell rope of all kinds as far east as Alberta, but will not, Mr. Thorn states, attempt to market binder twine outside of British Columbia.

Wood-Vallance Bowlers Continue Winning Streak

Winnipeg. — Wood-Vallance bowlers are evidently intent on capturing the second series of the Merchants' Bowling league. The hardware men seem to be unbeatable. Three more games were added to their total wins this week, when they downed R. G. Gunn and Co., in all three games, winning each by a rather big margin.

Great West Electric came through with two victories over the Farmers Advocate; Canada Malting took two from Walter Woods, the latter team winning the second game by a single pin; Robinson and Co., grabbed off two from Thos. Jackson and Sons and Terminals took two from McClary's in the remaining fixtures.

Several high class scores were chalked up during the evening. Jackson, of Walter-Woods, reached the charmed circle of 600 bowlers when he spilled the pins for a count of 602. He started off with a 223, added 198, in the second attempt and finished up with 201.

Events in the Trade

Business Changes

Frankford, Ont.—Foster & Latta have been succeeded by T. H. Foster.

St. James, Man.—Fincham & Payne, hardware, have dissolved, V. A. Fincham continuing.

Obituary

Guelph.—Thos. Griffin, one of the city's most prominent manufacturers, is dead. He was 65 years of age, and had been ill only a few days. He was a manufacturer of stoves and piano plates. He leaves a wife and one daughter.

Toronto.—J. Harry Paterson, president of the Toronto Hardware Manufacturing Company, Limited, died suddenly at his residence here. Mr. Paterson was 68 years of age, and his demise came very unexpectedly. He was educated at Trinity College School. In his later life he became prominent in manufacturing circles, founding the Toronto Hardware Manufacturing Company. He was an active member of the Canadian Manufacturers' Association.

Incorporation

The Ontario Gazette announces the incorporation of the following firms:

General Steel & Copper, Toronto, $40,000.

Canada Foundry Co., Port Arthur, $200,000.

Peninsular Cord Tire & Rubber Co., Hamilton, $1,000,000.

London Motors, London, $1,000,000.

Pire Moist Air Furnace Co., Ottawa, $40,000.

Personal

Tom Houghton, sales manager of the Martin-Senour Co., Ltd., Montreal, was in Toronto and London, Ont., last week.

Moncton, N.B.—At the annual meeting of the stockholders of the Atlantic Underwear Ltd., F. R. Sumner, president of the Sumner Co., Ltd., was elected a director.

A. Valiquette is calling on the plumbing and retail trade of Montreal for the Canada Metal Co., Ltd. Mr. Valiquette has previously held an important position on the inside of the Montreal branch.

Full Staff—Full Time

Brantford.—The Bluebird Corporation announces a return to full staff on full time. The plant will open on Monday under normal conditions, having been working recently but five days a week, with shortened staff.

A. J. Hopkins Forms New Company

Montreal.—A. J. Hopkins, formerly general head of automobile equipment department of the Canadian Fairbanks-Morse Company, Limited, has formed a company known as the Manufacturers' Canadian Service, Limited, with headquarters at 392 St. James street, Montreal. This company will handle the Canadian business for the following American manufacturers: The Black & Becker Manufacturing Company, Baltimore, Maryland, electric drills and compressors; Clover Manufacturing Company, Norwalk, Michigan, grinding and cutting compound; Continental Auto Parts Company, Columbus, Indiana, factories and service station machinery; Edgar C. Guthard & Company, Chicago, Illinois, Belmont wrenches; Locktite Patch Company, Detroit, Michigan, and Windsor, Ontario, tire repair material; David W. Onan, Minneapolis, Minnesota, electrical testing apparatus. Arrangements are being made to handle these accounts as though each one were operating its own factory branch.

Promotion for Chas. Byford

Montreal.—Chas. Byford has been promoted advertising manager of the Martin-Senour Co., Ltd. Mr. Byford has only been with this company for a short time, but through his continued efforts and enthusiasm for his new duties has shown that he is worthy of his promotion. Previous to coming to Montreal with the Martin-Senour Co., Mr. Byford was in the employ of the Mills Hardware, Hamilton.

J. A. Farquharson Retires

Sarnia, Ont.—J. A. Farquharson, after 34 years' service with Mackenzie, Milne & Co., has sold out his interests and retired. On his retirement Mr. Farquharson was presented with a handsome club bag.

Manufacturers and Retailers to Convene

Ottawa.—Negotiations pending between E. M. Trowern, Dominion Secretary of the Retail Merchants' Association, the Wholesalers' Association and representatives of the different trade lines, have as a primary object the holding of a conference for the purpose of discussing matters of importance to these bodies.

Questions which would be brought under review would include a discussion as to what shall constitute a manufacturer, the Retail Merchants' Association holding that their members cannot be designated under this heading; the best policy to be adopted in order to assist in the campaign for furthering trade of "made-in-Canada" goods, and as to what policy shall be adopted to swing the balance of trade which is against the Dominion back into Canada.

Hamilton Made Goods Train to Tour West

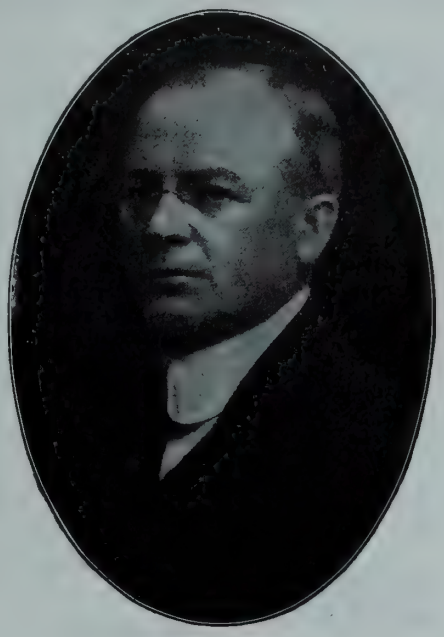
Hamilton.—The Chamber of Commerce has made arrangements to send a special train carrying made-in-Hamilton goods to the west. The train will start on June 3, filled with exhibits of Hamilton-made goods, and accompanied by representatives of the firms. They will make stops at every place of any consequence, and where possible reunions will be held of former residents of Hamilton. The trip will occupy 23 days, and it is expected that about 125 representatives of industries will be on the train. The object is to advertise Hamilton and Hamilton-made goods.

Some Changes in This Hardware Store

Kincardine, Ont.—W. C. Farley, local merchant, draws attention to some fine improvements he has been making at his store. A partition separating what was formerly the tinshop and the main store has been shifted back about 15 feet, leaving a raised floor of good proportions for the display of the firm's line of stoves and ranges. This allows the space formerly used by this line on the main floor for the display of smaller wares and paints, etc. Altogether the changes are a great improvement and no doubt will be found much more convenient for the buying public.

Yielding Up Firearms

Oshawa.—As the result of a notice posted up here in three languages by Chief of Police Friend, calling upon all persons in possession of firearms without a permit to deliver the same to his office and avoid prosecution, five guns and eight revolvers have been delivered up. The notice was posted up in accordance with a recent amendment to the Criminal Code. In Police Court a foreigner, who failed to obey the law, was fined $10 and costs, the court giving warning that the fine would be increased.



J. H. Conover Becomes General Manager Martin-Senour Co.

Manager of Ontario Division Will Succeed A. T. Black

J. H. CONOVER, manager of the Ontario Division of the Martin-Senour Co., Ltd., has been appointed general manager of the company, with headquarters at Montreal.

The many friends of Mr. Conover in Ontario will be pleased to know of his promotion. He was one of the first travellers of the company, and has risen gradually to the high position now conferred upon him. His knowledge of manufacturing, and his sales organizing ability, which have been so pronounced in the past, eminently qualify him to take up the larger duties of the general management.

Mr. Conover has many qualifications which will fit him for the new duties which he will undertake as general manager of the Martin-Senour Co., Ltd. Prior to taking charge of the Toronto branch of the company in 1911 Mr. Conover had wide experience as a travelling salesman. Before this time, however, he acquired a wide knowledge of the intricacies of the hardware business, not only as a retail salesman, but also as proprietor of his own hardware store at Leamington, Ont.

J. H. CONOVER

Manager of Ontario Division Martin-Senour Co., who becomes general manager of the company.

Flexible Shaft Factory in Operation

The new factory of the Flexible Shaft Co. is now in operation in Toronto under the direction of L. F. Fitzpatrick, who for a number of years was associated with the company's factory in Chicago.

Keen Competition in Toy Business

Ottawa.—Canadian toy manufacturers are meeting real competition in their efforts to retain their British connections formed during 1918 and 1919, according to Trade Commissioner J. E. Ray, reporting to the Department of Trade and Commerce. Although the British manufacturers themselves are making strenuous efforts, an attempt to compete with Germany in the toy market is meeting with only partial success. Imports of toys and games, which in 1919 were valued at $3,500,000, rose in 1920 to $12,850,000, a very large proportion doubtless emanating from Germany. Canadian manufacturers seeking to market toys in Britain must meet competition from German, French, Belgian and United States manufacturers. Commissioner Ray reports that in Manchester during Christmas week the quantity of Canadian toys on sale was infinitesimal compared with the total stocks from other sources.

Want Higher License for Transient Traders

Ottawa.—At a meeting of the local branch of the Retail Merchants' Association a motion was passed requesting the Dominion Executive to initiate action whereby the Transient Traders' Act may be amended to provide that the license fee for this class of trader be increased from $250, as at present provided under the act, to $1,000. It was claimed that one such trader came from Toronto, and, putting up at a local hotel, solicited trade from private residences in the city and did a big business, the money going to Toronto. The meeting wanted the transient traders' license to be made so high that this individual and others like him would do their business in Toronto, where they paid their taxes.

To Sell Building Specialties

Windsor, Ont.:—The McLaughlin Sales Co. has been organized to sell building specialties in the border cities and surrounding territory. Leo McLaughlin, formerly sales manager of the Canadian Roofing Mfg. Co., is identified with the new organization.

The Paint, Oil and Varnish Club, of Toronto, recently held a very pleasant and successful dance.

Developments Among The Manufacturers

Make Vulcanite Roofing

Thorold, Ont.—The Beaver Company, Limited, are now making vulcanite roll roofings and asphalt shingles in Canada. A modern and completely equipped plant is now in operation in Ottawa for the manufacture of these products. The sales offices of the Beaver Company are at Thorold, Ontario.

* * *

Expansion of Tire Plant

Oakville, Ont.—The Oak Tire and Rubber Company, Limited, are expanding their plant at Oakville, Ontario. A storey is to be added to the present building, and when the alterations are completed and the requisite machinery installed, the present capacity will be doubled.

* * *

New Building Completed

Chatham, Ont.—An addition to the plant of the Chatham Malleable and Steel Manufacturing Company, Limited, manufacturers of automotive and hardware specialties and sanitary stable equipment at Chatham, Ontario, is now complete, and the necessary machinery is now being installed.

* * *

Will Make Auto Accessories

Listowel, Ont. — Canadian Perfect Wheels, Limited, are a recently incorporated company operating at Listowel, Ontario. They have acquired a plant there with 30,000 square feet of floor space and are remodelling it to meet the requirements of a modern wheel factory. The goods to be manufactured are automobile wheels, disc, wire and wood, and a general line of accessories, stamped work, etc. The company expect to be manufacturing early in April. At present they are employing from fifty to seventy-five hands, and this number will be increased to 150 as required.

* * *

Addition to Foundry

Toronto.—A recently-completed addition to the Toronto plant of the Canadian Hanson & Van Winkle Company, Limited, takes the form of a thoroughly equipped gray iron foundry, where a special grade of soft gray iron castings for the machine trade will be produced.

* * *

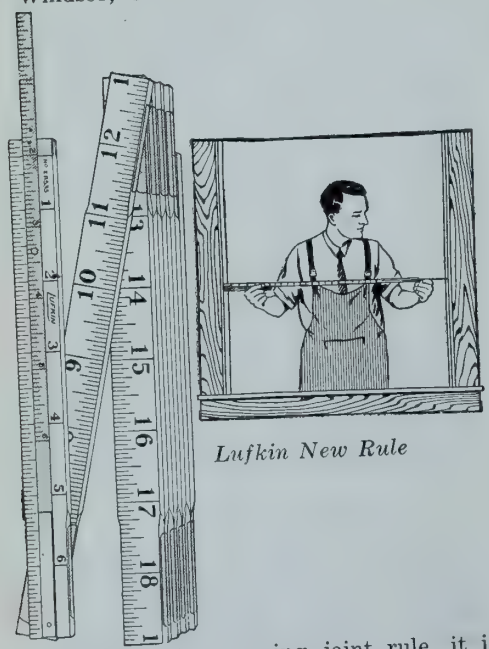
Producing Wire Rope

Vancouver, B.C.—The first factory of its kind in Western Canada, manufacturing a commodity essential to the development of the natural resources of British Columbia, the Britannia Wire Rope Company, Limited, commenced production at Vancouver recently. It is an all-British concern, having a directorate composed of men who have spent a life time in the production and sale of wire ropes and cables, and a plant manned by workmen who have become experts in their trade in the largest and best known industries of their kind in Great Britain.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

FIRM JOINT DIVIDER No. 139

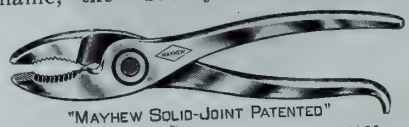


A new divided has been introduced by the L. S. Starrett Co., Athol, Mass. These dividers have the Starrett improved firm joint, and are made in 3-inch, 5-inch and 12-inch lengths. The makers claim that these dividers are rigid, and that the points are hardened and well finished.

Firm Joint Divider No. 139

LUFKIN NEW EXTENSION SPRING JOINT RULE

A new extension spring joint rule, six feet long, particularly designed for taking inside measurements of openings, such as door and window frames and similar fixed points, but just as handy as a common rule for ordinary measuring, has just been put on the market by the Lufkin Rule Co. of Canada, Ltd., Windsor, Ont. While somewhat similar in pattern to a spring joint rule, it is made of genuine boxwood in natural finish.



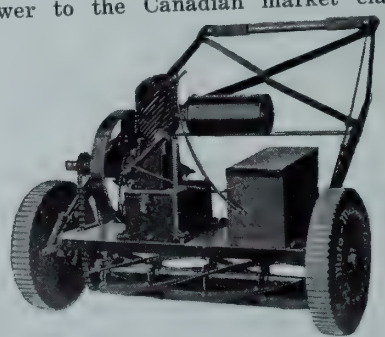
Lufkin New Rule

The first section of the rule is fitted with a graduated brass slide, which extends readily but is not loose and cannot fall out, having end lock. The extension slide is also admirably adapted to determining depth of mortises, etc. The boxwood sections are somewhat heavier than those of a common spring joint and are securely fastened at joints, making the rule rigid when extended. The graduations on both sides, with distinct lines and figures.

This rule, known as No. X8536, fully and conveniently taking the place of a common rule and having in addition the extension feature, will, it is felt, appeal to carpenters, architects, inspectors, contractors, automobile workers and others.

MAYHEW SOLID JOINT COMBINATION PLIERS

Mayhew Steel Products, Inc., Shelburne Falls, Mass., are placing on the market their new patented solid-joint combination pliers. As suggested by the name, the "solid-joint" is an integral part of one of the forgings of this plier and is locked to the other forging in a manner that is said to render the plier practically indestructible. By this construction they are enabled to harden and temper the joint in the same degree as the balance of the plier. This joint, which consists of only two pieces of metal working together, gives immense leverage, it is claimed.



Solid Joint Combination Pliers

The general design of this plier affords a large jaw capacity and the flat gripping portion of the jaw is diagonally milled. Length of jaw and a flat nose permit this plier to be used in places where an ordinary plier will not reach.

MOTO-MOWER

The Moto-Mower Co., of Detroit, Mich., in introducing their power lawn mower to the Canadian market claim that it will do the work of five men with hand lawn mowers, thereby cutting down the cost of lawn care by 75 per cent.

Moto-Mower

One of the principal features, according to the makers, is its extreme simplicity, there being but three moving parts in the motor and five in the rest of the machine, and but 29 parts in the motor altogether, including all the balls, nuts and screws.

There are no gears or clutches on the Moto-Mower. The power is transmitted direct to the cutting reel through chain and sprockets. Friction driving rollers on the ends of the reel shaft are brought into engagement with the flange on the inner side of the wheels by rotating the handle bars, permitting, it is stated, the machine to be started or stopped instantly without shock or jar, and also to be turned to the right or left.

Should a stone, root or other object become caught in the machine an automatic friction release by slipping protects the blades from injury or possible breakage, it is said.

The motive power is furnished by a 1½ horsepower reversible engine fitted with automatic governor and spark advance. The motor is built on the two cycle principle, without gears, cams or valves.

Oiling points have been reduced by the use of Timken adjustable roller bearings packed in hard oil and protected by felt, and Bound Brook oilless bearings make more than one oiling unnecessary in a season in normal use, except for one grease cup on motor, it is claimed.

The width of cut is 27 inches, cut adjustment ½ inch to 3 inches, weight 160 pounds. It is finished in French gray with gold striping and has 5 crucible steel blades. The makers claim a cutting speed of 2 to 3 miles per hour with a capacity of 5 acres per day on a gasoline consumption of one gallon.

No. 279 FILLET OR RADIUS GAGE

A new fillet or radius gage has been added to the list of tools manufactured by the L. S. Starrett Co., Athol, Mass., and is known as No. 279 in their new No. 22 catalogue. This is specially adapted for use in laying out forming tools, dies, etc., as well as for measuring filets. It has 20 leaves with a radii of from .020 to .400 inch inclusive.

No. 279 *Radius Gage*

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

MANY important price changes have taken place this week, the chief of which are further reductions in rope and cordage, cotton goods, cotton rope, sash cords, clothes lines, seine twines, candle wick, gasoline, and some grades of lubricating oils, oakum, copper rivets, horse clippers, coaster wagons, copper rods, sheets and tubing, and some lines of tools. Some lines of pumps and wrenches have been reduced and lead pipe and lead waste have declined again. Linseed oil and turpentine are also lower. Wire nail prices have been further reduced by wholesalers. Bar iron and steel are at lower levels and English standard galvanized sheets have been reduced in price.

The steel market is in a more quiescent state than it has been for some months and there are no immediate signs of any improvement. The present rate of pig iron production reported from Pittsburgh is about 60 per cent. of capacity, and the trend is towards a further decrease. Steel merchants are drawing on their present stocks almost entirely and some of the trade that should be good at the present time is being curtailed. Ingot metals, although still quiet, are inclined to be steadier, and some of them, including copper, are showing a better tone.

Business continues to improve in the volume of orders received, but some lines in which there should be good business now are quieter than usual. Taken altogether, orders are smaller, but it is realized that merchants are buying oftener than formerly.

Montreal Markets

MONTREAL, February 10.—Price changes to lower levels are prominent again in this week's market quotations and many important lines are affected. Cotton ropes, cords and lines are lower, also manilla and sisal rope. Both of these have featured in recent declines. Gasoline and fuel oil have new prices, while copper rods, sheets and tubing are 2 cents lower. Practically all grades of bar iron and steel are reduced, black and galvanized sheets are lower. Nails, pipe fittings and lead products remain at recent declines. Ingot metals are a little steadier this week.

Fuel Oil Reduced

Montreal.

New lower prices are now being quoted on fuel oil, showing a reduction of 3 cents a gallon, both in tank cars and in barrels. Quotations now ruling are 10.40 cents per gallon in tank cars and 12.40 cents per gallon in barrels.

Lubricating Oils Reduced

Montreal.

A reduction of from 5 to 10 per cent. is quoted on the different grades of lubricating oils. This decline, however, is not uniform on all kinds or grades, and some lines remain as formerly quoted. The new prices are said to be governed by stocks on hand, as the reduction in crude oil, which became evident a short time ago, has not had any effect on lubricating oils as yet.

Gasoline Lower

Montreal.

Gasoline shows a reduction of 2½ to three cents a gallon this week. This has been looked for, as crude oil has lowered recently, and only a few days ago gasoline was quoted at reduced prices in the United States. All grades of naptha are reduced 2½ cents. Present prices for gasoline are: motor grade, 41 cents; higher grade, 46 cents. Coal oil remains at 29 cents.

Sash Cord Reduced

Montreal.

Sash cord is again quoted at reduced prices. A decline of 11 cents a pound is given. New prices are as follows: No. 5, $15.30 dozen; No. 6, 59 cents a pound; No. 7, 58 cts. lb.; No. 8 and up, 57 cts. lb.

Rope Again Reduced

Montreal.

A reduction of 1½ cents on pure manila, and one cent on Beaver manila, sisal and lathyarn is shown this week. An unsettled feeling exists in the rope market, keen competition being felt from outside markets. Trade continues dull and with lower prices now in effect it is hoped to stimulate the trade to a certain extent. Rope has featured in declines recently and only three weeks ago a similar reduction was made. Quotations now are: Pure or best manila, 24½ cts. base; Beaver manila, 20 cts. base; sisal, 18 cts. base; lathyarn, 18 cts. base.

Braided Lines 10% Lower

Montreal.

There has been a decline of 10 per cent. on No. 3½, 4, 4½ and 5 braided lines. This applies to both white and colored.

Decline in Cotton Rope

Montreal.

Cotton rope is now quoted at from 9 to 11 cents a pound lower, present prices being 3-16 in., 49 cts. a pound; ¼ to ¾ in., 48 cents a pound.

Cotton Clothes Lines Reduced

Montreal.

Along with all other cotton lines, rope and cords, clothes lines show reduced prices. Quotations now are: 30 ft., $2.00 doz.; 40 ft., $2.50 doz.; 48 ft., $3.00 doz.

Reduction in Rivets and Burrs

Montreal.

Another reduction is made in the prices of copper rivets and burrs. Rivets with usual proportion of burrs are now selling at 27½ per cent. off list, and burrs only at add 10 per cent. to list.

Copper Goods 2 Cents Lower

Montreal.

Copper rods, sheets and tubing are again reduced two cents a pound. A

similar reduction was made on these lines only two weeks ago. Present prices are as follows: Rods, ½ to 2 in., 32 cents; soft plain sheets, 16 oz. and heavier, 34 cents lb.; plain tinned sheets, 16 oz. and heavier, 38 cts. lb.; sheets, polished and tinned, 16 oz. and heavier, 42 cts. lb.; tubing, 40 cts. lb.

Iron and Steel Reduced

Montreal.

A reduction is made this week on the different lines of iron and steel, running from 25 to 35 cents on the different kinds. Business continues seasonably light, with small sorting orders being shipped. New quotations are as follows:

IRON AND STEEL

Common bar iron, 100 lbs.	4 20
Refined iron	5 80
Iron finished machinery steel	4 25
Mild steel	4 20
Band steel	4 20
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 20
Tire steel	4 40
Toe calk steel	5 20
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steed in scroll bdles, 50c per 100 lbs. extra.

Waste Materials Continue Dull

Montreal.

Buying and selling of scrap metals continues very quiet, and very little business is reported. Prices on the different materials remain unchanged and following are the quotations:

DEALER'S BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 07
Red brass	0 12½
Light brass	4 50
Scrap zinc	0 05
Lead, heavy	4 00
Lead, tea	2 50
Light copper	9 00
Heavy copper	11 50
Wrought iron, R. Rd., No. 1, per gr. ton	13 00
Malleable scrap (ton)	15 00
Pipe scrap (ton)	9 00
Stove plate, per ton	20 00
Heavy melting steel	15 00
No. 2 busheling	5 00
Boiler plate	12 00
No. 1 machinery cast, per gr. ton	$25 00 $28 00

Lower Quotations on Sheets

Montreal.

Both black sheets and English standard galvanized sheets are reduced in price this week. The decline in black sheets is about 70 cents per 100 lbs., while on the English standard galvanized a reduction of 50 cents per 100 lbs. on all gauges of both Queen's Head and Fleur-de-Lis is quoted. Present prices are as follows:

BLACK SHEETS—	
10 gauge	7 75
12 gauge	7 80
14 gauge	8 10
16 gauge	8 25
18-20 gauge	8 30
22-24 gauge	8 40
26 gauge	8 50
28 gauge	8 75

18 gauge		10 65
16 gauge		10 50
14 gauge		10 50
12 gauge		10 50
English Standard—		
28 gauge	12 50	11 50
26 gauge	12 25	11 25
24 gauge	11 65	10 85
22 gauge	11 30	10 40
18 and 20 gauge	10 60	10 25

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Fittings Remain Unchanged

Montreal.

Pipe fittings remain unchanged this week, prices holding at the recent decline. Business is said to be fair on these, small orders being shipped from the jobbers, while stocks are in a fair shape also. Quotations are as follows:

	Less
Bushings, cast	20%
Do., malleable	20%
Flanges	20%
Plugs	17½%
Flange Unions	7½%
Malleable Unions	32½%
Nipples, blk. or galv., up to 4 in.	50%
Do., 4½ in. or larger	40%
Do., running thread, 4 in. and under	30%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 17½%.

Wrought Pipe Unchanged

Montreal.

List No. 48 is still used in the selling of wrought pipe. Business continues fair for this time of year, and the fact that retail dealers have been able to accumulate surplus stocks where a shortage was felt is said to have kept the demand up for piping. Stocks at present, both in the hands of the manufacturer and jobber, are good. Prices will be found on current market pages.

No Change in Corrugated Sheets

Montreal.

Sales on corrugated sheets remain seasonably quiet, and prices still hold at recent declines. Stocks have been improved considerably during the quiet months and and to-day are in very good shape. Prices are as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Wares Selling Well

Montreal.

Aluminumware, graniteware and tinware are all selling well for the season of the year. Sales continue to come in in good volume and manufacturers state that up to present date the sales are quite favorable and up to expectations. January and February are always expected to be more or less quiet, and this year is not exceptionally so. No recent price changes have been made on these lines.

Nails Holding at Decline

Montreal.

Both wire and cut nails are holding at the decline of last week. Few sales are being made in nails at present, but an improvement is expected in the near future. In March many spring deliveries are made on nails, and with the demand then increasing it is hard to determine whether lower prices will be quoted. Bookings to date are lighter than other years, dealers holding off and buying in small quantities only. Stocks in the hands of the jobbers are said to be fair. Present quotations are $5.25 base for wire nails and $5.75 base for cut nails.

New Sap Bucket Prices

Montreal.

Prices are now available for sap buckets. With the sap and maple syrup season well advancing manufacturers and jobbers are well stocked with both buckets and spouts. One manufacturer this year is making all buckets of Imperial measure, and they will be sized as 1 gallon, 1½ gallon, etc., thus enabling the purchaser to determine just what size he requires. Present prices are as follows:

Sap Buckets.—No. 8, $21.88; No. 9, $24.50; No. 12, $26.25; No. 16, $31.50 per hundred; 1 gal., $21.88; 1½ gal., $26.25; 2 gal., $31.50 uer hundred.

Spouts.—Perfection. $25 a thousand; Eureka, $16.50; Sterling, $38; Square syrup cans, 1 gal., Imperial, $26 per hundred.

Lead Products Unchanged

Montreal.

Prices are now available on sap products after the decline of last week on solders. Dealers report stocks in fair shape and a steady demand is experienced. Following are the current quotations:

Lead pipe	0 13½
Lead waste	0 14½
Note.—Lead pipe is subject to a discount of 10%	
Lead traps and bends	Net list
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Lead sheets, 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs. sq. ft.	0 10
Cut sheets ¼c lb. extra and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 28
Do., strictly, lb.	0 26
Do., commercial, lb.	0 23
Solder, wiping, lb.	0 23¾
Solder wire (8 gauge)—	
40-60	0 28¾
45-55	0 30¾
50-50	0 32½
Zinc sheets, casks	0 14½
Do., broken lots	0 15½

Ingot Metals a Little Steadier

Montreal.

There is not much change in the markets on ingot metals this week. They show a tendency towards being a little steadier if anything, but with no marked change. Tin, copper and lead are quoted at slightly higher prices, the balance with prices maintained.

Tin continues irregular in London, but some judges are of the opinion that the recent liquidation is nearly through and we may see a more stable market soon; however, whether this is premature is difficult to say. Local quotations are 38 cents a pound.

Copper shows a firmer tone in London and New York. The local market is distinctly stronger, but whether it will

be lasting is very hard to determine. Electro, 19 cents; casting, 18¾ cents a pound.

Lead has been a little easier in London and also touched the new low point of $4.40 in United States. However, the local price is a little stronger at 6¾ cents.

The recovery on spelter will likely be slow, but shows a firmness in London and is evidently not far from the bottom in the U.S.A. Local price is unchanged at 7¾ cents.

Little demand is shown for antimony, the market remaining dull and unchanged. Local price, 8 cents.

Aluminum continues quiet and unchanged at 34½ cents.

Toronto Markets

TORONTO, Feb. 10.—The features of the week have been the reductions in rope and cordage prices, and a further decline in wire nails. This alteration from the price quoted last week for nails has not been due to any further reductions by the manufacturers but is a revision on the part of the wholesalers.

While price changes are not so numerous as they have been there are some important alterations, and cotton goods are showing further reductions. Sash cord, cotton rope, and other lines such as mop cloths, seine twine awning cords and candle wick are reduced in price. Copper rivets, which showed a decline last week, are again lower. Gasoline prices are two cents per gallon lower and oakum is showing a reduction in price. Some lines of shears and scissors are lower and Stewart horse clippers are reduced in price. Several lines of National goods such as planes, vises, hack saw frames, etc., have been revised, and are mostly lower. Auto coaster wagons for spring have been reduced ten per cent. Bar iron and steel, black and galvanized sheets, wrought pipe and fittings are holding unchanged. Waste materials are quiet with little change. The ingot metal market is also quiet but there is a better feeling evident and prices are steadier.

Business is reported to be showing a gradual improvement with a fair volume of sorting up orders coming to hand.

Cotton Rope Lower Again

Toronto.

A decline of about 12 per cent. has been made in the price of cotton rope, and for ¼-inch size and larger the price is now 50 cents per pound. The usual extras are charged for smaller sizes.

The previous quotation was 57 cents.

Sash Cord Declines 16 P.C.

Toronto.

Sash cord has been reduced in price and the present decline is approximately 16 per cent. Sizes 8 to 12 are now quoted at 57 cents per pound, No. 7 at 58 cents, and No. 6 at 59 cents.

Copper Rivets Lower Again

Toronto.

A reduction was recorded in the price of copper rivets last week and another change is made this week, effective February 7. Copper rivets and rivets with the usual proportion of burrs are now quoted at 27½ per cent. off list. For burrs only, and where the burrs are in excess of one-third of the combined weight of rivets and burrs, the new quotation is list plus 10 per cent.

Wire Nails Lower Again

Toronto.

Wire nails are lower again this week by 15 cents per keg, and the base price is now $5.10. No further reduction has been made by the manufacturers, and the decline is owing to the wholesalers having agreed to reduce their margin by 15 cents per keg in order to bring differentials nearer to pre-war standard.

Cut Nails Show Decline

Toronto.

A big decline is reported in cut nails, and quotations for these are now at $6.20 per keg, base, f.o.b. Toronto, plus the usual extras on list of September 27, 1920. The charges for galvanizing remain unchanged and are $4.50 per 100-pound keg for sizes under one inch, and $4 per keg for one inch and over.

New Vise Prices

Toronto.

New prices are announced on National vises and constitute a reduction. The following are the new list prices.

MACHINISTS' STATIONARY BASE VISE—No. 103, list $10; 103½, $11.25; 104, $12.75; 104½, $15.50. No. 105, $20; 105½, $30; 106, $39; 107, $55. Discount 10/5%.

MACHINISTS' SWIVEL BASE VISE—No. 203, list, $13; 203½, $15; 204, $17; 204½, $20. No. 205, $30; 205½, $38; 206, $52; 207, $70. Discount 10/5%.

OVAL SLIDE VISE—No. 602½, list $5; 603, $6; 603½, $8. No. 604, $10, 604½, $16; 605, $18. Discount 40/5%.

SELF LOCKING PIPE VISE—No. 71, list, $5; 72, $7.50; 73, $11. Discount, 15%.

New National Plane Prices

Toronto.

Revised prices on National planes show some reductions in quotations. Practically all numbers are affected, and following are the new net prices.

ADJUSTABLE IRON PLANES—N2, $3.40; 3, $3.50; 4, $3.90; 4½, $4.50. N2C, $3.55; 3C, $3.65; 4C, $4.10; 4½C, $4.70. N5, $4.45; 5½, $5.05; 6, $5.80; 7, $6.70. N5C, $4.70; 5½C, $5.30; 6C, $6.10; 7C, $7.05.

BLOCK PLANES—N102, 70c; 103, $1. N110, $1; 120, $1.45.

WOOD PLANES—N35, $3.50; 26, $3. N. 27, $3.40; 28, $3.90.

Hacksaw Frames Revised

Toronto.

Reductions have been made in the prices of National hacksaw frames, and the new net prices are, per dozen, mechanics, nickel plated, $14; ditto, dull finish, $12.60; general purpose, $5.40; full grip, $19.60; pistol, $16.80.

Oakum Prices Decline

Toronto.

Lower quotations are now made on oakum and No. 1 spun is now $18.50, less 10 per cent., while plumbers' oakum is quoted at $9.25, less 10 per cent. This is a reduction of approximately 18 per cent. on the spun and 12 per cent. on the plumbers'.

Fitting Quotations Hold

Toronto.

Wholesalers report seasonably light sales in pipe fittings at present, and stocks are abundant for present requirements.

Quotations are held at recent declines and are as under:

Cast iron fittings	10%
Plugs	20%
Bushings	25%
Unions, ¼-in. to 2-in.	35%
Do., ⅛ in., 2½ to 4 in.	30%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B.	0 26	0 36
Class C.	0 17	0 26

Pipe Prices Unchanged

Toronto.

A fair sorting-up business continues to be felt in pipe, and sales of the smaller sizes are good for the season of the year.

Prices are held unchanged and list will be found on current market pages.

Bar Iron is Quiet

Toronto.

Sales continue light in iron and steel, and though orders are fair in numbers they are not heavy, and it is believed that it will be a little time yet before much change can be looked for. There is no quotable change in prices this week and following are prevailing quotations:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter	$ 5 25
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter	5 25
Common bar iron, ¼ in. and heavier	4 75
Angle base	4 75
Horseshoe iron	6 00

Tire steel	5 95
Band steel	5 25
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00

Toe caulk iron	6 70
Hoop steel	6 00

New Horse Clipper Prices

Toronto.

A reduction has been made in the price of Stewart's horse clippers, and the No. 1 BB is now quoted at $14, less 25 per cent. New lower list prices are in effect on the sheep shearing clipper and attachment, and also on spare clipper blades.

10 P.C. Reduction on Wagons

Toronto.

Auto-coaster wagons have been reduced about 10 per cent, and 33 1-3 and 10 per cent. is now quoted off list.

Gasoline Down Two Cents

Toronto.

A reduction of 2 cents per gallon has been made in the price of gasoline. The decline was forecast in the last issue of Hardware and Metal. New quotations are 40 cents for motor grade gasoline. Coal oil prices remain unchanged and are 28 cents for Royalite and 31 cents for Palacine. The last change in gasoline prices took place early last September when an advance of 2 cents was made.

S.W. Mops are Lower

Toronto.

A reduction of about 12½ per cent. has been made in the price of self-wringing mops, and these are now quoted at $5.50 per dozen. The old price was $6.30.

The cloths for self-wringing mops have also been reduced again and are now about 10 per cent. less than previous quotations.

Shears Show Lower Quotations

Toronto.

Reductions have been made in the prices of shears and snips, and the Wiss line are now lower. A decline of about 12½ per cent. is reported in the larger sizes of shears, and some lines are reduced from 20 to 25 per cent. Some lines of snips are down about 7½ per cent.

Lead Waste and Pipe Down

Toronto.

Another decline has taken place in prices of lead pipe and lead waste and they are down one cent.

Copper Bottoms Plus 50 P.C.

Toronto.

In noting the change in the discount of copper boilers in the issue of January 29, it read that boilers with copper bottoms remain unchanged at list plus 50 per cent. This should have read that copper bottoms remained unchanged at list plus 50 per cent., and pieced tinware with copper bottoms at list plus 90 per cent.

Household Vises Lower

Toronto.

A new lower price has been made on amateur and household vises and they are now quoted at $11.10 net.

Lead Products in Demand

Toronto.

Prices are holding unchanged on lead and zinc products. Business continues fairly good in these lines considering that it is a quiet season of the year.

Quotations are the following:

Lead pipe, list, per lb.	0 13½
Lead waste pipe, list, per lb.	0 14½
Do., over 8 in., list, per lb.	0 15½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 10½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 27
Do., commercial, lb.	0 24¼
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 25
Zinc sheets, per lb.	0 18

Compression Goods Steady

Toronto.

The demand for compression goods is fairly good on the various lines, especially on standard compression work and smaller valves. No further changes are recorded and quotations are holding at recent declines as below:

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	30%
Do., Fuller	30%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, stand.	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J. M. T.	10%
J.M.T. C.	20%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	23%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

F. O. B. factory, Toronto.

REDUCTION IN PRICES OF PUMPS AND WRENCHES

As Hardware and Metal is going to press a reduction of 10 per cent. has been made on all pumps of James Smart plant, with the exception of Red-Wing semi-rotary pumps. Canadian Billings and Spencer plant has also reduced prices on stillson pattern wrenches 10 per cent.

Boiler Tubes in Better Demand

Toronto.

There is a better demand during the last week or so for boiler tubes although sales are below the average. Prices continue fairly firm and show little change. Following are present quotations:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	$28 00	.....
1¼ inch	32 00	.....
1½ inch	33 00	.....
1¾ inch	35 00	.....
2 inch	35 00	28 00
2¼ inch	38 00	32 00
2½ inch	46 00	36 00
3 inch	54 00	45 75
3½ inch	70 00	46 00
4 inch	92 00	60 00

Sheets and Plates Held

Toronto.

Little change is reported regarding sheets and plates. The demand for the lighter gauges of both black and galvanized sheets is said to be unusually light even for a quiet season, but the heavier sheets and plates are reported to be showing an improvement.

Supplies are greatly improved and even with a large number of mills reported to be closed down, wholesalers state that they are able to get shipments from United States mills very promptly, and without the delay that formerly occurred.

Quotations are nominally unchanged and are the following:

PLATES

10 gauge	6 20	.....
12 gauge	6 25	.....
14 gauge	6 30	.....
16 gauge	6 40	.....

BLACK SHEETS

14 gauge	6 30	7 70
16-gauge	6 40	7 75
18-20 gauge	6 75	7 80
22-24 gauge	6 80	7 85
26 gauge	6 85	7 90
28 gauge	7 00	8 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	9 50	10 50
U. S 28	9 10	10 20
U. S. 26	8 80	9 95
22 and 24	8 65	9 70
18 and 20	8 50	9 55
16	8 35	9 40
12 and 14	8 30	9 35

An extra is now charged on galvanized sheets. 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Victor Hack Saws Reduced

Toronto.

There has been a reduction of about 5 per cent. made this week in the price of Victor hack saws.

Waste Market Holds Ground

Toronto.

There has been a quiet but a firm tone to the waste market, but the consuming demand has not yet improved. The non-ferrous scrap metals have stool still and dealing has been small and prices are unchanged although the undertone has been uncertain due to the virgin situation. The following are nominal prices for large quantities.

WASTE MATERIAL

No. 2 busheling		$13 00
Stove plate, per ton	19 00	20 00
Yellow brass	6 00	7 00
Red Brass		10 00
No. 1 machinery cast	24 00	25 00
Heavy melting steel	15 00	16 00
Heavy copper	10 50	11 50
Scrap zinc	4 00	4 50
Light brass	4 00	4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	2 00	2 50
Overseas lumbermen's rubber boots	1 50	2 00

Bicycle tires	0 75	1 25
Tea lead	2 00	2 25
Automobile tires	0 50	1 00

Hockey Stick Booking Prices

Toronto.

New prices on hockey sticks for booking for fall delivery are now out, and the prices for the season of 1921-1922 show no reductions in price from the present season. It is pointed out that the available supply of the right kind of lumber for these goods is getting harder each year to obtain and is costing the manufacturers of hockey sticks more for each shipment received. Such timbers as rock elm, ash, oak or maple are not growing as fast as they are being cut.

The following are the quotations on the St. Mary's Wood Specialty line:

Hockey Sticks—3-piece goal, $18 per dozen; extra large goal, $17; 2-piece goal, $15; handmade, $13.75; Reliance, $12; Hockey King, $10.50; Rover, $8.25; Amateur, $6.25; Practice, $5; Boys' Expert, $4.50; Boys' Painted, $3; Juvenile, $2; Rooter, $1.

Ingot Metals Still Quiet

Toronto.

Practically all ingot metals are quiet and unchanged, although a little better feeling is prevailing in the markets and a slightly firmer tone is displayed in outside markets on copper.

Tin is holding unchanged, but very little business is reported. In London markets were weak and prices broke from £12 to £14 and were marked to levels that were the lowest since 1914, but partly recovered later.

Quotations are holding here at 43 cents.

A better feeling is reported in copper markets, and though there is little increase in buying producers' prices are said to be firmer.

Local quotations are holding at 19 cents for casting copper.

Lead is quiet and showing no change in prices. In outside markets the demand is reported as fitful and irregular with little buying on the part of consumers. London markets are a trifle weaker.

The price here is unchanged at $7.

Spelter has shown little change during the week and buyers seem in no hurry to place orders.

Local quotations are holding at $7.

The antimony market is very dull with little or no business offering. Prices are unchanged at 8 to 9 cents.

Aluminum is said to be quiet here, but a better inquiry is noted on United States markets and a firmer tone is reported than has been the case for some months. London prices are holding firm.

Local quotations are still 35 to 37 cents.

London Markets

LONDON, Feb. 10.—Some important price changes have been made this week, and wire nails and also cut nails have again been lowered. Rope and sash cord have declined in price again, and other goods showing reductions are linseed oil and turpentine, Stewart clippers, rubber belting, compression goods, lace, leather, seine twine, candle wick and copper rivets and burrs.

Business here during the past week has been seasonably good and Dollar Day, which was held on Thursday, February 3, was a great success among the merchants here, and helped the total sales for the week considerably.

Collections continue to be good.

Linseed Oil Down Seven Cents

London, Ont.

Linseed oil continued to decline this last week and the present selling price is 7 cents lower than the previous week.

Quotations are as follows:

	Raw.	Boiled.
1 to 2 barrels, per gal	1 00	1 03
3 to 5 barrels, per gal.	0 99	1 02
6 to 9 barrels, per gal.	0 97	1 00

Less Barrels, add 15c per gal.

Turpentine Declines Ten Cents

London, Ont.

A decline of 10 cents per gallon has been made in the price of turpentine during the past week and single barrels are now quoted at $1.20 per imperial gallon. Sales continue light on this product at present.

New quotations are the following:

1 barrel lots, $1.20 Imp. gal; 2 to 4 bbl. lots, $1.19; 5 gal. lots, $1.35.

Wire Nails Changed Again

London, Ont.

The price has been changed again this week on wire nails, and another decline has taken place of 5 cents per keg, making the present base price $5.20. This is a price adjustment among the wholesalers, as no further reduction has been made by the manufacturers.

Quotations here are as follows:

$5.20 base, f.o.b., London.
$5.30 base, Owen Sound and Collingwood, freight equalized.
$5.20 base, Windsor, carload freight allowed.

Sash Cords Drop 16 P.C.

London, Ont.

Another reduction has been made in the price of sash cord this week, and new quotations are 11 cents per pound lower, making a further decline of approximately 16 per cent.

New quotations are the following, per pound, No. 6, 59 cents; No. 7, 58 cents, and Nos. 8 to 12, 57 cents.

Cut Nails Drop 75 Cents

London, Ont.

Cut nails have declined 75 cents per keg, and are now quoted at $6.40, base f.o.b. London.

Braided Awning Cord Lower

London, Ont.

New lower quotations are in effect on braided awning cord and constitute a reduction. Following are the new prices.

No. 3, $1.35 doz. hands; 3½, $2.; 4, $4.20; 4½, $6.00.

Reduction on Bed Cords

London. Ont.

Following the reduction in cotton goods, lower prices are quoted for cotton bed cords and are as follows:

COTTON BED CORDS—30 ft., $2.10 dozen; 48 ft., $3.20; 60 ft., $3.80.

Seine Twine Prices Lower

London, Ont.

Prices have declined again on seine twines and the following are the new quotations:

SEINE TWINE—No. 18 and larger in 1 lb. cone, 80c per lb.; No. 15 and smaller, 81c; No. 18 and larger in ¼ lb. cone, 81c; No. 15 and smaller in ¼ lb. cone, 82c.

Candle Wick Price Down

London, Ont.

The price of candle wick is lower this week and it is now selling at 55 cents per pound.

Rope Prices Again Decline

London. Ont.

Another change is made this week in rope prices, and pure manila declines 1½ cents, while Beaver manila, New Zealand hemp, sisal and lath yarns are 1 cent per pound less. Following are the new quotations:

Pure Manila Rope, 24½c base. Beaver Manila Rope, 20c base. New Zealand Hemp, 20c base; Sisal, 18c base; Lath Yarn, 18c lb.

Cotton Rope Down 12 P.C.

London, Ont.

A decline of about 12 per cent. has been made in cotton rope prices, and ¼ inch and larger is quoted at 50 cents per pound; 3-16 inch is now 51 cents.

Stewart Horse Clippers Cheaper

London. Ont.

New lower prices are made on Stewart horse clippers and sheep shearers and on parts. New lists are issued and the discount remains at 25 per cent. off.

Following are new list prices on some of the best known lines:

Horse Clipper, No. 1 BB., $14 each list.
Sheep shearing attachment for No. 1 horse clipper, $13 each.
Combined horse clipping and sheep shearing machine, $27 each.
Sheep shearing machine, No. 8, $18 each; No. 9BB, $22, list each..
Top plates for Stewart horse clipper, $1.25 ea.; bottom plates, $1.75 each; shaft and chain, $5.25 each; 6-ft. shaft only, $3.60 each; 6-ft. chain only, $2.10 each; head complete with plates, $4 each.
No. 276 cutter for sheep shearer, 25c each; No. 277 comb, 75c each.
All less 25%.

Copper Rivets Lowered Again

London, Ont.

New lower quotations were announced last week on copper rivets, and another reduction has been made this week.

The present discount on copper rivets and usual proportion of burrs is 27½ per cent. On copper burrs alone the discount is list plus 10 per cent.

Rubber Belting is Down

London, Ont.

Rubber belting has been lately reduced in price and the new discount on the Reliable brand is 40 and 12½ per cent. off list.

Bibbs and Stop Cocks Lower

London, Ont.

There has been a decline of approximately 11 per cent. in the price of brass compression bibbs and stop and waste cocks, and instead of 25 per cent. off list, the quotation is now 34 per cent. off.

Cut Lace Leather Declines

London, Ont.

A reduction has been made in the price of cut lace leather, and this is now quoted here at $2.25 per pound.

Window Glass Holding

London, Ont.

No change is noted in window glass here this week, and this is quoted at 60 per cent. off list for single or double diamond, and 60 per cent. off cut light list also.

No Change in White Lead

London, Ont.

The price of white lead in oil is holding unchanged here, and sales are seasonably fair.

Quotations remain as under.

	Tons.	Less Tons
PURE per 100 lbs.	$16 95	$17 30
ELEPHANT, per 100 lbs.	17 45	17 80

Putty Shows no Change

London, Ont.

No change has been made in putty prices and the demand is light at present. Present quotations are the following:

Standard 100 lb. drums, $8.05 per 100 lbs.; 25 lb. drums, $8.30. Pure, 100 lb. drums, $10.55; 25 lb. drums, $10.80.

Pyrex Ware Selling Well

London, Ont.

Pyrex glass oven ware is proving a good all the year seller and the demand for this line has been good even since the Christmas trade. Quotations remain unchanged at 35 per cent. off list.

Good Sales for Accessories

London, Ont.

Automobile accessories and tires are enjoying very good sales at the present time as a result apparently of the exceptionally open weather. Prices generally remain firm and show little change.

Fair Lantern Sales

London, Ont.

Fair sales are being made on lanterns and lantern globes, and the price of $15 per dozen for long or short pattern lantern still holds. Globe prices are as follows and are also unchanged:

LANTERN GLOBES— (long and short pattern), 1 doz. cases, $2 per doz.; 3 doz. cases, $1.80 per doz.; 6 doz. cases, $1.60 per doz.

Winnipeg Markets

WINNIPEG, Feb. 10.—Several lines of steel goods, such as hammers, sledges, wedges, files, etc., are reduced in price this week.

Carriage rivets are lower in price and copper rivets and burrs are reduced again. Other lines showing lower quotations are carpet felt, crushed oyster shell, and wood alcohol.

Linseed oil, turpentine and white lead in oil are all reduced again this week.

An improvement has been shown in the volume of business during the past week, but there is a certain holding back in ordering for later delivery, though good sorting up orders are being received.

Carpet Felt Price Declines

Winnipeg.

The price has been reduced on carpet felt and the following are latest quotations: 16-ounce, $4.70 per roll; 20-ounce, $5.90 per roll.

White Lead Declines Slightly

Winnipeg.

Decorators' pure white lead has been again reduced slightly and is now quoted at the following prices:

1 lb. $20.60 per 100 lbs.; 2 lbs, $20.60; 5 lbs., $20.10; 12½ lbs., $18.60; 25 lbs., $18.10; 100 lbs., $18.10.

Wrought Pipe Unchanged

Winnipeg.

There has been no change on wrought iron pipe for some time. The new price lists issued at the first of the year to take care of the change in freight rates is still in use. The demand for this line is fair and deliveries are getting better.

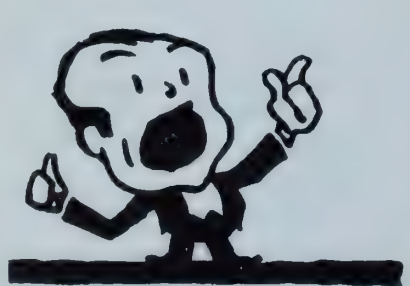
Quotations are to be found on current market pages.

Crushed Oyster Shell Lower

Winnipeg.

A slight reduction has been made in the price of crushed oyster shell for poultry, and it is now quoted at $2 per 100 pounds.

Turpentine Drops in Price



Winnipeg.

The price has again been reduced on turpentine and it is now quoted at $1.65 per gallon in barrel lots.

Wood Alcohol Prices Down

Winnipeg.

The price has dropped on wood alco-

The 33rd Annual Spring Buying and Directory Number of Hardware and Metal will be issued on March 19. It will be the best number ever produced in Canada. Watch for it.

hol this week and the following prices are quoted: Barrel lots, $2 per gallon; less, $2.10 per gallon. Containers extra.

Linseed Oil Again Lower

Winnipeg.

Another reduction has been made this week on the price of linseed oil and it is now quoted at the following: Raw, $1.20 per gallon; boiled, $1.23 per gallon.

Copper Rivets Again Reduced

Winnipeg.

The prices have been reduced on copper rivets and burrs and following are the last quotations:

COPPER RIVETS—No. 8, 50c per lb.; 10, 54c; 12, 58c.

COPPER BURRS—No. 8, 50c per lb.; 10, 54c; 12, 58c.

ASSORTED COPPER RIVETS AND BURRS—No. 8, 50c per lb; 9, 58c; 10, 60c.

Carriage Rivets Lower

Winnipeg.

The list prices on carriage rivets have been revised, making the selling price lower with a discount of 30 per cent.

List prices:
Size ⅜ in. x 3-16 in., 23c; ¼, 24c; 5-16, 23c.
½ x 3-16, 23c; ¼, 22c; 5-16, 21½c; ⅜, 21c.
⅝ x 3-16, 23c; ¼, 22c; 5-16, 21½c; ⅜, 21c.
¾ x 3-16, 22½c; ¼, 21½c; 5-16, 21c; ⅜, 20½c.
⅞ x 3-16, 22½c; ¼, 21½c; 5-16, 21c; ⅜, 20½c.
1 in. and longer by 3-16, 22c; ¼, 21c; 5-16, 20½c; ⅜, 20c.

Pittsburgh Markets

PITTSBURGH, Feb. 10.—Production of pig iron is down to a rate of about 27,500,000 gross tons a year, this comparing with a rate of about 28,700,000 tons in January, 32,150,000 tons in December and 36,850,000 tons in the year 1920 as a whole.

Actual productive capacity may be estimated at 45,000,000 or 46,000,000 tons a year, so that the present rate of operation is about 60 per cent. of capacity. In one way this is a low rate, but it must be remembered that a number of times operations in the iron and steel industry have gotten down to 60 per cent., and merely in a time of ordinary depression or relaxation, without there being such great unsettlement in the world as now exists.

Just now there is no occasion to think of the rate of production increasing. There is no sign that it is going to do that in the near future, or until fundamental conditions have greatly improved. Rather the trend is very decidedly downward, and unless there is a complete reversal in affairs there will be a much lower rate in the course of the next two or three months. Very likely there will be some improvement in demand here and there, but the rate, as a total, will decrease. Only a small proportion of the merchant furnaces are now in blast, so that there is not much room left there for decrease. As to the furnaces of independent steel works, they are, as a whole, running a little better than the attendant steel works, so that there may easily be some decrease in that quarter. The great point, however, is the Steel Corporation, whose operations have been altogether phenomenal. The corporation is running about three times as great a proportion of its capacity as are the independents, and that, of course, cannot continue indefinitely. It is a marvelous thing that while four months ago the independents began to decrease production on account of the supply of specifications beginning to run thin, the corporation has in those four months operated at a higher rate than it did in the preceding four months. In December the Steel Corporation blew in five blast furnaces and blew out one, while in January it blew in two and blew out one, so that it is now running five more furnaces than at the close of November. At some time, and probably very soon, the Steel Corporation's production of pig iron and steel will begin to fall off sharply.

While the present rate of pig iron production, 27,500,000 tons a year, is only 60 per cent. of existing capacity, it is just equal to the output in 1910, which was 27,300,000 tons, while that was approximately the full capacity in 1910. There was sustained demand throughout the year, largely against old contracts. All the consuming industries were working well and requiring more iron and steel than ever before. Now there is not a consuming industry that is in anything like normal position.

Foundry pig iron has been offered by producers on the basis of $29 valley, or $1 under the market as previously quoted. Nothing at all has occurred in Bessemer and basic, which accordingly remain quotable at $32 and $30, respectively, at valley furnaces. All these prices, however, are nominal. An actual inquiry for a few thousand tons would undoubtedly bring out lower quotations, but no one is disposed to inquire.

Pig iron is simply unsaleable. The furnace men do not know whether consumers would be interested at any price at all, but some of them would like to develop this matter. Production cost is, of course, vitally involved. With costs as at present the furnaces might shade these prices a trifle, but not much. The furnaces have not much leeway now that the market has declined as far as it has already, most of the production cost being involved in the costs of the raw materials. Two or three of the coke operators, perhaps more, are alive to the situation and are desirous of co-operating with furnace men to get costs down, expressing their willingness to figure out coke prices afresh, even when regular contracts are in force, if the furnace men can get other items of cost down so as to make much lower prices for pig iron and try whether such prices will enable pig iron consumers to get started consuming.

With the exception of plates, prices of finished steel products are well held at the Industrial Board level. In several of the commodities there is some shading, but not a great deal. The steadiness of the market does not betoken any real strength in the situation, the cause of the steadiness being rather that there is so little inquiry of a regularly competitive character that producers are not encouraged to name cut prices. Plates have been sold at 2.50 cents, against the Industrial Board price of 2.65 cents, and more orders could be placed at 2.50 cents, though it is to be noted that the Steel Corporation and some of the independents are adhering strictly to the 2.65-cent price. Other commodities may be quoted at Industrial Board prices as follows: Bars, 2.35 cents; shapes, 2.45 cents; standard steel pipe, 57½ per cent. basing discount; plain wire, 3.25 cents; wire nails, $3.25; blue annealed sheets, 3.55 cents; black sheets, 4.35 cents; galvanized sheets, 5.70 cents; tin plate, $7 per base box, 100-pound.

The Future

At the beginning of the year there were some predictions that the demand for steel products would experience a marked improvement about the second half of March, and that there would be fairly full demand by September or October, though these predictions were not made universally. Now, however, the predictions are less hopeful. There are practically none who definitely predict full employment even late this year.

Several causes brought about this change in expectations. One is that the price readjustment is not proceeding as rapidly as was expected. Observers took their cue from the declines in certain quarters, assuming that others would follow, but now it is seen that the lead is not followed as was expected. To illustrate, long ago clothing experienced sharp reductions, but groceries are not down in proportion even now. The wholesale price of pork dropped below the pre-war price, but the retail price has undergone little reduction. Then, coming home to steel, the independent steel producers came down to the Steel Corporation or Industrial Board level before the end of last year, but the prices of many finished wares produced from the regular rolled products have not declined in proportion. In the past week chain has been reduced from 7.25 cents to 6.75 cents base, with a decrease in the extra for the smallest sizes of .75 cent, but chain is still high relative to its raw materials, wire at 3.25 cents, rods at $57 and bars at 2.35 cents.

Partly on account of this slowness in price readjustment the expectation of broadening in demand for steel must be deferred. Another influence is the unsatisfactory credit situation, capital being scarce and borrowing difficult. The steel industry, which usually does a cash business, with excellent collections, now finds collections very poor in some quarters.

Paint and Varnish Manufacturers in Convention

Eighth Annual Meeting Held at Montreal—Officers Re-elected For 1921—"Save the Surface" Committee Report—Plans Outlined for 1921

AT THE eighth annual convention of the Canadian Paint, Oil & Varnish Association, held at Montreal, many important matters pertaining to the paint and varnish industry came up for discussion. As announced elsewhere in this issue practically all of last year's officers were re-elected.

GEORGE HENDERSON

Brandram-Henderson, Ltd., Montreal, re-elected president of the Canadian Paint, Oil and Varnish Association at the recent election.

There was some discussion regarding the agenda for the International Labor Conference to be held at Geneva, April 4 next, one item of which refers to the question of the prohibition of the use of white lead in the manufacture of paints. It was stated that the Lead Grinders' Association would take up the matter, and act in the best interests of all concerned.

Endorse Made in Canada

The meeting went on record as endorsing the efforts of the Canadian Manufacturers Association in connection with the "Made in Canada" campaign, and each member was urged to do all in his power to assist in furthering the campaign.

A request from the American consul for information in the form of replies to certain questions regarding markets for paints and varnishes was placed before the meeting, and the secretary was instructed to reply giving the information.

Paint Prices

The question of paint prices came in for considerable discussion, but no price changes were announced, and a statement was given to the effect that the feeling was unanimous that a reduction would not be in the interest of the members nor of the trade generally, and, further, that, in view of the fact that no money was being made at the present time, a reduction would be an intolerable burden on the manufacturers without stimulating trade in any way.

Freight Classification

Referring to the proposed freight classification No. 17, which the Canadian Freight Association filed with the Board of Railway Commissioners for approval, the Canadian Paint, Oil & Varnish Association suggested that an effort be made to have the minimum carload weight placed at 30,000 pounds instead of the proposed 36,000 pounds.

Report of "Save the Surface" Campaign Committee, Year 1920

"In submitting the annual report of the 'Save the Surface' Campaign Committee for the year 1920, it is proposed to cover as briefly as possible the activities engaged in and the progress made during the year.

While the work of the committee met with gratifying success during the year 1919, it was felt that there was a great necessity for a fuller understanding of the aims and objects of the campaign on the part of many subscribers and the great majority of salesmen, jobbers and retail distributors. The conclusion reached was that this could only be effected by personal contact with all classes of the trade, and that if their thorough co-operation could be obtained in spreading the "Save the Surface" idea it would be of inestimable value.

JOHN IRWIN

Managing Director McArthur Irwin Co., Montreal, elected a member of the "Save the Surface" committee at the recent meeting of the Canadian Paint, Oil and Varnish Association.

WALTER B. RAMSAY

A. Ramsay & Son Co., Montreal, re-elected vice-president of the Canadian Paint, Oil and Varnish Association at the recent election.

Plan a Convention

After a thorough discussion of this problem, it was decided to hold on April 30th a convention in Montreal, of subscribers, their salesmen, jobbers, retail paint dealers, master painters and others interested in the manufacture, distribution and use of paint. The success attending this gathering encouraged the committee to such an extent that similar conventions were held at Toronto, Vancouver, Calgary, Edmonton and Winnipeg.

As an outcome of the convention at Toronto, plans for local organization of the smaller towns were arranged, resulting in the retail distributors in a number of Ontario towns uniting co-operatively to use "Save the Surface" advertising at their own expense. Subsequently the conduct of this phase of the campaign was placed in the hands of F. J. Penberthy, who was chairman of the Business Promotion Committee of the Toronto Paint, Oil & Varnish Club.

British Columbia Campaign

At Vancouver, in order to meet the somewhat different local conditions existing there, it was decided to place the British

Glidden Gives the Finishing Touch

Giving the "finishing touch" to stately interiors requires not only the skill of the master painter, but demands the employment of the highest grade of materials as well.

The experienced master painter can be depended upon to choose the right finish — his choice is governed by long experience. And the fact that Glidden finishes are so frequently selected is evidence of Glidden quality. Painters know its wonderful qualities and unquestionable worth.

Identify yourself with Glidden products and reap the profits of Glidden reputation. You will find a ready response among painters for Glidden products. Write to-day for dealers' proposition.

THE GLIDDEN COMPANY, Ltd., Toronto, Ont.

Branches at Montreal and Winnipeg.

If interested tear out this page and place with letters to be answered.

Columbia campaign in the hands of the British Columbia Paint and Varnish Association, subject to the general direction of your committee. J. C. Pendray, of the British America Paint Company, has been lately added to the committee, and under his direction, as our representative in British Columbia, good results may be regarded as certain.

At Calgary, the campaign was heartily endorsed and promises of organization were received.

At Edmonton, where a successful "Clean Up and Paint Up" campaign had just been concluded, the representatives of your committee also met with promises of organization and co-operation.

Western Convention

At Winnipeg, a very enthusiastic convention was held. Mr. L. C. Stephens has been added to the National Committee as representing Manitoba and Saskatchewan, and was appointed chairman of the committee to conduct the local campaign throughout these provinces. The plans for further co-operation with your committee include another "Save the Surface" convention at the bonspiel to be held at Winnipeg in February 1921.

In the Maritime Provinces interest in the campaign will be further promoted by similar conventions during the present year.

Suggestions as to details of organizations considered desirable at the various centres were submitted by your committee to the local committees at Vancouver, Calgary, Edmonton and Winnipeg, and all the subscribers were furnished with a report of this convention tour.

One noticeable feature was the editorial support accorded by the newspapers of Vancouver and Winnipeg, which you will agree constitutes an exceedingly strong endorsation of the campaign.

It is to be remembered that a large part of the summer and early fall of 1920 was taken up in this organization work, the cumulative results of which cannot become fully apparent until 1921.

The publications in which "Save the Surface" campaign advertising has appeared, are divided into three classes:—City dailies, farm papers and magazines.

In addition to the distribution of the funds at its disposal in the conduct of the advertising campaign, the committee has printed and distributed the small book "Making Money in the Painting Business," which has been very popular and in great demand. During the last few weeks an attractive Window Trim has been secured for 1921, copy of which is before you. Large numbers of slogan cuts have been distributed, and your committee here wish to record the fact that there has been a great improvement in 1920 over 1919 in the use of this slogan, although some subscribers still at times forget its use in their advertising. This occasional neglect is to be regretted, as the constant use of the slogan should be the aim of all in order to keep it prominently before the public eye.

A reference to the folder sent out recently to all subscribers, containing the advertisements it is proposed to use during 1921 will, we feel confident, satisfy you that an excellent selection has been made. They were prepared with the greatest care in order that every branch of the industry represented in the Association might be covered in our series.

The entire funds placed in the hands of the committee were spent in advertising. Travelling expenses, where necessary in the interests of the campaign, were paid for personally by the members of the committee or by the firms they represented. It is not intended to extend the number of advertising mediums or space occupied, but to carry out the 1921 campaign on the same lines as those of 1920, will cost a considerably larger sum. This is due to the increase in advertising rates and also the marked advance in printing rates.

A series of letters has been sent out to all subscribers dealing with the subject of finances, and your committee hope that these letters have been given most careful thought.

A thorough investigation leaves no doubt as to the value of the campaign. Individual subscribers have furnished evidence of this by stating, in one case, that in the neighborhood of $2,000.00 worth of material was sold to one buyer as a result of the campaign; another states that as a result of the campaign accounts have been opened in establishments where paint was never before handled. Many retail dealers maintain that their sales have been materially increased through this medium, in fact from all sides tangible evidence is forthcoming bearing out this contention. The committee therefore feels, when the difficulty of estimating even approximately the results obtained from any form of advertising of a general nature is considered, that the campaign's success has been proven to a marked degree.

It will be of interest to note the action taken by the paint, oil and varnish manufacturers of the United States, when a short time ago they agreed to increase their subscriptions to the "Save the Surface" campaign from a matter of $140,000 to approximately $700,000, or five times as much as their original appropriation. There can be no stronger indication of the faith which lies behind the campaign in the country to the south of us than this enormous increase in the funds to be placed at the disposal of their committee.

We in Canada will undoubtedly benefit extensively from this increased appropriation in view of the fact that such a large percentage of the American committee's advertising is done in periodicals which have a very large circulation in this country as well as in the United States, such as the Saturday Evening Post, Literary Digest and American Magazine. This must, of course, be regarded as an exceedingly great help to our campaign linked up so closely as it is with the campaign in the United States.

Up to this point the movement may be regarded as a large scale demonstration rather than a complete program of serious work. The demonstration, however, has been so overwhelmingly convincing, the results have so completely justified the faith of the original proponents, that there can be no further doubt.

In view of all the circumstances, the committee feels that the subscribers will not have the slightest difficulty in realizing the importance of carrying on in 1921 advertising commensurate with last year, and after very careful consideration, is confident that its appeal for an increase of 50 per cent. over 1920 subscriptions will be heartily responded to. This increase is necessary for the reasons stated earlier in this report and the committee feels assured that the Association appreciates the desirability of reaping all the benefit undoubtedly to be derived from this campaign, augmented as it will be this year by the increased expenditure of the American committee.

The committee would like here to emphasize the fact that it is carrying out the plans of the association as unanimously decided upon. The detail work in connection with organization, advertising, etc., etc., can be, and has been done by the committee, but, without the enthusiastic co-operation of each individual subscriber the best results cannot be realized.

It has been felt that sufficient interest in the campaign is not being displayed by the selling staffs of the members of this association. The various advertising staffs seem to have taken a stronger hold of the material and ideas offering than have the sales departments. The enthusiasm evidenced by the money subscribed and by the work of the committee simply must be backed up by more, and still more, efforts on the part of the sales departments and the individual salesmen in their work throughout the country. This can only be secured by constant work on the part of the subscribers themselves, for, as previously stated, the maximum benefit to be derived from the campaign cannot otherwise be realized. Salesmen must be made to assume their part in the campaign, and the opinion of the committee is that the sales managers can bring this about to a greater extent than has yet been evidenced.

The committee feels that, assured of the active support of both sales and advertising staffs of the subscriber to the campaign, it will be in a position to perfect further plans for carrying the campaign along desired lines.

Better organization and co-operation amongst our own association members must be forthcoming before we can expect to secure the hearty support of such distributors, master painters, etc., etc., who may not have yet come in contact with salesmen who show the energy to be expected from representatives of those who are subscribing cash to carry on this work.

In order to assist subscribers to promote the campaign among their own sales staffs, an article headed "Talks to Salesmen" has been written and recently distributed. This gives suggestions which the committee feels should aid in creating the desired interest in the minds of all salesmen, but it is only a guide, intended to be used as such, and in no way to be considered the only method of bringing about the active support of the salesmen.

As a means of making sure that work is undertaken on behalf of the campaign by individual salesmen, it is suggested that each one be instructed to obtain the opinions of his various customers as to its value. These opinions could be sent to the respective head offices, who, in turn, could with advantage send them to the committee with their own remarks. Suggestions as to the conduct and extension of the campaign as a result of these expressions would be welcomed by the committee.

During the past two years, the campaign has made a strong and an effective appeal to the trade, to combat the false idea of economy shown in a reduced use of paints and varnishes during periods of business dulness, and this appeal is having, and will have an increased broadening and stabilizing influence during the present year when it is much needed. The year 1921 may furnish the acid test of the work so far accomplished, and therefore demands the carrying on of this campaign more intensively than before in order that we reap the benefit of the cumulative effect produced during the past two years.

Apart from the increased subscriptions asked for, the committee feels that only one thing is required, namely, the hearty and sustained co-operation of subscribers in the manner indicated, to make 1921 the most successful year since the organization of the campaign.

At the recent meeting of the Canadian Paint, Oil and Varnish Association held at Montreal, officers were elected for 1921 as follows:

President, George Henderson, Brandram, Henderson, Limited. Vice-Presidents: Walter B. Ramsay, A. Ramsay & Son Company; L. C. Stephens, G. F. Stephens & Co., Ltd., Winnipeg; T. F. Monypenny, Imperial Varnish and Color Co., Ltd., Toronto. Directors: J. C. Pendray, Andrew E. Hay, W. W. Ingersoll, Dougall Varnish Company, Montreal. "Save the Surface Committee": R. C. Mission, H. E. Mihell, John Irwin, A. T. Black, George Henderson.

A. T. BLACK RETIRES FROM MARTIN-SENOUR CO.

Will Enter Business for Himself

AN announcement of interest to those connected with the hardware trade comes with the news that A. T. Black, who for many years has been connected with the Martin-Senour Company and who, for the past five years, has held the position of chief executive of that company, has resigned to enter business on his own account.

A. T. Black is a native of London, Ont., and started his business career in the hardware store of A. Westman of that city. He was later connected with the Bond Hardware Co., of Guelph, Ont., in charge of the retail department. Later he became Eastern Ontario representative of the Martin-Senour Company, receiving an early promotion to the position of sales and advertising manager at Montreal. In 1916 he was appointed general manager.

Mr. Black's thorough training through each phase of the business will stand him in good stead in his intention to market a line of products selling to the hardware trade, regarding which an early announcement is expected. His success in the past will doubtless stay with him in his new venture and he will carry with him the good wishes of the many friends he has made in his recent capacity.

A. T. BLACK

Novel Ideas for "Dollar Day" Sale

Continued from page 57

this difficulty and find that it brings business.

After Country Trade

At the W. A. O'Dell hardware, which faces the market, the following lines were featured—aluminum ware, granite ware, silverware and cut glass for the women, paints for farmers, boys' watches, door mats, brooms and rubber mats. In the firm's advertising special attention was drawn to the fact that "Bargains" were offered at the O'Dell Hardware. Below were listed a large number of the articles mentioned. Paint was featured at the following prices: gallons $5, half gallons $2.50, quarts $1.25, pints 65 cents and half pints 35 cents. "See Us About Mixed Paints" said the caption of the paint section of the advertisement and a great many of the visitors took advantage of their visit to the city to talk over with the firm their paint needs. Not only were they sold paints but also brushes and other merchandise.

The Purdom Hardware Company took advantage of the crowds in town to open its annual February sale and used a quarter of a page of very attractively arranged advertising matter to tell the people about its offerings. In every instance the prices were given in large figures. There was literally in the merchandise listed "something for everybody." Automobile owners found patches listed at attractive prices, housewives looked over twenty-five enticing bargains in enamelware and aluminum ware. In addition there were such goods as brooms, vacuum cleaners, ash sifters and oil heaters. For the men there were saws, roofing, tools, wire door mats, horse blankets, lanterns and many other lines in which farmers are especially interested.

Close Co-operation

The visitors, who came in thousands, had one of the biggest days of their lives. In addition to their tour of the stores, and their visit to the auto show, the local theatres co-operated with the merchants by arranging special attractions.

Merchants stated to Hardware and Metal that the merchandise turnover was one of the largest in the history of the city. A feature that impressed itself on all of them was that the farmers have money in apparently unlimited quantities. They have money to buy apparently whatever they want to buy and while they are not in any way throwing money away they are prepared to buy good goods and pay a reasonable price for them.

There is always a certain percentage of any buying crowd that is looking for something cheap. These people were present on Dollar Day but were decidedly in the minority. To offer "cheap" stuff to the majority of the farmers who came into the stores would have been to lose them quickly. They were obviously interested in buying but they had the money and were willing to pay for the better class of goods.

The same thing was noticeable at the auto show. Hundreds of farmers who came in their own cars were inquiring about something "a little better." They seemed especially interested in the closed cars and if inquiries are any barometer many farmers from now on will be owners of closed cars.

FULL REPORT OF THE CONVENTION

Next week's issue of Hardware and Metal (February 19) will contain a very complete report of the proceedings of the annual convention of the Ontario Retail Hardware Association being held in Hamilton, Ont., from February 14-18 inclusive. Arrangements have been made to give the quick service necessary to have a complete report of every session published in the current week's issue. There will be much valuable data for hardware merchants as result of the discussion at this convention and next week's issue will set this forward in the most complete form for the instruction of those merchants unable to be present and as a reference for those in attendance.

Montreal Paint and Varnish Men's Club

Messrs. Geo. V. Horgan, secretary of the National Paint, Oil & Varnish Association, and H. S. Chatfield, representing the eastern zone of that association, addressed the paint and varnish manufacturers at their recent meeting in Montreal. These two gentlemen outlined the organization of their association and pointed out to the members the value of establishing a club in Montreal in affiliation therewith. After lengthy discussion it was moved, seconded and resolved, "That it is the opinion of the Montreal representatives that an organization be formed to be known as the Paint, Oil & Varnish Club of Montreal, and that this club, being an entirely separate organization from the Canadian Paint, Oil & Varnish Association and being in full control of its own affairs, affiliate as a constituent club of the National Paint, Oil & Varnish Association."

Weekly Paint Markets

Montreal

MONTREAL, Feb. 10.—Lower prices are again shown on linseed oil and shellac. Linseed oil is reduced five cents a gallon and shellac 50 cents. Window glass is still very unsettled, but the new glass list with a third off is being quoted.

Turpentine, white lead in oil and putty remain unchanged with sales seasonably light on these products.

Paint and varnish sales are steadily improving, spring deliveries now being forwarded in better volume. On spring orders sundries such as enamels, stains and other specialty lines appear freely in larger quantities than in previous years, thus indicating the ever increasing sale for these lines.

Linseed Oil Again Lower

Montreal.

The market on linseed oil continues to show lower quotations and this week it is again reduced 5 cents a gallon. The dollar mark has been now reached and passed in quantity prices. The flaxseed market remains very unsettled and shows signs of weakness. Lower prices may even yet be reached on oil, but at these low prices it is easily seen that linseed oil is away below its normal basis considering other commodities allied to it. Prices are as follows:

1 to 2 barrels	0 99	1 01½
5 to 10 barrels	0 92	0 94½

Shellac Still Lower

Montreal.

That shellac is experiencing a very unsettled market is quite evident. Although the same quotations as last week are held by some firms, others again are quoting a reduction of 50 cents a gallon. The sales of shellac are seasonably small and whether the price cutting now in evidence will stimulate sales seems doubtful. The lowest quotations for this week are as follows:

Orange shellac, in barrels, $4.50; in one gal. jugs, $4.75; white, in barrels, or 5 gal. jugs, $5; in one gal. jugs, $5.25.

Window Glass Remains Unsteady

Montreal.

The glass market is still very unsettled; even with the new list coming out with much lower quotations given, it is still felt that a firmness is not yet at hand. The Belgian market continues to sag, and when the demand becomes heavier, thus reducing the stocks on hand, it is hard to determine whether lower prices will then be offered. That Belgium is exporting a very high percentage of her production is manifest, or at least in a position to do so if the outside markets are in a position to receive the exports, and the Canadian market seems to be a desirable one to ship to. England with her new glass industries is now able to manufacture a higher percentage of her requirements; United States has been in this position, enjoying at the same time an export trade, and central Europe is not showing the demand at present for window glass.

The Belgian franc is also closely observed, as the exchange rate on this has quite an effect on the Canadian imports from Belgium. The new price list shows quotations as follows:

United inches	Star or 16 oz.	Double or 24 oz.
Up to 25	11 00	16 40
26 to 40	14 00	20 90
41 to 50	15 00	23 00
51 to 60	16 00	24 00
61 to 70	17 00	25 00
71 to 80	.....	27 00
81 to 84	.....	34 00
85 to 90	.....	36 50
91 to 94	.....	37 25
95 to 100	.....	43.75

Discount box glass, Montreal, 33 1-3%.

Cut size sheet glass, 60% off list of November, 1919.

Turpentine Unchanged

Montreal.

Turpentine does not follow the trend of linseed oil for this week, prices remaining the same. There is not much business offering, sales being very small. The Southern market also is very quiet, and it is felt that until the demand increases not much improvement will be shown. Quotations are as follows:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 25
2 to 4 barrel lots	1 22
Broken lots	1 26

White Lead in Oil Steady

Montreal.

No changes have been made in white lead in oil prices. The market also remains dull and unchanged. Prices will no doubt remain quite firm until the demand shows some improvement. Quotations will be found on current market pages.

No Changes in Putty

Montreal.

Prices on putty remain unchanged, with the demand continuing quiet. Little improvement is expected in this product until the season is more advanced. Quotations are as follows:

Standard Putty —	5 tons	1 ton	Less ton
Bulk barrels, 800 lbs.	$6 00	$6 25	$6 60
Bulk drums, 100 lbs.	7 00	7 25	7 60
Do., or tins, loose, 25 lbs.	7 25	7 50	7 85
Bulk drums or tins, loose 12½ lbs.	7 50	7 75	8 10
3 and 5 lb. tins	9 60	9 85	10 20
1 and 2 lb. tins	10 75	11 00	11 35

Bulk Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

Paint Still Shows Improvement

Montreal.

Business in prepared paints and varnishes continues to improve as the season advances. Spring shipments are now being delivered steadily and dealers are continuing to place their orders for requirements, realizing the season is approaching when their supplies should be in.

Paint Brushes May Be Scarce

Montreal.

That dealers are holding off in their buying of brushes for spring demand in the hopes of further declines is liable to result in a shortage in some lines by the time the season is well under way. Wholesalers are said to be taking advantage of this present situation and stocking as heavy as in other years, being guaranteed against declines until July and August. The chances of any further reductions until the late summer seem very remote, with manufacturers from five to six months behind in their orders, and skilled labor, which is absolutely essential in the better grades of brushes, very hard to procure.

Toronto

TORONTO, Feb. 10.—Business continues to show a gradual if slow improvement but many in the trade express the opinion that it will be another month before much change is shown and the volume of orders increased to any great extent.

Prices generally are held unchanged, and white lead in oil, putty and shellacs are at quotations given last week.

The glass market is still in an uncertain state although quotations are now more stable. Montreal wholesalers as noted last week have adopted a new list, but quotations here are still made from the old list.

NOVA SCOTIA—James Simmonds, Limited, Halifax, N.S.

If interested tear out this page and place with letters to be answered.

Turpentine and linseed oil are showing a slightly firmer tone this week and the demand is said to be somewhat improved.

Paints and Varnishes Hold

Toronto.

No change was made in paint or varnish prices at the meeting of the Paint and Varnish Association held on February 3. There is said to be a slow improvement in the amount of orders being received and shipped out, and next month, it is believed, the improvement will be more marked.

No Change in White Lead

Toronto.

No changes have been made in white lead in oil and prices are not expected to show any alteration for the present.

Sales are light and it is not expected that this condition will show much variation until the spring business begins to open up.

Quotations are as per current market pages.

Putty Sales are Light

Toronto.

The demand is not showing much change in putty and sales are still small. Prices are maintained and are as follows:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 05
Do., 25-lb. irons	8 30
Do., bladders in bbls.	9 30
Do., less quantities	9 55
Pure, in 100-lb. drums	10 55
Do., 25-lb. irons	10 80
Do., bladders in bbls.	11 80

Easier Tone on Shellac

Toronto.

Quotations on shellac continue to show a decline. Orange shellac is quoted at $4.75 per gallon in barrels and $5.25 in gallon jugs. On white shellac the quotations are $5.25 and $6 respectively.

Uncertainty in Window Glass

Toronto.

While some report that an improvement is observed in the demand for glass, others state that business is still very quiet and shows no indication of any revival of interest. It appears fairly evident that buying is restricted greatly to immediate requirements, and very little booking ahead is being done, indicating a belief on the part of many that despite recent large reductions in quotations, the bottom has not been reached in glass prices. Whether lower prices may be expected is uncertain at the present time, and depends largely on the future of Belgian exchange and the state of the market there.

It is significant that many United States glass factories, which only a few months back could not promise delivery under three months, are now working at only about 50 per cent. capacity.

Quotations are unchanged at 60 per cent. off list, with an extra 5 per cent. for 25 cases or over.

Linseed Oil Holding

Toronto.

No change is made this week in linseed oil, and a little firmer tone is noted. On local and American markets flax seed has advanced this week in sympathy with other grain, and the Argentine market is also showing firmness. Whether prices will maintain this advance or weaken again is uncertain, but more inquiries have been reported for oil this week and the demand has shown an increase.

Quotations are the following:

	Raw.	Boiled.
1 to 2 barrels gal.	1 00	1 03
3 to 5 barrels, gal.	0 99	1 02
6 to 9 barrels, gal.	0 97	1 00

Less quantities add 15 cents per gallon.

Turpentine Down 5 Cents

Toronto.

A better feeling is reported in this market this week and inquiries and sales are showing an improvement. There is also a better tone to southern markets and quotations are 5 cents lower.

Prices are unchanged here as follows:

Turpentine—	Per Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 12
5 gal. lots	1 30

Imperial Varnish and Color Co. Social

The employees of the Imperial Varnish and Color Co., Toronto, held a social evening at the Community Hall, Carlaw Ave., this week, when dancing and card playing was indulged in.

BUILDING A BRANCH HARDWARE BUSINESS

(Continued from page 39)

that since rceently adding wallpaper to the stock this line has had a good sale. A feature of trade in this line is that many hundred yards of border alone have been sold to be used along with the application of wall finishes. A close link can also be formed between the wallpaper and the paint department for oftentimes customers contemplating redecoration of their homes will also be prospects for paints and varnishes and vice versa. Easels are used to show samples of the various designs carried in stock.

Use Backs of Show Windows

The backs of the show windows instead of representing waste room, are utilized for display purposes as shown in the picture. These doors are ten in number and though they are used for display purposes they can be opened readily to permit goods being taken out of any part of the window quickly.

In handling the store staff one of the important points to keep in mind is the education of every salesman to a knowledge of the goods and an appreciation of the value of giving service to customers on every occasion. To help achieve this end short weekly meetings are held after the closing hour every Monday night. Personal salesmanship is discussed and short talks on the special features of new goods recently added to stock are given.

Fred J. Mills is store manager and he has a most capable staff in Messrs. J. H. White, Allan Lee, Albert Whiteside, J. Seymour, Fraser Thomas and Judson Edwards.

THE PROPOSED TAX ON TURNOVER

(Continued from page 51)

signment and allow them to sell as his agent thus avoiding the tax? Assistant Secretary of the Treasury Leffingwell, in recently commenting on the difficulty of estimating the yield of the turnover tax, well said that such a tax would in five years revolutionize present methods of doing business, because means of getting around the intermediate turnover tax could be devised and put into effect. Can business men look with equanimity upon a temporary tax which may change business practices that have proved their economic soundness by surviving the stress of competition,

The Tax Committee of the National Industrial Conference Board recommends that the excess profits tax should be repealed, that surtaxes on personal income should be reduced; and proposes to raise this revenue partly by an increase in the corporation income tax, which is fair if the excess profits tax is to be abolished; partly by increases in the present documentary stamp taxes, and the remainder by increases in customs duties, accompanied if necessary by sales taxes on commodities, which, while not absolute necessities, are of such widespread and general use, so well established in their distribution, and the demand for which is so constant, that none of these qualities would be adversely affected by the imposition of the tax.

The committee feels it is better to select such commodities intelligently than to levy a general tax without knowledge or investigation of the effect or the practicability of collecting such a tax. Such a tax would be levied at some one point in the progress of the commodity from the raw material to the consumer, but would not be a turnover tax or a tax on the final sale of every commodity which it would be impractical to collect. It would be better for business men to unite on a practicable, conservative programme for changes in our revenue laws which have a fair chance of accomplishment than to seek for such a panacea as a general sales tax, which is uncertain and unjust.

PAINTS AND VARNISHES

Visit Our Booth
At The Hardware Convention

In order to avail ourselves of the opportunity that the Convention offers of meeting our numerous friends in the trade, we have arranged to open a booth in the Exhibition Hall, Armouries Building, James St. N.

A cordial welcome awaits you. If you are directly associated with us in the distribution of International Paints and Varnishes we shall be glad to greet you as "one of the family."

Drop in and see us anyway. Our displays will interest you and it will be a pleasure to furnish you with every possible information and advice concerning paint and varnish selling.

STEWART & WOOD LIMITED

Distributors of the Better Grades of Paint and Paint Products for the Better Class of Trade

This Display Stand

Loaned without charge to merchants selling Dougall Varnishes.

Gives you a complete, compact and attractive Varnish department. Place it in a suitable location in your store and you will find your Varnish sales more than doubled.

It will pay you to ask for full details of this remarkable silent salesman. Write to-day.

CROWN DIAMOND LIQUID PAINT

Based on a formula which has successfully passed the most severe tests, both physical and chemical. A thoroughly Canadian paint made to endure and give lasting satisfaction. There are many interesting selling advantages—that mean more profit to you. Write and ask us about them.

At the Hamilton Convention, February 14th to 17th, you will find us located at Booths 6 and 7. Come and visit us. You will find an exceptional display of the Better Grades of Paints and Paint Products that will make your visit worth while.

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.
Owned and Operated by Nicholson File Co.

"Save the surface and you save all" Paint & Varnish

"Save the surface and you save all" Paint & Varnish

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for Wa-Ko-Ver Stain. This sales-maker will handsomely reward a little sales-effort on your part.

ASHDOWN'S

Sporting Goods

Summer Catalogue

THE Summer Sporting Goods Catalog for season 1921 is ready for distribution. We carry the most complete line of summer sporting goods in Canada. We can supply equipment for all Canadian sports, and can furnish the hardwareman with many striking and profitable lines in reliable Sporting Goods. All over Canada dealers have increased their business with Ashdown Sporting Goods.

The price list accompanying this catalog is approximately correct at the date of issue, but owing to the constant fluctuation of market prices it is subject to change without notice. Only such changes in prices and lists will be made during the season as are absolutely necessary, and we assure you that we will give you the advantage of a decline as quickly as a change in advance. We expect to issue corrected lists monthly during the season.

O-Rib-O

Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

RELIABLE

"T.F." Tree Pruners

This seasonable suggestion will fall right in line with your plans for a greater 1921 business. The design is effective and attracts favorable attention from prospects. The powerful leverage, convenient handle, and spring return feature are very convincing to practical orchard men, and the many other buyers of these efficient pruners. The firm, steady, "one-bite" cut closes sales; it is what your customers want. Don't overlook "T. F." Lawnmowers and Cobbler Outfits, Household Combination Outfits, Farmers' Combination Outfits, Cobblers' Sets, Shoe Holders, Cobblers' Fittings, etc.; suitably packed and fully assorted. THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

We are Judged by Our PERFORMANCE Not Our INTENTION

To the Delegates of
The Ontario Retail Hardware Merchants' Convention

LOWE BROTHERS LIMITED need no introduction to you as regards their reputation in respect of Goods, Principle or Policy.

What *you* are *immediately* interested in is WHAT they DO to interpret their policy into "sales"—how they co-operate to MOVE the goods off your shelves.

The *Merits* of Lowe Brothers' Selling Service—Advertising—and Promotion work—and how the system operates to your profit, is told eloquently during your convention, by the proposition itself, on exhibit at BOOTH 15.

We cordially invite you to visit our representative, who extends a hearty welcome and invites inquiries.

That your convention will be a source of many profitable ideas, and that it may be but the advent of a very prosperous season for "High Standard" Dealers, as well as their competitors, is the wish of

Lowe Brothers, Limited.

Little Visits

Beatty Bros. Limited Bulletin

With BT Dealers

Mr. Drury (in cap) and our Special Time Saver Salesman, Mr. H. F. Harper, conducting a very successful demonstration in front of the store—154 Oakwood Avenue, Toronto.

Window cards and a good display of machines are two favorite ideas of Mr. Drury's. He believes in stocking at least half a dozen machines.

The black garment hanging on the line is an old pair of Mr. Drury's overalls. He used them for—we'd hate to say how long—cleaning the car. He figured if the Time Saver would wash them it would wash anything. It did the job all right!

"Meet Mr. E. A. Drury—"

Mr. Drury is the man with his hands in his pockets on the right-hand side of our top photograph.

It's anything but a characteristic pose for Mr. Drury! His long suit is hustle and getting after the business!

The Demonstration shown in our photograph is an instance! When Fate sent Mr. Drury a fine large picture theatre right across the road he believed he ought to take advantage of it, so he holds his demonstrations right on the sidewalk in front of his store, and he surely gets the business.

Guessing contests, selling contests for the boys of the neighborhood, show cards, slides and dodgers, are all part of Mr. Drury's method of selling the Time Saver Electric Washer! He also believes that a good stock of machines does a lot to stimulate sales—it shows there's "something doing."

It would be pretty safe to say that there are not many homes in North Toronto who have not heard of the Time Saver. Mr. Drury does not believe in waiting for business to come to him—he gets out after it.

The result is that he has taken 83 Time Savers in a little over a year and is still going strong.

Time Saver Season Is Coming

The Time Saver is a boon in the hot weather. It makes a splendid and useful Christmas gift—but its real big opportunity is during spring housecleaning.

That's when the housewife needs an Electric Washer—when there are lots of curtains, bedding, couch covers and so on to wash. That's when it pays to display the Time Saver, hold demonstrations, and go after this profitable trade.

Do you realize how soon housecleaning time will be here? Easter is early and Mrs. Housewife will be starting mighty soon.

Get details of the help we can give you in selling—a card will bring them.

Have a good stock of Time Savers on hand—for Time Saver Season will soon be here!

Remember—The Time Saver washes and wrings faster than any other machine.

That's why we call it

"Time Saver"

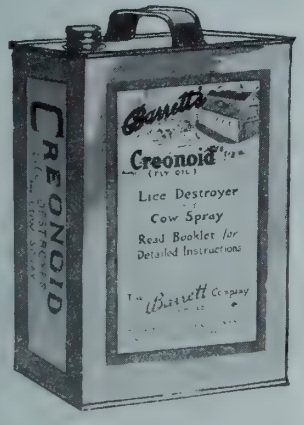
Barrett Roofings, Cements Industrial Paints etc.



Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Plastic Elastigum Patching Cement

ONE of the most popular of the Barrett Products is Creonoid (Fly Oil) Lice Destroyer and Cow Spray. Farmers throughout the entire Dominion use vast quantities of this product during the fly season. Our plans include an intensive advertising campaign directed to the farmers during the time when the fly pest is prevalent. Be ready to cash in on this demand which will be created for you.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

"I SAVE from $30 to $50 per month by the use of Creonoid," writes a farmer. "By its use night and morning, my cows have practically 24 hours of peace and comfort . . . I have used Creonoid for more than a year in my dairy, and I find it so superior to all other 'fly dope' that there is no comparison."

That is but one instance among thousands, where Creonoid has increased the milk yield. Experts say that cows give 25% more milk, when freed from the fly nuisance.

Creonoid is a very inexpensive and wonderfully effective fly-spray for horses and all live stock.

It is easy to apply. After its use cows will stand still at milking time, and should show an increase in weight and milk yield.

Creonoid will pay for itself many times over through increased farm profits.

Creonoid means more milk per cow, more eggs per hen, more pounds per hog.

Creonoid comes all ready for use. It requires no mixing or thinning.

It is put up in exceptionally attractive lithographed cans in the following sizes: 1-gallon cans (12 to the case), 5-gallon cans, ½ barrels and barrels.

"WELLWORTH"

Aluminum Self-Basting Roaster

Three New
and
Distinctive Features

1—Double roll on cover bead, absolutely preventing collection of filth in this dangerous spot.
2—Cast aluminum—unique design—handles.
3—Flat top handle which does away with annoyance of old style Roly-Poly covers. This cover stays where you place it and can be used as a mixing bowl.

Made of heavy 99% pure sheet aluminum and has the famous "Wellworth" polish.
Can be retailed at $5.00.
No. 612, 12½ x 7", 6 quarts.

BEFORE THE ADVENT

of the Audit Bureau of Circulations in 1914, each publisher made his own circulation statements to advertisers.

Many of them were truthful. Some were not.

But there was confusion and lack of uniformity. An intelligent comparison was impossible. Details regarding distribution were not generally given because there was no standard of practice in keeping the records.

The Audit Bureau of Circulations has brought order out of chaos. To-day the Bureau's system of keeping records is almost universal among the better publishers. Uniform reports are furnished to advertisers verified by that absolutely independent organization.

The experienced advertiser demands A.B.C. reports and if the publisher has nothing to hide, he gets them.

HARDWARE AND METAL is the only hardware publication in Canada that has become a member of the Audit Bureau of Circulations.

BURLAP

No. 3 of a Series

Work Up a "Prospect" List:

Cost of sending strong sales letter to prospects small as compared with results.

Here's a Sample Letter that ought to pull:

Mr. John Smith,
Smithville.

Dear Mr. Smith:

For that new building you intend erecting this year we have a decorative wall covering that will give you satisfaction in every sense of the word. It is Decorative, Sanitary, Wall Burlap.

This burlap is made of the strong, tough, selected fibre of jute—grown in far-away India. Natives that are expert in separating these fibres take great care not to injure the stalk. This means that the resultant burlap—later woven in the big mills in Scotland—is tough and durable.

When received in huge bales, the Canadian manufacturer impregnates this burlap with germ-killing linseed oil and selected pigments. The resultant product is called oil-coated burlap and you may have a choice of three shades—white, drab or green. These are really "ground" colors over which you may secure any desired tint in flat, glossy or varnished effect, and at moderate cost. For these burlaps are lower in price than for several years.

Applied same as wall paper. Come in to-day, or to-morrow, and talk over your wall-covering needs with us. You will be surprised with the comfort, appearance and all-round satisfaction these burlaps impart; they are ideal for any and every wall and you have no falling plaster problems when this is used.

Yours very truly,

Gaining New or Greater Distribution

is a well-recognized and familiar use of properly-directed, continuous advertising.

For either marketing on a national scale or by "Zone Methods" continuous, properly-directed advertising blazes the trail, carries your name, reputation and a knowledge of the product to the trade, paving the way for the salesmen, lubricating your whole distribution system and creating friendly territory waiting to welcome your product and your travellers as your production expands.

A weekly message to the whole hardware trade of Canada through HARDWARE AND METAL—their recognized source of business information—will increase your distribution.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

If interested tear out this page and place with letters to be answered.

Next, invite the Painters to a Wausau "Pow-Wow" in Your Store.

Tell them that old "Chief Ruff-Stuff" is holding a painters' pow-wow in your store and has some interesting things to tell, about—

Wausau Flint Paper

Fix up your window with a display of Wausau sandpaper and all other painters' supplies you sell.

Put the striking "Chief Ruff-Stuff" poster in the center, and use our catchy "Snappy Sayings" cards, changing the cards each day during the pow-wow.

Such an event, properly advertised in your windows, in your newspaper ads, and by mail, to all the painters in town—will crowd your store with these men and their families.

Our Book — Sandpaper Sales Tips—will give you and your clerks valuable tips on making "Ruff-Stuff" a trade pulling magnet. Ask us for free copies for all your salesmen.

WAUSAU ABRASIVES COMPANY
114 So. Clinton Street, Chicago, Ill.

CANADIAN DISTRIBUTORS: Please communicate with us, in reference to handling our complete line of abrasives in the territory which you are able to cover intensively

HORSE BLANKETS

Imperial Brand

New Patterns

Jute, Duck and Kersey

These blankets are right up to standard in material and workmanship and are well finished in every detail. The high quality of the lining this year, and the new patterns in Jute, Duck and Kersey, will make these old favorites even more popular. Imperial Brand Blankets have always been good sellers, as farmers and horsemen know them and believe in their quality, so **order early.** Our travellers are on the way to you.

Morrison Valves

Your customers know the excellent reputation of Morrison Products and buy them readily.

Morrison Valves are specified on nearly all drawings for important contracts.

In every feature of design Morrison Valves are abreast of modern engineering progress.

These reliable fittings are made from perfect patterns, cast with the greatest skill, insuring evenly distributed material in the walls.

James Morrison Brass Mfg. Company
LIMITED

93-97 Adelaide Street West TORONTO, ONT.

"Alston" Hack Saw Blades

The Only Flexible Hack Saw Blade That

"Will Not Break in Service"

Do not confuse the Alston Flexible Blade with the air-hardened flexible blades offered by the market as non-breakable. A comparative test will convince you that no sacrifice of cutting has been made to get the tough or flexible quality of Alston saws.

The "Will not break in service" type of saw is the greatest economy offered in hack saws to-day.

Just the blade for all light power and hand frame work.

A few words in regard to the Alston power blade.

You are not experimenting when you order the Alston hack saws.

Made of the best steel, special heat treated process and tempering leaves the Alston saws free of strains and brittleness.

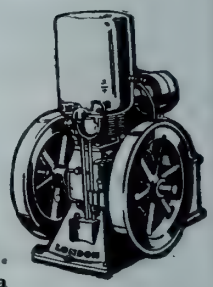
Better Because of the War!

For years our plant was under Government control. Every effort of our employees was centred on shell making.

Into every man in our employ was drilled the necessity of hair's-breadth accuracy.



Now that their efforts are again centred on the

LONDON ENGINE

The same attention to accuracy that was developed in war time is carried out by the experts retained in our employ.

The London Engine is as perfect as the shells that helped win the war.

Dealers! Write for booklets.

London Gas Power Co., Ltd.
29 York St. London, Canada

THE CREDIT MAN of a manufacturing or commercial concern must know now the financial standing of the firms to whom his company extends credit. He has his Dun or Bradstreet.

The Purchasing Agent or the buyers of various departments must be convinced that the goods delivered are as represented in both weight and quality. They have their scales and testing apparatus.

The Advertising Man must know that the circulation claims of the papers with which he does business are justified by the facts. He has the reports of the Audit Bureau of Circulations.

Good firms invite investigation of their rating or their merchandise.

Good papers furnish A. B. C. reports to their advertisers.

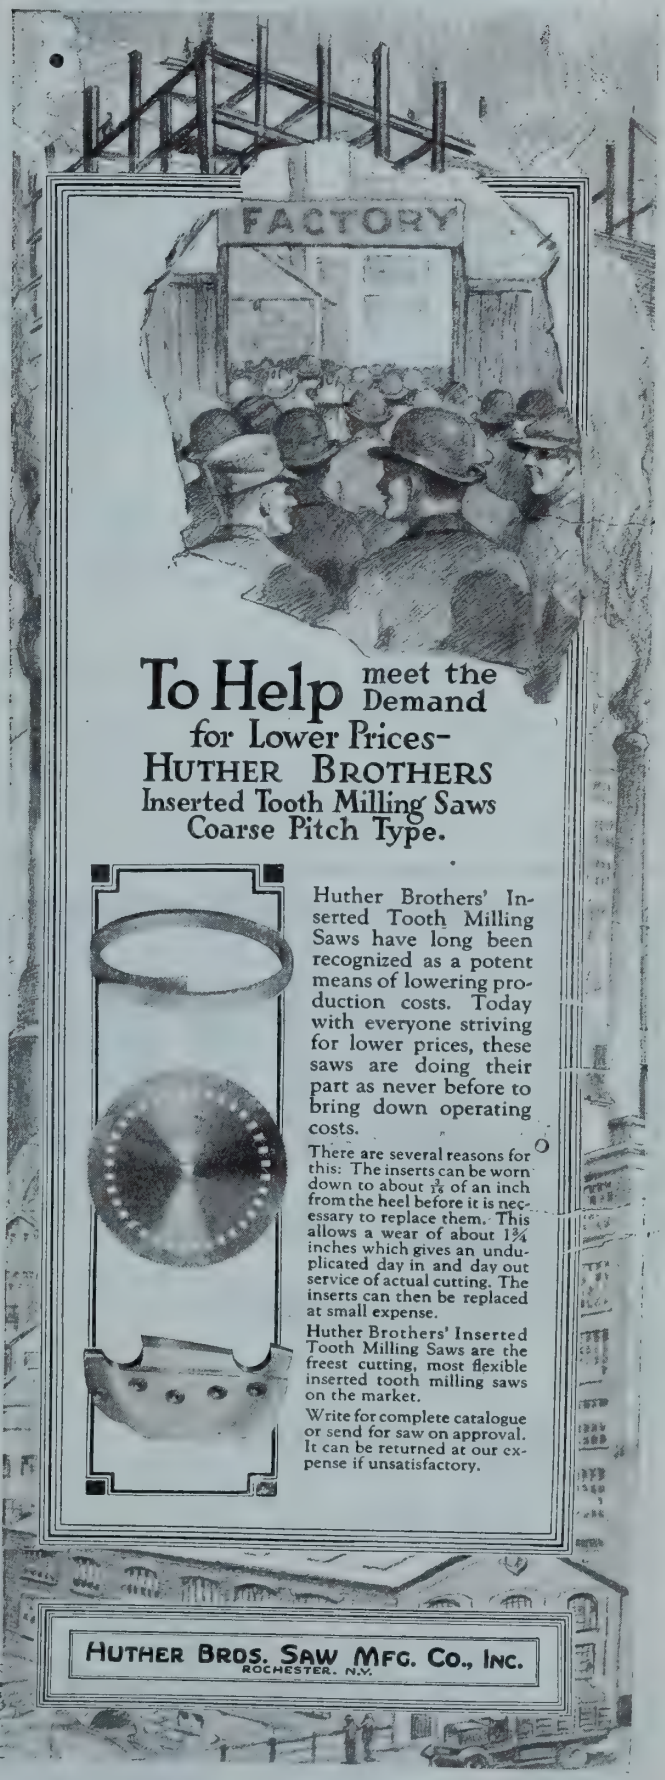
Hardware and Metal is a member of the Audit Bureau of Circulation.

If interested tear out this page and place with letters to be answered.

Three Special Reasons Why You Should Order Your FREEZERS Now

(1) We can ship more promptly now than when the big demand is on.

(2) Transportation is better now.



(3) Hot weather is sure to come. So will the rush for Freezers, all along the line, from user to dealer,—to jobber,—to us. But we cannot supply every demand promptly the last minute. Be wise in time, get your stock now while the getting is good. Be ready to supply your customers the moment they are in a humor to buy. If you hesitate now you may lose later. We venture to guess that your stock is low, so there is every good business reason why you should prepare in time. Place your order with your jobber now—you cannot lose.

North Bros. Mfg. Co.

PHILADELPHIA - PA.

To Help meet the Demand for Lower Prices—

HUTHER BROTHERS

Inserted Tooth Milling Saws Coarse Pitch Type.

Huther Brothers' Inserted Tooth Milling Saws have long been recognized as a potent means of lowering production costs. Today with everyone striving for lower prices, these saws are doing their part as never before to bring down operating costs.

There are several reasons for this: The inserts can be worn down to about $\frac{3}{16}$ of an inch from the heel before it is necessary to replace them. This allows a wear of about $1\frac{3}{4}$ inches which gives an unduplicated day in and day out service of actual cutting. The inserts can then be replaced at small expense.

Huther Brothers' Inserted Tooth Milling Saws are the freest cutting, most flexible inserted tooth milling saws on the market.

Write for complete catalogue or send for saw on approval. It can be returned at our expense if unsatisfactory.

Facts on the Quality Line *for* 1921 Selling

The "Phoenix" and "Quality" Screw Drivers are making reputations for themselves with the men who buy screw drivers. Our No. 20 should be on your shelves where your customers will see it.

The blade cannot turn in the handle. The point will "stand up"—each one is tested. One solid piece of steel the whole length. Specially treated for greatest strength and durability.

Handles Black Rubberoid.

Retails at popular prices, and there is a nice profit for those who sell them.

Blades are 2, 3, 4, 5, 6, 7, 8, and 10 inches.

TANKS

Gasoline Tanks
For Underground Storage

Made of the finest copper steel procurable, welded and then painted on the outside with Anti-Rust, Acid-Proof black paint, these tanks are practically rust and corrosion proof. For handling gasoline only the very best is safe. The thorough test all our tanks undergo before leaving our factory is a guarantee of their reliability. The prices are most reasonable.

Oil and Gasoline Tanks

Here's a tank made of copper-steel with handy screw cap opening at top for filling and faucet in side near bottom for drawing off contents. Another reliable tank at a moderate price. These tanks have been giving satisfactory service wherever sold.

Your money back if not satisfied

Write us for prices and send us addresses of possible customers to whom we can send literature direct for you. We also manufacture baths, dairy equipment, sanitary closets, etc.

The Steel Trough & Machine Co., Ltd.
TWEED, ONTARIO, CANADA

Stock this Mayhew *Bit Extension*

Your customers need this Mayhew Bit Extension—the most nearly perfect on the market.

The forged steel jaws completely close on the shank of the bit. A flexible connection between jaws and shank of the extension insures centering the bit. Sleeve runs on a quick-acting multiple thread. Extension will follow a 5/8" hole. Made in all lengths from 12" to 36".

Regular Mayhew quality. Meets a definite demand. It should be in *your* store.

At your jobber's—or

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything, forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500-lb. containers.

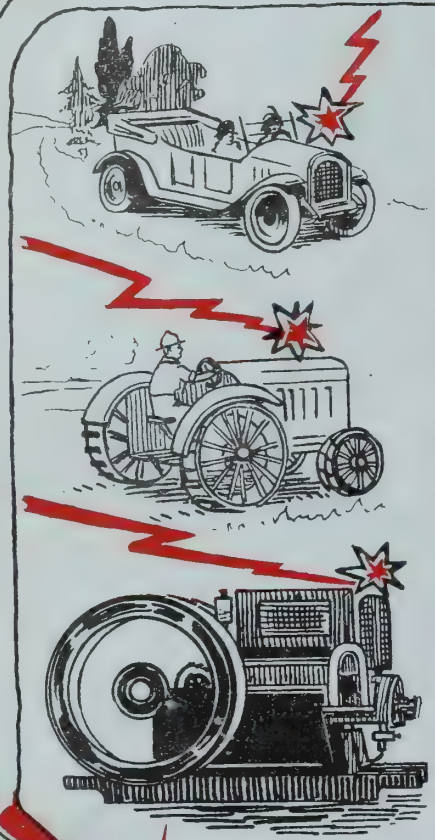
Your Salesman—

HAVE you a place in your store for a purely "Canadian Made" product that will bring you an excellent trade each year?

Your customer sees many points of superiority as you talk. The wire is tough and elastic—drawn to proper size and well galvanized in our factory at Hamilton — The Frost Lock — the strongest part of the fence, the evenly spaced uprights and the strong lateral wires are material for a selling talk that is bound to convince.

When you sell Frost Fence you make these purchasers of it regular customers, the reason being : they get something that measures up to their idea of what they ought to have.



Frost Fence is that kind of a product. It gives the kind of satisfaction that breeds good-will and not only brings your man back for further purchases but makes him a booster for your store.

FROST FENCE IS AN ASSET TO YOUR BUSINESS

FROST STEEL AND WIRE CO., Limited
Hamilton, Ontario

OUR BOOTH AT THE HARDWARE EXHIBITION NEXT WEEK IS NO. 66. WE SHALL BE GLAD TO MEET AND WELCOME ALL OUR DEALERS AND THEIR FRIENDS.

"UNIPLEX"—The Mighty POWER

"Long Life Promotes Long Friendships"

Full-Powered— Long-Living— and Dependable

Burgess Batteries give unfailing superiority of service because every item of zinc, carbon, and other chemicals used is carefully selected and scientifically assembled for the sole purpose of giving fat, hot sparks for the longest period of time.

They are made right in Winnipeg, and reach dealers with long shelf life—their strength does not rapidly leak away, nor is there any point where trouble can creep in to shorten their career in service.

"BURGESS" Uniplex Batteries

For motor cars, tractors, gas engines and any work where more than ordinary power is required for good ignition, these multiple batteries serve best. Four, or five "BURGESS" No. 6 Batteries are assembled and sealed tight in a waterproof container that makes them a solid unit, compact, handy and economical. Just two connections to wire up, and these are insulated so that accidental short-circuiting is impossible.

"BURGESS" Dry Cells

Over fifty different features, patented for our exclusive use, combine to ensure supremacy for the Burgess line of batteries and accessories.

Our No. 6 battery is an everlasting monument to the wonderful inventive genius of Mr. C. F. Burgess, who is largely responsible for the development of the battery industry of America.

Burgess Flashlight batteries, sold in unsealed cartons, are typical "BURGESS" leaders; they have strong brass terminals, heavy zinc containers, and are uniform in size and quality.

BURGESS BATTERIES, LIMITED
WINNIPEG

BURGESS BATTERIES

Guarantee

"You are protected by our unqualified agreement to replace any Burgess product which does not give satisfaction." We make replacements promptly without any red tape.

COMMENCING OUR BIG COLOR CAMPAIGN

WHILE employing almost every known form of advertising, we rely chiefly on those methods which enable us to show in COLOR what O-Cedar Products will do. Posters, Window Cards and Street Car Cards—will carry the O-Cedar idea broadcast. This campaign indicates our faith in the products, our belief in the power of advertising, and our optimism as to the immediate future.

CHANNELL LIMITED
TORONTO

Sort Your Stock of Garden Tools

O-Cedar Polish

One of the necessities for Spring cleaning. Sell it in large size cans as it is of daily use. How is your stock of O-Cedar mops?

Aladdin Dye Soap

Colors while it cleans

Every woman who comes into your store is a possible prospect for a few cakes of this wonderful dye soap. It is the ideal dye, no muss or fuss—just wash the clothes, using Aladdin Dye Soap, which removes the dirt and dyes at the same time.

Order a display rack from the "Rice Lewis" man.

LIQUID VENEER

Another Spring cleaning requisite which you should have a big sale for. We carry all sizes of packages in stock; also Liquid Veneer mops.

SPRING COMING

—if it's not already here. Spring always brings its quota of duties around the home which collectively are termed Spring Cleaning. This takes various forms—the removal of winter's grime, the refreshing of paint and varnish, the cleaning up of the back yard, and the gardening.

Now is the time to look over and replenish your stocks of Spring Goods, such as Garden and Lawn Tools, Garden Hose, Cleaning Materials of all kinds, Polishes, Dyes, etc.

Let us help you fill the vacancies in your Spring Stocks. Don't wait until you begin losing sales.

Ask the "Rice Lewis" man, or write direct.

There Are Sound Reasons Why

"America" Trolley Hangers

Have the Largest Sales of any Trolley Hanger in the Dominion

Some of the Reasons Why

The "America" operates in the Hatch Trolley Track—the only track supported by the famous corrugated track brackets. These brackets are, naturally, much stronger and better than ordinary plain track brackets.

The "America" is peerless for warehouse, factory, garage and barn doors. The apron is 6 in. long, 3¼ in. wide. This hanger appeals to customers because of the simple adjustments, anti-friction, forged steel yokes and ability to stand hard usage.

Its popularity with consumers and its great demand are well founded—on merit. Perfect action is assured by tandem trucks and hardened roller bearings.

With Each Pair of Hangers are included:

Two End Caps, Bolts for Hangers and Lag Screws for Brackets.
Packed one pair in a box, complete with Screws and Bolts.
Weight per dozen pairs, without Brackets, 95 pounds.

Let us help You to glide easily along the Track of Prosperity with "America" Trolley Hangers.

Exceedingly Tender Skin

How frequently men are heard to tell of their "exceedingly tender skin" when they are talking to a hardware clerk about razors.

When a customer comes into your store and tells his shaving troubles does your clerk answer, parrot like, "We have a lot of good razors," or does he say to the customer, "I can sell you a Genco razor that will shave *YOU*."

Do you *keep razors* in your store or do you *sell shaving service*? There's a difference.

At one time razor buying was more or less a matter of guesswork. Dealers sold razors and men bought them, while both trusted to luck that the razor would be the right one for the man who was to use it.

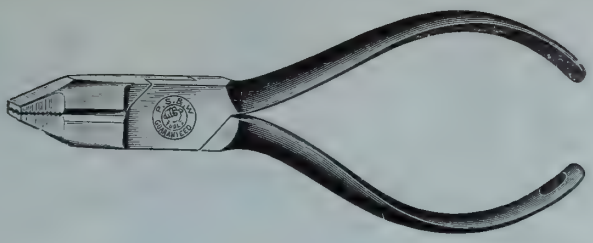
GENCO RAZORS ARE SOLD DIFFERENTLY

Different kinds of beard and skin call for different kinds of razors.

A full concave ground Genco razor one-half inch wide is the one for the man with tender skin. A heavier Genco ground half concave for wiry beard and rugged skin.

There are other grinds and sizes for other conditions.

There is a Genco Razor for Every Kind of Beard and Skin



There are a number of different assortments of Genco razors with which display trays and counter cabinets are supplied. Each assortment contains razors for every kind of beard and skin, enabling the dealer to make every customer a satisfied customer by selling each one

The Razor That Will Shave *HIM*

Brief but thorough clerks' selling charts and dealers' folders are supplied with each assortment. If your jobber cannot supply you, write us.

The Trade and Co-operation

Stabilizing Prices in 1921

CLOSE co-operation will do much to relieve the present strain of high prices. By following the markets carefully from day to day we shall keep our lines attractively priced, thus aiding in the stabilization of prices. As evidence of good faith we have already put into use new prices on all lines that have shown any tendency towards deflation.

Our new 72-page illustrated catalogue, showing auto accessories, sporting and electrical goods, is now ready for distribution and we will mail a copy on application.

Let's work together in 1921

It Pays To Sell Horse Insurance

Tapatco Gloves are made of selected cantons, Gauntlet, Knit Wrist and Band Top. They are supplied in Heavy, Medium or Light Weight; also, in Leather Tip, Leather Faced, Jersey—Gloves and Mitts in Tan, Slate or Oxford.

The loss of the services of one horse, for one day, may cost your customer more than to outfit every horse in his stable with Tapatco Brand Horse Collar Pads. When you sell a man this serviceable, efficient Collar Pad and make chaffed, galled or bruised shoulders an unknown quantity among his teams, he bears good-will toward you and your store, and feels confidence in other goods sold there.

The snug-fitting comfort of Tapatco Pads is due to their cushion of soft, pliable padding. This cushion protects the horse's shoulders from every form of collar pressure. The famous Tapatco stapling device (Patented in U.S., Dec. 1, 1914; Patented in Canada, April 6, 1915), for attaching hooks, gives a firm hold that outlasts even the splendid wearing qualities of the fabric itself.

Lawson's No. 1800 Lavatory Hinge

Less Investment Quicker Sales — More Profit

LAWSON No. 1800 Hinges for lavatory doors are easy to sell. They cost a third *less* than other kinds and give far better service.

Two 3-inch Lawson Spring Hinges take the place of the customary 4-inch hinge and blank, giving better support and greater flexibility of tension to the door and improving the appearance of the job.

Adjustable to any thickness of marble from 1⅛ to 1½ inches, and doors up to 1⅜ inches.

Instead of a large stock of ordinary hinges in assorted sizes, you can make a small lot of Lawson's meet all the requirements of your trade.

With ONE-TENTH of your customary investment, your turnover will be five or ten times faster.

Write today for illustrated catalog describing in detail this and other styles of Lawson Spring Hinges, for residence, office and factory doors, gates, etc.

Quality

CONFIDENCE

THE GREATNESS OF BRITAIN IS FOUNDED ON HER INTEGRITY.

HER STRENGTH SHE DERIVES FROM WORLD COMMERCE—HER ENDURANCE FROM CONFIDENCE.

THE WAR TEMPORARILY RETARDED HER CONSTRUCTIVE EFFORTS, BUT THE POWER OF THE CONFIDENCE OF THE PEOPLES OF THE WORLD WILL RESTORE TO HER IN MORE BRILLIANT FORM THE LEADERSHIP SHE HAS JUSTLY EARNED AND PROUDLY HELD.

CONFIDENCE IS THE FOUNDATION OF OUR POSITION IN THE WORLD OF IRON AND STEEL—OUR PROGRESS DEPENDS ON IT.

WE HAVE BEEN SUCCESSFUL IN THE PAST—THE FUTURE IS BEFORE US. TO ADVANCE, WE MUST CONTINUE TO MERIT THE CONFIDENCE OF THE BUYERS OF STEEL AND IRON PRODUCTS OF EVERY DESCRIPTION IN CANADA, AND WE ARE DETERMINED TO ADVANCE.

I-XL

Stainless Steel Knives

have now become so popular that no up-to-date merchant can afford to be without them.

We are now making substantial shipments to all the leading jobbers throughout the Dominion and would urge every retailer to see that his clerks have them to offer when required.

Stainless steel is a boon to the housewife as it absolutely does away with the knife board or cleaning machine, yet is always clean and bright for the table.

After extensive experiments we have finally overcome the many technical difficulties in tempering and are now combining all the virtues of stainless steel with a wonderful cutting edge.

Look for I-XL on the Blade.

A Little Chat on Hot Galvanizing

OF course, you have realized the advantages of carrying hot galvanized ware. You know that women prefer it because of the extra service that hot galvanized ware gives.

But have you yet realized that there are grades of superiority to hot galvanized ware? That SMP Hot Galvanized Ware tops the list? This is why!

The black iron sheets are selected with care. Then they pass into the factory where they are cut and punched into the shape desired—be it pail, wash tub, garbage can, etc. The article is then pickled—given a carefully timed bath in a vat of acid. It is then removed and dried.

The can or pail is now complete—all except putting on the coat of zinc. Then—one by one—article by article—they are dipped—by hand—into a boiling, seething bath of pure molten zinc spelter. Not a crack, not a seam, spot or corner of the article is missed by this liquid metal. All that can hang on, stays on. The coating of zinc is complete.

This hot galvanizing fills all the seams and makes the article ***strong*** and ***sturdy***. And it makes it ***leak-proof*** and ***rust-proof***. It gives it the ***spangle*** and ***smart appearance*** that women like to see, and for which they will pay more money

And, despite high wage demands and the shortage and high cost of raw materials, we have flatly refused to cheapen SMP Hot Galvanized Ware. Its splendid quality to-day holds it right up in the lead of its line.

We can now ship the seasonable articles and all-year-rounders in SMP Hot Galvanized Ware. But we advise you to order quickly.

Shipments Made Promptly.

Made in Canada

After the Convention

Whether you have been in Hamilton for the convention or whether you are reading this in Prince Edward Island, Halifax, Medicine Hat, or Prince Rupert, makes no difference—it is time to be prepared with your stock of Stewart Clipping Machines.

To-day, customers fully appreciate the need and benefit of spring clipping for horses. A clipped horse is a better horse; he dries off quickly, rests comfortably and is fresh for good, productive work next day. A clipped horse pays his owner better. Clipped horses are safe from pneumonia, heaves and colds that often cost owners so heavily that the low cost of Stewart Clipping Machines offers reliable, worth-while "horse insurance" at economical rates. Stewart Clipping Machines sell to supply a definite existing need.

If interested tear out this page and place with letters to be answered.

Comes Spring Clipping

The Stewart No. 1 Ball-Bearing Clipping Machine is the most perfect clipping machine ever made at any price.

It combines durability, simplicity, ease of operation and low price. It has made good through years of satisfactory service.

Gears are cut from solid metal and enclosed in dustproof metal box. All wearing parts are of hardened steel. Compact—can be set up or taken down quickly.

Shipped knocked down in a substantial box, and weighs only 30 lbs., so transportation charges are little and machine is handy to move about.

Positively guaranteed to please, or full price paid will immediately be refunded. Clips horses, mules or cows—no change of knives or adjustments.

Give your jobber that stock order for Stewart Machines to-day—be ready for the business. Attractive new window cards for the asking.

DU PONT THE STANDARD SHOTGUN POWDER

You Can Meet the Demand for Shotgun Shells

—if you order from this table of Du Pont Standard Loads.

The great majority of shooters use Du Pont Powders simply because years of experience have taught that Du Pont Powders *always* give satisfactory results.

With this great army of shooters the word of the Du Pont Company, backed by its 119 years of powder-making experience, carries great weight.

We are telling every shooter we can reach through the sportsmen's magazines that the standard loads given in the table below are the ones to use to get best results. In this table we have eliminated all slow movers and have listed only those that are in constant demand in various sections of the country.

Make up your orders from this list and meet the demand—concentrate your stock, cut down capital invested. Result: faster turnover, greater profits.

Most Shooters Use Du Pont Shotgun Powders

STOCK THEM IN THESE STANDARD LOADS

DU PONT

Standard Twelve Gauge Loads

	DUPONT SMOKELESS Drams	DUPONT BLACK Drams	OUNCES Shot	SIZES Shot
Large Ducks	3, 3¼ or 3½	3½	1⅛ or 1¼	4, 5, 6 or 7
Small and Medium Ducks	3, 3¼ or 3½	3½	1⅛ or 1¼	5, 6, 7 or 8
Grouse, Partridge, Prairie Chicken	3 or 3¼	3¼	1⅛	6, 7 or 7½
Pheasants	3	3¼	1⅛	5, 6, 7 or 7½
Geese	3½	3½	1⅛	4, 3, 2, 1 or BB
Wild Turkey	3½	3½	1⅛	4, 3, 2 or 1
Squirrel, Rabbits	3	3¼	1⅛	6 or 7
Doves, Pigeons	3 or 3¼	3¼	1⅛	6, 7 or 8
Quail	3 or 3¼	3¼	1 or 1⅛	7½, 8 or 9
Snipe, Woodcock	2¾ or 3	3	1 or 1⅛	8, 9 or 10
Shore Birds	2¾ or 3	3	1 or 1⅛	8, 9 or 10
Sora Rail	2¾ or 3	3	1 or 1⅛	8, 9 or 10
Trap Loads	3 or 3⅛		1⅛ or 1¼	7½ or 8

Facts that Every Dealer Should Know about Du Pont

It is a fact that "Du Pont" develops a higher velocity than any other powder made. This is because it burns progressively and cleanly, generating a lower pressure at the breech and maintaining the pressure a greater distance down the barrel.

Other reasons why "Du Pont" has the largest sale of any powder made:

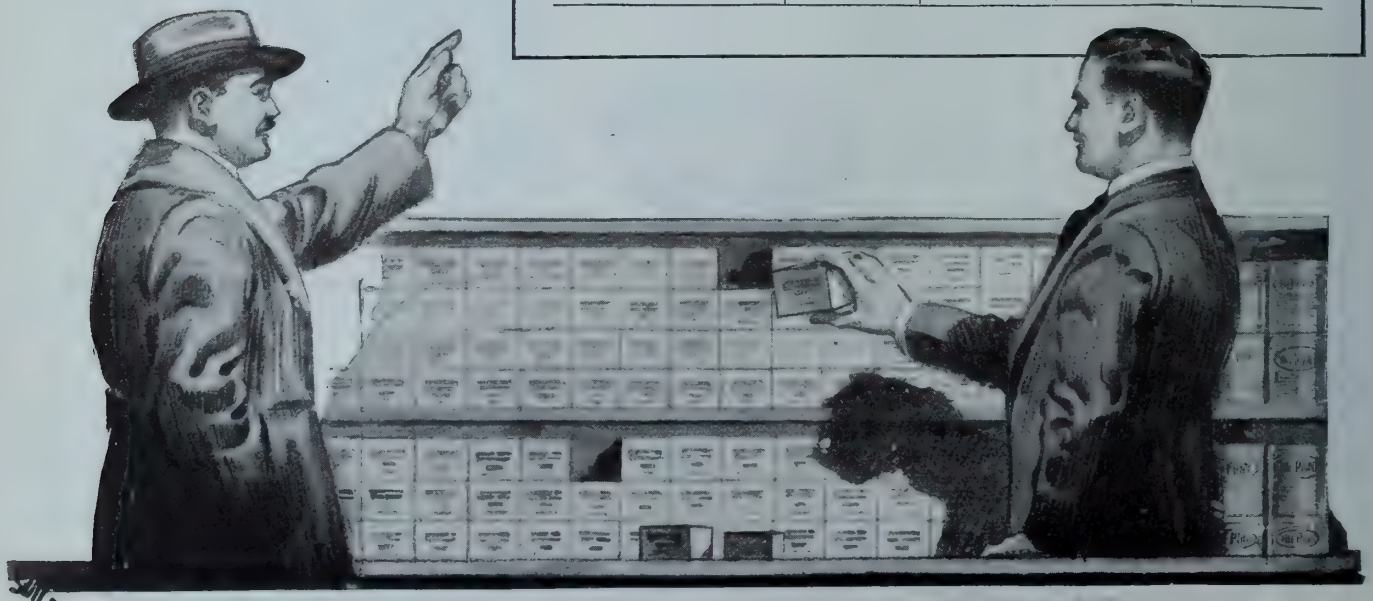
—it gives the closest patterns.

* * *

—it develops the lowest initial pressure, which means less strain on the gun.

* * *

—it is the cleanest burning powder made.



* * *

—it is waterproof, dependable, and absolutely uniform year in and year out.

* * *

A shell is only as good as the powder it contains.

Hack Saws

This is why they are Repeaters and not Shelf-Warmers

hardening—that is done individually instead of in batches,

Tempering comes next, to take out brittleness and add a resilient "springy" strength that resists strain.

every hack saw blade in a Millers Falls box is exactly alike.

THERE are two kinds of merchandise in most businesses. One kind stays and stays on your shelves. It takes up valuable space that you pay rent for. It ties up your capital and brings in no profit. The other kind of merchandise repeats often, keeps moving in and out of your store, releasing your capital by turning over your investment and collecting profits instead of dust and dirt. The difference between these two classes of merchandise is largely one of pulling power from the other side of the counter. Because Millers Falls Hack Saws bear a well known name with the prestige of years of known performance, and because they are satisfaction-giving hack saws, they repeat often—the man who buys them comes back for more.

* * *

Quick turnover is more important today than ever before. And this is particularly true of hardware stores where the number of items carried is so large. Select your lines with extra care. Select Millers Falls Hack Saws because they are repeaters, and not shelf-warmers.

BILLMONT

MECHANICS' KIT—all the socket wrench equipment you'll ever need with but a few wrenches, for each wrench takes the entire set (24) of Billmont sockets, making 24 different wrenches by merely changing sockets.

Thus, this Kit of 8 wrenches and 24 sockets will operate to the same extent as 192 wrenches —and by the use of the two extensions that likewise are interchangeable, the utility of the line multiplies itself into 768 combinations.

Instead of a separate socket wrench for each sized nut, the Billmont principle lessens the number of wrenches, but increases the number of jobs.

There's the Master, with its hooked nose; Junior, of unusual strength; Ratchet, that operates in ½ inch space; Offset, with upward bend to handle; Husky, Short and Long Ts; Speeder; Rim Brace; Extension 9 inches and 11 inches; Interchangeable screw driver attachment, and 24 interchangeable sockets (hex and square), compact and handy in a 22 gauge metal kit box ready for instant use. As an outfit or sold individually.

Write for Catalog on Entire Line.

Get Closer to that Customer—The Factory Workman

MACHINE shop men who spend their lives working with iron and steel, are the first to appreciate improved tools.

They will see the advantage of the "*Gun*" Tap, an exclusive GTD product, or the "*Acorn*" Die, or the GTD "Rapid Inspection" thread gage. These threading tool specialties are only three items in the extensive line made and sold by GTD for machine shop production, but each one is a masterpiece which will excite the admiration of any foreman, machinist or superintendent engaged in quantity thread-cutting.

Do you know the "*Acorn*" Die? Did you ever watch a "*Gun*" tap shoot its chips out of its own way?

To be sure, the workman himself does not always buy production tools for his personal use but he certainly exercises a tremendous influence on his foreman, which amounts to the same thing, because it produces orders from his factory or shop.

Learn about these tools and you'll find a sure way to sell them to the shop-worker. And as we've been saying for the past two years, *go out and get this trade.* It belongs to you. It's yours for the asking.

An idea: Send us a list of shops near you where they produce threaded parts in quantity—and we'll send you some special material to mail out to them which will cultivate this new field for you.

FIRE INSURANCE AT COST!

For HARDWARE DEALERS

We charge board rates, collect upon delivery of policy the full premium based on this rate and at the end of the policy year return the saving or dividend. This means "cash premium full legal reserve mutual plan"—the safe way.

Every year since 1908 our Hardware Companies have paid 50 per cent. dividend to policy holders, thus providing protection at exactly half the board companies' cost.

In addition to paying such large dividends the three companies forming The Canadian Hardware and Implement Underwriters increased their net cash surplus (which is the real strength of an insurance company) by $500,000,000 in the year 1920.

We now have:

Net cash surplus, over	**$ 1,800,000.00**
Insurance in force, over	**220,000,000.00**
On deposit with Dominion Government	**150,000.00**

Place your insurance with us now and make the same savings.

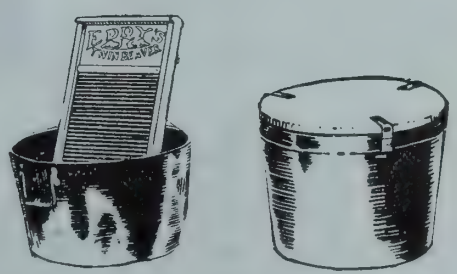
Story for Week Dated Feb. 19, 1921 **Being No. 45 in the Series**

Another Eddy Pulp Product is The Well Known Indurated Ware

ALL the E. B. Eddy Company products of which you have read so far in this series, are made of wood in some form or other. Eddy matches are made of wood which you can easily recognize as wood. The slogan "From the Tree to the Trade" needs no explanation as regards Eddy matches.

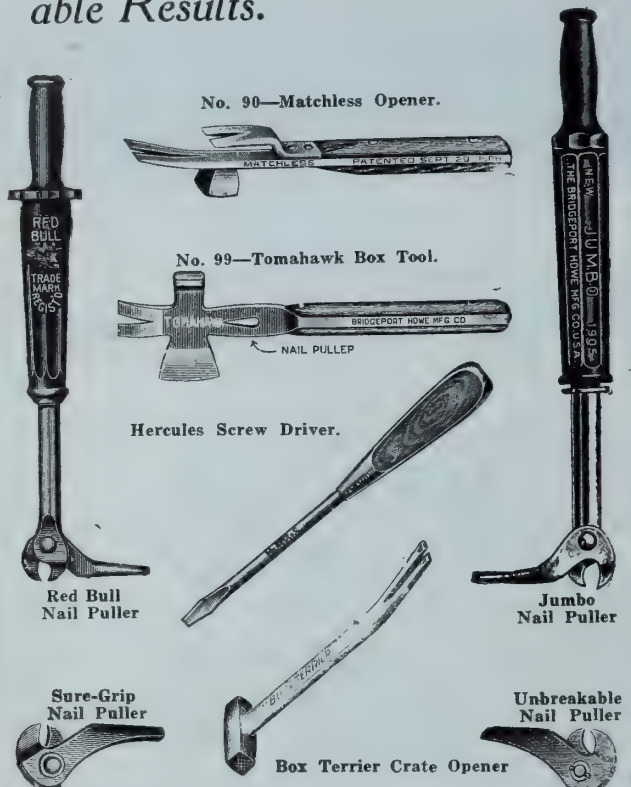
As regards the many kinds of Eddy paper it requires a minute's thought to connect the pure, soft or firm, smooth paper with the trees of the bush, but Eddy Company papers are all made of wood which has been pulped and purified by the processes of which you have read. Now comes E. B. Eddy's Indurated Ware. To connect this light, strong, smooth, waterproof material with plain wood of trees may seem at first hard for Eddy Company Indurated Ware is as durable as metal, and far lighter and more lasting. Is this excellent material wood also? Does it come "From the Tree to the Trade," too?



It does, Indurated Ware is made of pure wood pulp. But the processes through which it passes are very different from the paper-making or the match-making processes. As a result of them the product emerges in the form of various useful utensils, pails, butter tubs, barrel covers, flower-pots, pigeon nests, cuspidors, and many other things. In fact there is no limit to the possibilities of indurated ware. Rifle stocks, revolver butts, articles of furniture, boats, and canoes warrant the erection of machinery to manufacture these elaborate articles. Indurated ware as made at the E. B. Eddy plant, is probably the most lasting form of pulp-wood or paper known.

The processes of manufacture involve pumping, pressure, baking, varnishing, polishing, drying, and painting. These will be described in the next article in this series.

Indurated Fibre Ware



Wash Tubs
Wash Boards
Household Pails
Milk Pails
Fire Pails
Butter Tubs
Cuspidors

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail-holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough, leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

BURLAP——

No. IV of a Series

Making Up a Burlap Window

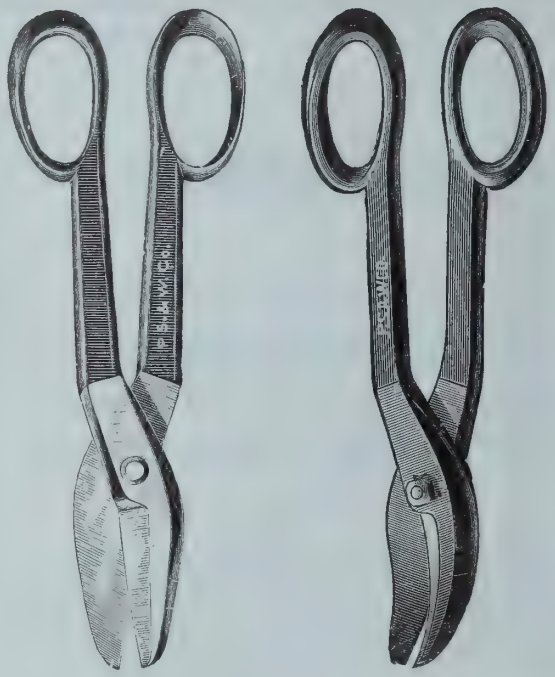
It's easy; this plan is only suggestive:—

Take several rolls of oil-coated burlap and place on end in front of background. Rolls should be untied and a yardage extended toward the glass—of each shade.

Where yardage is shown, place a square, round or diamond-shaped card, neatly lettered—"Decorative Wall Burlap, White—may be finished in any desired tint." Use other cards for as many rolls as are shown. Then letter a large card for display in centre, placing this on raised easel or suspending from ceiling.

In addition to this it is possible to add other features, such as cutting off a yardage of goods and making up into different shapes.

If one has only a limited quantity of the goods it is well to unroll several yards and make up into attractive shapes. Always use plenty of well-lettered cards stating what the product is, what it will do, and how moderately-priced it is.



Plan to make this a BURLAP YEAR—Make More Profit

100 Years of Successful Snip Manufacture

Doesn't that mean something to you?

Think what a century of experience and reputation back of the tools you sell means. And today we maintain that same high standard of workmanship and quality which made PEXTO SNIPS famous for so many years.

No detail of design or manufacture that would add to their usefulness is omitted.

Pexto Snips are made in twenty-five styles and various sizes which cover every type of practical snip. The line is complete and easy to sell.

The Snip Display Boards will increase your sales without adding to your sales costs. They make an exceptionally attractive display for windows as well as the counter.

The Lyon (shown above) is an unusually popular snip. It is made to cut circles and scrolls, but can be used as a regular snip. The blades are rounded and sharp pointed, making delicate work possible. Made in four sizes.

Send for a supply of our Snip Booklets—a 16-page pamphlet describing our line of Snips. We will gladly imprint them with your firm name and address.

Let us tell you more about Snips and our complete line of Mechanics' Hand Tools and Builders' Hardware as shown in our No. 20 Catalog. You will find it full of interesting and instructive details.

Pexto goods can be obtained through representative Canadian jobbers.

Good Tools Make Satisfied Customers

It is generally admitted that Disston Levels cause less trouble from warping than any others. They are made from specially treated hardwood stock,—wood that has been scientifically cured in the Disston plant, so treated as to allow the least possible warp.

Then, too, Disston has developed the easiest and most positive level adjustment on the market. The turning of two small screws enables anyone to true up the bubble. This is a most simple arrangement to offset the invariable slight variation due to heat, cold, dampness, etc. The adjustment is solid when set, and there are no springs to allow an annoying inaccuracy.

Write us for information on levels. It will mean more sales for you.

BANNER PIPELESS FURNACE

The plan or age of the house makes no difference when installing a Banner Pipeless. The Banner is neat and trim, doing away with the old-style, unhealthy clutter of overhead pipes; it heats the entire house comfortably, from one large register. The Banner burns either coal or wood, and the large firing door makes it the ideal furnace for burning wood. The Banner practically runs itself, it can be cleaned without raising a dust, has easy working grates, doors that fit, smoothly working dampers, and the water pan is conveniently located. More heat with less waste and less fuel is a statement we can back which may satisfy customers.

The Galt Stove & Furnace Co., Ltd.

Galt, Ontario

The Arrows Show the Way

The Banner Pipeless has many improvements over other pipeless furnaces. The Banner has two casings. The inner one is a triple casing—tin on the inside, galvanized iron on the outside with a sheet of asbestos between, making complete insulation between the cold air duct and the warm air chamber. This cold air duct around the furnace prevents radiation of heat in the cellar, the outer casing taking the place of the usual cold air flue. The warm air rises directly to a large register over the top of the furnace. This register is divided into two parts, the centre part serving as a warm air register, and the outer part acts as a cold air register, drawing the cold air down the flue formed by the outer casing. The outer casing is always kept cool by the outer cold air flue, thus making it possible to store fruit and vegetables within six feet of the furnace, without the aid of partitions, all the warm air going above the furnace and floor—where it belongs.

The Banner assures your prospects a warm house and a cool cellar.

Barrett Roofings, Cements Industrial Paints etc.

THE name "Barrett" on any product is the identifying mark of a quality article. Barrett products are fast sellers because they insure customer satisfaction. The products described below are the result of long years of manufacturing experience and each of them is the best product on the market for its particular use.

Our advertising in the leading publications and newspapers is telling your trade that the Barrett trademark is always a sure pledge of dependability.

Everlastic Liquid Roofing Cement

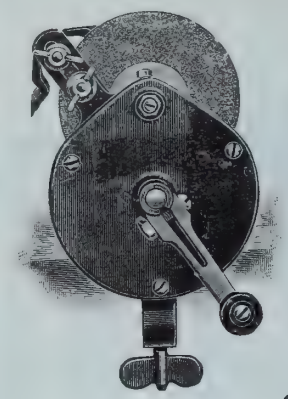
Unequalled for resurfacing worn-out prepared and "rubber" roofs. Has the consistency of thick molasses; is easy to apply and dries quickly into a hard, elastic, wonderfully durable coat. Proof against moisture, acids, alkalies and fumes. Has same base as Barrett Specification Pitch, which is famous for its waterproofing qualities. Comes ready for use in packages ranging from 1 pint tins to 40 gallon barrels.

Everlastic "Rubber" Roofing

This is a popular priced roll roofing of unusually high quality. It is made of the best grade of waterproofing materials and will give your customers the same sure satisfaction it is giving thousands of users in all parts of the Dominion.

There is a big market in every community for this roofing, and during the past few years its sales have increased enormously.

Everlastic "Rubber" Roofing comes in 1-ply (light weight), 2-ply (medium weight), and 3-ply (heavy weight), in rolls containing 108 square feet. Nails and cement are packed with each roll.



A typical farm building showing effect secured after covering with Everlastic "Rubber" Roofing.

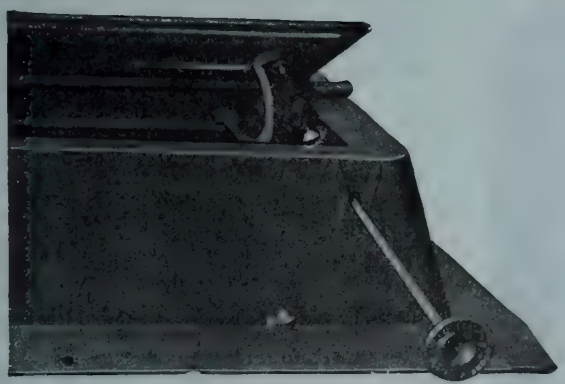
"Apollo" Railroad Milk Cans

The outstanding feature of these cans is their more than ordinary durability. In addition to the "Davidson Quality," which in itself is a hallmark of satisfaction, these R. R. milk cans are made of the very finest tinned steel.

Strengthened with a hoop of heavy section iron, 1½"x¼", fitted on bottom to inside of body — giving extra protection where it is needed most.



Seamless necks and dome or seamless covers. This leaves no joints where milk can lodge and sour. Made in five sizes—4 to 10 gallons.

Information and Special Catalogue on Request.

CURTIS AIR COMPRESSOR and TANK OUTFITS

Note these Special Features of this Garage Equipment:

1—**Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage or waste of oil, no oil gets into the tires. Enclosed crankcase keeps out dust.**
2—Uses about one-tenth of the oil used by any competing machine; saving in oil alone soon pays price of machine.
3—High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crankcase.
4—Fan flywheel cools cylinder; increases capacity.
5—Inspectable valves, light weight, large area.
6—Valves cannot drop into cylinder and wreck machine.
7—Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.
8—Drop forged crankshaft. Adjustable, renewable, non-cutting die-cast bearings.
9—Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

Welded Steel Pressure Tanks

Examine the Grain!

A properly alloyed babbitt has a perfectly uniform grain.

Break a bar
of the babbitt you are using—

If you find the grain irregular—if it shows a mixture of fine and coarse particles—if it shows a separation of layers—one dark and one light in color—

then you may know

that it is poorly alloyed—and that you can get far better wear from

Lionroyal

produced by the STANLEY PROCESS of alloying.

Lionroyal is clean—uniform—dense grained—and durable.

It is copper-hardened and tin-toughened. Bearings lined with it carry the load evenly—every inch of bearing surface equally durable.

It has no hard spots of copper or antimony, because the hard elements are thoroughly and uniformly amalgamated with the tough elements. This fact bespeaks steady service and long wear.

Write for booklet "AB" to know more about pouring and using Babbitt.

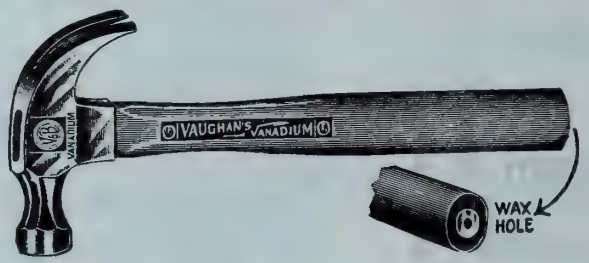
The Vaughan & Bushnell Dependable Tools

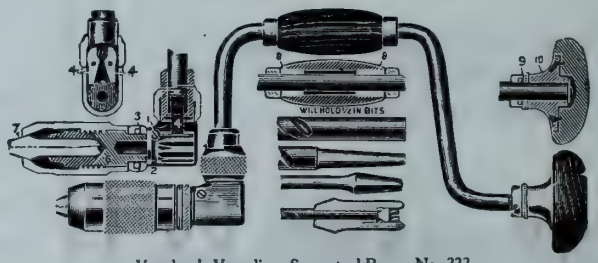
FOR carpenters, machinists, engineers and blacksmiths are tools of Quality. Leaders in their fields.



For over 50 years Vaughan & Bushnell Manufacturing Company has been making fine tools. Its product, made on the latest machinery by most modern methods, is controlled in material, workmanship and tests by laboratory specifications. Uniformity of quality is assured.

Ball Pein Hammer

Bell Face Nail Hammer



This is one of an extensive line of 28 hammers. Each is a leader in its class. Constant pounding proves the quality in a V & B Hammer.

V & B tools are made of extra refined steel, drop forged, tempered by laboratory requirements and rigidly tested. They include hammers, braces, pliers, pincers, nippers, hoof parers, tongs, anvil tools, wrenches, cold chisels, plumbers' and carpenters' chisels, wrecking bars, star drills, machine and belt punches, nail sets, reamer and countersink bits. Absolutely guaranteed against defects in material or workmanship.

Double Duty Plier

V & B Braces embody radical improvements over ordinary braces. Patented key construction of the socket frame positively prevents chuck from working loose. Four numbers, 8 to 14-inch sweeps.

Vaughan's Vanadium Supersteel Brace, No. 222

Carpenter Pincers

There is no guesswork about the making or tempering of these tools. Laboratory analysis governs each step. Every tool is given a rigid individual physical test. We know they are right before they can leave the factory. Quality is their dominant feature. They may be ordered from any part of the world in fullest assurance that their use will give uniform satisfaction.

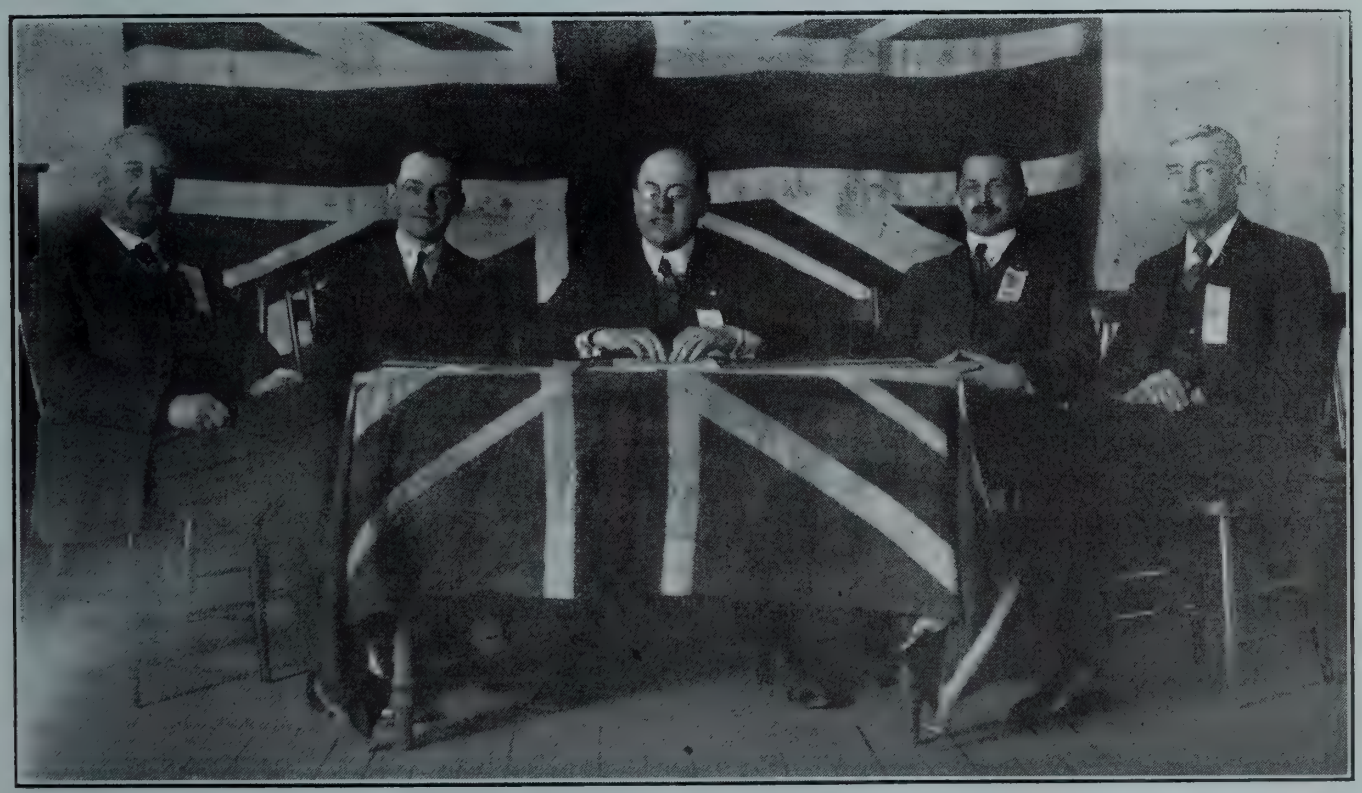
Interesting and Instructive Convention



Imminence of Legislation Affecting the Trade and the General Condition of Business Provided Many Important Topics for Discussion at 16th Annual Convention of Ontario Retail Hardware Association in Hamilton

THE advantages of a convention of merchants to discuss trade matters of interest was very clearly demonstrated at the sixteenth annual convention of the Ontario Retail Hardware Association held in Hamilton from Monday until Friday of this week. The program was a comprehensive one, containing many addresses from prominent manufacturers and wholesalers representing various hardware products, and addresses from retail merchants. The social side of the proceedings was at all times well looked after and sufficient diversion provided so that the deliberations would not be too strenuous. Much more attention was given the arrangement of booths at this year's convention and many interesting and instructive hours were spent by retailers in visiting these exhibits and conversing with the representatives of the seventy-odd firms who had booths.

Oppose Recent Legislation

Owing to general conditions of trade and in view of the imminence of governmental legislation affecting the hardware merchants, the action taken at this year's convention was watched with close interest. Opposition to the recent legislation regarding the sale of arms and ammunition was made, and the hope was everywhere heard that the counsel of experienced business men would be taken into consideration by the Government this year in framing new tax and tariff policy.

An optimistic note was sounded in the addresses dealing with various branches of the trade, but the necessity of allowing the readjustment process to continue gradually until it has affected every line and fully shaken out all superfluous inflation was emphasized. A policy of forgetting that there is any different aspect to business to-day and of buckling down and discouraging customers from any talk of depression was thoight to be the best and quickest way to bring about a return to normal conditions.

CALLING THE FIRST BUSINESS SESSION OF THE CONVENTION

This group was snapped at the convention in Hamilton this week, and shows the 1920 officers of the association as they called together the first business session of this year's convention. From left to right—G. A. Binns, Newmarket; Nelson Mills, Hamilton, the new president; Ed. Wanless, Chatham, retiring president; W. F. Macpherson, Prescott, secretary; John Caslor, Toronto, treasurer. George May, Toronto, and F. B. Smith, Belleville, were not present when this picture was taken.

Business Must Now "Hit on All Four"

Timely Advice From Representatives of Manufacturers and City Council at Opening Session of Hardware Convention—"Buy in Cold Blood and Sell With Enthusiasm"—Visit Wood, Alexander & James Warehouse—Much Interest in the Exhibits

A GOOD representation of hardware retailers, representatives of wholesale firms and manufacturers were on hand at the opening of the first business session of the convention in the hall at the Armories on Tuesday morning. A social evening was held on Monday following the registration of members. In the absence of the mayor, Controller Davis extended a hearty welcome on Tuesday morning and emphasized the advantages of meeting together for an exchange of ideas. "Co-operation is needed in this country now," said Controller Davis, "and I congratulate you upon the objects you have in view. The retail trade of this country can be of vast service to Canada at this particular time." Reference was made by him to the importance of urging the purchase of Canadian-made goods wherever possible and he concluded with a reference to the fact that the pinch of the reconstruction period is now being felt and that attention must be given to the question of reducing costs and promoting production. President E. Wanless replied expressing the appreciation of the association members for the warm welcome extended.

Welcomed by Manufacturers

Speaking on behalf of the manufacturers of Hamilton, C. A. Smith, secretary the Frost Steel & Wire Co., extended a cordial welcome to the merchants to the city and expressed the hope that full advantage would be taken of the opportunity to visit the plants of local manufacturers. Mr. Smith dealt briefly with trade problems confronting all branches of the hardware business, as follows:

"In the sixteen years of your association this convention will call for the most serious consideration of problems of merchandising that you have had. World conditions to-day are such as have not been experienced in the lives of most of us and if ever there was a time when co-operation was needed that time is to-day. This is a time when the machinery of business needs to "hit on all four" if we are going to market our goods with a profit.

"It was said at a convention recently held that the trade should 'buy with enthusiasm and sell in cold blood.' To-day this must be reversed. We must buy in cold blood and sell with enthusiasm. Advertising for some years has been looked upon as a good way of getting rid of excess profits, but to-day we need all the enthusiasm we can command as individual dealers. We must make the best use of our advertising and our personal contact with our customers. Now is the time for the utmost co-operation between you men who sell to the consumers and we who manufacture much of the goods you are selling. It is no time for suspicion. Remember, united we stand, divided we fall. In these days of crisis the manufacturer needs your support more effectively than in the past. Manufacturers, as a body, are in position to serve you and to serve you well, and if there is the co-operation there should be there is no reason why conditions cannot improve and a bright day dawn. A great deal of the pessimism has been in our minds and not in our country. People in Canada are in position to pay for goods and to pay cash for them. The more we talk hard times the harder times will be. Let us believe that the people must have our goods and let us put a little enthusiasm into our efforts."

Reports

The president's address, secretary's report and treasurer's report as reproduced in full elsewhere in this issue were thereupon presented and referred to a resolutions committee on motion of George May, Toronto, seconded by Messrs. Hawkins, Smiths Falls, and Long, Walkerville. President Wanless appointed a resolutions committee consisting of Messrs. Hawkins, Long and Wallace. The auditors' report by Messrs. J. D. Mathewson and J. D. Peacock was also received.

Visit Wood, Alexander & James Warehouse

The splendid new hardware warehouse of Wood, Alexander & James, as recently described in Hardware and Metal, was visited by the delegates at the conclusion of the morning session. A hearty welcome was extended by Messrs. S. H. Alexander and G. F. James, and care was taken to explain every detail of the modern facilities provided in the warehouse. The delegates were shown through very department of the building and much interest was taken in the weighing machines, chutes, freight elevators, facilities for providing the office and warehouse staff with the best ventilation, etc. Considerable time was also spent in the iron warehouse, where special facilities for handling heavy stock, such as transveyors, railway sidings into the warehouse, etc., were examined with interest.

Much Interest in Exhibits

Tuesday, Wednesday and Thursday afternoons were spent by the delegates in visiting the seventy odd booths in the Armories. Full advantage was taken of the opportunity of meeting in person the representatives of many of the firms whose lines are handled by the merchants. Aided by the strains of catchy music from the orchestra, the social at-

Continued on page 129

OFFICERS FOR 1921-22

The following officers were elected by acclamation at the Tuesday session set aside for nominations:

PRESIDENT NELSON MILLS, HAMILTON, proposed by W. A. Rankin, Ottawa, seconded by R. Hawkins, Smiths Falls.

VICE-PRESIDENT, GEORGE E. MAY, TORONTO, proposed by R. Hawkins, seconded by Mr. McGregor, Oakville.

SECRETARY, W. F. MACPHERSON, PRESCOTT, ONT., proposed by F. B. Smith, Belleville, seconded by M. Phillips, Toronto.

TREASURER, JOHN CASLOR, TORONTO, proposed by M. Phillips, Toronto, seconded by Mr. Lake.

EXECUTIVE COMMITTEE:—F. B. Smith, Belleville, proposed by Mr. McGregor, Oakville, seconded by R. Hawkins.

R. HAWKINS, SMITHS FALLS, proposed by Mr. McGregor and seconded by Nelson Mills.

WALTER BELL, BEATON, ONT., proposed by G. A. Binns, Newmarket, seconded by George May, Toronto.

(Mr. Joy, Toronto, withdrew his nomination).

AUDITORS:—GEORGE MATHEWSON and J. W. PEACOCK were re-elected on motion of Mr. McGregor, Oakville, seconded by W. A. Rankin, Ottawa.

Merchants and Government in Closer Touch

This Condition Much Desired in View of Important Problems Now Facing Trade—Advise Trade to Watch Trade Papers Closely —Brisk Season Ahead

Address of President J. C. Wanless before 16th annual convention Ontario Retail Hardware Association

IN presenting to you my address on the year's activities I want to first of all thank you most kindly for the honor shown me when you appointed me to the office of president of your association, and I trust I have been of some service to you during the year. At least I have given the best I had to your work.

I want to also pay tribute to the most excellent work accomplished by every member of the executive. In every case they have been ready and willing to do even more than was asked of them. Special mention should be made of the work done by Vice-President Mills and Past President Wright, who, through living in Hamilton, have had a very large amount of the work of the exhibition thrust upon their shoulders. But above all, let me take off my hat to the best secretary of any association with which I have ever been connected. Mr. MacPherson has absolutely the best qualifications of any man we could find, and even though the balance of the executive have done their duties and in every way have endeavored to forward the interests of the association, yet I think I am safe in saying that at least 90 per cent. of the credit belongs to the secretary, who has worked practically night and day to insure the success of this convention and exhibition. His remarkable work, and the success he has had in promoting this association has made me more certain than ever that he is the right man for the big job which I hope you will place in his hands.

I want to tell you how gratified I am with the attendance and with the exhibits, and at this time I can have no fear as to the positive success of the convention of 1921. Before passing on, let me ask that you take seriously upon yourself the duties of attending each and every meeting, and above all things of being on time. When we call a meeting for 9.30 let's get away with a bang and when we call a meeting for 7.30 let's all be there at that time. If we follow these thoughts we will all be surprised with the wonderful results we will obtain. Further, if you do me these favors, in return I will promise that I shall endeavor to have every speaker ready at his appointed time, and I shall furthermore ask him in all kindness not to take up more time than is allotted him on the program. A committee will be appointed to give this their attention. Let's make it a point, starting right now, to be in our seats at the time the meeting is scheduled to start.

Legislation

Now that I have made these remarks to you, and I know that they will be observed, let me make a few comments upon topics which we shall possibly like to have discussed. First of all, we know that just about this time the Dominion Parliament will be in session and let us hope that they will not take up a lot of fool legislation regarding the retail hardware man such as they have taken up in previous sessions. Let's hope that they will consult, not only with our association but with the manufacturers and wholesalers, so that they may be properly advised and come in full possession of the facts instead of running blindfolded as they apparently have in the past. I note in this connection that in spite of the number of deputations that have waited before the different members, at different times, the retail hardware men have been conspicuous by their absence. This is not as it should be and is simply another reason why we should have a permanent secretary on the job. I might go on and cite many more reasons but this will be covered in another report.

J. C. WANLESS

Chatham, Ont., who, in his presidential address at the O. R. H. A. Convention suggested closer co-operation between merchants and the Government.

Let me touch upon the markets as they now stand. This is merely a personal opinion, but in talking with different hardware men during the last few days along this line, I am convinced that they coincide with my ideas, that while it is well to be careful and cautious, still it is positively a mistake for any merchant to starve his business to such an extent that business is lost through not having the goods in stock. I do believe that every retail hardware man should keep his stock in good condition and should have it as complete as possible. This, of course, necessitates very careful attention to stock keeping.

Brisk Season Ahead

I really believe that the coming season is going to be very brisk, more especially so in the building line, and while it looks as though it might be a little late in starting, still it is a fact that things look really good in our district for a large building program.

Some one has said, or did I read it somewhere? "that a great many hardware men have not made any money," but I say it frankly that if they have not made money within the last five years that I am afraid they will be missing in the line of hardware men before prices are finally readjusted. I further believe every hardware man should adjust his prices as they are adjusted by the manufacturers and wholesalers, and that he should give his customers the benefit of lower prices as they are changed. I believe this is good merchandising and will serve to secure the confidence, good will, and, as a result, the business of his community.

Watch Trade Papers

I believe every retail hardware man should spare at least an hour or two with his trade paper immediately upon its arrival so that he may adjust his prices to those quoted in its columns. This will keep him in close touch with the market and he will be able to buy and sell more intelligently than if it is neglected.

Another matter which I believe needs to be driven home to the majority of the hardware men is that of collections. I believe I am safe in saying that hardware men are imposed upon to a greater extent than any other retailer except possibly the grocer, and it is a positive fact that a vast majority of merchants, and in that I include hardware men, are entirely too easy with their collections and as a result they have large losses.

The Retail Hardware Outlook for 1921

Address by Nelson Mills, Vice-President Mills Hardware Co., Hamilton, Before Ontario Retail Hardware Association Convention

"SUMMING up the retail outlook for 1921 as affecting the Hardware merchant, I am firmly of the opinion that business to the equal of or better than 1920 can be accomplished in 1921 in spite of changed conditions if the merchant himself will only get out and get under, and through effort create a demand that will fill the gap.

"Last year business shot along at a terrific pace. In fact during the last three years it has been easy sailing, but now we find the pressure that held us up is giving way, and we are inclined to trim our decks for action.

"During the last month and a half a great many prominent men have been passing out opinions, advice and prophecies. It is now such a popular indoor sport that "comments on conditions" and "what the future holds" are subjects that are becoming quite threadbare—such talks, however, will do us a wonderful lot of good, provided we use the advice and make the necessary repairs and adjustments to our stocks and policies.

"There is much even in the present situation to inspire confidence and hope in the future. The past year yielded the greatest crops in history, transportation congestion and labor troubles have been greatly relieved and our banking systems have withstood severe credit strains.

Co-operative Spirit Needed

"What we need now is a co-operative spirit between manufacturer, jobber, merchant and consumer, all thinking and working for a common good, then we will find ourselves living in an ideal atmosphere. But the problem of supplying the world's demand for essentials is still before us and should spur us on to action. People must eat, they must have clothing, a house to live in, they must travel and be entertained. All this keeps money moving, so the wise business man will not sit tight and make himself believe that everything is going to pot. He should not even wait to see what the other fellow is going to do, but be up and doing—stand ready to give his business a little artificial stimulation, a little hand cranking, so to speak, when the self-starter refuses to work.

"During the past few weeks we find the situation has cleared considerably. Travellers are out for 1921 business and they come to us with propositions for spring business on definite arrangements, under which the dealer knows where he is at and will be absolutely protected regarding price and delivery of goods. These arrangements have a tendency to stabilize conditions, and replace indecision with confidence as far as the purchase of necessary merchandise is concerned.

"We have all been somewhat conservative during the past six months and have used caution in buying and operating expenses. Why, we did not realize, it wasn't that our business was falling off, it was simply that everybody was doing it, waiting for something to happen. Possibly our banker was responsible and perhaps we do not fully appreciate the banks' good judgement and foresightedness, for while we rush to them in moments of financial worry, we must remember they are really our greatest debtors and so it will be through the banks we will be able to enter into a long stretch of prosperity when the proper time arrives.

NELSON MILLS

Hamilton, Ont., who, in his address as vice-president of the O. R. H. A. dealt with conditions in the retail trade.

"Believing that the blackest cloud has passed over, the retailers' inly course is to get his spring requirements on display as soon as possible, ever keeping in mind that he can sell just as much as last year by the use of a little "pep." Don't overbuy, however. There is a happy medium. Keep your stock well assorted and anticipate your wants before the customer does. Buy Made-in-Canada goods.

Overstock or Public Sentiment

"The following question was put to me by a manufacturer the other day:—Are retailers buying less merchandise because of overstock or public sentiment? And I wish to answer it in the following paragraph.

"The function of the retailer is to supply the needs of his community and I believe that the retailer to-day has the best opportunity he will ever have to reduce and dispose of his shopworn, poorly bought merchandise and take a loss in face of changing conditions. A cleaning up process will be a wholesome one. It will enable him to reduce his liabilities which dead stock and high priced stock represents. It's a false asset and it's not a profit, so it will be a liability unless sold within the next few months.

"Most retailers need regular lines to sell and are not overstocked so to speak, yet they hesitate looking for cheaper prices, a condition brought about by the newspapers instead of by supply and demand. So we should be making sales of our stock on hand, eliminating unnecessary lines and sizes, turning them into money and placing ourselves better able to go into the market and buy as prices decline. The consumer too will be satisfied that we are doing our part to make conditions meet his expectations, a condition which would produce activity. This bargain game, however, will hurt you unless done honestly. It is much better to advertise that you are selling goods at near pre-war prices than to advertise that you can sell $2.75 hammers for $1.19. The first argument is stronger and you are not so apt to have the consumer think you can do business on such big margins. Advertising carefully thought out will bring much larger returns.

"One welcome change as affecting the retailer is that the buyers troubles are over, but the selling end of our organization must carry the big burden now for sometime to come, and the real test is salesmanship. We must introduce new methods for the training of better salesmen, new and better methods of advertising and store keeping, because competition in the near future will be just as keen with the retailer as with the manufacturer and possibly our strongest opposition will be the chain store. These conditions face us straight in the face and unless we change with them the answer will be "the survival of the fittest." That same condition faces the jobber, for without the retailer where would the jobber stand? Retailer and jobber must co-operate, for in unity there is strength.

Map Out Campaign

"It seems to me that the retailer must set down and figure out the opportunities that exist around him; map out a campaign for 1921, and not observe conditions through the large end of his telescope. Use the small end and get a close up view of the situation. Analyze your past methods and map out a selling plan that has a real punch to it. No business can succeed from now on with the fighting spirit absent, you cannot overcome keen competition with wavering policies and lack of fear to venture. Put your whole weight behind your problems, then when December arrives you can sit down and count 'em over.

"Before closing I wish to mention briefly the subject of taxes, not as an **outlook**, but rather from the viewpoint of **lookout**. You are only sure of two things in this world. One is death, the other taxes.

"The Income Tax has come to stay. The Government says every merchant must keep books. Income Tax must be paid. Therefore, the Government wants to know exactly what your profit is at the end of the year. You can't **"think."** You can't **"guess."** You can't **approximate.** You must **know.** You can't make excuses. The government wants facts and figures. You can't comply with the Income Tax Law unless you know just what your financial condition is. Even if you make an "honest mistake" you are liable to be fined. Everything must be clear to the Revenue Officer when he comes to check up your statements. You can't afford to take chances, so the thing to do is to **put your house in order** and end your tax worries by keeping a complete record of your business day by day just as the Government wants you to. Taxes must be raised to pay our debts, and the sooner the merchant realizes he must pay his share the sooner our debts will be reduced. We all have a duty in this world to perform and it is just as easy to function right as wrong.

"The outlook for 1921 is as you make it. Let me suggest. A little bit of business, and a little bit of play, then a little bit of service to the other guy some day; and it must not be forgotten that man's opportunity to serve society is found in the successful conduct of his own business, and in such a manner that he may give perfect service equal to or even better than his competitor, and when in doubt to give added service beyond the strictest measures of debt or obligation, ever keeping in mind that wonderful phrase: 'He profits most who serves the best.'"

Outlook From Wholesalers' Standpoint

Col. Robt. Starke, of Starke, Seybold Company, Montreal, President of Canadian Wholesale Hardware Association, Was Unavoidably Absent. His Address was Read as Follows by Herb Seybold:

AS requested, some weeks ago, by your secretary, Mr. Macpherson, I venture to say a few words as to the outlook for 1921 from the wholesalers' point of view.

May I, before starting in on what I have to say on that subject, just have one word to express to you my appreciation of being asked to your annual gathering. I have had the privilege of attending last year and returned to Montreal greatly pleased with what I had seen and learned.

COL. ROBERT STARKE

Montreal, President of the Canadian Wholesale Hardware Association, whose address was read owing to his inability to be present.

I have attended may conventions and I can truly say that I have never been more impressed anywhere with the despatch of business and the vast amount of information given to members.

Replace at Lower Costs

After passing through 5 or 6 years of business carried on under ever advancing price conditions, and a demand beyond the supply, we find ourselves at the beginning of 1921 under reverse conditions. There is a decided holding off on the part of all the retail trade not to place too many goods in their stocks, and justly so, as staples, such as wire nails, all wires, iron and steel bars, as well as some of the smaller lines, show substantial declines. And in order to get these lower prices the mills are forced to make wage reductions and to economize in every department. If further declines in all lines are forthcoming all depends on conditions abroad and the ability of our mills and factories to further curtail manufacturing costs and still run at a profit; fortunately both wholesalers and retailers have had ample time, and have had ample warning to reduce their stocks so as to be in a position to replace at lower costs.

Take it all round, the hardware trade has not suffered nearly as much in depreciation and volume as many other lines of business, and we can look forward, after the first quarter of the year, I think I am safe in saying, to a normal state of affairs again. There is such a demand in all large centres for moderate priced dwellings to look after the ever increasing demand from the laboring mechanic, and other classes, that we find corporations applying to Federal and Provincial Governments for loans for dwelling house purposes amounting to $20,000,000 and upwards, and even these tremendous amounts will go only a little way to house our people. You can readily see what a demand must be made on the manufacturers of hardware and the wholesale and retail trade. One cannot but think, looking into the future, that there lies ahead of us many busy years.

Faith in the Hardware Business

When attending last October, the annual conventions of the American manufacturers and wholesale jobbers of hardware at Atlantic City, where some 1,500 delegates attended, from all parts of the Union, the meeting was opened by an eminent divine from Philadelphia who stated that the world would never be Christianized until there was a hardware store established in every corner of the globe, he showing his faith in the hardware business as standing strongly for clean, honest business principles.

May I, in closing, say that it is our duty to give every support to the Canadian manufacturers and to British made goods. We should be proud of our young country and all that the Empire stands for, every dollar spent in Canada is a dollar more for our development. We must have faith in each other and at all times be ready and willing to hold out a helping hand. The strong must be prepared to help the weak and if we each do our little part and play the game, there will be very few breakers ahead that the hardware trade of Canada cannot navigate.

Outlook From Retailer's Viewpoint

Address by George E. May, of May Brothers Hardware, West Toronto, and Executive Member Ontario Retail Hardware Association

I appreciate your kindness in asking me to say a few words to you. I have a natural reluctance in expressing my views to this body of hardware men, many of whom by virtue of their years have possibly forgoten more about hardware than I know.

I believe the outlook for business this year is particularly bright. While listening to the previous speakers on this subject I was pleased to find them all so optimistic. I believe that is the only view-point a person can gather who gives this any thought, and there are a few reasons that I would like to mention why things look good to me this year.

Periods of depression come and go periodically and they are followed by years of good business. We have been forewarned so much about this particular depression that we have just passed through that it will be a pleasure to have it over. In fact it fizzled out before it arrived, like many other troubles that do not amount to anything when we are brought face to face with them.

Show Good Profits.

The year 1921 should show the retailer good profits. During the rise in prices, every merchant here, I am sure, felt that he had to absorb a good many raises of 5 per cent. and 10 per cent. rather than change his retail price. Whether this was good business or not, I believe it was often the case. This year the reverse is in order. There will be a good many small declines which will not go to the consumer. They belong rightly to the retailer. It also represents an opportunity to adjust prices to make each article show a proper margin. Drop your prices as fast as you can but bear in mind these losses which you have absorbed.

The supply of goods will be much better this spring. During the last few years while business has been good, we have lost a great many sales through our inability to procure goods. Every sale lost, of course, represents a distinct loss in profits. This year you will be able to buy all the goods you want at lower prices. You will be in a better position to give service to your customers, and they certainly are in need of a lot of hardware.

Before I close I would like to say a few words about our friends, the jobbers. I believe that some jobbers are trying to play fair with the retailer and I know that some jobbers are not. If they would only show the same activity in meeting the decline in prices that they showed in taking advantage of the rise in prices they would greatly assist the retailer in solving his problems. The merchant to-day that has to buy can save a lot of money by mixing a little shopping with his buying.

Speaking of buying, I would like to draw your attention to this article, a cheap little chest handle, stocked by every hardware store. The price quoted recently by the five leading wholesale jobbers was: $8.25 per dozen pair; $8 per dozen pair; $6.70 per dozen pair, $4 per dozen pair; $3.50 per dozen pair; and at the same date I bought them from the factory laid down in my store at $2.55 per dozen pair.

GEORGE MAY

Toronto, who held out good prospects for the retailer in 1921 in his address at the convention.

Secretary's Report Indicates Progress

Report by W. F. Macpherson, Prescott, Ont., Secretary Ontario Retail Hardware Association

TO Officers and Members Ontario Retail Hardware Association:

In submitting this my sixth annual report, as your secretary, I am pleased to be able to advise you of steady growth in our Association, the membership now standing at 352 notwithstanding the fact that there have been a great many changes in the retail hardware trade—through removal or death, and also by withdrawal from active business on the part of a number of our former members. The fact of almost one hundred per cent. renewal of membership apart from those mentioned evidences a hearty support and interest in our Association by those who have realized the advantages and benefits derived from organization.

W. F. MACPHERSON

Secretary of the O. R. H. A. who outlined the work of his department during 1920

Extended Services

During the year the services customarily rendered our members have been extended as far as it was in my power to do. The current correspondence passing through my office has been, I might say, the largest in volume of any year since I have acted as your secretary. Difficulties in the interpretation of the varied plans of taxation, bearing on the retail hardware merchant and tinshops have been referred to me, all of which received prompt attention. This entailed considerable correspondence and interviews with taxation officials, and while I was not able to obtain any relief passed on the interpretations submitted by those who administer the Taxation Department.

Tinsmiths as Manufacturers

On behalf of our Association I have made protest against the inclusion of tin shops under the heading of manufacturers, realizing that while those thus employed do not desire to evade their fair share of taxes, they do wish to avoid the almost impossible task of keeping satisfactory detailed accounts of operations in a section of their business, where the said operations are for the most part a minor affair, and the collection of a two per cent. tax from their customers a most vexatious proceeding.

As usual a small percentage of our members have used the collection forms of our Association, and I would intimate that where a personal letter from this office to a delinquent debtor is desired, I am quite ready to perform that service as a follow up to our regular collection forms.

I have also during the year corresponded with several of our members in connection with placing their businesses on a cash basis—and am glad to learn of a growing desire to adopt this method of doing business.

At a later session the report of your executive will be presented outlining their work during the year, which I will not touch upon in this report.

Co-operation Needed

Business conditions at the present time force us to see the absolute necessity of co-operation — co-operation between the consumer and the retailer, and co-operation between the retailer and the wholesaler and the manufacturer. The wheels of the factories must be kept running to employ those who are among the best customers of the retailer. Confidence must be established in the minds of the consumer, and this can only be done by an active display of faith and optimism by the retailer during this period of readjustment—and after faith must come work. Follow the markets, and when necessary to make a loss to meet present replacement values—make it with a smile. The average purchaser will not appreciate buying goods on which he has been assured in a somewhat doleful way that the retailer is making a loss. And as retailers, we are expecting many good broad smiles from wholesalers and manufacturers in the same way. But above all let all the various interests combine their efforts to give business that momentum it needs.

The spirit of confidence and co-operation is alive today here in this convention, and I trust that every member will through active participation in our proceedings be able to return home and radiate that confidence amongst his fellow merchants and customers which will enable all to say "All's right with Canada," the most favored country under the sun to-day.

W. F. Macpherson, Secretary.

Report of Executive Committee

Read by President at 16th Annual Convention Ontario Retail Hardware Association

MEMBERS Ontario Retail Hardware Association:—

I beg to submit herewith report of your Executive Committee for the year 1920.

Three meetings of the executive were held during the year, in April, September and December.

As per resolution passed at the convention held last year "That steps be taken to procure the services of a permanent secretary who would devote his whole time to the work of the Association," your executive beg to report having entered into an agreement with our present secretary whereby he agreed to dispose of his business, and devote his whole time to furthering the interests of the Association. We feel that in taking this step Mr. Macpherson has solely the best interests of the Association at heart, and that in giving up a successful business to undertake this work, he is showing his faith in the ultimate success of the Association, and your executive is fully satisfied that with his energy and initiative, and long and successful experience in the retail business, his faith in the growth and influence of the Association will be fully justified. Following the consummation of this agreement, I as president of your Association sent out a circular letter to the trade, asking their co-operation and endorsement of the action of the executive, and received what we believe to be a sufficient endorsement to justify the undertaking.

We would also ask you to confirm this act of your executive and confer on your incoming executive power to carry out the agreement entered into.

A further resolution was passed at last convention requesting the executive to investigate the ready mixed paint proposition with a view of suggesting means to overcome the competition of department and mail order houses selling private brand paints. It was decided that having the analysis of paint placed on the cans would not be effective in overcoming the difficulty, on account of the lack of technical knowledge on the part of the vast majority of paint users, as well as on the part of the retailer as to what ingredients are required to constitute a properly balanced paint, as the constituents of the paint would necessarily be stated in chemical terms. Your executive thought that protection would be better secured by having possibly a grading number. Your secretary wrote the different paint manufacturers, asking their views on this point, and also suggestions as to means to overcome the difficulties of the handlers of high grade paints in competition with private brands. The consensus of opinion was that by placing the maker's name on the cans it would strengthen the position of the cheaper grade paints—but there was no reference made to the suggestion of grading the paint as to quality.

The only suggestion offered was the matter of education of paint users to quality goods.

The futility of getting any legislation along this line was evident to your executive, and it was decided to report progress, and with the continued growth of the Association to endeavor by further consideration to work out some plan to obtain the desired protection.

The result of the efforts of your executive in their endeavor to make the present convention and exhibition the best in our history is, I believe, quite apparent to all, and we would strongly urge all our members to take an active part in the sessions of the convention, and also to give every consideration to the exhibitors, who are doing so much to assure the success of our Annual Conventions.

All of which is respectfully submitted.

E. Wanless, President.

Conception of Duties and Scope of Association Secretary

Address by Ed. Wanless, President Ontario Retail Hardware Association

"I HAVE been requested to give 'my conception of the duties and scope of an Association Secretary' and were I desirous of disposing of the question in a concise manner could sum it up in one word, namely, Service.

"However that is not my intention and I will briefly outline some of the varied services in the minds of your executive when they came to consider the appointment of a whole-time secretary to carry on the work of this association. In a circular which I issued during the summer and which has been referred to in the report of the executive committee, a number of the services were mentioned in detail.

"These were, 1st—A price service given in compact and handy form—giving net prices on innumerable lines of goods subject to trade discounts, thus saving the busy merchant hours of valuable time in preparing net cost prices.

"2nd—A sales bureau offering to the trade at close intervals lists of goods, which our members wished to dispose of, on account of overstock.

"3rd—An increased collection service to be at the call of members in following up delinquent debtors.

"4th—A freight audit—as soon as practicable.

"5th—An adjustment bureau, where complaints of our members could be taken up, and an earnest endeavor made to obtain a satisfactory settlement.

"6th—To give every assistance in promoting amicable relations between dealers, where they do not exist.

"7th—To assist in forming group meetings and local associations for consideration of local problems.

"8th—To give practical information for guide of retail salesmen and clerks, on the use and sale of specific lines and materials.

"9th—To give assistance to members in advertising and sales promotion.

"10th—To obtain information for members in any specified line of goods, when requested.

"11th—To visit the retail trade as largely as possible, and thus weld more closely the membership of the Association.

"12th—To carry on an energetic campaign for increased membership.

"Quite a comprehensive program, you will say. Yes, it is—but I firmly believe that every item named can be successfully carried out by a competent secretary whose entire energy would be devoted to the service of the Association and its members.

"Retail merchandising is without a doubt becoming more of a problem every day. New methods of distribution are being introduced and tried out with increasing frequency, many of them will be short-lived, while others are likely to expand and grow. To my mind the best way in which to understand and meet these problems is by the institution of a strong secretarial office, which could study the situation, obtain all possible information, and give to the Association members the benefit of its investigation and research, to enable them the better to consider and adopt satisfactory methods to meet these questions as they arise.

"I leave it to you, fellow hardwaremen, to judge of the individual benefit to be derived from the institution of a service, as I have outlined it."

What the Secretary Owes the Members

And What the Members Owe the Secretary

Address by W. F. Macpherson, Secretary Ontario Retail Hardware Association

The comprehensive way in which your president has dealt with the question of the duties and scope of an association secretary renders it unnecessary for me to speak on the first division of the topic on which I was to address you—namely—what the secretary owes to the members. An earnest effort to bring into effect the many services outlined by your president, when combined with regular routine secretarial duties, will keep a secretary fully engaged far beyond any customary stated business hours and with an eye single to the welfare of the organization which he represents should be of eminent service to its members.

Utmost Support Needed

What to me seems just as important is the second division of the topic—What the members owe the secretary. To make the work of a secretary effective, the unqualified support of the membership is absolutely essential. By this, I do not mean that everything your secretary does must be conceded to be the right and proper thing; far from that. An honest constructive criticism is a far better way to show your loyalty to your secretary, whose sole aim should be to improve any service instituted, and to make that service more beneficial. Let every member carefully examine each individual service offered, and express an opinion of its value to him, and freely offer suggestions as to how they might be improved or enlarged, or if of sufficient benefit to be continued. Your secretary has no other direct way to learn of the real value of the varied services, and is often at a loss to know just how far his efforts meet any need of the members. And also, if you do appreciate any particular branch of the work carried on, tell your secretary. It is an inspiration to him and could be used to very great advantage in introducing the work of the association to those who are not yet members.

Do you get results from the use of association collection letters? Drop a line to the secretary periodically and tell how many accounts you have collected through this agency. Your success may encourage others to try the same methods to their advantage.

Ways of Helping Secretary

One more important way in which you can help a secretary is by a prompt reply to any letters from his office whether they be personal or circular letters. It is most discouraging to any secretary to receive only from ten to fifteen per cent. of replies to questionnaires sent out. This I am sorry to say is the usual thing, and when you stop to think that behind the enquiry sent out, the motive is for the purpose of getting information to be used for the welfare of your association, I am sure that this apparent lack of interest would disappear. Then don't sidetrack even a circular letter, because it is on your account that the secretary or executive is seeking information.

Carry on Question Box

We have most interesting and helpful discussions in our conventions, arising from the question box. Why not carry this on throughout the year. Anything that comes up in the course of business, at any time, which causes you to say: Why is this so? send your query to your secretary. Views from different sources will be obtained, and I am sure our valued trade press will give publicity to such matters as would be of interest to the members. In doing this, doubtless points will be raised, which will work out to the advantage of some other hardware man, and furthermore would aid in sustaining an interest in the association throughout the year, and would certainly add impetus to our growth.

I trust that these suggestions will impress on you the great value which is attached to your co-operation, and that your hearty support will be given your executive and secretary during the coming year along the lines I have indicated.

Letters to the Editor

Communications expressing the opinions of subscribers concerning matters of interest to the trade.

TINSMITHS AS MANUFACTURERS

Editor Hardware and Metal:—

Sir:—In connection with the test case to be instituted as to tinsmiths being manufacturers, of which I have read in Hardware and Metal, I wish to say that, as a tinsmith, I have taken out a license but can't see why I should be classed as a manufacturer. I learned the tinsmith trade when a boy, worked 38 years for one firm, when that firm gave up business I started a small shop for myself. I have to earn my living by my trade. There seems to be something very unfair in classing me as a manufacturer. I manufacture a few tin pails at such times as I am out of a job, also make up some stove pipes at leisure out of the black sheet.

I work alone, employ no hands, and don't sell wholesale. All through life I was given to understand that a manufacturer was a firm of one or more men, carrying on a business on a large scale, by employing men and machinery, to sell to the retail trade, goods made up for that purpose. This is not fair to me. I buy some Canada plate and make up some stove pipes. A blacksmith manufactures horse shoes out of bar iron, the blacksmith having learned his trade as I did tinsmithing. Why should I be classed as a manufacturer and the blacksmith and shoemaker not? Why should either of us be classed as such when the three of us served our time to learn a trade, to follow it, to make our day's pay? Is it any wonder that so many young men object to learning a trade which is becoming extinct, just trusting to taking any job they can get and then after a short time are laid off for an indefinite length of time. Is it any wonder that there are so many young men out of work to-day with no trade of their own to help them out. So don't be too hard on the young man who has given, say, four years of his life almost for nothing so that he may have a trade which no one can take from him.

Hoping that these few words will reach the ears of those who will decide this question.

A Reader.

The British Consulate at Saigon, Cochin-China, draws attention to an opportunity which exists there for the sale of British goods, particularly for metal goods, tools and hardware of all descriptions.

Pictures of The Cordage Industry

Interesting and Educational Film of all Processes in Manufacture of Cordage Shown by Plymouth Cordage Co. Representative

THE value of moving pictures as an educational means of giving definite knowledge of the various articles handled in the trade was demonstrated in the showing of the film story of Plymouth rope and binder twine at the Tuesday evening session of the convention. The representative of the Plymouth Cordage Company, North Plymouth, Mass, was on hand to explain the picture, as shown in nine parts dealing with the following phases of manufacture:

1. Growth and cultivation of Manila fiber.
2. Production of Sisal fiber.
3. Factory panorama. Arrival of hemp steamer. Docking and unloading scenes.
4. Opening the fiber. Its preparation and spinning. Tarring and putting up lathyarn.
5. How binder twine is made. Spinning, testing for length and strength, baling, sacking, warehouse facilities for shipping. Harvest scenes.
6. Machine-made rope.
7. General factory scenes. Binding off, coils, shipping, etc. End of the day.
8. Old-time method of hand spinning by a rope maker 90 years young.
9. Modern ropewalk practice.

Film Broadens Knowledge

The intensely interesting and educational story of this important industry, presented in this complete manner, from the cultivation and production of Manila and Sisal hemp, through the various progressive steps of preparation and manufacture into rope and binder twine, was highly appreciated by the delegates who viewed the picture. Everyone handling rope and binder twine in any capacity broadened his education by seeing this film. The picture approximates 5,300 feet of film and presented an exceptionally interesting entertainment of about one hour and a half duration. Every phase of the cordage industry was effectively portrayed, commencing with the foreign supply sources of the raw material, through the various factory departments of manufacturing and shipping of the finished product.

Binder twine, a single spun yarn and a 15-inch wrecking cable composed of 1,197 yarns of similar size, illustrated the scope and diversity of production.

The Various Scenes

The opening scenes were laid in the Philippine Islands, showing the growth and cultivation of Manila fiber, a product of the wild banana plant which because of its flexibility, strength and durability is principally used in the manufacture of high grade rope. Many beautiful scenes followed, depicting the native methods of cultivating the hemp plant, cutting the stalks, stripping and cleaning the fiber, after which it is dried over bamboo poles, tied into bundles, compressed into bales of 270 pounds and exported. Mexico was next shown, the state of Yucatan being the chief centre of Sisal production, and in similar manner this source of supply was interestingly pictured. Sisal fiber is obtained from the leaves of a cactus-like plant, and the native methods employed for obtaining it are of great educational interest. It is used principally in the manufacture of binder twine, and for making the so-called tie yarns for binding and bundling purposes.

The reels which followed told the story of rope and binder twine from start to finish as made in the company's cordage factories at North Plymouth, Mass., and Welland, Can. How the fiber arrives by steamer and is unloaded at our own docks; its careful preparation prior to spinning into rope yarn and binder twine; the ingenious spinning process employed; the tarring method in the manufacture of lath and shingleyarn, together with the rope walk and factory methods of rope-making, were all faithfully reproduced, so that all who saw would have a perfectly clear conception of the industry.

The consensus of opinion was that the film story of Plymouth rope and binder twine was one of the most educational features of its kind which has ever been shown to the retail merchants and as such it was highly appreciated.

Major, Sask.—McCulloch & O'Keefe, hardware, have been succeeded by McKenzie Bros.

Balcarres, Sask.—Cruickshank & Hess, hardware and implements, have been succeeded by Hess & Decker.

MERCHANTS AND GOVERNMENT IN CLOSER TOUCH

Continued from page 63

During the past few months we have adopted a rather strenuous course of collections, not being at all hard upon those who could not pay, but pushing those who could pay, but would not, and, as a result, I can safely say that our books have never been in as good condition as they are at the present time, even despite the fact that last year was a very large credit year and also despite the depression which landed during the latter part of the year. The collection proposition is really a difficult one, but it is something that must be forced, if the merchants doing a credit business wish to have success.

I trust I have not trespassed too much upon your time in these few rambling remarks, but these are things I wish to drive home to my fellow hardware men, and you can be assured that I have plenty of opportunity for absorbing them myself.

Again I say "thank you" and with all good wishes for a really prosperous year.

J. C. Wanless.

Canada Cement Earnings

Montreal.—Earnings applicable on the common stock at the rate of 3.1 per cent. are shown in the financial statement of the Canada Cement Company for the year to December 31, 1920. During the year the company paid the full 6 per cent. dividend, necessitating a drawing from surplus of $525,887.

Belleville, Ont.—The Asbestos Pulp Co., Ltd., has obtained a charter.

Brantford, Ont.—The Quebec Paint & Varnish Co., Ltd., has been incorporated.

St. Thomas, Ont.—Elgin Handles, Ltd., have obtained charter.

Toronto.—The Domestic & Farm Appliances, Ltd., have obtained charter.

Toronto.—Victory Auto Accessories, Ltd., have obtained charter.

B. M. Hill & Company, Winnipeg, have removed their office from the Montreal Trust Bldg. to a larger and more spacious office in the Aikins Building, McDermot avenue.

FINANCIAL STATEMENT ONTARIO RETAIL HARDWARE ASSOCIATION

Annual report presented by Secretary W. F. Macpherson shows steady growth

Financial Statement to 31st Dec., 1920.
Abstract.

Only Permanent and Sane Reductions Will Come From Work and Devotion to Business

Address by Col. A. F. Hatch, General Manager Canada Steel Goods Co., Ltd., at Annual Convention of Ontario Retail Hardware Association

ADDRESS of Col. A. F. Hatch, general manager Canada Steel Goods Co., Ltd., at the annual hardware convention of the Ontario Retail Hardware Association.

"I understand that this morning I am to speak about manufactured products. This is a subject which covers a great field and being that I am anxious to give you some help which may guide your members into the paths of prosperity, it is necessary that I should make some recommendations and suggestions.

"Taking into consideration the attitude which seems to have been adopted by numerous beings interested in the products which you and I are interested in, let me recommend first that: We suspend all business. Quit buying. Quit selling. Quit advertising. Quit eating. Let us get hungry. Let's give ourselves up heart and soul to an orgy of gloom. Let's howl and howl and howl. Let's curse the country, business, our town, our neighbors, and each other. Let's get it all out of our system and then go to work.

Separates Wheat from Chaff

"Unquestionably prices of manufactured products are on the downward trend. How long they will continue so is difficult to forecast and how long they will remain at their present level is equally difficult to forecast, but there is no question in your and my mind that the only permanent and sane price reductions that can take place are those which will come from work and our devotion to business. In some ways, a business period such as the present one has its uses, its advantages, because it separates the wheat from the chaff. That is, it shows who are the timid folks, chronically unprepared for the inevitable fluctuations of business, and perennially ready to see "red" the minute the market goes off a fraction. This you see gives the level-headed folks a chance to know definitely what kind of foolishness they are up against and an opportunity to calm the frightened ones. These are the days when clear-headed, far-seeing, courageous business men really come into their own. They steady the ship, they nurse the timid ones back to confidence, just as a patient parent restores contentment to a sacred child. To-day holds no real and permanent perils so let's readjust sensibly and sanely.

"Everywhere we go we expect to run across a 'sniffler' or two, but never in all our born days have we seen such a crowd of them as there are at the present time. The 'woods' are literally full of them. You know who we mean—the fellow who can think of no other thing to talk about but hard times, poor business, unemployment, etc., who, in some way or other, has slipped his clutch and is running along on his calamity gear.

COL. A. M. HATCH

Canada Steel Goods Co., Hamilton, who in his address gave some sound advice to the trade as to the best means of minimizing the effect of the present business condition.

Why in the world ordinarily sensible men will stand and listen to his chatter is beyond us. If business is to get back again on its normal footing, if the present resistance to buying is to be stopped, if unemployment is to give place to employment, these 'snifflers' must, at once, be given the place that we would ordinarily give to men of their calibre; and the one thing which will put them there most effectively is by you not falling in line with their views.

Dangerous Reasoning

"On every hand there is evidence of a 'buyers' strike' against buying. 'Wait for lower prices' seems to be the slogan on everybody's tongue; and there is no question but that by waiting prices can and will be forced lower. 'Bankrupt sales will offer us opportunities to buy what we want at practically our own price.' It sounds good, but isn't it foolish and dangerous reasoning? It entirely overlooks the fact that if these conditions are brought about so many of us will be out of a job that bargains will be the last thing in the world of interest to us.

"Cannot we who see the handwriting on the wall realize that nothing can be gained by increasing the purchasing power of the dollar if it means at the same time a greatly reduced supply of dollars available for us to make our purchases with, and that the highest individual prosperity is to be attained not by costly distress and bankrupt sales, closed-down factories, wide-spread unemployment, sadly reduced wages, and criminal under-production, but from a healthy trade in which each buys what he normally needs and can afford?

"I must therefore state to the buyer that the 'water' is already out of high prices when further reductions in commodities would be artificial and that the highest prosperity is now to be attained, if you will do your part in trying to hold together that which is the greatest essential in business—confidence.

Panicky Retailers

"We stand between you and the consumer and as our attitude is molded so also you mold the ideas of the consumer. The worst evidence of the so-called buyers' strike and consequent price reductions, unemployment and distress, are traceable to the lost confidence on the part of a small number of retailers who become panicky and allow themselves to be quoted to the effect that prices will be reduced. Your vital interests demand its prevention—demand that we fix in the minds of the consumers that prices cannot be lowered except through economy and our best attention to business, but prosperity is with us if we have sense enough to hold on to it. Let me place these facts before you. Let me point out as clearly, as forcefully as it is in my power, that unless the present resistance to buying is at once stopped, and purchases made at prevailing prices to cover our normal need, boarded-up factories, slowed-down money circulation, widespread unemployment, complete industrial depression that will take us years to recover from, are inevitable.

"Now then, Mr. President, the advice that I have offered perhaps is not what you expected to hear about manufactured products, but it is necessary for

The Iron and Steel Outlook

Existing Values of Steel Products as Related to Costs as Low, If Not Lower, Than Pre-war Level—Importance of Building Resumption on General Conditions

Address by George Spence, General Sales Manager the Steel Co. of Canada, Before Convention of Ontario Retail Hardware Ass'n

CONDITIONS in Canada are very much affected by conditions across the border and this is an admitted fact by manufacturers, wholesalers and retailers. Probably no better evidence of this can be given than the army of American travellers who are covering Ontario and other parts of Canada endeavoring to sell goods to the buyers in Canada. When conditions in United States are bad we can expect their conditions will materially affect us here. We all know there has been a falling off in business in the States and that there is stagnation in buying at the present time. Stagnation is not confined to any one article, but is general. While this is no time for blind optimism it is rather a time for courage when all must do their share to end the deflation and get down to a sound basis.

We have referred to conditions in the States. Those who are well posted as to American conditions, and who have looked into conditions in Canada, say that conditions are much better in Canada than they are in the States at the present time, for which we are duly thankful and let us help matters by doing our best individually to improve conditions. Sir Henry Drayton, our Finance Minister, said recently that Canadian difficulties are small compared to those solved.

Foreign Trade

Our foreign trade amounted in 1920 to $2,351,174,000, being an increase over 1919, but this is made up of a large increase in imports. Our imports actually exceeded our exports by $151,145,000, the imports for 1920 having shown an increase over the previous year of $425,499,373. The imports, no doubt, can be very materially increased in 1921 if the Canadian buyer will buy Made-in-Canada goods and keep the money circulating in Canada and thus help to keep the exchange rate down.

The members of the Ontario Retail Hardware Association are most interested in the Province of Ontario and it will be seen from figures below that they live in the most prosperous and thickly populated province.

The value of Ontario farm products in 1920 was 40 per cent of the total value of all Canada.

The mineral output 30 per cent. of the value of all Canada.

The timber output 35 per cent. of the value of all Canada.

Value of manufactured products 50 per cent. of the value of all Canada.

Ontario has 23 cities—139 towns and 150 villages. Canada's failures during 1920 showed a small increase over 1919 and December showed an increase over any other month in the year, thus reflecting the effect of depression.

We must not forget now that the Farmer Government is in control of provincial affairs, that Canada is an agri-

GEORGE SPENCE
General Sales Manager, The Steel Company of Canada

cultural country. The value of the field crops in Canada for 1920 is estimated by Bureau of Statistics as $1,636,664,000, and when we consider the published debt of Canada $2,298,784,000 it gives some idea of Canada's resources, when the value of field crops alone for one year is such a large proportion of the debt. The bank deposits run about $2,000,000, to say nothing about our other numerous resources which it would not permit us to mention here owing to the lack of time. Gentlemen, with such heritage should any be down-hearted?

Immigration during 1920 was what might be called natural being close to 120,000, which it is safe to say might easily have been increased had the government thought it well to do so, but owing to the increase in the unemployed, owing to easier manufacturing conditions, the government restricted immigration.

Perhaps there is nothing which has done more to hold up activity in the retail hardware trade, as well as manufacturing, as the building trade. The figures for 1920 show contracts awarded amounted to 35 per cent. increase over 1919 for the whole of Canada and Ontario is about 25 per cent. in excess of 1919, while the West shows an increase of 150 per cent. Architects tell us that their offices are full of plans which are held up pending lower prices on material and labor.

This is something which is not confined to Hamilton, Toronto, Montreal or Ontario, or even the Dominion, but is general all over the world. If building in a general way were to commence we would soon have everyone happy again with the retailer turning over his stock and the manufacturer turning out a new supply and labor busily engaged.

It has been said however, that before these good times come, the retail prices must fully reflect the declines in wholesale prices and the retailer should take his loss in writing down his stock the same as the jobber or manufacturer and thus help a general buying movement.

Outlook As To Prices

In considering present prices on steel products, as compared with pre-war prices, it may be stated the existing values as related to costs are low, if not lower, than during the pre-war period. Therefore, further declines in prices are not likely unless heavier reductions in labor costs are effected than now seems reasonable to expect, because labor reductions will be regulated largely by manufacturing costs.

It is interesting at this point to consider the efforts now being made by independent steel companies in United States to secure business. The independents are very short of business and are cutting prices in an effort to secure business so as to keep their plants partially going, while the United States Steel Corporation are maintaining the governmental price fixed March 21st, 1919, and running to capacity or nearly so on business booked before the depression took place.

Judge Gary a few days ago referring to action of the independents quoting lower than governmental prices, stated the Corporation have no present intention of cranging the selling prices and goes on to say that he knows from the Corporation's books that on any of their products it would be impossible for any of their competitors to sell at a profit unless they receive as much as, or more,

No Big Reductions Unless Wages Are Cut

Humanity is Very Fickle, Says S. H. Alexander—Keeping Stock Complete in All Branches Must Have Breadth of Vision

Address by S. H. Alexander before Convention of Ontario Retail Hardware Association

I AM once more honored with the invitation to appear before your association as a representative of the jobbing trade. It is indeed a very great pleasure to have this opportunity of meeting face to face with so many of our retail friends. It is the only time in the year that we can get in touch with a great many of you. As each year comes around, we resolve that we will take a little time off and visit among the trade but the time never comes when it seems possible to drop the routine of life for a few weeks and get around among our friends. However, it goes without saying that we are vitally interested in you and in your welfare for if you do not thrive, neither do we, and I believe there never was a time when the wholesaler was of more value to the retailer than at the present time when careful buying is necessary; you buy in smaller quantities and oftener, and you could not pursue this method without the jobber's stock to draw on.

The retail hardware merchant of today is no doubt sharing in common with all other branches of trade the feeling of doubt and uncertainty as to what the immediate future has in store. I do not think for one moment there is cause for any very grave concern. Humanity is a strange box of tricks, swayed often as readily by the imaginary as by the real. As soon as it becomes known that such merchandise as cotton and wool goods, hats, clothing and shoes have taken a tumble and are headed for the bottom, we of the rugged, staid and staple iron and steel business immediately take fright and think we are headed for perdition also, overlooking the fact that in our business there had never been during the period of the war any considerable amount of wild-catting. What I am driving at is that while wool advanced about $1,400 per ton and other basic articles as much in proportion, the major part of the iron and steel lines did not advance $100 a ton and in many cases not $50, and you must consider also that the greater part of these advances were composed almost entirely of workmen's wages. Now in the light of this it does not seem reasonable to expect any ruinous reductions in prices unless wages are cut in half. It is quite true that markets are declining. Many declines have already taken place but if you will note you will realize that outside of nails, glass, and one or two other lines, the reductions for the most part have been 5, 7½ or 10 per cent. In very few cases indeed have they been sufficient up to the present time to entirely wipe out the margin between your cost and resale. As regards glass, we have advice that the market is already tending upward again, and as for wire nails the best information we can secure will show that further decline is not looked for. Of course, there are only my personal observations and no guarantee goes with them.

Speaking personally, we have never stopped buying goods. We have deliberately set ourselves within the last few months to see that our stock is complete in all its branches. We are firm believers that the merchant is in business for the express purpose of carrying a stock of goods for his customers; in fact, that is his only reason for existence and the minute he ceases to function properly, he is no longer a vital factor in the business sphere. The result of this procedure in our case was rather strongly exemplified a few days ago when one of our travellers took an order from a merchant just starting in one of the villages not a hundred miles from Hamilton. This order comprised an assortment of general hardware lines such as a merchant in a rural community would stock and consisted of four hundred items. We filled from our regular stock three hundred and ninety-eight, that is, the back order sheet this man received with his invoice consisted of two items. Now, had we taken fright a few months ago and started in to starve our stock, what sort of satisfaction would we have given this man, and what would his impressions be of us, posing as wholesale merchants in business with the avowed purpose of supplying the retailer with what he required. I pass this on to the retailer with this purpose, to point out that if in his fear of some possible or probable decline, he refuses to buy and lets his stock run down, what is the farmer or householder going to think of him when he comes in to supply his needs and is told by the merchant "We are out of stock and are not buying just now."

S. H. ALEXANDER
of Wood, Alexander & James, Hamilton, who addressed the convention

The successful merchant, be he wholesaler or retailer, must have some breadth of vision, he must say to himself, "For five years steadily prices advanced, and in every case I had goods on my shelves bought at lower prices on which I was able to make the added profit." Surely no one is foolish enough to think that he can buy everything at the low price and sell everything at the high price. The one must be put against the other. Prices up to the present moment have not commenced to decline with the same rapidity nor in the same extent as they advanced so that with any one of you the balance must be very substantially on the right side.

The time for speculative buying is probably past, and as the manufacturers are gradually getting into shape so that they can fill their orders very promptly to the wholesaler, you can very readily adopt a somewhat more conservative policy as to your buying, that is, you can probably run your business on a smaller stock because you can replenish it more readily. It would appear to me that the wise merchant in the coming months will be the one who has confidence in the solvency of his country and district, and who realizes that people are going to continue to use hardware. Don't forget that Canada is to-day in the premier position of the countries of the world.

Comparatively speaking, we have no troubles. It is true that the United States exchange is against us but if this condition of affairs leads us to look more closely into the resources and possibilities of our own country, the eventual result should be a grand thing for Canada. Also we cannot shut our eyes to the fact that in industrial centres we have

Closer Co-operation Wholesaler With Retailer

A. J. Wright, Past President, Suggests Joint Meetings of Executive of Retail and Wholesale Associations; James Hardy Concurred—Manufacturers Should Extend Field So All Lines of Made-in-Canada Goods Can Be Made Available

Address by A. J. Wright, Before Convention of the Ontario Retail Hardware Ass'n.

SPEAKING from a retail standpoint I am going to deal in two sections. What we have and what we want. I have sat back and listened to the wholesalers and the manufacturers and their addresses represent one of the most instructive features of our convention. It has always impressed me that they have

A. J. WRIGHT

Member of the Executive Committee of the O.R.H.A. who spoke on retail problems.

tried to give us the facts. To the manufacturers and jobbers I say, we appreciate the service you give, we also appreciate the class and variety of the stocks you carry. If you did not have a complete stock handy for us retailers, no one knows where we would accumulate the stocks to meet our customers' requirements. If my wholesale house was not so handy, imagine what a time I would have gathering a stock together. We also appreciate the regular calls of the travellers who display samples, make quotations, straighten out errors, and tell us of the wonderful trade that our competitor is enjoying; the national and local advertising, catalogs, sample window trims, demonstrations. These are all valuable aids given to the retailers and they are appreciated. I do not think the average retailer appreciates the money spent on his behalf by the manufacturers. The men who control the distribution of hardware are of the highest calibre and we have much to be thankful for. This business is not in the hands of a lot of shysters. We realize all these, as things we have now. Now for what we might want.

What We Want

The manufacturers for some years have come to us as an association saying "buy made-in-Canada goods." It is pointed out to us that if we buy Canadian made goods we are turning over our own dollar. Now we are going to say to these manufacturers, we want you to make the goods that our customers demand and make these in Canada. It is just a month or two ago that a salesman came to me and said: "We have 23,000 pairs of German made skates for sale at pre-war prices." The thought struck me that the Canadian manufacturer asks us to buy Canadian made goods. The onus is on the manufacturer and jobber to see that the government does not allow these goods to be brought into this country at this time. If that jobber was to get away with that business it would not be long before another batch of German goods would come along and soon we would have a return to the conditions under which there was 30 per cent. to 40 per cent. of German hardware on our shelves. This should be kept out.

Joint Executive Meetings

Another point addressed to the manufacturers is this: We would like to see your goods sold through legitimate channels only. We would like you to sell them through the hardware trade. I leave that thought with you.

We have an executive committee in connection with this association. They are reasonable men. They are trying to function as an organization of hardware dealers in Ontario. The next step is for the wholesales' executive committee to get in touch with our committee and co-operate and take up these matters that affect them and us from time to time to mutual advantage. There can be nothing gained by standing off and I will say that you will get more satisfaction from this understanding.

We would like your confidence and help to devise ways and means to encourage the sale of goods made in Canada. That is a subject for a joint executive. We want to continue to be your customers, we want to be better customers and retain your good will and prosper together under the best conditions. The only other suggestion I have to offer is that some wireless device be provided the retailers to take the flash from the wires from Halifax to Vancouver in regard to price changes such as that on nails.

James Hardy, secretary Canadian Wholesale Hardware Association, replied that during the present year he had it in mind to carry out the suggestion, namely, to have joint executive meetings between the two associations.

Co-operation Solves Retail Problems

Address by F. B. Smith, Belleville, Ont., member of Executive Committee, at Annual Convention of O.R.H.A.

I HAVE collected several recent headings from trade papers and letters which reached me within the last month through the mails.

To me they show the optimistic view these writers would have us take of what will come to pass. Some sound a note of warning, others of enquiry, asking us to gaze into the future and discover if possible what that future will be.

I Will Quote Them

"What is coming?"
"What is the business outlook for 1921?"
"What is going to happen?"
"Will business be dull?"
"How much longer will the slump continue?"
"A glimpse into 1921 is reassuring."
"The party is over: Look ahead."
"The country is still optimistic."
"1921 the Come Back Year."
"Big (Bicycle) Business for 1921."
"United effort and maximum efficiency is needed."
"Good times for all can only be the product of good work by all."
"Keep hammering away."

"Are we to experience a period of rapid price declines with consequent losses or will prices gradually descend to more normal levels without seriously affecting general conditions."

"Prices went up a step at a time, they must not come down the banister."

"A careful canvass of the industrial field has failed to produce one responsible business executive who lacks faith in the future."

"There is an even greater number of wise men who are unanimously of the opinion that the worst is past, and that a resumption of trade on a sound and more normal basis will be experienced within a very short time."

While at a convention the other day in Montreal a speaker told of a leading firm there who had adopted the slogan:

"We progress by co-operation."

This impressed me at the time and has remained uppermost in my mind ever since. I began to fit it into my own store and into the hardware business of my own city. For some years I have been a believer in co-operation instead of opposition, and

Strategic Loss Essential to Effective Offensive

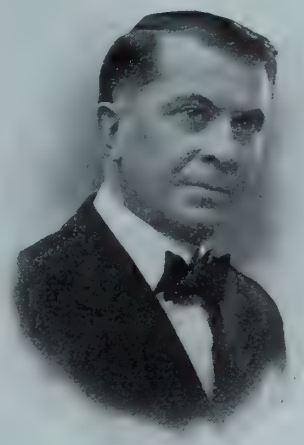
Reconstruction Process Has Not Affected Iron and Steel as Much as Other Basic Materials—Canada Has Reduced Price Advance 30 Per Cent.—Labor is Chief Factor in Basic Industries

Address by B. J. McCormick, General Sales Manager Canada Foundries & Forgings, Ltd., Before Convention of Ontario Retail Hardware Association

WE accepted this invitation as an honor, not of a personal nature to the speaker, but as a tribute to that grand old Smart plant established on the banks of the St. Lawrence in 1854, almost a generation before this great Dominion became confederated.

We feel that a man who mixes with his fellows on occasions of this kind is ever on a voyage of discovery, finding new islands of power in himself which would have ever remained hidden but for these associations with others.

Business Prospects, 1921



Consciously or unconsciously factory managers are answering this question by the plans which they are now laying for future operations. No one can answer correctly with assurance, but a knowledge of conditions and the economic laws that govern those conditions will aid in making the answer more authoritative. All the ablest theorists and members of the oldest and wisest schools of economics have guessed during the last three months about what was the matter with industry, and what would happen within the near future. You ask for my opinion, but all I intend to do is to discuss the matter with you.

The year 1920 with its profits and losses, and mostly losses, has passed into history. There are several viewpoints from which to look into 1921. The productive and distributing machinery of Canada is very finely balanced and it is a well-known fact that all industry and commerce prospers and suffers together. We have experienced seven-year periods of depression or trade fluctuation. The average length of previous depressions have been about one year, some of shorter periods and some longer.

Reconstruction

Most merchants seem to think that one big slash in prices would have the same effect as a fairy waving her wand, that all our troubles would at once vanish and be over, and that our readjustment would be completed. A good many of us thought that the year 1920 was to be the readjustment period but we were all wrong. The year 1920 started with an unprecedented demand for every article known to commerce, and factories were so crowded with work that they had no time to readjust. In fact, labor asked for and received more concessions in 1920 than during any previous year of the war. During the month of April, 1920, we offended our customers by refusing to bid on over a million dollars' worth of inquiries because our production chart was filled for the entire year on that class of goods.

Then came the shock, and industry immediately went into low gear about October, and here we are.

B. J. McCORMICK

General Sales Manager, Canada Foundries & Forgings, Ltd., Welland

My opinion is that this is the real period of readjustment, and our whole industrial and commercial structure is being tested by the strain, but those who have builded wisely and well have no cause for alarm.

My Vision

My personal vision of the future is bright, pleasant and a reassuring one, but the process of reconstruction must continue until every factor contributes to the result which we attain. Wheat, cotton, tobacco, sugar, leather, rubber, lumber, tea and coffee and other raw materials, including copper and zinc, have taken a big slump in the last three months, some of them going even below pre-war prices, but I wish to call your attention to the one point which I wish to impress upon you to-day, and that is, that iron ore is the only raw material which has held firm.

Why? Because wages have not been revised by the steel interests who perform the first seven processes of this great industry.

Manufacturing implies buying. If nobody wants to buy what the factories make, the factories very soon have to switch off the power and put a padlock on the door. There never has been a time and there never can be a time when nobody wants to buy; but enough people can stop buying, or can curtail their buying, to make a big dent in manufacturing processes and that is just what has happened in this country at this time. There has been, and at the present time of writing there still is, a buyers' strike. It was, and is, psychological. Nobody could have done anything to prevent it. No one alone and unassisted can do very much to stop it. Buying is based on confidence—confidence that prices are fairly stable—that they will not decline recklessly over night. This is true of both individuals and of corporations. It is clear that business and industry in general must take certain broad steps before confidence is returned. It remains for the industry, whether it be manufacturer, jobber or retailer, that has not already done so, to make the plunge; to sacrifice if sacrifices are necessary, but in any event to get back again on a workable basis of confidence. What we all want to know to-day is when will that period of relative stability likely be reached, and then and only then will the wheels of commerce speed up.

In New York there was a meeting in January of jobbers at which they formed a policy to trade among each other, rather than purchase direct from manufacturers. Their slogan was "Don't buy anything from the maker until he is down to pre-war prices."

This buyers' strike will and has slowed up production in our factories with all its disastrous effects of non-employment. Slow production begets higher costs.

Pig Iron

This is an expression used by most hardware buyers, "Pig iron is down $5 or $10 per ton." This is a stock phrase and generally used as an opener with most of the hardware salesmen. Do not use this poor, old, hackneyed phrase because it shows at once that you are not familiar with the basic principles of your own business, and it makes you look like a man coming into a ball game at the seventh inning, and asking your neighbor what is the score. It would be just as reasonable for you to ask the price of iron ore at Lake Erie ports, or even more reasonable still to ask what

Mutual Fire Insurance for Merchants

Proposition of Hardware and Implement Dealers' Mutual Insurance Co. Outlined to Convention by F. A. Martin, Ontario Provincial Manager

DEALING with the question of mutual fire insurance for retail merchants, F. A. Martin, Ontario Provincial Manager of the Hardware and Implement Dealers' Mutual Insurance Company, read the following statement:

"The Hardware Dealers' Association of Minnesota organized the first hardware mutual insurance company in 1899 for the purpose of furnishing insurance to its members at a saving. Their success was so pronounced that their operations gradually extended to other states and to-day are licensed in forty-two states across the border.

"Last year the three strongest companies applied and received license in the Dominion and province and are now operating in this country under the supervision of the two insurance departments.

"For the past thirteen years the hardware association members in the States have been saving 50 per cent. on their insurance through this insurance. Dividends are declared by the board of directors in December on all policies expiring the following year, and with the low loss ratio experienced on hardware and implement lines and the small expense at which the business is handled, there is no reason why this dividend cannot be maintained or increased. The large surplus is ample to take care of any excessive losses and gives to the dealer positive protection at one-half the cost of stock company insurance.

"On account of the large number of dealers having added automobiles to their line, we have found it advisable to include fireproof garages to our coverage. The dividend on this class of business is 40 per cent.

"It has been the policy of these companies since their inception to write hardware and implement insurance only, for members of the state hardware or implement association, and to continue the insurance to those in good standing. They are endorsed in the States by the thirty-one State hardware associations and fifteen implement associations. It is our wish to continue this practice in the Dominion, and respectfully solicit your endorsement on this basis, assuring you of the best insurance at the largest saving and our hearty co-operation."

N.Y. Association's Opinion

In further confirmation of the points outlined Mr. Martin read the following letter from the secretary of the New York State Retail Hardware Association of Syracuse, N.Y., dealing with the subject of mutual insurance:

"I am very glad to state that our hardware mutual insurance companies have been an important factor in building up our State association and further in keeping alive the interest of members after the merchants have become affiliated with us.

"The companies have consistently refused to continue insurance for a merchant who withdraws from the association or who defaults in the payment of his dues.

"I believe that in any territory where co-operation between trade organizations and insurance companies can be established in the very cordial manner that exists here, it would pay the associations interested to tie up with the hardware and implement associated mutuals."

In the discussion which followed the presentation of this matter the following question was asked:

What is your policy in connection with the hardware sections of general stores?

Answer.—If they carry 25 per cent. hardware we cover their entire line, said Mr. Martin.

The executive committee will take the matter into consideration.

T. L. Waldon, managing director of the Marshall Wells, Ltd., Winnipeg, accompanied by Seth Marshall, president of the Marshall Wells organization, has left for England.

S. Schwanz, accompanied by Mrs. Schwanz, of Rocanville, Sask., was a visitor in Winnipeg last week, combining business with pleasure.

E. Williams, of Stonewall, Manitoba, spent last week in Winnipeg, and renewed acquaintances with the wholesalers.

A. E. Reynolds, of Calgary, Alberta, representative for Clare Bros., Western, spent last week in Winnipeg with his principals.

NEW OFFICERS OF THE ONTARIO RETAIL HARDWARE ASSOCIATION

The nomination of officers for the ensuing year turned out to be an election by acclamation for these members who will guide the destinies of the association in the year 1921-22. From left to right—R. Hawkins, Smiths Falls, Ont., member of the Executive Committee; George May, Toronto, vice-president; Ed. Wanless, Chatham, retiring president; Nelson Mills, Hamilton, president; W. F. Macpherson, Prescott, secretary; F. B. Smith, Belleville, executive committee; John Caslor, Toronto, treasurer. Mr. Bell, Beeton, Ont., the third member elected to the executive, was absent when the picture was taken.

75% of Nation's Assets Need Paint Protection

Paint and Varnish Needed at Every Stage of a Person's Life—Three Classes of Retailers—Value of Suggestion in Paint Selling

Address by John Irwin, McArthur-Irwin, Ltd., Montreal, Before Ontario Retail Hardware Association Convention

IN speaking to you to-day on the "Save the Surface" Campaign, it will be my endeavor not to present the subject from the angle of statistics to prove that there is need for such a campign. This has already been done, and that idea is fixed in our minds. The field for paint sales is seen to be far beyond what the imagination of a few years ago thought possible.

Given the marketing possibilities we will now consider how the retailer can develop his trade, making those possibilities become actualities, and how the "Save the Surface" campaign co-operates in this development.

The "Save the Surface" child was born in the U. S. in 1916. The paint and varnish manufacturers there realized how necessary was an increased use of the materials they manufacture. It was believed that the market could be doubled or trebled in a few years if the public were taught the ultimate saving to be obtained from the protective value of paint as against the idea of mere decoration. Cultivation of the thought was all that was required, and the movement was started through advertising and publicity along broad, educational lines, impressing on the public the part that paint and varnish could play in conserving the wealth of the nation and individual. Just about this time the States entered the world war, and it was not thought wise to induce all the paint manufacturers to join the campaign until the return of normal times. The propaganda, however, was continued in a small way until the Armistice was signed, when steps were taken to obtain the moral and financial support of all the paint, varnish and allied industries. The object of the campaign was to impress the whole of the country with the importance of paint and varnish in their daily life, so that they should be led to purchase and use it primarily from the standpoint of economy and conservation. The idea of the use of paint as an aid to beautify and improve the appearance of our surroundings was also kept in mind. Sufficient funds were raised in the States to provide for a minimum outlay of $100,000 per year for a period of five years, and the machinery to handle this amount along the above lines was put into operation.

Increase The Fund

The first year's results proved beyond the shadow of a doubt that the idea of the campaign was fundamentally sound. Tangible results began to show themselves. Paint and varnish manufacturers were doing more business than at any time in their history. While it would be foolish to say that all of the increased

JOHN IRWIN

McArthur-Irwin Co., Montreal, who addressed the convention as the representative of the Save the Surface Committee

activity was due to the Save the Surface Campaign, nevertheless, it was conceded by every one interested in the movement that the idea was germinating and that harvest time could be looked forward to. So encouraging were the returns from the first year's investment that in 1920 $250,000 was spent on educational work.

This year enthusiasm is at white heat and $700,000 have been put aside to continue and enlarge the results of the previous campaign.

Early in 1919 a few of the Canadian manufacturers were seized with the idea of the movement in the United States. At first the idea of a similar campaign for Canada was not enthusiastically received. As with all innovations it was received at first with scepticism and considerable difficulty was experienced in obtaining the interest of all the paint, varnish and allied industries. Those who fathered it persisted in their efforts, money sufficient to try it out for the year 1919 was raised. The results were astonishing. The indifferent ones became the most enthusiastic, and papers that had damned the campaign with faint praise were converted and swung into line. In 1920 the paint and varnish manufacturers of Canada eagerly pledged themselves to a three years' campaign, and it speaks well for the satisfaction with the results that in spite of the present bad conditions the appropriation for 1921 has been increased by fifty per cent.

There still remains a good deal of ignorance as to the objects of the Save the Surface Campaign. The Save the Surface movement is co-operative advertising launched by the paint and varnish manufacturers and the allied industries of the North American Continent to educate the public in the use of paint and varnish.

Protective Factor Dominates

In times past paint and varnish were considered luxuries, with a faint idea of protection obtruding itself. To-day first and foremost the function of paint after its beautifying effects is understood to be preservative and protective. In other words, to save all, the surface must be saved.

Seventy-five per cent. of a nation's assets are such as can be protected and saved by the use of paint and varnish. What is true in a national way is true also of the property of the individual.

The floors of our houses are protected by an application of varnish, and we should remember that we prolong the life of the wood indefinitely just so long as we walk on the varnish and not on the wood.

The walls of our houses are protected by a coating of paint, and the elements are incapable of harm as long as the paint prevents the entrance of moisture and the rotting of the wood beneath.

Every one of the population of Canada—between 8,000,000 and 9,000,000—is a continuous prospective buyer of paints and varnishes, either directly or indirectly.

The new born babe is placed in a cradle, then in a carriage, both of which require paint and varnish.

The child's toys, the boy's sporting equipment, the girl's playthings are all finished with paint or varnish.

Everything that youth demands in the home, at school, in social life has to make it finished and perfect the aid of one of the products of the paint, varnish or allied industry.

Marriage creates a new home, newly decorated rooms, new furniture, to bring which into being paint and varnish are all important.

The family flivver is kept looking like a Premier with a can of auto enamel, and some carriage top dressing.

The man of the house finds a thousand uses for the brush and a can of paint.

Every phase of human activity, domestic, social, religious, commercial, political, educational, with recreation and transportation requires some form of abode, and implements that utilize paint and varnish.

A GAME OF CARDS

MANY interesting points were brought out in the questions asked by various hardware merchants and the answers given by the association officers and other members in attendance on Tuesday evening. This took the form of "A Game of Cards," in which a number of matters which have come to the attention of the secretary recently were put forward for open discussion. The questions with their answers are given in full herewith:

Cost of a Hardware Clerk

"What should be the percentage cost of a good hardware clerk in proportion to his sales?"

George May, Toronto, replied that this was a difficult point, owing to the fact that a merchant might have a first-class clerk in his store who spent much time fixing show cases and trimming windows, and whose sales, therefore, vary. John Caslor, Toronto, moved that the secretary play this game "alone."

* * *

Percentage of Overhead

"What is the average percentage of overhead expense in a hardware business?"

A great variety of answers were forthcoming on this point. Some of these were as follows:

18 per cent., 25 per cent., 23 per cent., 20 per cent., 20 per cent. to 21 per cent., and 22 per cent. to 23 per cent. The average was thought to be about 22 per cent. W. A. Rankin, Ottawa, pointed out that it was a question of how this was figured, as 20 per cent. on the selling price would run up as high as 30 per cent. on the cost price. One other merchant pointed out that he had taken stock on the basis of both cost and selling prices. For the last three inventories he had marked his invoices at selling price and totalled the whole, thereby striking an average for the three years.

* * *

Managers' Salaries

"What is a fair salary for the manager of a hardware business doing approximately $60,000 turnover?"

President Wanless pointed out that this would depend upon the location. Another retailer suggested that such a man should earn $2,000 a year. Another opinion was that this would depend upon the amount of profit this manager would make on the stated turnover.

This brought up another question as to what a merchant with a fair sized business would pay a managing clerk in charge of a certain department. The answers ranged from $30 to $35 per week. A representative of a firm which did a $230,000 turnover stated that they employed two men at $35 per week, one at $30 per week, one at $20 per week, and another at $15.

Another retailer pays his head clerk $22 per week and 7½ per cent. of the profits. The first year he paid this clerk 2½ per cent. of the profits, the second year 5 per cent., the third year 7½ per cent., and the fourth year he expects to pay his 10 per cent. This commission is settled at the end of the year and a drawing account provided.

* * *

Sentiment in Business

"Does sentiment play any part in successful business management?"

Mr. Joy, Toronto, stated that he would not want to have a business in which sentiment did not play a part. President Wanless stated that while sentiment sometimes cost dollars, the merchant is fully repaid for employing this factor.

* * *

Maintaining Present Wages

"Is it possible to successfully carry on a business and maintain the present wage standard?"

Mr. Joy, Toronto, replied that this depends upon the scale of wages, but stated that in his business it was not possible to reduce wages and maintain present efficiency. Mr. Wanless did not think the average clerk had been overpaid (applause from the clerks present).

* * *

Reducing Wages

"What is the best method to adopt in reducing the wages of your staff—to lay off and retire; notification of intended reduction and extending the privilege of continued employment at the new scale or a personal talk with the staff?

It was generally agreed that the latter plan was the best one, and that employees would appreciate the circumstances which made such action necessary.

* * *

Dealing With Your Opposition

"What action would you take when your opposition in a retail hardware business secures goods in a roundabout way for which you have exclusive agency?"

President Wanless replied that in his opinion reputable manufacturers would uphold their representative under such circumstances. He cited a recent case where a dealer who sold certain goods at cut prices was informed by the manufacturer that they would have nothing more to do with him if he did this again.

* * *

Filing Catalogs and Price Lists

"What is the best method of handling catalogs and price lists in the retail store in order to make the best use of them?"

W. A. Rankin, Ottawa, replied that he had a rack lettered alphabetically in which these were filed. Another merchant said that he had a rack three feet long and containing six shelves. The first shelf would contain catalogs filed according to the alphabet and numbers under each letter. A card system was used as a key for this plan. Every new catalog would be given a new number under the alphabetical letter in which it would be filed.

R. Hawkins, Smiths Falls, has a separate shelf for catalogs divided according to the nature of lines dealt with. Thus there would be a rack for builders' hardware, hardware specialties, stoves, etc. This plan was followed to help in locating the catalog dealing with a certain line, where the name of the firm was not known. Another index was also kept in which the names of the firms were filed alphabetically. The two systems combined were said to be adequate.

Canadian Hardware and Implement Underwriters' Agency Writing Fire Insurance

The Retail Hardware Mutual Fire Insurance Co. of Minneapolis, the Minnesota Implement Mutual Fire Insurance Co. of Owatona, and the Hardware Dealers' Mutual Fire Insurance Co. of Stevens' Point, Wisconsin, have obtained licenses from the Dominion of Canada. These companies were organized a number of years ago as a protest against excessive insurance rates charged by stock companies. Each company has made the necessary deposit of $50,000 with the receiver-general of Canada for the protection of policy holders and has received license accordingly. These licenses have been registered in Manitoba, Saskatchewan, Alberta and Ontario, and a considerable amount of business is said to have been done already in these provinces.

The companies will operate in Canada under the name of "The Canadian Hardware and Implement Underwriters," with head office at 802 Confederation Life Bldg., Winnipeg.

C. L. Clarke, formerly with the U. S. companies and now Canadian manager, has appointed the following Provincial managers:

C. W. Athey, 124 East 7th avenue, Calgary, Alta.

A. E. Athey, 1720 Broad street, Regina, Sask.

F. A. Martin, P.O. Box 137, Colborne, Ont.

Mutual Fire Insurance for Merchants

Operation of Insurance on Mutual Basis—Pay Dividends of 30 to 35 Per Cent.—Tariff Rates Collected—Advantage of Inspection Feature

Address by Norman S. Jones, Manager Northwest Mutual Fire Ass'n, Before Convention of Ontario Retail Hardware Ass'n

I WISH to express my appreciation of having the opportunity to speak to you on the subject of insurance, and to thank you for having a part in your convention program.

You are an interesting body of men to any insurance man, because, as retail merchants, you represent the largest class of business men in any community; and, without you, no real community could exist. But, you are especially interesting because you represent a class of risk which has, in this Canada of ours, been contributing about 50 per cent. of the premiums paid for fire insurance protection, and, yet, have been producing only about 15 per cent. of the losses.

It is not any wonder that you reached the conclusion many years ago that, as a class, you were paying too much for your insurance and that the subject has, in consequence, been a lively one at your conventions.

Referring to the program, I see that your secretary has indicated the subject of what I am to say to you as, "Mutual insurance as carried by Retail Associations," from which I take it that I am expected to tell you something of the arrangement which the Northwestern Mutual Fire Association has made with the various Provincial Boards of the Retail Merchants' Association of Canada, Inc.

I come now to the definite proposition, which, as manager for Canada, of the Northwestern Mutual Fire Association, I have had the pleasure of concluding with the various Provincial Boards of the Retail Merchants' Association of Canada, Inc., from coast to coast. I am presuming that while you are the members of the Retail Merchants' Hardware Association, the great majority are also members of the Retail Merchants' Association of Canada, and, as such, you will have been aware that the matter of an insurance service has been a very prominent topic for, at least, the last ten years, in the councils of that organization.

Insurance on Mutual Basis

The basis of the Retail Merchants' Association is co-operation, which means mutality of interest, and therefore, the logical insurance for the Association to adopt was one modelled on Mutual lines.

The agreement provides that the Northwestern Mutual Fire Association shall operate a special Retail Department, which is known and registered as "The Retail Merchants' Underwriters Agency." No policy will be issued to other than bona fide members of the Retail Merchants' Association of Canada, but policies will be available to only such members that have risks that measure up to the Northwestern Mutual standard.

In discussing the matter of an insurance service with the officials of the various Provincial Board Executives, and at some of the conventions, it was recognized that no plan for insurance service could be considered that did not measure up to the dignity that the Retail Merchants' Association had itself obtained. The first requisite was one of unquestionable financial responsibility. The second was underwriting or line capacity. Any service, that did not include these two important features would not provide the service required nor be worthy of the Association. Neither of these two features are obtainable with a new or comparatively young organization.

It is necessary that the Retail Merchants' Association insurance service shall have the ability to write large amounts. The Northwestern re-insured the Retail Merchants' Mutual Fire Insurance Company, of Saskatoon, on December 1st last. The main reason for the local company concluding such an arrangement was that they had found that as they could safely write a policy for only $2,000, the service was too small to interest a very large number of the merchants. It was therefore, realized that any insurance service that would be of real value to the Association membership must have an underwriting capacity equal to the largest average protection required by an individual merchant. The Retail Merchants' Underwriters Agency has a capacity of approximately, $100,000, subject to one fire area, of which 85 per cent. will be re-insured in other Mutual Companies, who contribute the same rate of dividend and, at the same time, add their combined assets to the reserve fund of the Northwestern.

NORMAN S. JONES

Manager Northwest Mutual Fire Association

The Northwestern Mutual has made full government deposit at Ottawa, and holds a Dominion license. The company is also registered with every Provincial Insurance Department.

No Mutual Company Has Failed

The company was organized 19 years ago, and is now in its 20th year. It has been very successful, right from the start, and is now the largest mutual organization in the United States. The financial statement of December 31st last showed that the company had a reserve fund of practically a million and three-quarters, more than nine times the amount, having which no Mutual Fire Insurance Company has ever been shown to fail.

In addition to building up such a splendidly strong reserve, the company has returned to its policy-holders in dividends, over 3½ millions, which, in a stock company organization, would have gone to the shareholders. Mutual insurance in Canada has always been identified with the premium note, assessment, or contingent liability of some kind, and most, if not all, Mutual Insurance Organizations in the United States, except the Northwestern, operate on an assessment contract. Some years ago the Northwestern reached the point where its reserve was sufficiently adequate to enable the company to issue its policies on a cash, non-assessable basis. As a result, for the first time, in the history of Canadian insurance, a policy is offered which is on an absolutely cash basis—non-assessable, and, yet, participating in the profits of the organization.

When it is understood that the participating feature has never meant less than a dividend of 25 per cent. on any class and that the average, for the last ten years is over 30 per cent., some idea of the attractiveness of such a contract may be gathered.

Dividend of 35 Per Cent.

When the arrangement with the Retail Merchants' Association of Canada was made, it was intimated that a dividend, on the retail class, of 30 per cent., might be expected and we have been proceeding on that basis. Last week I received a telegram from head office at Seattle, advising that the dividend, on the retail class for this year had been struck at 35 per cent. It is also important for you to know that the dividend rates have never been changed except to be increased.

Some of you may wonder how such a wonderful dividend can be paid. I'll tell you. The total net premium income of the company for 1920 was, approximately, $2,149,000. The losses amounted to only $538,000—practically 25 per cent. as against the experience of the average company of 55 per cent.—there's 30 per cent. of a difference there. As a matter of fact the Northwestern figures show that only 60c of each dollar, collected for premiums, is used in the payment of losses and expenses. Thus, an average margin of 40c has been the record, as against the margin of 5 and 10c of the average company; and, remember, this is not only the record of last year, but it is the record of the company for the past 20 years, and, surely, 20 years is long enough to establish a record that can be relied upon.

The Canadian management is absolutely in the hands of Canadians. All Canadian premiums will remain in Canada. All losses are passed by and paid from the Canadian head office. No loss claims are submitted to Seattle.

I am well aware that some of our competitors are endeavoring to make capital for themselves by "waving the flag" and lamenting that the Retail Merchants' Association of Canada should affiliate with an American institution. It is not to be supposed, for a minute, that that phase of the proposition was not fully considered. It was recognized that a Mutual organization, that would be of any value to the Association membership, could not be created for many years to come. The experience of the local company at Saskatoon was good evidence of that fact. As already explained, everything about the organization in Canada is Canadian, and, therefore, the only feature of the proposition that is

Should Oppose Recent Legislation

James Hardy, Secretary Canadian Wholesale Hardware Association, Suggests Action Regarding Ammunition and Arms Legislation Recently Passed

BRIEFLY addressing the convention on the business outlook, James Hardy, Toronto, secretary Canadian Wholesale Hardware Association, mentioned that last year he had advised the trade to buy all the goods possible and that the trend of events had justified this advice. This year conditions were admittedly different but Mr. Hardy drew attention to the remarks of C. H. S. Bamford, sales manager J. H. Ashdown Hardware Company, Winnipeg, as outlined on page 58 of the February 12 issue of Hardware and Metal. Mr. Hardy advised the trade to give careful attention to the details outlined therein. Mr. Hardy then made brief reference to the legislation in regard to the sale of arms and ammunition.

Oppose Legislation

"Recent legislation in regard to the sale of arms and ammunition has been very drastic," said Mr. Hardy, "the amendment to the law provides that the wholesaler may sell these lines unreservedly to the retailer but the latter in selling is hedged around with all sorts of conditions. He cannot sell a gun to a man unless he has got a permit. If the customer wants to shoot deer, he must obtain two permits, one for the gun and one for the deer. These permits are only good for twelve months. I have always had in mind the saying of a famous attorney in New York who said the best way to show how bad a bad law was, was to strictly enforce it. It is very well for people who live in cities but when you come to sell your farmer customer and he has to get a permit I think it is a case that you should take up and make all the representation possible. This is a very serious thing and if you are going to do any business in that line at all you will have to take action."

JAMES HARDY

Secretary Canadian Wholesale Hardware Association, who in speaking of the business outlook at the O.R.H.A. convention in Hamilton this week, drew special attention to the points mentioned in an article on page 58 of February 12 issue of Hardware and Metal.

Tariff Revision

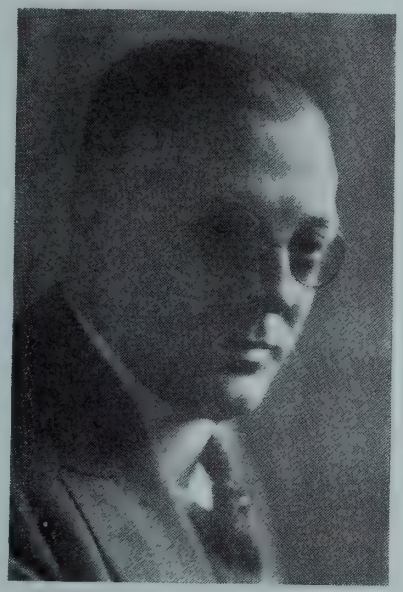
Ottawa.—In the address from the throne read by the Governor-General upon the opening of the new session of Parliament, reference was made to the question of revising the tariff, as follows:—

"My advisers are convinced of the necessity for revision of the customs tariff. In order to secure the most complete information a committee has conducted an extensive and thorough inquiry and has secured the views of all parties and interests in every province. The hearings necessary have been completed and the conclusions founded thereon will be submitted in due course. It is the opinion of my advisers that in such revision regard must be had to the necessities of revenue and as well that the principle of protection to Canadian labor and legitimate Canadian industries, including agriculture, which has prevailed for more than forty years in this country must be consistently maintained; but that the customs duties imposed to that end should be no higher than is essential to ensure good standards of living among our working population and to retain and make possible the normal expansion of the industries in which they find employment."

AN OPEN SESSION AT THE O.R.H.A. CONVENTION

Photo showing those in attendance at one of the open sessions of the convention of the Ontario Retail Hardware Association in Hamilton this week. Manufacturers and wholesale firms are well represented in the gathering, along with the retailers who attended the convention.

Outlines Winchester Store Plan



Not a Cut Price Proposition Says F. A. Maycumber, Sales Manager of the Company—Have No Fight With Jobbers—Have Helped Hardware Merchants to Meet Competition—No Immediate Plans for Canada

Address delivered by F. A. Maycumber, Sales Manager Winchester Repeating Arms Co., New Haven, Conn., before Convention of Ontario Retail Hardware Association

WHEN your secretary wrote me and asked me to come here in reference to the Winchester proposition, I was somewhat fearful of coming to a strange country and talking to you about it, but he wrote a second letter and outlined a little program, and his proposition was interesting to me.

Speaking of the Winchester plan, we are not as bad as they are painting us in the U.S. We are not the big octopus trying to gather up everything and taking it away from the hardware men. Before the war Winchester employed 6,000 to 7,000 men. During the war our plant extended, and at the time the Armistice was declared we had 22,000 people. About a year after we had 15,000 employees. You can realize what we were up against, for all we had left from the war was a plant. We did not make any great amount of money in the war. When the war ended we had a big plant and had to fill it. The thing we had to consider was what kind of goods we should manufacture.

We had always been in the firearms business, and the question was, was it right to branch out and manufacture other lines in keeping with our regular products. We finally decided to make a start and surveyed the field. We decided one of the things we would like to make was cutlery, so we bought the Eagle Knife Co., and others. We do not pretend to know all about the knife business, but we are learning. We have a capacity of 2,500 doz. knives a day. We took over another high-grade line of pocket knives, and, furthermore, we are manufacturing reels, skates, axes, etc. After we got manufacturing all these lines we wanted to know how we could distribute them. Our business in the past had been through jobbers. Should we continue on the same lines or adopt a method of distribution through the retail trade direct? We found out there were about 70,000 retail hardware dealers in the U.S. We decided this plan could not be followed. We then hit upon the exclusive agency plan, and finally decided to put it into effect in each town in the U.S. under 50,000 where there was a hardware store giving exclusive rights to sell our new goods. We also decided that the jobbers were entitled to consideration in reference to our new line of products. Some of the jobbers became unfriendly and went after us pretty strong. They said our method was wrong, and we were doing something that would spoil business in the United States. We started out with a constructive policy, we did not care to tear down what had been built up. We felt that through our exclusive agency plan we would come into closer touch with the retailers who were our

F. A. MAYCUMBER

Sales Manager Winchester Repeating Arms Co., New Haven, Conn., who addressed the convention on "The Chain Store Proposition."

distributors. We sold to them at slightly higher prices than we sold to jobbers.

No Fight With Jobbers

We have no fight with the jobbers, and we do not want to have. The jobber is just as necessary for distribution as the railroads, but I think in our own proposition we had something else to consider. We want to build up the hardware business if we can, so as to take a certain proportion of business which is now going to the department stores. I think the hardware dealers as a class in the U.S. have been asleep. When I go to the Wanamaker department store in New York I visit the hardware department, which is one of the finest to be found. This store is taking business from the hardware stores. When we adopted our policy we said we would establish our own operated stores in towns over 50,000. This was simply a policy, as we have established a number of agencies in towns under 50,000. This was because we could not find, as a rule, hardware dealers who could give us the representation we wanted to establish.

Competing With Department Stores

In one town I have in mind there were three big department stores with which our store had to compete. The hardware man in that town came to us and said he could not stand the competition. We took him with us and fought the competition together. Since last July we have fought, and to-day the hardware store and ourselves control the aluminum ware business in that town.

Not Cut-price Proposition

When a man speaks of chain stores I think of cut-price competition, but that is not our policy. We conform with the prices established in each district and we are succeeding along that line.

Agencies

We have established over 3,600 exclusive agencies in the U.S. Every dealer is a stockholder. We did not have any stock to sell. Every dollar's worth of stock was purchased on the open market for them. We financed it until it reached the dealer. We asked the dealers to come in on this because they would have a financial interest and would help to make it successful. We have quite a bunch, and in the next two years we expect to have over 6,000 agents. These dealers are helping us.

Speaking of the legislation re firearms as mentioned in your convention, I am reminded of a similar condition in the State of Oklahoma, where we formed a Winchester club, similar to that formed in each district, composed of local dealers. They carry on their own affairs and make suggestions re policy. The question of legislation was reported to us, and we took it up with the executive committee, and I have had a telegram since coming here stating that the bill has been defeated. This was not due to the Winchester club alone, but with the help of the dealers. The officers of Winchester clubs in various districts are prominent members of the retail associations in each State.

Continued on next page

Sales Service

One of the things we feature is our sales service, which we tie up with our exclusive agencies. This service is along the lines of better merchandising methods. You know the old type of unprogressive hardware store, most of which in the U.S. are painted green. One of the first things we thought of was to change the color of the store fronts of our stores. We voted to paint Winchester store fronts a Winchester grey, a color which would stand the sun and water better than any other. To-day we have over 600 of the retailers throughout the U.S. who have their stores painted this color. This is a co-operative idea.

Warehouses

We have established in the United States three warehouses, and on March 1st two more will be opened. Each is in charge of a district manager who handles the salesmen. Each proposition is entirely separate. The dealers are closely tied up to these warehouses. We will not sell general stores or jobbers from these warehouses, and we do not quote general dealers on any of our new products. We quote general dealers on guns and ammunition, but at jobbers' prices and accept orders for shipment through jobbers but our exclusive agents can buy guns or ammunition or our other lines direct. We like agency dealers to maintain our prices as we do not want them to get into a price war. We do not believe that the agency dealer has any more desire to cut prices than any other dealers and we believe this policy can best be maintained through our plan.

Prestige of Hardware Ass'n Not Affected

The prestige of the retail hardware associations has not been taken away. We have not hurt them in any way. We have rather co-operated with them.

We have no fight with the jobbers. We are going to sell the jobbers guns and ammunition as long as they will buy. They are entitled to every consideration and we feel we are giving consideration to them in every way we can. There are some jobbers who quit us, but for every one who quit Winchester has been able to get most of that business through other sources.

Prestige of Name Winchester

The name Winchester has come to have much prestige which we must guard. Theodore Roosevelt when preparing for his South African hunting expedition asked Winchester to outfit him, but stipulated that this fact was not to be used for advertising purposes. Yet in looking over his book written on the basis of his experiences I note he makes frequent reference to Winchester in such phrases as "I took my trusty Winchester."

During the war our plants were guarded closely. Our competitor at Bridgeport, Conn., also had the same protection and a local newspaper printed an article showing the chief of police and the guards and mentioned that they were armed with Winchesters.

Thus we want to guard that name carefully and that is why we have gone into the exclusive agency. That is why we want agents to guard that name closely. We have selected retailers who will further the Winchester plan. Our plans have not changed. We are going ahead just as we started and we have not seen any cause to change them.

Women's Trade

The hardware stores as a rule have never gone after the women's trade. Statistics show that 80 per cent. of all retail purchases are influenced by women. The result is the retailer is catering to 20 per cent. of the trade only. Why is it the department stores secure that business? It is because they influence women purchasers. Our idea is to encourage the hardware man to put in side lines to appeal to women and get them into their stores. The women will see a shirt sale and will tell her husband. They may not purchase direct, but they purchase indirectly and we suggest that every hardware man go after the women's trade.

Have Big Responsibility

I have been much impressed with the talks I have heard here. I will say you have a bigger responsibility than you have had before. The manufacturer cannot produce unless you sell. The jobber cannot buy unless you buy and sell. The result is that the whole load has got to be carried by the retailer. He has to establish confidence in the consumers' mind in regard to prices prevailing. I do not believe you should cut prices but that you should take fair profits. But you have to go after business, and there is plenty of normal business to be had.

Blame Manufacturer

The manufacturer is as much to blame in reference to present conditions as the retailer or consumer. This is not a "consumer's strike," it is a lack of confidence. Everyone has lost confidence, the result is that plants in the United States today are running only on half time, but there is a certain amount of normal business that the manufacturer is not getting. The responsibility is on the retailers. If business does not start before long, and when it does start there is going to be a scarcity of goods and the prices will be upward. Now is the time to buy goods in normal quantities to meet normal requirements. Keep your stock well assorted. The only way we can get back to normal is for the retail merchant to help and if you do not everyone is going to suffer six months from now.

The Winchester business is not broke yet and our president has not resigned as has been reported. We are happy and are trying to put forth our own ideas without destroying anything.

Plans for Canada

At the present time we have no plans made for Canada, but it may be that at some time in the future we may enter Canada if we think there is a market for our plan here. We are still going to distribute our goods in Canada through jobbers. Our new products will not be sold in Canada at the present time. Distribution will be only through the exclusive agency plan and then we will manufacture in Canada so as to have "made-in-Canada" goods. I agree with you in your ideas on this subject and I believe the more manufactures you get here the better Canada will be because you have the resources here. You must extend your your manufacturing to get the most out of these resources.

Firms Represented at the Hardware Convention

AMONG the firms who occupied booths or were otherwise represented at the convention were the following:

The Hoover Suction Sweeper Co. of Can., Ltd.....Hamilton, Ont.
Bird & Son, Limited .....Hamilton, Ont
The Consumers' Cordage Co. .....Toronto
Wentworth Manufacturing Company .....Hamilton
Dougall Varnish Co. .....Montreal
Stewart, Wood & Co., Ltd. .....Toronto
The Martin-Senour Co., Limited .....Montreal, P.Q.
The Coleman Fare Box Company, Limited .....Toronto
The Steel Company of Canada, Limited .....Hamilton
The Sherwin-Williams Co. of Canada, Ltd.....Montreal, P.Q.
Shurley-Dietrich Company, Limited .....Galt
Lowe Brothers, Limited .....Toronto
Canada Foundries & Forgings, Ltd. .....Brockville
Slade Manufacturing Company .....Owen Sound
Burlington Steel Products, Limited .....Hamilton
Sanderson Pearcy & Co., Limited .....West Toronto
Ohio Varnish Company, Limited .....Hamilton
Aluminum Specialty Co. of Canada .....Toronto
Clay Products Agency, Limited .....Toronto
Brandram-Henderson Limited .....Montreal, P.Q.
Hardware and Metal .....Toronto
Richards-Wilcox Canadian Co., Ltd. .....London
The Hall Zryd Foundry Co., Ltd. .....Hespeler, Ont.
Kasement Skrene Dore Co. .....Toronto
Standard Paint & Varnish Co., Ltd. .....Windsor
The DeLaval Company, Limited .....Peterborough
Norman Macdonald, 62 Temperance St. .....Toronto
Oneida Community Ltd. .....Niagara Falls, Ont.
Durham Duplex Razor Company .....Toronto
Canadian National Carbon Co., Ltd. .....Toronto
Martin-Senour Co., Ltd. .....Montreal, P.Q.
Canadian Steel & Wire Co. .....Hamilton
Hamilton Mirror Plate Co. .....Hamilton
Hamilton Aluminumware Co. .....Hamilton

The Boeckh Company, Ltd. .....Toronto
The Hamilton Stove & Heater Co., Ltd. .....Hamilton
Daniel G. Moody .....Toronto
E. C. Atkins & Company, Inc. .....Hamilton
AutoStrop Safety Razor Co., Ltd. .....Toronto

In attendance—Benjamin Moore & Co. .....Toronto
Brown & Bonnick, Ltd. .....Toronto
Taylor Brosco Co. .....Hamilton

Building a Co-operative Business

"Closer Relations Between Producer and Consumer are Desired" —Syndicate of Fourteen Members Started Co-operative Business On $700, Now Return Dividend of 8 Per Cent. and Commissions To Shareholders

Address by Wm. Hargreaves, Manager Drug Trading Co., Toronto, before Convention of the Ontario Retail Hardware Ass'n.

I CONSENTED to come here for two reasons. One is that I feel that if we have got a successful organization our experience will be of service to you and it would be selfish for us not to give you the benefit of that experience. The other reason is that I consider ours is a plan that is very much in the interests of the general community because it brings closer together the producer and consumer. Much has been said about this subject in recent years. You hear complaints about the difference between prices paid producers and asked of consumers. I also consented to come under the brief that you are considering establishing a similar co-operative organization.

The wholesale drug houses of Canada did not entertain any kindly feeling toward our company, but our organization has benefited seven hundred retail druggists and any number more are eligible, and they are not going to feel bad because we tread on the corns of a few wholesalers. I do not want to bring down upon our shoulders the wrath of other wholesalers, but I think our experience might be of some benefit to you.

The Start

I am not so sure either that it can be of any particular benefit because of a possible great difference in conditions. We started in a very small way and I think that we had very good reason for starting. We commenced as a sort of syndicate. Fourteen druggists got together in consequence of a department store putting in a drug department selling proprietary articles, which gave them a particularly good opportunity because proprietary articles are advertised at established prices. Now, as retailers we had to pay $1.75 per dozen for articles to sell at 25 cents each. These were sold by the department stores for 15 cents or sometimes two for 25 cents. We had to do something. We tried numbers of schemes working jointly with manufacturers and wholesalers, but they did not work, so we organized the syndicate, putting up $50 each, starting in the back shop of Hargreaves Bros., who were appointed agents. You will be surprised at what we accomplished with that $700, and we continued under that plan for several years, until we were forced to make a change and get away from retail connections to organize the Drug Trading Co. I think we now have the largest business with retailers in Canada. We have not a traveller on the road. Now we have about 700 shareholders, the large percentage of these being in Ontario, though we have them out in Alberta and Saskatchewan and in the Maritimes.

Pay Commission and Dividends

Through the syndicate we distributed the goods at very small advance on cost —about 1 per cent. and another 3 per cent. added to the invoices to cover expenses of Hargreaves Bros. for carrying on the work. But when we went into the Drug Trading Co. we adopted prices as used by the other wholesale drug houses particularly on proprietary articles plus a margin of 15 per cent., but at the end of the term we paid not only a dividend of 8 per cent. but a commission on purchases based so that a man who bought $2,000 worth would get twice as much as a man who bought $1,000 worth. That commission varies also in favor of those holding the higher number of shares. The shares are $50 each and no one is allowed more than 15 shares. Each share, excepting the first, is only half paid, the first being paid in full. Our idea is that the business must be carried on on a plan which will make losses practically impossible. No individual therefore has more than $400 invested.

WM. HARGREAVES

Manager Drug Trading Co., Toronto, who spoke on the subject of "Co-operative Buying."

A great many get back in the shape of commissions, as much as $2,000 on their $400 in a year. We have paid in dividends a commission each year since we started in business. In our earlier years this amounted to about 85 per cent. and in our later years it has grown to 120 per cent. of our total paid up capital and today I would say that we could sell out our business and we could pay back about 200 per cent. of the paid up capital, so that we are in pretty healthy condition.

However, there is a difference in the situation between yourselves and ourselves. We started in a very small way, so small that no wholesale drug house realized what was going on or they certainly would have snuffed us out of existence. They did try to do so but the efforts were confined pretty well to the Toronto jobbers. If you start out in that small way I am sure you will meet with that opposition and a good deal stronger opposition than we met. On the other hand if you start in a larger way to fight that opposition, which I think would be necessary, you will want to have the confidence of the retail hardware stores generally. Are you in position to get that confidence? Starting in a small way as we did, we got that confidence from the retail druggists. We carried on under that syndicate long enough to show them we could successfully conduct the business on this co-operative plan, but when we made the change we had no little trouble to induce them that under the changed plan they were sure to get the benefits which accrued under the syndicate, but we managed to hold all but about ten or twelve out of about two hundred shareholders, so that we started our Drug Trading Co. with about two hundred shareholders and they came in with some doubts and fears, but these gradually disappeared after about three or four years and everyone then had confidence.

Our prices are regulated by the margin of profit we get on the proprietary articles, that is 15 per cent. We try to carry that out on all lines and that is our basis. On lots of other lines the wholesale drug houses want as high as 50 per cent., and they frequently get 20 per cent. to 25 per cent., so that outside of the proprietary articles, every shareholder saves by buying from the company outside of the commission he gets at the end of the term. Even if they did not get the commission they were saved money.

Social Spirit Held Sway at Banquet

Generosity of the Hosts Exemplified in Dinner And Entertainment Provided by Wood, Alexander & James

AN event of much value in cementing the ties of good fellowship between the various branches of the trade was the complimentary banquet tendered the Ontario Retail Hardware Association by the firm of Wood, Alexander & James, Hamilton, on Wednesday evening. The utmost generosity was exemplified in the array of good things for dinner and the features of entertainment. The social spirit was early awakened by the choruses, aided by an orchestra, and under the guidance of an enthusiastic conductor.

Toasts to the King, to Canada, and to the Ontario Retail Hardware Association were proposed by S. H. Alexander, the latter toast being responded to by the retiring president, Ed. Wanless, and Secretary W. F. Macpherson.

President Wanless Replies

To the tune "For He's a Jolly Good Fellow" Mr. Wanless spoke of feeling quite at home at the head table in company with Messrs. Wood and Alexander representing the firm acting as host; James Hardy, C. Birge, Steel Co. of Canada, and others representing Hamilton industries. He expressed regret at leaving the "inner circle" of the association and spoke in high esteem of the officers with whom he had worked in his official capacity.

"I have never been connected with a better group of live business men and I commend them to your support for the year," said Mr. Wanless, concluding with an expression of appreciation of the social evening provided. A lusty clap from those present confirmed this expression.

New Plan Will Be Helpful

Secretary W. F. Macpherson made reference to the steady growth of the association and expressed the opinion that under the new plans being formulated the organization would this year come into its own. He had been much gratified to hear from those who had visited similar conventions and exhibitions in other countries that nothing better than this year's program of the O.R.H.A. had been found. He thought one of the big steps forward this year would be the joint meetings of committees of the wholesalers and retailers as outlined by James Hardy, sec. Canadian Wholesale Hardware Association.

On behalf of his colleagues in the firm of Wood, Alexander & James, who acted as hosts, S. H. Alexander replied briefly to the effect that it was a pleasure to provide this entertainment and that the hosts had taken as much enjoyment in it as did the guests.

ONLY PERMANENT AND SANE REDUCTIONS

Continued from page 69

me to draw the attention of my hearers to some of these facts in order that they will realize that their interests in manufactured products are equal to yours or mine. I have a great deal of faith in the Dominion of Canada because I believe that we are better equipped to face any depression which might come to us than any other country in the world, and a good many are going to be disappointed who have expected that depression would overtake this country.

"I Told You So"

"You know the old story of 'I Told You So' when men stand on the street corners whispering of the awfulness of what may come. They who see only rain and storm and forget that the sun does come out and the clouds disperse and that we do have glorious weather, which in its turn must give way to a bit of rain and sleet so that we may have those 'bigger than ever' crops each year. 'Heavens.' Has there ever been a panic that half-way equalled what was prophesied? Has any ten-year period in Canada's history equalled the past decade in our industrial and national growth? Doesn't each decade show giant strides beyond the last? Are we going to lie down and develop a frenzy because we outgrew our clothes and found them a bit too tight in spots? The new ones will shortly arrive from tailor adjustment and let's hope we have ordered them slightly large to allow for further growth, and we all know trade will soon get busy and busier, then busiest again. Then what is all the fuss about? Just keep on trading.

Canada's Position Sound

"The man the world looks up to for his success is usually not a mental marvel. He is just the average type of logical, hard-headed, business man with the added quality of wider vision. His vision shows him the wisdom of knowing every detail of his commercial affairs and you know that the opinion which I hold of you is that you are the type which I refer to and that Canada will not go back but that manufactured products will still continue to come forth from the machines and supply what is necessary to build up this country. We are under an obligation to fulfil our part and we cannot supply what is needed if we hesitate about having the goods which are in demand. I have refrained from giving figures or statistics about the wonderful wealth of our country. I believe it would be sufficient for me to mention that the value of the field crops of Canada for 1920 was $1,636,664,000 as against the figures for 1919 which were $1,452,435,000. This surely is enough to convince the most skeptical that Canada is going to go ahead, that plenty of hardware is going to be consumed, that there is going to be all the business that we can look after if we will only stop talking, live economically and go to work, and when the readjustment has reached the retail store and a new basis of values has been generally accepted, the genuine prosperity will arise in which you will have a large share. We shall merit and shall secure that prosperity in proportion to our good sense in realizing now that our duty is to go ahead, sell all we can and buy what we require."

S. H. ALEXANDER CONVENTION ADDRESS

Continued from page 71

a considerable amount of unemployment, but this does not reach to any degree the rural community and at the worst it should not last long in the industrial centre.

Our crops last year were ample to keep us in food and while the farmer did not get war prices, he certainly got more than he was accustomed to getting in pre-war days, and I see no reason whatever why the average hardware merchant in the towns and villages at least should not enjoy a full normal business in the year 1921.

The world is still short of iron and steel products and we believe that as soon as confidence is again restored, there will not be enough goods to go around. We know of no manufacturer with a stock of goods in his premises that would in any way compare with his normal stock in pre-war days. Some lines could be enumerated now that could not be secured under several months. Architects' offices are full of work ready to be let as soon as intending builders are assured that they will get value for their money, so that as soon as the period of fear is past there is every reason to believe that business will flow freely in its accustomed channel.

These remarks could be continued at length but I understand I was only expected to make some general observations and if I have been able to convey anything of interest to you gentlemen I shall feel myself amply repaid.

I trust that your meeting together will be of benefit to each and every one and that you will go back to your business feeling proud that you are connected with such a virile and necessary branch of the business community.

Linseed Oil Has Led Declines

Decline in Past Year of $1.60 Per Gallon— Should Give Attention to Quality

Address by M. Lortie, Toronto Manager Dominion Linseed Oil Company

ON behalf of my principals I desire to thank you for the privilege of addressing your convention a few minutes on the linseed oil situation.

From my observations, through the public press and street conversations, I believe that the great outstanding feature from a buyer's standpoint has been to await the time when price or prices are readjusted. Grant that I may to some extent at least be right in this content. I therefore desire to make it quite clear to all you, gentlemen, in fact to all buyers of linseed oil that of all commodities linseed oil probably has in the matter of decline led all others, so that to-day you are buying linseed oil at a right price. When I say a right price I do not mean to say that we have seen the low point and that oil will not sell lower, but when you consider that the decline for the last year amounts to $1.60 per gallon, and further, when you consider that the oil which will be shipped to you on your spring orders has been made or manufactured during the last three months, and that the price of the raw material of to-day, not when it went into the mill, which, in many cases, was from fifty cents to two dollars per bushel higher, governs the selling costs or price, I hope, gentlemen, you will be reasonable and grant the manufacturers of Canada, through your jobbers, the privilege at this time of filling your requirements.

Mr. Chairman, from my viewpoint, I have from our president a very important message to deliver, that is regardless of price, the policy on which the founder, the late James Livingston, of Baden, whom you all knew, built up the Livingston brand of linseed oil, shall be maintained. "Quality" goods will be our aim, nothing but a pure matured oil shall be marketed, always reliable and fully guaranteed. Therefore, when you have the name "Livingston" on the barrel you are fully protected.

Time, unfortunately, will not permit to fully go into the respective merits of oil, but since the ultimate purpose of oil is for preservative as well as decorative use, I think all buyers, and particularly the retail hardware merchants, should give more attention to the quality of goods they buy; in other words, price alone does not of necessity bring quality oil. As an illustration, we all know that flour is made from wheat, there are different qualities of flour, the result, of course, from milling different grades of wheat or through the admixture of wheat grown in different countries or perhaps more properly speaking grown in different climates; what is true of wheat and flour is just as true of flaxseed and oil, for the same reason that Manitoba hard wheat is of a high grade, Canadian Northwestern flaxseed is likewise of a high grade. Therefore the Canadian buyer of linseed oil, in my estimation, should be very canny in buying any other oil than that manufactured at home and from home-grown flaxseed; last, but not least, made by Canadian labor. Every dollar in the Livingston plants at Baden, Montreal and St. Boniface is a Canadian dollar.

As intimated the climate of a country has a decided effect on the grain grown, therefore does it not follow in this case that the products from home-grown commodities are better suited to withstand the severe climatic changes of our country? I am pleased to say that my principals are crushing Canadian seed at all of our mills.

As important as the raw material is, just so are the various stages in the process of manufacturing. This subject being so vital does not lend itself to short discussion, but I desire to draw your attention to at least one phase of it, that is the boiling of oil. In this department alone our Baden boiled oil is, and has been, characterized as a distinct product from all other boiled oils. It is a genuine fire boiled or, commonly termed, kettle boiled oil. In this process the moisture in the oil is driven off to a greater extent and therefore coagulates the myriads of oil cells thoroughly and positively, which gives it absolute elasticity so vital from a preservative standpoint, and as such requires a longer period in which to properly precipitate or settle and at the same time the relative cost between a steam boiled and a fire boiled oil is fully two cents per gallon. Yet what do we have? No discrimination in buying, that is to say, the buyers are paying just as much for one product as the other.

What applies to the foregoing remarks largely applies to the linseed oil trade generally, and it is for this reason that I am appealing to the trade at this time to make a study of all commodities for quality. Any varnish maker will tell you that the better varnishes are those made from high-grade goods, but in addition to that he also knows the necessity and does emphasize the fact that varnish must be aged to mature. What is essential to finish the varnish is just as essential to finish the oil. Assuming that linseed oil is properly manufactured and produced from high-grade raw material, purchased at its lowest point, it of necessity follows that the longer the oil is stored under proper conditions the better becomes its quality and beyond any doubt the value should increase to at least the proportionate carrying cost, even though flaxseed does not change in price. It is this feature that is entirely ignored by the trade and you may depend upon it that just so long as the buyer will not discriminate, just so long will it be possible, if you will pardon the expression, for the lusty trader to use any oil. Unfortunately since no standard is established, the average buyer is handling an inferior article on which his percentage of profit is no greater than where the better grade oil is handled. Not only this, gentlemen, it should be part of your duty in acting as buyers for the general public, for is it not the public you depend upon for your profits, to know the details of any commodity and base the value accordingly?

In conclusion, I desire to submit to this convention the fact that Livingston brand linseed oils are not produced on price basis, but prires are consistent with value of raw material plus quality, and I leave it with you to "get what you want," only remembering that the blue barrel with the name Livingston is the outward mark of inward quality.

Winnipeg Building for 1921 Estimated at $14,000,000 Events in the Trade

Winnipeg.—Revised city hall estimates of the probable building operations in Winnipeg this year place the outlays at approximately $14,000,000, the largest since before the war and one of the largest in the city's history.

Here is the list:

General building	$11,000,000
Granolithic walks	372,000
School board	1,000,000
Sewers	60,000
Pavements	70,000
Pavement repairs	50,000
Maryland bridge	250,000
Housing commission	570,000
Aqueduct underdrainage	120,000
Miscellaneous	508,000
Total	$14,000,000

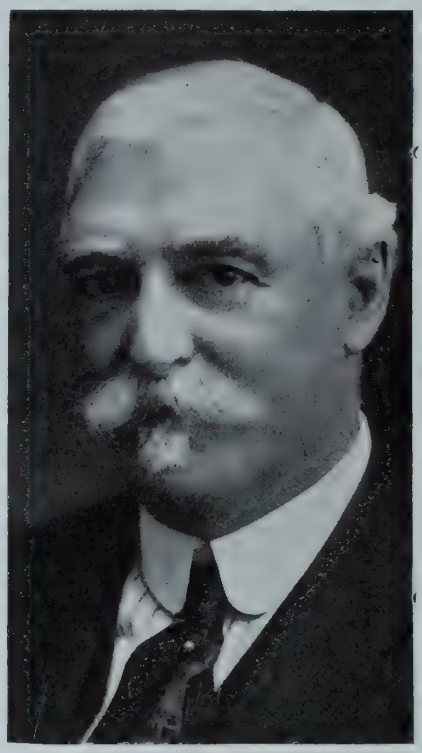
The city's local improvement program, it was explained, will be governed by the funds available but orders already have been issued to advertise the city's intention to construct many of the works listed.

Building permits alone last year aggregated $8,370,150, covering 2,501 premises. The building department issued, since January 1, permits for 46 buildings to cost $196,000 as compared with permits for 49 buildings costing $111,550 between January 1 and February 12, 1920.

With housing accommodation taxed to the limit, companies clamoring for space in office blocks and business concerns increasing the size of their premises, builders in touch with conditions anticipate that even more than $14,000,000 of construction work may be completed.

The city also contemplates erecting an addition to the King George Hospital in Fort Rouge, if the necessary arrangements can be made.

Robert Hobson Heard at Banquet



Enjoyable Social Event Provided by Manufacturers of Hamilton—President of Steel Co. Deals With Conditions

THE hardware manufacturers of Hamilton extended a very enjoyable banquet to the retailers, travellers and visitors to the convention of the Ontario Retail Hardware Association at the Royal Connaught Hotel on Thursday noon. A number of entertainers from local theatres were on hand and the guests enjoyed the music and entertainment.

H. B. Hubbard, E. C. Atkins Co., presided and welcomed the guests in behalf of the Hamilton manufacturers.

Robert Hobson, president the Steel Co. of Canada, who has just celebrated his 25th year with the company, stated that he had some good news for the assembly and then proceeded to give the assurance that we were 90 days nearer good times than we were three months ago. Mr. Hobson stated that he was an optimist and that the views expressed by George Spence at the meeting on the previous day, as outlined elsewhere in this issue, represented the views of his company. Referring to the steel situation Mr. Hobson predicted good times in the near future and the scarcity of many hardware lines. He stated that to-day there is not ten days' supply of pig iron in the United States, practically every merchant furnace is out and producers of coke in the Connelsville district are working at only 12 per cent. capacity.

Mr. Hobson further stated that to-day we are up against excessive freight rates and high wages in the building trades, which are a detriment to business and which must of necessity be adjusted. He also referred to the steady growth of Western Canada as a factor in the forming of a good future for this country.

ROBERT HOBSON
President The Steel Co., of Canada, Hamilton, who spoke at the Manufacturers' Luncheon

Other speakers at the luncheon included Nelson Mills, the new president of the O.R.H.A.; W. A. Wood, of Wood, Alexander and James, Hamilton; Colonel A. Hatch, Canada Steel Goods Co.; Ed. Wanless, retiring president O.R.H.A.; W. F. Macpherson, sec. O.R.H.A., and James Hardy, sec. Canadian Wholesale Hardware Association.

MUTUAL FIRE INSURANCE

Continued from page 77

American is the guarantee and reserve fund of nearly $2,000,000, which forms the security behind the policy issued. Every one, who has seriously considered the matter, is quite satisfied to have the American policy-holders put up good American money as the security, instead of having to use Canadian funds for that purpose, which would, undoubtedly, have to be the case, if a Canadian company had to be organized and developed from the beginning. Not only will the Canadian policy-holders receive the benefit of the reserve fund, which the American policy-holders have accumulated, but also the large volume of business which the company now enjoys, and which, this year, will amount to, approximately, $3,000,000 of premium income. This means that the dividend paid to Canadian policy-holders is not dependent upon the Canadian experience, but has the benefit of the established business of the company, because the agreement provides that whatever dividend the company pays to the policy-holders in the United States, the same rate of dividend will be paid, on the same class, in Canada.

Collect Tariff Rates

I want to make it clear to you that the company is not a non-tariff organization, in the accepted use of that term. The only recognized Rating Bureau in Canada is the Canadian Fire Underwriters' Association and we are not cutting below the rates published by that Rating Bureau. We collect tariff rate, pay our losses and expenses, carry 5 to 10 per cent. reserve, in order to equalize the lean years with the fat and thus stabilize the dividend rate, then hand the balance back, by way of dividend, to the policy-holders.

Therefore, if the risks are selected, the loss ratio is reduced. If the premiums are collected in a direct manner, the amount required is the minimum, and the surplus is returned by way of dividend. There is nothing "Ponzi-like" about the proposition.

No one knows better than the retail merchants that the Government would have had just as much money to do with from the luxury tax, if they had collected half the amount and collected it more directly.

You readily realize that, as the Northwestern uses only 60c of each dollar which they collect as tariff rates, and the stock companies use 95c, our competitors have not much chance of competing with us, at least in any permanent way. Their methods will not provide much reduction in loss ratio, and their organization will not allow of any reduction in the expense ratio, but I predict that as the whole trend of fire insurance on the American Continent is toward the mutual idea, the time is not far distant when the stock companies will have to introduce, at least, a measure of mutuality into their operations if they are to maintain their present status. The large life insurance companies had to mutualize some years ago, through the pressure of public opinion and the stock fire insurance companies will, undoubtedly, sooner or later, reach the same position.

It is with a tinge of vanity that I have the opportunity to offer the Northwestern Mutual Fire Association's indemnity to the Canadian property owners. I studied the proposition from every angle, for over nine months, before accepting the responsibility and I say to you that it is absolutely watertight. The stock company competitors in the United States have, for years been trying in every way possible, to discredit the Northwestern, but so far the only result is that they are still trying, while the Northwestern has gone ahead, every year, by leaps and bounds.

The slogan for this year was announced last month at the annual meeting by President Martin. It is "$1,000,000 in dividends, in 1921."

The manner in which the retail trade, as well as many of the large wholesale houses and manufacturers in Canada, are taking advantage of the opportunity which the Northwestern Mutual contract affords is wonderfully satisfactory to the company. Frankly, I am not surprised at the reception the proposition has had. I expected it. A contract, which provides an opportunity to reduce fire insurance cost by one-third, with such a record and security behind it, is not difficult to sell. It really only requires the "spreading of the good news."

Other Advantages

One minute more and I'm through. I have been talking about the reduction in the cost of manufacture, but that is not all, by any means, that is involved in the insurance service which we are providing for the Retail Merchants' Association. That service includes the reviewing of a member's insurance policies, whether he places any insurance with us or not, an inspection of his premises from the fire prevention standpoint, and also for the purpose of endeavoring to secure a reduction in basis rate.

I want to lay stress on the inspection feature. Our proposition is, first and foremost, fire prevention. As mutual fire insurance means insurance at cost, and, as the cost is controlled by the amount of loss sustained, it follows that fire prevention is the first operating principle of such an organization, and means that special importance is given to the work of inspection. The scientific basis of fire insurance is the apprehension of the habits of fire. We now know that every fire that occurs, where it is not desired, is the direct result of either man's ignorance or neglect. The twenty years' research of the National Fire Protection Association into fire causes, and its carefully digested records of more than 15,000 fires, in properties of every variety, have produced information, from which reliable conclusions can be drawn regarding the hazards existing in any individual risk.

We say to you: "pay us the tariff rate; we will guarantee your insurance will not cost you more." You have the record of the company, which assures you of a substantial dividend.

Early Display of Garden Seeds

Ralph Smiley, of the J. Y. Smiley & Son hardware, Woodstock, believes in preparedness. Although it is only the middle of February he is showing a fine display of garden seeds in a prominent place in the store.

"I know," said Mr. Smiley to Hardware and Metal, "that many people who like gardening have been getting seed catalogues in for some little time and that they are spending their evenings now planning what they are going to put in and in arranging their gardens. Every year we have been selling more and more seeds and I find that it pays well to be ready for this business. It seems early to be showing seeds, but a month will soon roll around, and by that time a great many gardeners will have made all their plans and also decided what seeds they are going to buy. We find that by showing our stock of seeds early we get a lot of this trade and keep orders at home that would otherwise go out of town."

Mr. Smiley stated also that he has placed his orders for larger supplies of fishing rods, flies, hooks and similar lines than ever before. The firm makes a specialty of these lines and puts in some fine window displays of them. As a result every fisherman in and around Woodstock has come to know that Smileys is headquarters for fishing tackle.

"We are going to be ready for them early this year," said Mr. Smiley. "Everything points to an early spring and the fishermen are among the first to get busy."

Discussing business generally Mr. Smiley stated that he is looking for a most satisfactory year. Owing to unusual weather conditions, he said, seasonable goods, such as stoves, skates, and other winter goods have not moved in their usual quantity. Notwithstanding, he has found that business has kept coming in and has no complaint to make.

Feature Accessories, Washing Machines

Elliott's Hardware at Brantford this week has a very attractive window display of auto accessories. Non-glare lenses are featured in the center of the display and around them are shown spark plugs, tire patches, anti-freeze compound and other things the car owner needs. Advertising helps are most skilfully arranged and the whole display makes a fine showing and one that carries real interest to the car owner.

* * *

In the Ballantyne Hardware at Brantford is a window designed to appeal especially to housewives interested in getting away from the drudgery of wash day. A handsome washing machine is shown in the center and around it are placed an ironing board, wash tubs, irons and other laundry and wash-day equipment. Attention is increased by half a dozen large white show cards lettered in blue, with such wording as, "One of these machines takes the drudgery out of wash day," "Come in and let us demonstrate."

A Mail Order Deal on Saws

The other day, in Ontario, a man went into a hardware store to buy a saw. He found the kind he wanted and asked the price. It was $1.65 the dealer said.

"Good gracious," replied the shopper, "I can buy that same saw exactly from the catalogue house for $1.35.

"That's less than I paid for it," replied the dealer, "but I will meet catalogue competition, so I'll make you that saw for $1.35 also."

"All right," said the customer, you send it to my house and charge it to my account."

"Not on your life," replied the dealer. "No charge account on this; the mail order house don't trust you. I am simply meeting their price and terms. Fork over the cash."

The customer complied.

"Now 3 cents more for the postage, and 5 cents for the money order," said the dealer.

"What?"

"Certainly, you have to send a letter and a money order to a mail order house, you know."

The customer, inwardly raving, handed over the money.

"Now 25 cents for express charges," said the dealer, still holding out his hand.

"Well, I'll be—" said the customer. But he paid it, saying, "Now, hand me that saw and I'll take it home myself and be rid of this foolery."

"Hand it to you? Where do you think you are? You're in Ontario and I'm in Montreal. You'll have to wait two weeks for that saw."

Whereupon the dealer hung the saw upon a peg and put the money in the cash drawer.

"That makes $1.68," he said. "It has cost you 3 cents more and has taken two weeks longer to get than if you had bought it from your local hardware store in the first place."

STRATEGIC LOSS ESSENTIAL

Continued from page 73

is the rate of pay at the mines at Oliver, Minn.

The foundation of the whole structure known as the steel industry is what is commonly called labor. In using this word—labor—I wish to impress you with the fact that I do not use it as a hostile expression, but with thoughts most respectful and friendly. I would ask that when I use the word labor that you would immediately interpret it as meaning "Physical application of human energy, plus intelligence, knowledge and skill, applied to material things such as woods and metals."

Labor is the greatest contributing factor to costs in our industry today, and in fact the determining one, with transportation coming next. Labor again is the chief factor in transportation charges.

U. S. Steel Method

The United States Steel Corporation in their system of cost practice values iron ore in the ground at only 10 cents per ton because it is only just plain mud. They reason that by the application of human energy, plus intelligence and skill, and aided with modern tools and equipment and with a further application of heat, that they can convert this mud into merchant bar and pass it along to the general steel working industry at a profit. I figure the steel industry on the same basis as a nine inning ball game, the seventh inning or operation is the blast furnace turning the ore into pig iron, while the eighth and ninth processes are where the metal working industries of Canada begin to function, and the greatest contributing factor which we have to reckon with is wages—because no industry with too heavy a burden in this respect can produce its wares or deliver its services at reasonable prices unless this factor of remuneration contributes.

Remuneration

The man who first takes a rough bar of wrought iron may be a blacksmith who has only partly learned his trade and has no ambition to rise above the anvil. The best possible thing he can do with his bar of iron is to make it into horseshoes, and he congratulates himself upon his success. He reasons that the rough lump of iron is worth only three or four cents per pound and that it is not worth while to spend much time or labor upon it. However, his enormous muscle and small skill has raised the value of this lump of iron say from $1 to $10. In modern factory practice this man's remuneration would probably be based on weight, and the market price of pig iron might possibly be considered in naming a selling price.

Along comes another artisan known as a cutler, with a little better education and a little more ambition, and looking at the blacksmith and his product says: "Is this all you can see in that lump of iron? Give me a bar and I will show you what brain and skill plus hard work can make of it." He has seen a little farther into the rough bar. He has studied many processes of hardening and tempering. He has acquired tools and grinding and polishing wheels and an annealing fur-

Montreal TORONTO, CANADA Winnipeg

SATURDAY, FEBRUARY 19, 1921

SOME pointed statements made at the hardware convention in Hamilton should do much to encourage retailers to a full appreciation of the present condition of business and as to the best policy to solve to-day's problems:—

"ONE cannot but think, looking into the future, that there lies ahead of us many busy years."—Colonel Robert Starke.

* * *

"LET'S howl and howl and howl. Let's curse the country, business, our town, our neighbors and each other. Let's get it all out of our system and then go to work."—Col. A. F. Hatch.

* * *

"I BELIEVE every retail hardware man should spare at least an hour or two with his trade paper immediately upon its arrival."—J. C. Wanless.

* * *

"IT is positively a mistake for any merchant to starve his business to such an extent that business is lost through not having the goods in stock."—J. C. Wanless.

* * *

"WE HAVE been forewarned so much about this particular depression that we have just passed through that it will be a pleasure to have it over. In fact it fizzled out before it arrived."—George May.

* * *

"NOTHING can be gained by increasing the purchasing power of the dollar if it means at the same time a greatly reduced supply of dollars available for us to make purchases with."—Colonel A. F. Hatch.

* * *

The Convention

THIS issue of Hardware and Metal contains practically a complete report of the sixteenth annual convention of the Ontario Retail Hardware Association held at Hamilton this week. To run an extended report of a convention which concluded on Thursday night, and have this issue in the mails on Friday afternoon is a task of no small proportions; but it is done each year, in order to give our readers the best possible service, and give the news while it is news. We direct the special attention of our readers throughout the Dominion to the many excellent addresses which are reproduced in this issue, and which contain a wealth of information from many of the best posted business men in their respective lines. A wide range of subjects is covered by the addresses, and information of vital importance at this time is placed before the trade for perusal. A most pleasing innovation this year was the addition to the program of addresses by the executive members of the retail association. The idea originated with President Wanless, and certainly proved a most interesting and instructive feature. The meetings this year were well attended, the time schedule was more closely adhered to than in previous meetings, and President Wanless made a splendid presiding officer, keeping the meetings well in hand at all times. Although the attendance of retailers was not up to the desired mark, it is quite safe in saying that the convention just closed has been the most successful in the history of the association.

A Safe Policy

THE value of merchants gathering together to discuss matters of interest to their trade was clearly evident at the convention of the Ontario Retail Hardware Association in Hamilton this week. It was decided by all in attendance that prevailing conditions are such that only by an open discussion of all problems and the interchange of ideas could a definite and adequate policy be decided upon. From the retailers' point of view it was felt that the requirements of hardware were still very large, that goods would be forthcoming in larger quantity in the spring and that prices would be more stable than at present. The danger of retailers becoming panicky and assuming that conditions are worse than they really are was emphasized by both retailers and wholesalers. At the same time it was the opinion that plenty of notice had been given both retailers and wholesalers to reduce stocks so as to be in position to replace at lower costs.

In view of the opening this week of the new session of the Federal Government it was timely for some expressions of hope that tax legislation to be enacted at this session would be free from the many absurdities which brought forth such strenuous protest from merchants during last year. Already action is being taken by the Government along the lines suggested by the merchants, in bringing on a test case to establish the status of a retailer, and it is thought that the counsel of retail merchants will be considered more in the framing of future tax legislation than heretofore. Advice to watch the trade papers closely and to keep in touch with bankers for advice on collections and general financing were heard on every hand, and it is doubtful if much hardship will be experienced by any in the trade who give close attention to these matters.

Their "Howl" Will Soon Die Out

NO attempt was made at the convention of Ontario hardware merchants to disguise the fact that prices are on the downward trend and that it is difficult to forecast their future trend. It was the opinion that strict adherence to certain business principles will, however, eliminate practically all danger from the situation, and one suggestion offered was that the "calamity howlers" be given full swing and get all the howl out of their system and then settle down to business. All undue inflation in prices will be squeezed out in the present process, as indeed it has already been eliminated in many cases. After this the only price reductions will be from more efficient work and the lowering of costs through application of sound business principles.

One interesting line of thought was that the present period of business depression had its advantages in that it shows forth the clear-headed, far-seeing, courageous business men as the leaders in their field. Literally, it separates the wheat from the chaff and enables the "wheat" to shine forth in greater glory than when obstructed by the "chaff."

News of Western Canada

A Made-in-B. C. Campaign

As Solution of Present Business Condition Rather Than Curtail Production

MANUFACTURERS of British Columbia have launched a big campaign for the increased use of "Made-in-B.C." products among the residents of the province. A large fund is being raised for the purposes of the project; offices are being opened and a manager appointed acting under the advisement of a committee of business men.

Confronted by a period of business depression, and with thousands of unemployed seeking work in Vancouver and the other cities, the manufacturers decided that instead of following the trend of the times by reducing production, they would endeavor to increase the output of their respective industries. In order to do this the possible and probable markets were closely scrutinized, and it was determined that before trying to enter competitive foreign fields, the home market should be captured, so, like charity, they began at home.

The movement was initiated recently at a large dinner held under the auspices of the manufacturers' bureau of the Board of Trade. It was largely attended and of a most enthusiastic character. So satisfied were those who attended the gathering that no time should be lost in starting the campaign that $6,000 was subscribed at the time to cover the preliminary expenses of organization. It is anticipated by the members of the committee that at least $72,000 will be necessary to make the success of the enterprise that is desired, and this sum they expect to raise without much difficulty.

The campaign is in reality wider in its scope than purely sectional movements of the kind usually are, for, as expressed by J. B. Thomson, chairman of the B. C. Division of the Canadian Manufacturers' Association, who is one of the most active workers on the committee, the first endeavor will be to increase the sale of British Columbia made goods, and if these are not available to have the purchaser ask for those of Canadian manufacture, to be followed by a demand for the products of the Empire before considering imported commodities. This fostering of trade within the Empire was met with hearty and enthusiastic support.

The Program

The chairman of the committee, Frank Parsons, in outlining the proposals of the committee responsible for organizing the dinner-meeting, said that the programme would consist of extensive newspaper advertising, bill board appeals, educational work in the schools; by organizing "Made-in-B.C. Days" and "Made-in-B.C. Weeks," and by addresses delivered at luncheons and gatherings of clubs and semi-public bodies.

Not only are the manufacturers intent on increasing their daily sales, but they are anxious to improve, if possible, the quality of the goods they produce. In many lines the products of British Columbia far excel those imported into the province from foreign countries.

Not only will those responsible for the conduct of the campaign seek cooperation from other classes of the community, but they plan a thorough review of the purchasing possibilities of themselves as a class. Every manufacturer in the province, and there are more than 1,000 in addition to those engaged in the lumbering and mining industries, will be provided with a list of the products of the other fellow's plant, and they will be impressed with the necessity of making use, wherever practicable, in the manufacture of their own wares, of "Made-in-B.C." goods.

Hold Successful Dollad Day Sale

Calgary, Alta.—The J. H. Ashdown Hardware Co. (retail) recently held a successful Dollar Day sale which brought business 25 per cent. in excess of that realized in a similar sale last year. Among the lines listed at $1 were combination offer of shaving powder, cold cream and tooth powder; glass butter tubs; tumbler holder; coal hod and steel shovel; brass soap holder; combination offer of can opener, bread knife, paring knife; salt and pepper shakers; silver napkin rings; 16 bars washing soap; 9 rolls toilet paper; yard of white oilcloth; ivory dressing comb; brooms; three brushes; hockey toques; auto sponges; feather dusters; record brushes; showcard brushes; hockey skates; quart mixed paint; athletic shirts or pants; quart varnish stain; pint of aluminum paint; enamel finish; electric torch; disinfectant; pocket knives; tools; garment hangers, etc.

A large ad was used in connection with the sale and generous use made of $1 cuts to illustrate it.

Western Notes

F. C. Moog, of Simpson, Sask., was a visitor in Winnipeg last week.

Chic Glover, of Windthorst, Sask., was a visitor in Winnipeg last week.

George Elliott, of Toulon, Man., was a visitor in Winnipeg last week.

S. Sigurdson, of Arborg, Man., spent a week in Winnipeg on business.

J. J. Moody, of Selkirk, Man., was a visitor in Winnipeg last week.

George Simpson, Selkirk, Man., spent a week on business in Winnipeg.

D. McAlister, of Beausejour, Man., paid a visit to Winnipeg last week.

J. B. Stallwood, of Maryfield, Sask., paid a visit to Winnipeg last week.

H. N. Smiles, Macklin, Sask., was in Winnipeg last week on a business trip.

J. H. Millard, of Melfort, Sask., was in Winnipeg recently on a business trip.

J. A. MacIntyre, of Leslie, Sask., was in Winnipeg recently on a business trip.

J. Chicoine, of Stothoaks, Sask., was in Winnipeg last week on a business trip.

William Sutherland, of Dauphin, Man., was in Winnipeg last week on a business trip.

Jack Killer, of Carduff, Sask., called on the wholesale trade in Winnipeg last week.

C. J. Morrison, of the Morrison-Blackwood Hardware, Ltd., was a visitor in Winnipeg last week.

Rod Maskill, of Gladstone, Man., while in Winnipeg, renewed acquaintance with the wholesale trade.

J. C. Cahoon, of Cahoon Bros., Ltd., Cardston, Alta., was in Winnipeg last week on a business trip.

L. W. D. Park, of the Fyffe Park Hardware Co., of Swift Current, was in Winnipeg last week on a business trip.

Paul Egilsson, of Egilsson Bros., of Calder, Sask., made a visit to the wholesale trade while in Winnipeg last week.

William Butchart, of, Plumas, Man. paid a visit to Winnipeg last week, and while in town paid a visit to the wholesale trade.

Events in the Trade

Business Changes

Montreal.—Bourassa & Primeau have dissolved partnership.

Toronto.—MacDonald & Elliott, auto supplies, have dissolved partnership.

Toronto.—The Toronto Iron, Rag & Metal Co. have dissolved partnership.

Brampton, Ont. — Higgins & Large, plumbing and hardware, have sold hardware business.

Fire Loss

Guelph.—The Sterling Rubber Co. suffered a severe loss when a portion of its plant was destroyed by fire. The blaze occurred in the new addition which had been recently made to the plant, and was caused by combustion in one of the dipping tanks.

Obituary

Ottawa, Ont.—Chas. Warner, harness and leather goods, died recently.

Montreal, Que.—Oliver Faucher, of the firm of Faucher & Fils, wholesale carriage hardware and blacksmiths' supplies, is dead.

Oshawa, Ont.—The death occurred at Colorado Springs, February 15, of Glenn A. Henry, a hardware merchant of Oshawa, Ont. The deceased had been an invalid for several years and had been at Colorado Springs for over two years in search of health. The funeral takes place at Oshawa Saturday, February 19.

Personal

J. R. Terrill, of Caverhill, Learmont & Co., Ltd., is in Hamilton this week attending the convention.

Montreal.—John Richardson, of Richardson & Bureau, will spend the next couple of weeks in Toronto.

Montreal.—H. A. Croxall, of the National Hardware Co., Orillia, Ont., is calling on the wholesale hardwares this week.

Montreal.—Herb. Seybold, of Starke-Seybold, Ltd., is attending the convention of the Ontario Retail Hardware Association in Hamilton this week.

Montreal.—T. L. Waldon, vice-president Marshall Wells, Ltd., Winnipeg, is spending a few days in Montreal before sailing for England and the continent.

Montreal.—George Henderson, president Brandram-Henderson, Ltd., Montreal, and W. S. Fallis, vice-president Sherwin-Williams Co., Ltd., are in Winnipeg this week in the interests of the Canadian Paint, Oil & Varnish Association.

Western Ontario News

Vance and Brown, hardware merchants at Inwood, Ont., are dissolving partnership and the business will be carried on by Johnston Vance.

* * *

Following an illness of a year with heart trouble the death occurred in St. Joseph's Hospital at London, Ont., of John Hawkey, for many years a carriage manufacturer at Parkhill.

* * *

At the annual meeting of the Huron and Erie Mortgage Co. at London, Ont., Norman B. Howden, of the D. H. Howden Hardware, was elected to the directorate.

* * *

At the annual meeting of the Leamington Bowling Club, Ivan Cook, of the hardware firm of Lendon & Cook, was elected secretary-treasurer; H. Lendon a member of the canvassing committee, and W. C. Lendon a member of the games committee.

Incorporations

The Ontario Gazette announces the incorporation of the following firms:

Hubbell Electric Products Co., Ltd., Toronto.

The North Tire Equipment Co., Toronto.

The Queen Asbestos Co., Quebec.

Merchants Demand Exemption From 8-Hour Day Legislation

Ottawa.—The Retail Merchants' Association of Eastern Ontario and Ottawa district have filed strong objection against any attempt to include retailers in the scope of the eight-hour day legislation now before the Ontario Legislature. Premier Drury has received the following telegram from the association:—

"The retail merchants of the Eastern Ontario and Ottawa districts strongly oppose any attempt to include them in the proposed eight-hour day legislation. They demand exemption from its provisions, as there is now a satisfactory early closing act upon the statute books under the provisions of which they are operating."

Officers of the Rubber Association of Canada Elected

Montreal.—At the business session of the Rubber Association of Canada, held in Montreal, Monday, February 14th, the following officers were elected: C. H. Carlisle, Toronto, Goodyear Tire & Rubber Company of Canada, Ltd., president; W. A. Eden, Montreal, general manager Canadian Consolidated Rubber Co., vice-president; C. N. Candee, Toronto, Gutta Percha & Rubber, Ltd., treasurer; John Westren, Toronto, Dunlop Tire & Rubber Goods Co., Ltd., assistant treasurer; A. B. Hannay, Toronto, manager and secretary.

The following were elected as directors: F. E. Partridge, Guelph, F. E. Partridge Rubber Co.; W. H. Miner, Montreal, Miner Rubber Co.; R. F. Foote, Merriton, Ont., Independent Rubber Co. of Ontario.

Harness Makers Hold Convention

The Master Harnessmakers' Association of Canada opened its first convention after a lapse of several years at the Arlington Hotel, Toronto, Feb. 15. Besides the younger members of the organization were many "old-timers" who had been in the business for forty or fifty years. The president, W. A. Hammond, of Chatham, presided over the meetings.

During the afternoon "Harnessmaking in Custom Shops" and "Repairing Costs of Today" were the principal items discussed. In connection with the former, an effort was made to arrive at some reliable system of determining the actual cost of making a set of harness, but owing to the wide variation in the cost of different materials entering into harness, this was admitted to be a difficult matter.

In discussing the subject of repairing some of the delegates asserted that the buying strike had not been confined to the city and that some farmers were resorting to fence wire in fighting repairing costs.

The members were optimistic with regard to the outlook for their business, believing that an improvement was about to commence. It was felt that lower costs for leather would make possible some reductions in prices.

Thieves Enter Hardware Store

Grimsby, Ont. — James Wray, hardware store, was entered by thieves but nothing was taken.

Date Set For Important Test Case

Exchequer Court at Ottawa Will Commence Hearing of Case on March 9th to Prove Status of Retail Merchant

THE date for the hearing of the test case to establish whether or not the Inland Revenue Department is justified in classing certain retail merchants as manufacturers and compelling them to apply for the manufacturer's license has been set for March 9 before the Exchequer Court in Ottawa.

Since November 3, 1920, the Retail Merchants' Association of Canada, Dominion Board, has been contending that a retail merchant should not take out the manufacturer's license, there being no provision in the act whereby they may be compelled to do so. The Dominion Board decided the wisest plan would be to have a test case and they urged the Government to take proceedings against some firm in Ottawa, where the matter could be properly attended to. The Government concurred in the request and on Wednesday last issued a writ against Frank J. Pedrick and Frederick A. Palen, merchant tailors, the case to commence a month hence.

Will Make Determined Fight

The Dominion Board has retained counsel and, according to the secretary, E. M. Trowern, the board is determined to fight the matter to the last ditch and, if necessary, to take it to the highest courts. The contention of the board is that when the act was passed there was no thought whatever of placing a retailer in the same category as a manufacturer, so that the action of the Inland Revenue Department was contrary to the act, and while it may not be a question as to who is a manufacturer, the question that must be decided is what was intended by the act. And whatever that intention may have been all retailers disclaim the right of any person to class them as manufacturers.

Annual Meeting of Ottawa Merchants

Recommend License Fee of $1,000 on Transient Traders—Will Uphold Retailers' Case Even if Appeal to Privy Council is Necessary.

OTTAWA.—The Ottawa branch of the Retail Merchants' Association of Canada has had a most successful year. At the annual meeting reports were submitted showing twelve months of activity and progress. E. A. Stephens was elected president, Mr. Freiman refusing to accept renomination owing to pressure of other business. Strong resolutions were passed dealing with matters of importance to the local retail trade, and it was decided to hold a monthly luncheon for the members of the branch.

Transient Traders

Jess Abelson brought up the matter of the Transient Traders' Act. He instanced the case of the representative of a Toronto retail firm who makes periodical visits to Ottawa and takes orders so large that the $250 license fee he is called upon to pay is a mere bagatelle.

Mr. Campbell said that the Retail Merchants' Association had been responsible for putting the first license fee on transient traders on the provincial statute books, and it had always felt that it was not large enough.

Mr. Abelson moved, seconded by Mr. Bell, that the branch take steps to have the act amended so that the license for transient traders should be $1,000. This was unanimously carried.

The meeting decided to support Messrs. A. J. Freiman, Henry Watters, Thomas G. Collins and George Pink for election to the directorate of the Central Canada Exhibition Association.

Will Carry Fight to Privy Council

Mr. Trowern then spoke in reference to the action of the Dominion Government in seeking to recover payment of the manufacturers' tax and license from retailers who sold goods of their own manufacture. The association had advised its members to refuse to pay such tax or to take out the required license. Since action had been entered against one Ottawa firm the association had obtained the promise of members of the Government that no others would be molested pending the result of the test case. The retail merchants were prepared to carry the action to the Privy Council, if necessary, but, he thought, that before it reached that stage the Government itself would see the unfairness of the regulation and amend it accordingly. A conference of manufacturers, wholesalers and retailers had been arranged to be held in Ottawa during March at which it was expected it would be decided what actually constituted a manufacturer.

The election of officers was then proceeded with and resulted as follows:

President—E. A. Stephens.

First Vice-President—Richard McGiffin.

Second Vice-President—J. A. Larocque.

Secretary—B. G. Crabtree.

Treasurer—A. G. Johnston.

These five will constitute the executive for the year.

Good Business for Petrolea Merchants

Petrolea, Ont.—More than 5,000 farmers from all parts of Lambton County gathered at Petrolea for the annual Corn Show. It was a big day for the merchants, as the farmers were not only out to see the fair, but also to do considerable buying and all the "window shopping" they had time for. The hardware firm of Van Tuyl and Fairbank dressed one of its show windows with washing machines and the other with dairy supplies. In the center of the washing machine window was a mechanically operated advertising help telling about the value and virtues of a well-known lubricant. It added a touch of action to the window that cinched attention and brought a lot of inquiries that mean business not only for the oil, but for the washers.

Manager Rainsbury stated to Hardware and Metal that he is looking for satisfactory business this year. While things have been a little quiet, owing to unseasonable weather and business conditions, he has no fault to find with trade. The farmers, he says, are prosperous and will buy what they need, and that alone insures a nice volume of business.

Permit for Gun Even if Never Used

A permit under the Offensive Weapons Act must be held by the possessor of every firearm or other weapon, no matter whether the weapon is used or not, according to Supt. Rogers of the Provincial Police Department.

"No matter if a gun hangs on the wall from one end of the year to the other, the owner must have a permit, which must be renewed yearly," he stated.

"Is this permit the same which would be given a man for a gun which he used for hunting or other legitimate purposes?"

"Yes, it would be the same permit."

"Is there any fee for such a permit?"

"No. There is no fee for any permit under the act."

Questioned as to the procedure for obtaining permits to carry arms in lumber camps or in outlying districts of Ontario, Supt. Rogers stated that application should be made to the sheriff of the district or to a police magistrate. Justices of the peace, he explained, had not power to issue permits.

"Weapons are not allowed in lumber camps, however," he added. "That would be a breach of the fish and game laws."

Guelph, Ont. — The Sterling Rubber Co., Ltd., manufacturers, have suffered loss by fire.

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of February 19th, 1901:

"New companies incorporated include the following: The Strathy Wire Fence Co., Ltd., Owen Sound, Ont.; The Canadian Oak Belting Co., Ltd., Brockville, Ont.; The Northern Hardware Co., Ltd., Sault Ste Marie, Ont.; The Defiance Lantern and Stamping Ltd., Toronto."

* * *

"Winnipeg retail clerks held their regular meeting with president Bro. Trumble in the chair. Ex-president Calder was elected honorary president."

* * *

"A lengthy and comprehensive petition has been sent to the Ontario Government which is believed to have the solid support of all the iron manufacturers of the Dominion. It is officially signed by A. T. Wood, president; C. S. Wilcox, general manager Hamilton Steel & Iron Co., Ltd.; The Nickel Steel Co., of Canada, John Patterson, secretary; the Canada Furnace Co., per Geo. E. Drummond, managing director and treasurer."

* * *

"Thomas McVittie, who 50 or more years ago was engaged in the hardware business in Toronto, died at his home in Barrie, Ont. For the past 30 years Mr. McVittie has resided in Barrie. For a time he was engaged in the hardware business, but in his declining years he went out of business and lived retired."

* * *

"In Montreal the Colin McArthur hockey team defeated the Canada Paint Company's crack aggregation by a score of 4 to 1. The Canadian Rubber Co. and the Baylis Mfg. Company's teams played a very interesting game of hockey at the Ontario rink, Montreal, which was hotly contested, the latter winning by 2 to 1."

* * *

"B. C. Beach & Co., founders, Winchester, Ont., intend erecting two new buildings. One of these will be 120x40, four storeys high, and will be used for offices, showrooms, storage and mounting room. The other will be used as a moulding shop."

Is Ski-ing The Coming Winter Sport?

Very Popular at Present in Ottawa, Montreal and Quebec—Parties Both Young and Elderly are Seen 'Packing' Their Way to Mountain or Hillside—Week End Programs Carried Out

IT would not be fair to say that skating is losing its attractiveness and popularity, because we do not believe the open country pond, the open-air skating rink with its brightly lit surface, or the closed rinks and arenas with the bands in attendance will ever cease to be the national winter sport of Canada. These attractions, coupled with the ever-increasing interest taken in hockey, contribute a winter sport that may well be envied by other more southern countries.

However, there is a winter pastime that is coming to the front in leaps and bounds, very much in evidence during the present winter in such cities as Ottawa, Montreal and Quebec. Ski-ing, although up until very recent years left to the countries of Norway and Sweden, is now indulged in by a great many boys and girls, men and women, in these eastern cities. To see some individual dressed in the habit of the snowshoer with his woollen upper garments, accompanied by breeches and heavy high boots, is a sight becoming very common on the streets of the above cities. But rather than carrying snowshoes under his arm or strapped on his back, he has his pair of eight or ten-foot skis to carry along with him.

Women Are Enthusiasts

We have been speaking of "him" dressed in his weather resisting apparel, but, as stated, this sport is not confined to the male sex alone; women can also wear woollen caps and sweaters, accompanied by breeches and high boots, and judging from the mixed crowds on a Saturday afternoon, the fair sex enjoys this outdoor pastime as well as her male companion.

Ski clubs have been formed and week-end programs carried out, these added attractions no doubt contributing to make the sport more of a favorite. Local newspaper reports are perhaps self-explaining: "The ....Ski Club had an enjoyable outing over the week-end. The weather was fine, and the snow conditions perfect. There was a heavy fall of just the right kind of snow to make perfect running. Saturday was a glorious day, with a brilliant sun, and low temperature without a breath of wind. A long run was taken through the hills and after tea was served, members indulged in the exciting sport of going down the bob-sleigh run on skis."

To participate in the art of "ski jumping," one does not have to be an old and experienced hand at the game, providing this same person is willing to take his chance on a "snow bath" or "spill," but provisions are made so that the young as well as the older members may compete in the ski jumps. The novice, intermediate and senior competitions are regularly held.

Skates, Why Not Skis?

Skis, ski harness and boots are not carried by all hardware dealers, but might be carried by more of them. Skates, hockey sticks, sleighs and toboggans may be seen in the display windows of hardware merchants, so why not a showing of skis with the above mentioned harness and ski boots? That the demand has been large this season is manifest. When speaking to one merchant who foresaw the benefit he would derive from stocking these lines he states, "We sold all the skis we could obtain, and could sell more if we could get them."

If popularity was gained to such an extent in this winter sport in one season in the above cities, could it not be expected to extend to other towns and cities in the coming winters?

Auto Trade Members Join R. M. A.

MEMBERS of the automobile trade in Ottawa have decided to affiliate with the Retail Merchants' Association of Canada. What was known as the Ottawa Automotive Trade Association is now the automobile section of the Ottawa branch of the Retail Merchants' Association of Canada. This change was brought about at a recent meeting of the automobile men. It is proposed to form sub-sections, one for garage men and the other for tire and accessory retailers. The attendance at the meeting was representative, but it was decided to have another, and if possible, larger meeting when the officers will be elected.

Mr. George Pink, president of the disbanded association, presided and outlined what he felt to be the advantages to be gained from the affiliation. The automobile trade in general throughout the country, he said, had felt the distinct benefit of the assistance rendered by the Retail Merchants' Association in the luxury tax dispute with the manufacturers. The matter was not yet satisfactorily settled and better results would undoubtedly be achieved in this and other matters through close co-operation with the association. He was a strong advocate of the association's motto: "One for all, and all for one."

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

WITH fewer price changes recorded, the chief item of interest in the hardware trade is the reduction made this week in the price of ready-mixed paints. The reduction applies to interior and exterior house paints and also to floor and porch paints. Other declines include a reduction in gasoline prices, the second within two weeks, and also on coal oil, made possible by lower crude oil prices.

Lower quotations are made on the smaller styles of pumps, such as force, cistern, and cottage pumps. Reductions have been made on some makes of wrenches, levels and braces, and lead pipe and waste are lower. Solder is showing a further decline in price, and glass fruit or jam jars for next season are quoted at a lower level. Some lines of wall board are reduced in price. Canada plates are available again in better quantities and at lower prices. Ingot metals are still quiet and prices show practically no change from last week. Bar iron and steel, black and galvanized sheets, wrought pipe and fittings are holding unchanged and are quiet.

Iron and steel prices continue nominally unchanged in outside markets, but quotations below the Industrial Board level are reported from Pittsburgh on the part of some of the independent mills, but without any increase in activity or heavy bookings. Sales are also reported on foundry pig iron at prices under the former market quotations and the outlook for reductions in ore prices is stated to be very promising.

A slight improvement in buying is reported by wholesalers, but while the volume of orders for shelf hardware is showing an improvement, heavy hardware is backward. Booked orders for spring and summer goods are beginning to move out, and though in many cases they are smaller than last year, they are regarded as satisfactory.

Montreal Markets

MONTREAL, Feb. 17.—Although no striking price change may be featured this week, several changes are in effect, all to lower levels. Gasoline is down 2 cents a gallon again this week, and coal oil 1 cent per gallon less. Fruit jars are reduced from 75 cents to $3.25 a gross according to the sizes. A 10% decline is shown on smaller pumps, such as cottage, force and cistern pumps, and the same reduction is reported on Stillson wrenches of Canadian make. Wire nails are down 5 cents base in Montreal, with lower quotations f.o.b. Toronto and St. John.

Roofing and rope remain at former prices. Lead products show a decline in solders, lead pipe, and lead waste of one cent per pound. Pipe, pipe fittings, black sheets, galvanized sheets, corrugated sheets, bar iron and steel are held unchanged in price. Ingot metals are reported a little quieter again this week.

Gasoline and Coal Oil Down

Montreal.

Gasoline is again quoted lower this week. This is the second reduction in the last ten days, a decline of 2½ cents being given in last week's issue of Hardware and Metal. The new price shows a further reduction of 2 cents, motor grade now selling at 39 cents, and the higher grade at 44 cents. Coal oil is down one cent per gallon and is now quoted at 28 and 30 cents.

Fruit Jars Lower

Montreal.

A reduction has been made on fruit jars, affecting all sizes in the different brands. The decline varies from 75 cents a gross on the large sizes, to $3.25 per gross on the smaller sizes. Following are the new lower prices:—

Crown and Improved Gem, wine measure—Small, $13,50; medium, $15; large, $20.50 gross.
Perfect Seal—Small, $15,50; medium, $17; large, $22.50 gross.
Crown Style Only, Imperial Measure.—Pints, $15.50; quarts, $17; ½ gals., $22.50 gross.

10 Per Cent Decline on Pumps

Montreal.

A reduction of 10% is made on the smaller lines of pumps, such as cottage, force and cistern pumps.

Stillson Wrenches Reduced

Montreal.

Stillson wrenches of Canadian make are shown at a reduction of 10%.

Wire Nails Slightly Reduced

Montreal.

Wire nails are again quoted 5 cents lower in Montreal. This reduction comes from stocks in the hands of jobbers, as no lower prices are quoted by the manufacturers. Present prices are $5.20 base f.o.b. Montreal; $5.10 base f.o.b. Toronto, and $5.35 base f.o.b. St. John, N.B.

Roofing Prices Hold

Montreal.

No change has been made in the prices of prepared roofings since the beginning of the year. The demand is slowly improving but spring requirements are not yet being shipped to any great extent. Following are the prices quoted on the three weights by one roofing manufacturer:

	Car lots	Less
Heavy Weight—		
1 ply	2 10	2 25
2 ply	2 55	2 70
3 ply	3 00	3 15
Standard Weight—		
1 ply	1 75	1 90
2 ply	2 20	2 35
3 ply	2 65	2 80
Light Weight—		
1 ply	1 65	1 80
2 ply	2 00	2 15
3 ply	2 35	2 50

Rope at Recent Decline

Montreal.

Prices on rope remain at the decline

quoted in last week's issue of Hardware and Metal, present quotations being as follows—Best Manila, 24½ cents base; beaver or New Zealand manila, 20 cents base; sisal and lathyarn, 18 cents base.

Prices on Sap Buckets

Montreal.

Following are this year's quotations on sap buckets and spouts. The list includes the prices on Nos. 8, 9, 12 and 16. Also on the 1 gal. 1½ gal. and 2 gallon, these sizes now being sold by some manufacturers. They are of Imperial measure.

Sap Buckets.—No. 8, $21.88; No. 9, $24.50; No. 12, $26.25; No. 16, $31.50 per hundred; 1 gal., $21.88; 1½ gal., $26.25; 2 gal., $31.50 uer hundred.

Spouts.—Perfection. $25 a thousand; Eureka, $16.50; Sterling, $38; Square syrup cans, 1 gal., Imperial, $26 per hundred.

Some Lead Products Lower

Montreal.

A reduction has been made on some lines of lead products, lead pipe and waste showing at one cent lower. Solders are priced one cent less on all grades, while wire solder has been revised to 35 cents per pound. Business continues fair, with a sorting trade experienced. Present quotations are as follows:—

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net list
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c lb. extra and cut sheets to size. ¾c lb. extra.	
Solder, guaranteed, lb.	0 27
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., wiping, lb.	0 22¾
Do., wire, lb.	0 35
Zinc sheets, casks	0 14½
Do., broken lots	0 15½

Fittings Remain Steady

Montreal.

A fair sorting trade is being experienced in pipe fittings. Prices remain unchanged, with stocks in very good shape, although a shortage of some of the smaller fittings is felt. Following are the quotations:—

Bushings, cast	20%
Do., malleable	20%
Flanges	20%
Plugs	17½%
Flange Unions	7½%
Malleable Unions	32½%
Nipples, blk. or galv., up to 4 in.	50%
Do., 4½ in. or larger	40%
Do., running thread, 4 in. and under	30%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Add 17½%.

No Change in Wrought Pipe

Montreal.

There is no change to report on wrought iron piping, list No. 48 being still the selling prices. Stocks in the hands of the jobbers are in good shape, the shortage being well overcome. Quotations may be found on current market pages.

Sheets at Recent Decline

Montreal.

Black and galvanized sheets show no further change in price this week. Business remains quiet, however an early improvement is looked for. Stocks are reported in good shape, deliveries from the mills coming regularly with all weights easily obtained. Present prices are as follows:—

BLACK SHEETS—	
10 gauge	7 75
12 gauge	7 80
14 gauge	8 10
16 gauge	8 25
18-20 gauge	8 30
22-24 gauge	8 40
26 gauge	8 50
28 gauge	8 75
GALVANIZED SHEETS—	
U.S. Standard—	
10¾ gauge	11 75
28 gauge	11 25
26 gauge	11 00
22 to 24 gauge	10 85
20 gauge	10 65
18 gauge	10 65
16 gauge	10 50
14 gauge	10 50
12 gauge	10 50

English Standard—	Queen Head	Fleur-de-Lis
28 gauge	12 50	11 50
26 gauge	12 25	11 25
24 gauge	11 65	10 85
22 gauge	11 30	10 40
18 and 20 gauge	10 60	10 25

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Unchanged

Montreal.

Following the decline on many lines of iron and steel, quoted in last issue, the prices remain at the lower levels for this week. Business continues generally quiet on these lines, only small shipments being made. Quotations are as follows:—

IRON AND STEEL

Common bar iron, 100 lbs.	4 20
Refined iron	5 80
Iron finished machinery steel	4 25
Mild steel	4 20
Band steel	4 20
Single reeled machinery steel	6 80
Spring steel	6 00
Sleighshoe steel	4 20
Tire steel	4 40
Toe calk steel	5 20
Harrow tooth steel	4 35
Mining tool steel, per lb.	0 24½
Black Diamond tool and cast steel	0 24½

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steed in scroll bdles, 50c per 100 lbs. extra.

Corrugated Sheets are Steady

Montreal.

With building activities not yet in evidence, the business offering on corrugated sheets continues quiet. Stocks are reported in better shape than they were at this time last year, and dealers are looking for a better movement as soon as the season permits building operations. Prices remain unchanged and the new quotations given at the first of the year are still in effect. Following are the prices:—

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Canada Plate Now Available

Montreal.

English half bright Canada plates are again offered on the markets for import at very reasonable prices, and no doubt the trade will welcome a return of these plates to this market. The outlook for polished plates is not quite so favorable, as these are on a much higher basis, but will probably also show improvement later on.

Waste Materials More Active

Montreal.

The market on scrap metals may be stated as being a little more active than in the past few months, when both buying and selling have been very quiet. More enquiries are now coming in and business generally is improving. Red brass, however, is quoted at a lower figure, the price now being 11 cents. Following are the present quotations:—

DEALER'S BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 07
Red Brass	0 11
Light brass	4 50
Scrap zinc	0 05
Lead, heavy	4 00
Lead, tea	2 50
Light copper	9 00
Heavy copper	11 50
Wrought iron, R. Rd., No. 1, per gr. ton	13 00
Malleable scrap (ton)	15 00
Pipe scrap (ton)	9 00
Stove plate, per ton	20 00
Heavy melting steel	15 00
No. 2 busheling	5 00
Boiler plate	12 00
No. 1 machinery cast, per gr. ton	$25 00 $28 00

Beaver Board $48.50 Per M. Ft.

Montreal.

Local distributors of Beaver Board are quoting $48.50 per 1,000 feet, a decline of $5.00 since the beginning of the year. The business offering on this product has been very dull up to the present, but deliveries for spring requirements are expected to go forward in the near future.

Guaranteed Price on Winchester Arms

Montreal.

A notification has been received by all wholesale houses that Winchester guns and rifles are guaranteed against decline in factory prices until December 31st, 1921.

Wire Cloth and Netting Moves

Montreal.

Local wholesalers report that shipments of wire cloth and poultry netting have already been forwarded at guaranteed prices. The orders for these have been satisfactory from the wholesalers' point of view.

Ingot Metals Quiet

Montreal.

Ingot metals are generally quiet this week with little change in prices to report. There will probably be a seasonable improvement in the near future, but it is very hard to determine at present just when to expect this improvement.

TIN.—Tin has been somewhat firmer this week, although the advance made will not likely extend very far until the demand improves in the United States.

COPPER.—Copper is slightly easier in New York, but the time is not yet ripe for any sustained advance. Prices

remain unchanged locally at 19 cents for electro, and 18½ cents for casting.

SPELTER.—Spelter is still as lifeless as ever and in the present state of apathy it is impossible to state what will happen next. Price, 7¾ cents.

LEAD.—Lead is dull and quiet, and shows very little sign of any improvement at present. Local price, 7 cents.

ANTIMONY. — Little demand is shown for antimony, and the market remains dull and quiet. Local price unchanged at 8 cents.

ALUMINUM.—Aluminum still remains quiet with price unchanged at 34½ cents.

Toronto Markets

TORONTO, Feb. 17.—Fewer price changes are in evidence this week, and among the chief alterations are lower prices on coal oil and gasoline. Declines in the price of crude oil have enabled lower quotations to be made on oil and gasoline. Other lines showing declines are Stillson wrenches, lead pipe and waste, solders, oakum, pumps, wrapping paper, chalk lines, road scrapers and some lines of tools including braces and levels. Some higher quotations are shown on English makes of grass hooks and garden shears. Prices are held unchanged on wrought pipe and fittings and on bar iron and steel and also on black and galvanized sheets and plates. Ingot metals are unchanged and are quiet and dull. Business is reported to be a little improved on many lines of shelf hardware, but heavy goods are still showing a slowness in movement. Booked orders in spring and summer goods are beginning to be shipped out, and in many cases are smaller in quantity than last year.

Rope Holds at Recent Change

Toronto.

Rope prices are holding at the decline made on February 8, and sales are showing a marked improvement, though on a smaller basis than ordinary. The present prices on pure manila, beaver manila and New Zealand hemp are nearly a third lower than the prices in effect last summer, and sisal prices are 20 per cent. less.

Following are present quotations:

ROPE—	
Pure Manila, basis	$0 24½
Beaver Manila, basis	0 20
New Zealand Hemp, basis	0 20
Sisal, basis	0 18

Above quotations are basis prices, ¾ in., and larger diameter. The following advances over base are made for small sizes: ⅝ in, ½c; 9-16 in., ½c; 7-16 in., inclusive, 1c; ⅜ in., 1½c; ¼ in., and 5-16 in., 2c; 3-16 in., 2½c.

Single lath yarn, basis	0 18
Double lath yarn, basis	0 18½

Hemp Lobster Twine Declines

Toronto.

A reduction of one cent per pound has been made in the price of hemp lobster twine, and the "Standard" is now quoted at 25 cents and the "Fine" at 26 cents.

Nails; No Further Change

Toronto.

The demand for nails has been light, but with spring approaching and the resumption of building operations combined with the reductions which have been made since last season, amounting to nearly 20 per cent. in the price of wire nails, it is expected that sales will show a considerable improvement. Prices are holding at the quotations announced last week and are $5.10 base per keg for wire nails and $6.20 base for cut nails.

No Chage in Wrought Pipe

Toronto.

Pipe prices are holding unchanged. Wholesalers' stocks are improved and fair movement is reported. Quotations are as per current market pages.

Pipe Fittings Unchanged

Toronto.

No further changes have been made in fitting prices, and stocks are reported in fair shape with a slight improvement in the demand.

Quotations are the following:

Cast iron fittings	10%
Plugs	20%
Bushings	25%
Unions, ¼-in. to 2-in.	35%
Do., ⅛ in., 2½ to 4 in.	30%
Dart Unions, blk., ¼ in. to 2 in.	20%
Do., ⅛ in., 2½ to 4 in.	8%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B.	0 26	0 36
Class C.	0 17	0 26

Bar Iron is Quieter

Toronto.

Business continues on the light side in bar iron and steel, but wholesalers anticipate that trade will show a change for the better during the next few weeks. Retailers have been buying for their immediate requirements for some time and their stocks are in most cases reported to be smaller than usual and with an increase in the demand there should be a good movement in this line. Quotations are holding at recent declines and are as follows:

IRON AND STEEL

Common bar steel, 3-16 in. dia. and lighter	$ 5 25
Common bar steel, ¼ in. and heavier	4 75
Common bar iron, 3-16 in. dia. and lighter	5 25
Common bar iron, ¼ in. and heavier	4 75
Angle base	4 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 25
Spring steel	12 75
Crucible Cast Sheet Steel	35 00
Mining drill steel	28 00
Common Cast Tool Steel	20 00
Sleigh shoe steel	6 00
Norway iron	15 00
Toe caulk iron	6 70
Hoop steel	6 00

Higher Priced Garden Shears

Toronto.

Garden shears are quoted at higher prices this season, and the following are prices on some of the better sellers.

GARDEN SHEARS—	Each
No. 75. x 6 inch	$1 60
No. 100. x 8 inch	1 65
No. 100. x 9 inch	1 95
No. 101. x 8 inch	1 95
No. 101. x 9 inch	2 15
No. 101 x 10. inch	2 45
No. 104. x 9 inch	2 90
No. 106. x 9 inch	2.90

Next Season's Sleighs Lower

Toronto.

The new prices for booking for next season on Canadian made sleds and sleighs show a reduction of about 10 per cent. off this season's prices.

Stillson Wrenches Decline

Toronto.

The Canadian made Stillson wrench is now quoted at 45 per cent. off list, and is a reduction of approximately 8 per cent. Notice of a decline was received last week just before going to press and was reported in February 12 issue. The new net prices are as follows:

STILLSON WRENCHES—(net prices)—6 inch, $13.20 per doz.; 8 in, $14.85; 10 in., $16.50; 14 in., $23.20; 18 in., $33; 24 in., $48; 36 in., $90.

English Grass Hooks Advance

Toronto.

An increase of from 10 to 14 per cent. has been made in the price of English grass hooks, and the Fox make is now quoted at following prices per dozen, No. 2, $7.50; No. 3, $8; No. 4, $8.50.

Lower Prices on Pumps

Toronto.

A reduction of from 7 to 10 per cent. has been made in the price of well and cistern pumps of the Jas. Smart make, and the following are the new quotations on some of these lines:

CISTERN PUMPS—Figure 2, No. 1, $3.20 ea.; No. 2, $4.20; No. 3, $4.75; No. 4, $5.20.

Ratchet Braces Revised

Toronto.

Prices have been revised on some lines of ratchet braces, and some of these goods are showing slightly lower prices. Following are new quotations:

BRACES—No. 966 x 10 in., $12.60 per doz.; No. 956 x 10, $17.40; No. 946 x 10, $22.80.

New Level Prices

Toronto.

New revised prices are issued on some lines of Stanley levels, and the following are the new quotations:

LEVELS—No. 00 x 20 in., $13.80 per doz.; No. 00 x 22 in., $14.40; No. o x 24 in and 26 in., $15.60; No. 0 x 28 in. and 30 in., $16.20.

Kraft Wrapping Paper Lower

Toronto.

The market is easier in Kraft wrapping paper and the round rolls are quoted at $14.50 per 100 pounds.

Chalk Lines are Lower

Toronto.

A reduction has been made in the price

of chalk lines, and the new quotations on these are as follows:

CHALK LINES—No. 12½ x 20 ft., $4.80; No. 13 x 20 ft., $4.60; No. 14½ x 20 ft., $3.10; No. 15 x 20 ft., $3.10; No. 12½ x 50 ft., $12.10.

Road Scrapers Reduced

Toronto.

New lower prices are being quoted on road scrapers, and the No. 1 with runners is priced at $15.25 and the No. 2 at $14.80.

Gasoline Down Two Cents

Toronto.

Another decline of two cents per gallon has been made this week in the price of gasoline. This is the second reduction in less than two weeks. The decline in the price of crude oil is the reason for the lower quotations, and as the price of crude oil is now about 30 per cent. below the high level price of last year it would appear that lower prices are possible. The new quotations for motor grade are 38 cents per gallon net.

Coal Oil One Cent Less

Toronto.

Coal oil has also declined, but the reduction is less than on gasoline. As in gasoline, lower crude oil prices are responsible for the reduction. Present quotations are one cent below previous ones, and are 27 cents net for Royalite and 30 cents for Palacite.

Plumbers' Oakum Declines

Toronto.

Reductions have been made in oakum prices, and plumbers' oakum is now selling at $4 per bale of 50 pounds, an approximate reduction of 15 per cent.

Electrical Lines Firm

Toronto.

A fair trade is reported on electrical lines, such as heaters, grills, toasters and irons, although these goods are not moving as rapidly as usual. Prices are holding firm on most lines and the future trend is more likely to be downward than higher, it is stated.

Corrugated Sheets Firm

Toronto.

Sales are light on corrugated sheets at the present time, but a slight improvement is noted. Quotations are unchanged as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	10 50
No. 26 gauge	11 25
No. 24 gauge	16 00
No. 22 gauge	19 00
No. 20 gauge	22 00
No. 18 gauge	28 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Lead Pipe and Solder Decline

Toronto.

A reduction in the price of lead pipe and waste was noted last week, just before going to press. The list price of lead pipe is now 12½ cents, and waste pipe is 13½ cents, and over 8-inch 14½ cents. Solders are showing some revisions. A fair amount of sales are reported for the time of the year. Quotations are the following:

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	Net
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09¾
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 36
Do., strictly, lb.	0 26
Do., commercial, lb.	0 24
Do., guaranteed, lb.	0 28
Do., wiping, lb.	0 22¼
Zinc sheets, per lb.	0 18

Valves and Bibbs Holding

Toronto.

Valves and bibbs are holding at the recent changes. The demand is showing a slight improvement and wholesalers state that stocks are in fair condition. Quotations are as follows:

WASTE

Compression work, standard	34%
Fuller work, standard	30%
Bath cocks, compression	30%
Do., Fuller	30%
Flatway stop and waste cocks, standard	34%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%

J.M.T. C.	20%
Gate or straightway	7/10%
Jenkins Globe	10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening	28%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

F. O. B. factory, Toronto.

No Change in Scrap Metals

Toronto.

The waste metal market shows little change this week, and business is still limited. The consuming demand is still extremely light and it is believed that there will be little change from the present position for a while. At the present low level of red and yellow metals there is little disposition to make sales, as with copper likely to advance dealers are out of the market. The following are prevailing quotations on quantities, and are strictly nominal.

WASTE MATERIAL

No. 2 busheling		$13 00
Stove plate, per ton	19 00	20 00
Yellow brass	6 00	7 00
Red Brass		10 00

Scrap zinc	4 00	4 50
Light brass	4 00	4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	2 00	2 50
Overseas lumbermen's rubber boots	1 50	2 00

Sheets and Plates Steady

Toronto.

While a slight improvement in sales is reported by some wholesalers, business is still light in sheets and plates. Many look for a better showing in these lines within the next few weeks. From present indications it is said that further reductions in prices are unlikely. Following are prevailing quotations:

PLATES

10 gauge	6 20	....
12 gauge	6 25	....
14 gauge	6 30	....
16 gauge	6 40	....

BLACK SHEETS

14 gauge	6 30	7 70
16-gauge	6 40	7 75
18-20 gauge	6 75	7 80
22-24 gauge	6 80	7 85
26 gauge	6 85	7 90
28 gauge	7 00	8 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	9 50	10 50
U. S 28	9 10	10 20
U. S. 26	8 80	9 95
22 and 24	8 65	9 70
18 and 20	8 50	9 55
16	8 35	9 40
12 and 14	8 30	9 35

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Ingots Show Little Change

Toronto.

But little change is shown in ingot metal prices this week and in most cases last week's quotations still hold. Business is still very quiet and sales are light. Tin showed a decline, but recovered to the same point as at this time last week.

TIN.—Cable reports from Singapore announce that the Straits Government fixed price has been withdrawn, and there is open market on tin again. English markets, which showed a decline, are up again at last week's quotations. Local prices are unchanged at 43 cents.

COPPER.—More active inquiries are reported from United States markets though little increase in buying is noted. Producers in the States are looking for a larger European demand to make up for a lower domestic consumption, and at the same time are taking steps to curtail production. Local markets are quiet and prices are unchanged at 19 cents for casting copper.

LEAD.—Outside markets continue dull and and quiet in lead, and an easier tone is reported. In London prices still decline. Business here is dull and quotations are held at $7.

SPELTER.—Little change is shown in this, and locally prices are unchanged at $7.

ANTIMONY.—This market keeps firm and quiet. Prices are unchanged at 8 to 9 cents.

ALUMINUM.—The consuming demand continues negligible and prices are held at 35 to 37 cents.

London Markets

LONDON, Ont., Feb. 17.—Several lines of hardware are quoted at lower levels this week, and among other goods wire nails, Stillson wrenches, sweat pads, turpentine, rat traps, calf meal and chick feed are showing lower prices. Coil door springs are quoted at a slight advance in price. Very fair business is reported in the district this past week and many merchants are making extra efforts to reduce stocks of winter goods and also odd and slow selling lines to make room for shipments of spring and summer goods.

Turpentine Down Five Cents

London, Ont.

A reduction of 5 cents per gallon has been made in turpentine prices since the last market report and new quotations are $1.15 per Imperial gallon in one-barrel lots; $1.14 in 2 and 4 barrel lots, and $1.30 in 5-gallon lots.

Linseed Oil Unchanged

London, Ont.

No change has been made in linseed oil prices, and sales continue light in this product. Quotations are as follows:

	Raw.	Boiled.
1 to 2 bbls, per gal.	1 00	1 03
3 to 5 bbls, per gal.	0 99	1 02
6 to 9 bbls., per gal.	0 97	1 00

Less barrels add 15 cts. gal.

Wire Nails Lowered Again

London, Ont.

The price of wire nails has been adjusted again, and wholesalers are quoting these 10 cents a keg lower. The new prices are the following:

5.10 base f.o.b. London.
5.20 base, Collingwood and Owen Sound.
5.10 base, Windsor, carload freight allowed.

Cut Nails at $6.40

London, Ont.

Cut nails are being quoted here at $6.40 per keg, base price, f.o.b. London.

Irwin Auger Bits Selling

London, Ont.

Good sales are being made of Irwin auger bits. A complete assortment of sizes are now available and quotations on the auger bit are 25 per cent. advance on list. The Irwin car bit is priced at list plus 20 per cent.

Perfect Door Springs Higher

London, Ont.

The Perfect coil door springs, largely sold for screen doors during the spring and summer, are higher in price this season and are quoted as follows: No. 2, 75 cents; No. 3, 85 cents; No. 4, 95 cents; No. 5. $1.10 per dozen.

Mops and Polishes Sell Well

London, Ont.

Good sales are being made on O'Cedar mops and polishes. No changes are made in prices, which are as follows:

MOPS—Nos. 1, 3, 5 and 14, $16.00 per doz. net cash; No. 15, $10.00.
POLISH—4 oz. bottles, $2.40 doz. net cash; 12-oz., $4.80; quart cans, $12 doz; ½ gal, $20 doz.; 1 gal., $28 doz.

Headlight Lenses in Demand

London, Ont.

A very good demand continues here for auto headlight lenses and the Primolite make is selling at $1.65 per pair.

Wood Traps are Lower

London, Ont.

A slight reduction has been made in the price of the Victor mouse and rat traps and present quotations are 40 cents per dozen for the mouse trap, and $1.55 for the rat trap.

Calf Meal Quoted Lower

London, Ont.

The Royal Purple calf meal and chick meal are now about 5 per cent lower in price and the following are the quotations on these and on the Royal Purple laying meal.

CALF MEAL—25 lb. bags, $4.60 per 100 lbs., net cash; 50 lb. bags, $4.55; 100 lb. bags, $4.50.
LAYING MEAL—25 lb. bags, $4.10 per 100 lbs., net cash; 100 lb. bags, $4.
CHICK FEED—25-lb. bags, $4.50 per 100 lbs. net cash; 100 lb. bag, $4.40.

Sweat Pads Decline

London, Ont.

A slight reduction has been made in the price of the yellow sweat pads, and the new quotation is $10.35 per dozen.

Stillson Wrenches Cheaper

London, Ont.

The Canadian make of Stillson wrench is now quoted at 45 per cent. off list, in place of 40 per cent., making a reduction of a little over 8 per cent.

Glass Sales Light

London, Ont.

There is no change in the price of window glass this week, and sales are light at present. Sixty per cent. is quoted off case list for single or double diamond and 60 per cent. off light list for cut lights.

Putty Prices Holding

London, Ont.

No change is reported in putty and prices are maintained. Following are the quotations here.

STANDARD—100 lb. drums, $8.05 per 100 lbs.; 25 lb. drums, $8.30.
PURE—100 lb. drums, $10.55 per 100 lbs.; 25 lb. drums, $10.80.

White Lead is Unchanged

London, Ont.

Prices are holding unchanged on white lead in oil. The following quotations are in effect here.

	Tons.	Less tons.
PURE	$16 95	$17 30
ELEPHANT	17 45	17 80

No Further Rope Change

London, Ont.

No further change has been made in rope prices, and it is holding at decline noted last week. Following are present quotations:

ROPE—No further change. Pure Manila, 24½c base; Beaver Manila, 20c; New Zealand Hemp, 20c; Sisal, 18c.

Netting and Screen Wire Move

London, Ont.

Shipments of spring goods are beginning to move out, among them being poultry netting, which is priced at list plus 10 per cent. for both 1 inch and 2 inch mesh, and screen wire cloth on which the price this season is $3.50 per 100 square feet.

Garden Tools Start Moving

London, Ont.

Among the lines for this season on which shipments are now being made are garden tools, harvest tools, and spades and shovels. Harvest and garden tools are selling at 50 and 10 per cent. off list, and spades and shovels at 35 per cent. off list, with 50 cents net per dozen added for half polished and $1 for full polished.

Screen Door Hinge Prices

London, Ont.

The No. 20 and the No. 200 spring screen door hinge is selling at $28.80 per gross pairs. Smaller lots are priced at $2.50 per dozen pairs. These lines are beginning to move out.

Water Paints Moving

London, Ont.

Spring shipments of water paints are starting to move out. Quotations on Alabastine are 40 per cent. off list.

Shipping Sap Supplies Now

London, Ont.

Sap supplies are beginning to move now, and the following are this season's quotations:

I. C. SAP PAILS—	
10 quart, flaring, per 100	$26 25
2 gallon, straight	26 25
SAP SPILES—	
Eureka, per 1000	$16 85
Do., per 100	1 75
S. M. P. make, per 100	3 80
SYRUP CANS—	
Quarter gallons, per 100	$13 50
Half gallons	19 00
One gallons	26 00

Winnipeg Markets

WINNIPEG, Feb. 17.—There are some important changes this week and the following lines are all showing a decline, wire nails, cut nails, rope, rubber belting, copper rivets, Canada plate, Always Ready wrenches, bright market, and solder. Ready mixed paints are reduced in price. The iron and steel market remains very firm and there seems no immediate prospect of any change of importance unless wages or other producing costs decline. There has been a marked improvement in the hardware trade during the past week, more orders are arriving from outside points and travellers are reporting an increase in business.

No Change in Turpentine

Winnipeg.

The price on turpentine remains the same as quoted last week, namely, $1.65 per gallon in barrel lots; small lots 10 cents per gallon extra and containers 25 cents per gallon extra.

Linseed Oil Advances 5 Cents

Winnipeg.

Linseed oil, which has been on the decline for the past few weeks, has taken a sudden change and has this week been advanced 5 cents per gallon. Quotations for this week are: Raw, $1.25 per gal.; boiled $1.28 per gal.

Agricultural Wrenches Higher

Winnipeg.

The prices on agricultural wrenches have been advanced this week and are quoted as follows: 6-in., $9.60 per doz.; 8-in., $10.80 per doz.; 10-in., $12.60 per doz.; 12-in., $16.20 per doz.; 15-in., $21.60 per doz.

Always Ready Wrenches Down

Winnipeg.

The price has declined on Always Ready wrenches and they are quoted as follows:

NICKEL PLATED—No. 1, $5 per doz.; 2, $6.75.
BLACK—No. 1, $4.60 per doz.; 2, $6.30.

Another Decline in Nails

Winnipeg.

The price has declined on wire and cut nails this week and is 50 cents per keg lower. The base price Winnipeg for wire nails is $6.45 and Fort William $5.80. Cut nails, base price, Winnipeg, are $7.75.

Reduction on Rivets

Winnipeg.

The prices have been reduced for copper rivets and burrs and assorted copper rivets and burrs. This week's quotations are as follows:

COPPER RIVETS—No. 8, 42½c per lb.; 10, 46c; 12, 49¼c.
COPPE RBURRS—No. 8, 42½c per lb.; 10, 46c; 12, 49¼c.
ASSORTED COPPER RIVETS AND BURRS—No. 8, 47½c per lb.; 9, 49¼c; 10, 51c.

Fence Staples Lower

Winnipeg.

The price has been dropped on fence staples, bright and they are quoted at $6.05 per 100 lbs. at Fort William and $6.70 at Winnipeg.

Another Reduction in Wire

Winnipeg.

The price of wire has declined this week and following are the new quotations:

ANNEALED—No. 0 to 8, $6.75 per 100 lbs.; 9, $6.85; 10, $6.90; 11, $7; 12, $7.05; 13, $7.25; 14, $7.35; 15, $7.60; 16, $8.05.
BRIGHT WIRE—No. 0 to 8, $7; 9, $7.10; 10, $7.15; 11, $7.25; 12, $7.30; 13, $7.50; 14, $7.60; 15, $7.85; 16, $8.30.
COPPERED SPRING WIRE—No. 8, $10.70; 9, $10.80; 10, $10.85; 11, $10.95; 12, $11; 13, $11.40; 14, $11.50.

Rope Drops Another Cent

Winnipeg.

Another cent reduction has been made on rope and the following prices are now in effect:

SISAL—¼ and 5-16, 22¼c per lb.; ⅜, 21¾c; 7-16, ½ and 9-16, 21¼c; ⅝, 20¾c; ¼ and larger, 20¼c.
BRITISH MANILA—¼ and 5-16, 24½c per lb.; ⅜, 24c; 7-16, ½ and 9-16, 23½c; ⅝, 23c; ¾ and larger, 22½c.
PURE MANILA—¼ and 5-16, 29¾c per lb.; ⅜, 29¼c; 7-16, ½ and 9-16, 28¾c; ⅝, 28¼c; ¾ and larger, 27¾c.
SISAL LARIAT—3 x 7-16, 25¼c per lb.; 4 x 7-16, 26¼c.
MANILA LARIAT—3 x 7-16, 32¾c per lb.; 4 x 7-16, 33¾c.
LATH YARN—20¼c per lb.

Reduction in Canada Plate

Winnipeg.

The price of Canada plate which has been nominal for some time past has declined lower than it has been for a long while. Some shipments have been received and conditions look better. The following prices are quoted this week:

CANADA PLATE—(ordinary)—18 x 21 inches, $11.50 per box; 18 x 24 in., $11.50; 20 x 28 in., $11.75.

Paint Prices Reduced Again

Winnipeg.

Reductions have been made in the price of paints and are as follows: First grade paints, white is reduced 60 cents per gallon; colors are reduced 70 cents, and porch paints are also 70 cents less. Inside floor paints have been reduced 25 cents. The second quality paints in white and colors are 50 cents per gallon lower. It is stated that no further guarantees will be given covering the future as was done last December when the previous change took place. Retailers who have received deliveries of spring bookings will be given credit for the difference between their invoices and the new prices. Paint manufacturers state that costs must be forgotten and they—the manufacturers—must bear their share of reconstruction losses. They believe that the paint trade has done all possible to meet customers and the public interest, and confidently expect liberal support on the new price basis.

Bale Ties Marked Down

Winnipeg.

The price of bale ties has been marked down and they are now quoted $7.25 Fort William and $7.90 Winnipeg.

Pittsburgh Markets

PITTSBURGH, Feb. 17.—The markets continue dull and the question of price has become more prominent. One of the independent mills is reported to be out for business at prices below the regular market quotations, and in the event of any active business being secured it is likely that other companies will follow. It is believed that the effort to interest buyers has not met much success, and the apparent willingness to accept lower prices will make purchasers even more cautious and prices more indefinite than they have been since last fall.

The falling off in the production of the Corporation, subsidiaries has been more pronounced this past week, and with new business lighter it is probable that operations will show a further reduction. The pig iron market reflects no increase of interest on the part of melters.

PITTSBURGH, Feb. 17.—This week has shown the first definite breakaway from the Steel Corporation schedule. Many buyers have refused to regard that schedule as final and they are feeling now that their belief has ground in fact.

The Midvale Steel & Ordnance Co. has instructed its sales offices to find out the prices at which orders can be secured and also has granted authority to take the business. The drive on the part of this company has resulted in definite offers of tonnages of the major products at well below the regular market quotations. Since the instructions were not written it is difficult to obtain actual information as to the prices named, but it has been verified that it named 2.25c., Pittsburgh, on shapes and bars.

Unverified reports have been current of quotations of 2c on bars and it also is rumored that the same price was named against a tonnage of plates in the Chicago district.

Other independent interests have done nothing in the matter of price cuts, but it is patent that in the event any business is uncovered by the company which is active in this respect the others will go along.

So far as can be learned the effort to interest buyers in purchases at practically their own prices has not been successful. This, however, was to be expected, in view of the fact that the first effect of a sudden reduction in prices usually is to make buyers cautious. The Steel Corporation subsidiaries meanwhile are holding to the level of prices which it has observed now for almost two years, and apparently they are content to wait to see what success attends the efforts of independent companies to secure business at lower prices before taking any action either as regards selling prices or wages. It is pretty well established that the cutting of prices by independent companies is to be accompanied by lower wages, and since the rates of Pittsburgh and Youngstown companies have not yet been disturbed it is figured that the acceptance of business at the prices named would involve a cut in wages of as much as 30 per cent. The market is even duller than it has been as a result of the apparent willingness of independents to consider lower prices, and prices are even more indefinite now than they have been at

Hamilton, from the mountain

Industrial Activity on a Broad Scale

is found in the

CITY OF HAMILTON

where the

Ontario Retail Hardware Merchants Gathered this Year in Convention

The logical gathering place of Ontario retail hardware merchants is in the city where a very large proportion of the lines they handle every day, are manufactured.

Phenomenal Growth During 1920

HAMILTON is so important an industrial centre that it claims to be "The Industrial Hub of Canada," and to have grown to be a banner industrial city boasting 737 diversified industries, without becoming a "factory town" with all that term implies, has been its unique experience.

Evidence of the remarkable stability of its industry is found in the continued development recorded during 1920. In his annual report for last year, just now presented to the Hamilton Board of Control, C. W. Kirkpatrick, Commissioner of Industries, stated that 27 new industries had been added to the city's total, and that the grand aggregate was now in the neighborhood of 700. The 1920 additions represent a total capitalization of $7,440,000, and will employ 1,500 persons when in full operation. It is noteworthy that the three largest concerns are practically all connected with the hardware industry. Canadian Libbey-Owens Sheet Glass Co. will make sheet glass, and it is proposed to make automobile windshields by a special process; incidentally, the parent organization, manufacturing at Charlestown, West Virginia, has devoted a large part of its production capacity to that line. The Moto-Meter Company will make the apparatus of that name, and the Canada Color Type Company manufactures embossed license plates for the Ontario and other Provincial Governments.

Three Millions in Buildings

W. D. Shambrook & Co. have commenced the manufacture of aluminum ware. Permits for extensions to factories and for new construction were said to total $1,412,200, not including the Libbey-Owens Glass plant and the Firestone factory, which would bring the aggregate to about $3,000,000.

The shortage of electrical energy was mentioned by Mr. Kirkpatrick as a drawback. The prospect that the Chippawa development will be completed in the fall of 1921 makes it reasonable to suppose that power difficulties will be overcome. The Commissioner of Industries of Hamilton finds that some of the American companies that are considering the establishment of branch plants in Ontario desire to secure temporary quarters until such time as they can buy or build factories.

"No Bonusing" Policy

Mr. Kirkpatrick asserted that no industries were secured by offering bonuses, tax exemptions, bond guarantees, or other special concessions. "Industries that are dependent on assistance from the municipality for their assistance are more frequently a detriment than an asset to the community in which they locate," says the Industrial Commissioner. "The substantial manufacturer is quite willing to stand on his own feet

BEAUTY SPOTS OF HAMILTON

Looking Southeast Toward the Mountain

The Fountain in Gore Park

Where Beauty and Industry Combine

and pay his own way, providing the municipality shows a desire to deal reasonably with him in the matter of supplying the facilities necessary to the successful conduct of his business, such as water, sewers, etc., and passable roads."

Beauty and Industry Combine

With all this industrial development, Hamilton does not lack in beauty spots. The city nestles on the shores of Hamilton Bay with a beautiful land-locked harbor, at the head of Lake Ontario. It is sheltered at the south by the Niagara Escarpment from the summit of which a panoramic view of the city below, with the bay and lake in the distance, unfolds in picturesque magnificence. Wide, well-kept thoroughfares are bordered by a profusion of shade trees, impressive public buildings, handsome residences. To the west lies the beautiful Dundas Valley, to the southeast the bountiful "Garden of Canada," to the north the shimmering waters. The Mountain is the city's proudest boast to beauty. On its summit thousands of citizens have made their homes, two incline railways and a picturesque driveway making the top easily accessible.

Hamilton is truly a place where people "live" as well as work.

Corrugated T-Hinges, Trap Door Rings,

These Lines Were Booth 47 During

No. 1917 Hanger with No. 1918 Track and Brackets

This is the only self-cleaning track on the market. It will not hold dust or water. As shown in the sectional view, the carriage is protected from weather—from snow and ice, and accumulations that might interfere with smooth running of the hanger in its track.

Corrugated T-Hinge

No. 210 Corrugated T-hinge (bulk)—a strong, neat, light hinge which is replacing the heavy type hinge. The corrugations strengthen it. The finish is better than the old type iron hinge.

Trap Door Ring

No. 1215 Trap Door Ring, size 3½ in. Wrought steel flush trap door rings, baked japan finish. Packed half dozen in carton, with japanned screws. Supplied also in galvanized or plated finish at additional cost.

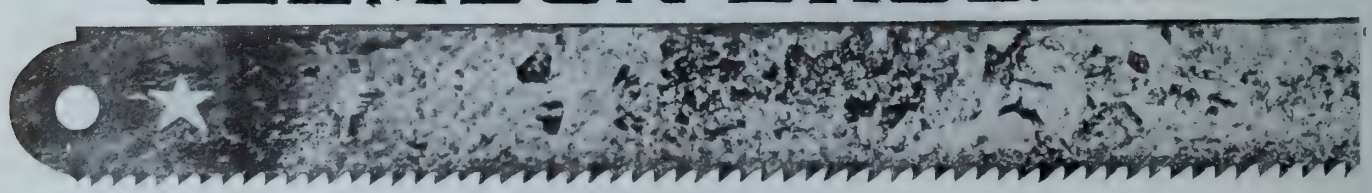
Let's get down to cases on this Hack Saw business

You can't carry all the different saw blades that salesmen are trying to force on you. If you did, you would have a lot of money tied up in stock that would take a year or more to move.

Why not do what the leading hardware dealers are doing and cut down to one or two lines and make quick turnover boost your profits?

Then the question arises: "What lines shall I choose if I cut down?"

Here is the answer that was recently given to that question the other day by a New Jersey mill supply man.



He said: "Years ago we carried seven or eight different brands of saws but decided to cut out many that were hard to sell. To-day we carry but two brands, Star and the X brand. And I have noticed this — at times when through oversight a Star user has been sent an order of X blades, he is always very quick to register a protest and insists upon Star.

"Star users' experience and their reading of Star advertising have made them insist on the brand so that we simply have to carry Star Saws."

Probably you will agree that the merchant makes the greatest success who doesn't wait to be coerced but finds the lines of least resistance himself and takes advantage of them.

Geo. N. Clemson *President*

CLEMSON BROS. INC.

If interested tear out this page and place with letters to be answered.

Star Hack Saw Signs

Are lithographed on tin and show the actual blades. A small sign with striking display value for use of retail and mill supply dealers sent free on request.

Star quality and Star advertising make Star hack saws the line which is most called for and most readily accepted.

When you carry Star you can satisfy every hack saw demand as with no other blade. Star users are legion and you can never make a Star user believe another blade is "just as good as Star."

Don't buck established demand. Push Star Saws and cash in on it.

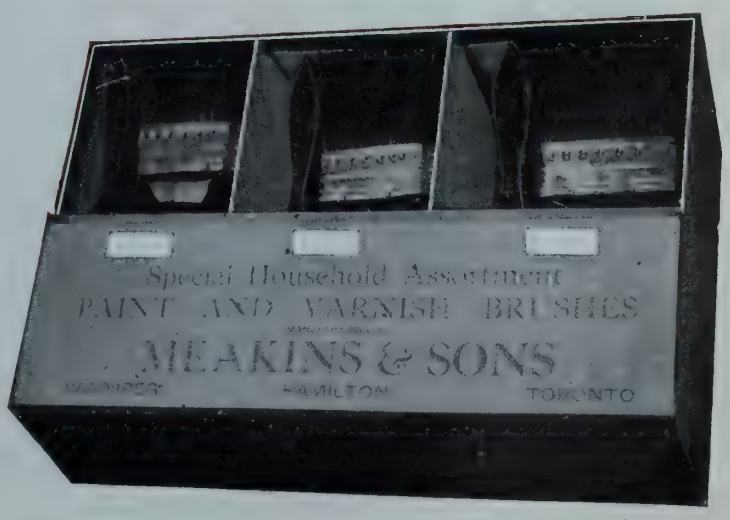
Silent Partners



Counter Displays that Make Sales

You were interested in our display at the Hamilton Hardware Convention, so here are two examples of counter displays that will hold your attention as sales-makers. A Meakins counter display is really a silent partner in your business; placed upon your counter it catches the eye of your waiting customers and draws attention to the quality materials, skilled workmanship, and superior finish of Meakins Rubber Set Brushes. These attractive displays close many profitable sales.

Write for complete Catalogue. Order through your jobber.

PEERLESS FENCES

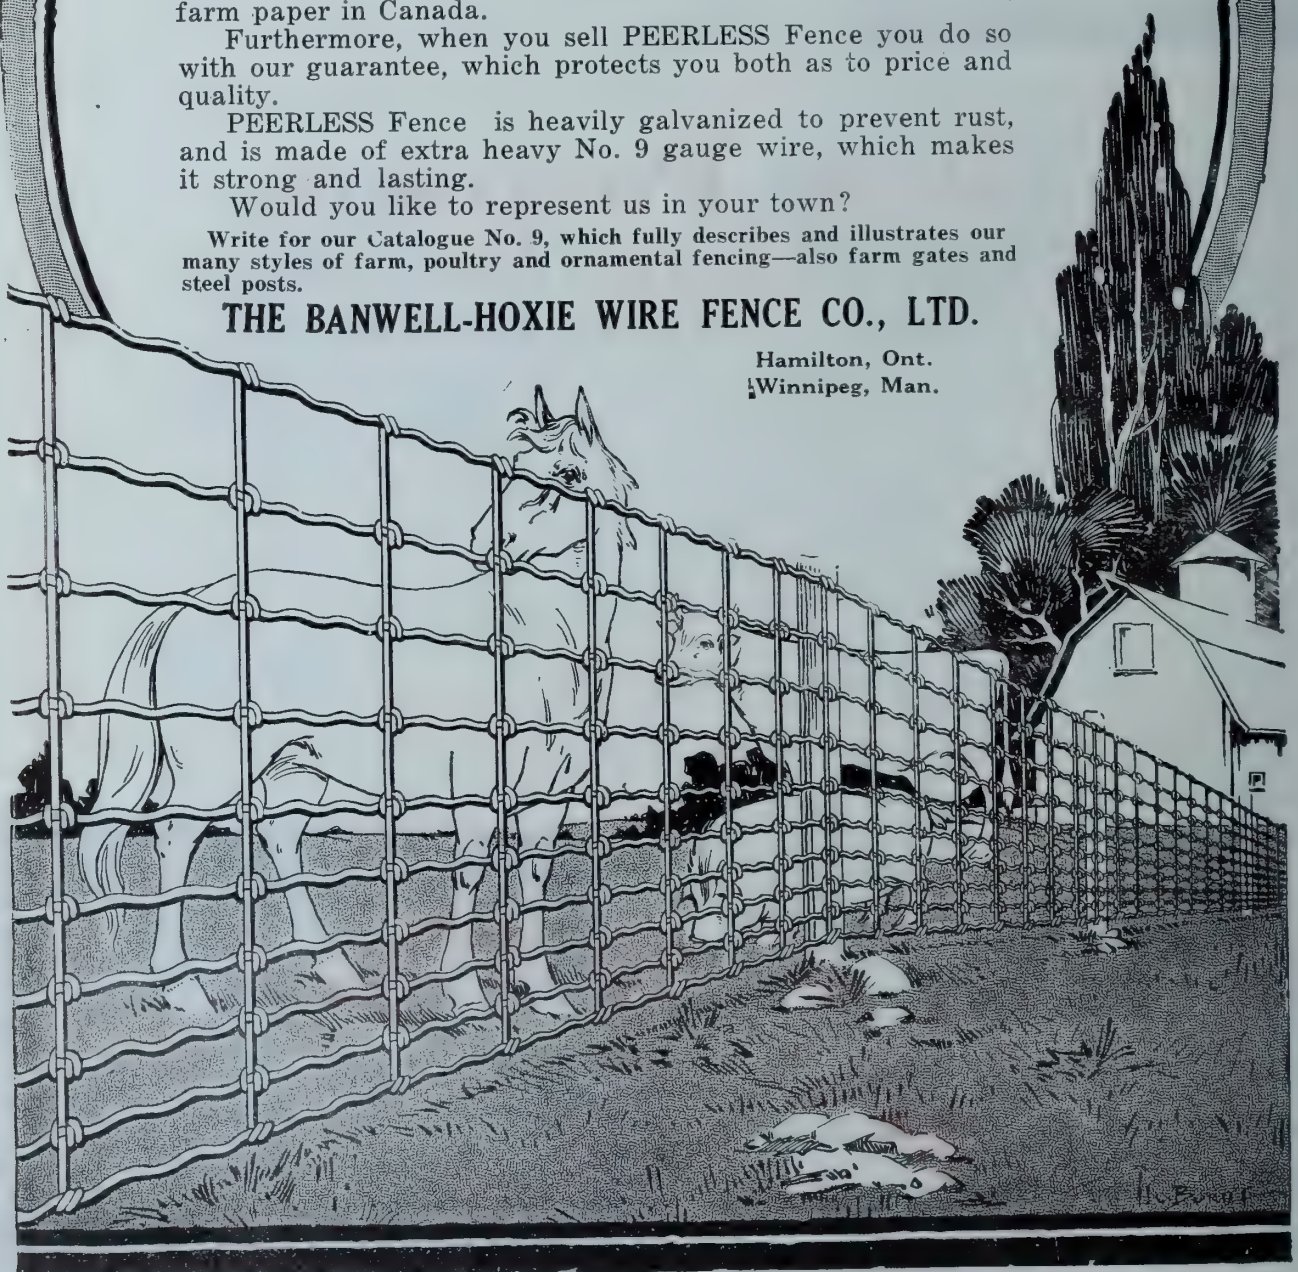
STAND EVERY TEST

Some Fence Manufacturers' advertisements appearing regularly in leading farm papers advise the farmers to buy direct, thus saving the middleman's profit.

If these Manufacturers wish to eliminate the Dealer, it is of course none of our business, but we call your attention to it in order that you may know their policy as compared with ours.

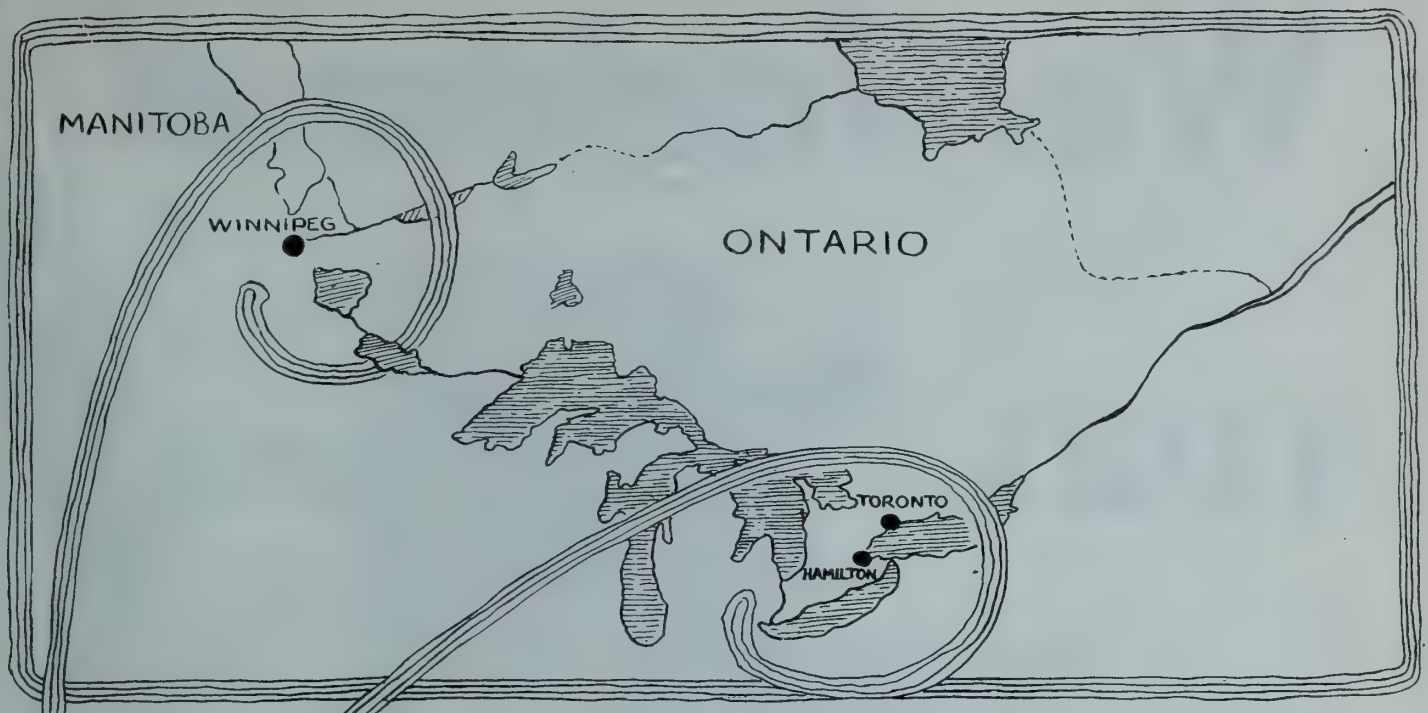
We consider our Dealer Connection the greatest asset in our business, and in return for your co-operation we back you up, not only with the best quality fence, but also a fair margin of profit and good advertising in every worth-while farm paper in Canada.

Furthermore, when you sell PEERLESS Fence you do so with our guarantee, which protects you both as to price and quality.



PEERLESS Fence is heavily galvanized to prevent rust, and is made of extra heavy No. 9 gauge wire, which makes it strong and lasting.

Would you like to represent us in your town?



Write for our Catalogue No. 9, which fully describes and illustrates our many styles of farm, poultry and ornamental fencing—also farm gates and steel posts.

Westinghouse

Reputation and Sales

The good reputation that Westinghouse electrical equipment has is an important sales force.

The turnover toaster upholds this reputation by giving clean, crisp toast at an inconsiderable power cost.

Reputation, the kind that Westinghouse electrical equipment has, boosts sales.

The turnover feature sells the toaster.

A trial is proof.

Should Retailers Display Your Goods?

Do You Set a Good Example?

RETAILERS have their displays in "silent salesmen," and in windows where the goods appeal silently to the desire of every passer-by.

And your goods—where do you display them to create desire in the buyers of the Canadian hardware trade?

There is one street, with one great national display window, where the hardware buyers of the Dominion throng each week eager and interested to see what new goods, new models or new messages are displayed to the trade there. This national display window is the advertising section of HARDWARE AND METAL. Its pages are intently studied each week by all the wholesale hardware buyers of Canada and over 90% of the retailers.

Let us show in detail that it pays you to display your goods in HARDWARE AND METAL's National Show Window.

Cave Man at the Wellworth Exhibit

A Big Sensation

For grotesqueness and daring originality, Artist Moore of Hamilton exceeded himself in picturing this strange and grotesque creature — the Cave Man of the hazy past, millions of years ago. The Wellworth "better quality" aluminumware exhibit used this picture alongside a modern setting containing aluminum cooking utensils on an electric stove, to illustrate the wonderful progress that has been made since the early days of man.

Alongside of this exhibit was a series of sixteen picture stories showing the evolution of cooking utensils from the "stone age" to the "aluminum age."

The crowds that gathered in front of this booth was eloquent tribute to the good judgment used in arranging the display.

In these modern competitive times the display must not only be interesting but must also be instructive, and the Wellworth people supplied both these requirements in an excellent manner.

Changes in the Markets

Fewer Price Changes With Paint the Chief Feature This Week

PRICE changes in hardware commodities often seem to occur in waves or cycles. One week there will be quite a number of declines or advances, and then for a week or two there is a comparatively quiet period with few alterations. This week there are fewer changes to record, and as has been usual during the past few months they are mostly in a downward direction. Practically the only lines reported as advancing this week are English-made garden tools, shears and grass hooks. Despite the opening up for export trade again of the German markets and the competition from that source, with the low exchange value of the mark, there does not appear to be any signs of reduction in English cutlery prices, and shipments of Sheffield lines show little difference in quotations.

Canada Plate Available at Decline

Canada plate is becoming available again in better quantities, and at a lower price, and the shortage which was experienced last year should not be repeated this season. The condition in tin plates is not so favorable and prices are holding more firmly. It is believed that there will be a more favorable turn later on. The Welsh tin plate industry is stagnant and many of the mills there are closed down, and one of the reasons given is that present prices are below the cost of production.

Paint Prices Lowered Again

Prepared paint prices have been revised this week, and a reduction made in all lines of first grade house paints, and in floor and porch paints. Second grade paints show a smaller reduction. Paint manufacturers at recent meetings were reported as saying that present market conditions did not warrant any decline in prices at the present time, but later on decided that they would forget costs and bear their share in readjustment conditions.

The new quotations bring paint back to the price set at the beginning of October, 1918, and which were in force until the end of June, 1919. From that time until a twelvemonth ago the price of paint was advancing, and the new prices are approximately 23 per cent. lower than the high level price which was in force during the greater part of 1920.

GENERAL MARKETS

Continued from page 96

any time since the reaction in business set in last fall.

The recession in the activities of the Steel Corporation subsidiaries has been rather pronounced in the past week. The Carnegie Steel Co. has one less active blast furnace than a week ago, and while it has all of its ingot making capacity on except its Sharon, Pa., works, production is not over 90 per cent. of capacity, and finishing mills are not as fully engaged as they were recently. With new business on a very light scale as compared with completed tonnages, it is probable that before the end of the month total operations now averaging close to 90 per cent. will be below 80 per cent. The company at an early date will shut down its Columbus, Ohio, works, due to the lessened demand for sheet bars from the American Sheet & Tin Plate Co., which as far as sheets are concerned is not nearly so busy as it was recently. The American Steel & Wire Co. has experienced no improvement in business and its plant operations still are declining. The National Tube Co. is the one subsidiary organization which continues to run full.

The increases in independent steel company operations are only partly sustained, for new orders have not been coming forward in volume sufficient to offset those which have been completed.

The pig iron market reflects no increase in interest on the part of melters, although one large company in the week under review bought about 2,000 tons of foundry iron for early delivery.

BUSINESS MUST NOW HIT ON ALL FOUR

Continued from page 62

mosphere of these afternoon gatherings was very helpful. The booths, from the standpoint of arrangement and decoration, left nothing to be desired. No limit was put upon the effort expended by the various exhibitors to make their booths attractive and instructive, and many novel arrangements were to be found. Everyone was in good spirit and took a keen interest in examining the lines exhibited and in conversing with the various representatives in regard to business conditions in general. A list of the exhibitors is found elsewhere in this issue. In addition to these there were many manufacturers represented in person.

Introduce New Members

Prior to the commencement of the Tuesday evening session, President Wanless called for the introduction of any new additions to the membership. John Hanna, Walker Hardware, Belleville, Ont., and mayor of the city, was introduced by F. B. Smith, also of Belleville. Mr. Kingdon, of the Kingdon Hardware, Peterboro, was also introduced as a new member.

The business of this session consisted of the presentation of the report of the executive committee on the Permanent Secretaryship and the addresses of President Wanless and Secretary Macpherson on the duties and scope of the secretary's work, what the secretary owes the members and what the members owe the secretary. These reports appear elsewhere in this issue. In this connection brief mention was made of the price book service being planned. It was mentioned that the pages showing changes would be supplied weekly, that only the general lines of hardware could be covered in the initial volume and that other lines would be added from time to time. Mention was made of the price service extended by wholesalers in the United States for which a charge of $12 to $15 is made to customers.

At this point the question of the cost of the price book service and its relation to the regular membership fee was brought forward by M. Phillips, Toronto, whose idea it was that a straight fee of $15 should be charged, including the price book service, thereby making it compulsory for all members to take the service. President Wanless explained that the idea of the executive committee was to leave it optional with members as to whether or not they would take the price service.

No Increase in Fees for 1922

This discussion was followed by a motion by M. Phillips, Toronto, seconded by Mr. McGregor, Oakville, Ont., that the membership fee for 1922 be $10 instead of $5. F. B. Smith, Belleville, supported this motion, but it was defeated when put to a vote.

The nomination of officers was proceeded with and resulted in acclamations for those nominated. The officers elected are shown elsewhere.

The question was raised by M. Phillips as to why the name of Benjamin Moore & Co., Ltd., was mentioned in the convention program when a booth was not occupied. It was explained by President Wanless that this company upon being given the opportunity of taking a booth responded by forwarding the cost of a booth to the association secretary to help the association work, but declining the opportunity of arranging an exhibit.

An interesting feature of this session was the "Game of Cards" in which many questions of interest to hardware merchants were asked and answered. These questions and answers are reprinted in full elsewhere in this issue.

Coleman Lamp Co., Toronto

Mr. Coleman gave a brief talk on the advantage of merchants selling quality

Continued on page 140

Strategic Loss Essential

Continued from page 85

nace. Under his hand the iron is further fused, carbonized into steel, drawn out, forged, tempered, heat soaked and quenched in liquid of some nature to improve its tempering and finally ground and polished with great care and patience. When this work is done he shows the astonished blacksmith $1,000 worth of knife blades, where the latter only saw $10 worth of crude horseshoes.

In our present shop practice this man's remuneration would be based on count and quality.

Along comes another artisan and looking at the product of the cutler, he says: "Knife blades are all very well if you can make nothing better, but you haven't half brought out what is in that bar of iron." He can see higher and better uses. The third artisan has a more delicate touch, finer perception, higher ideals, better training and superior determination, which enable him to look still further into this rough bar—past the horseshoes and past the knife blades—and he turns this crude iron into the finest needles, with eyes cut with microscopic exactness. The production of the invisible points requires a more delicate process, a finer grade of skill than the cutler possessed. This feat is considered marvelous and the third artisan thinks he has exhausted all the possibilities of the iron because he has multiplied the value of the cutler's product many times.

This man's daily remuneration would undoubtedly be based on quality only.

Along comes still another skilled mechanic with a mind more finely organized and a still more delicate touch, more patience, more industrious and higher order of skill, together with better training, and he passes with ease by the horseshoes, the knife blades, and needles and returns the product of his bar of iron in fine hairsprings for watches. Where the others saw horseshoes, knife blades and needles only worth a few thousand dollars, his penetrating eye shows a product worth tens of thousands and following the process down still further we find the little barbed instruments used by dentists to draw out the finest branches of dental nerves being sold at a price worth hundreds of times as much per pound as gold itself.

The remuneration of this classification of man is fixed neither on weight, count nor quality. His type is so scarce and so much in demand that he commands the maximum wage with the minimum output.

By the application of this human energy, intelligence, skill, patience and scientific training, together with the use of modern plant equipment and machinery, our products of commerce are produced, and in some particular lines the price of pig iron per ton at the blast furnace practically has no meaning at all, because the one main thought, the one big factor that enters into the whole proposition, is the value of the human energy involved.

These are my reasons for advising you never to use the old stereotyped phrase—that pig iron is down.

Decline Comparisons

Comparing advances of average commodities between the years 1914 and 1920 we find the following comparative views. The United States has reduced these advances 66 2-3 per cent., England 40 per cent., France 25 per cent. and Canada 30 per cent.

Therefore, taking these other countries as a competitive basis, we must have a further average reduction of 10 per cent. to be on a par with Great Britain, or a further average reduction of 36 2-3 per cent. to be on the same footing as the United States.

Equal Contribution

When the manufacturer and the jobber and the retail man contribute to deliver goods to the consumer and having done their bit by contributing their surplus profit, and the ultimate consumer still maintains the attitude that the price is still too high, only one factor remains, namely, wages, and if wages will not contribute, then production ceases until it does. Wages must conform to the new basis of commodity prices, not because we want it so, but from the very nature of things.

When I use the word "normal" I do not by any means mean to convey pre-war prices, because I feel that we could be a happier and more prosperous community if wages received their better share of reward than in the old pre-war days, and I am inclined to think that wages will.

Retailers' Attitude

Recently the Financial Post sent out a questionnaire to the bank managers from coast to coast on which were six questions, and one of the most important questions included was: "Is the retailer reducing prices as far as conditions warrant?" Two hundred and sixty-eight centres reported that retailers were NOT making price reductions warranted by conditions; thirty centers reported doubtful replies, and two hundred and fifteen reported Yes. The genuineness of sales being held in many places was seriously questioned by the bank managers, who pointed out that the retail trade does NOT feel disposed to take its losses.

Dull Seasons

Dull seasons call for economies and it is always good business practice to keep your assets liquid. Cash on hand is more useful than shelves full of stagnant stock bought at prices the public will not meet. Ready money makes it possible to purchase new fresh goods at present values and puts the merchant on an up-to-date selling basis. It is sometimes better strategy in taking a loss than by sitting tight and playing a waiting game. A strategic loss nowadays seems to be essential to a most effective offensive. The manufacturers and jobbers have taken theirs—WHY NOT YOU?

Business Prospects

The hardware business depends considerably upon building activity. MacLean's reports predict that millions will be spent in Ontario during the year 1921. The long delayed building program must start soon. The natural increase in population, not counting immigration, is 3½ per cent. Take Ontario's population, the last estimate of three million, and with a natural increase of 3½ per cent., and carry this down to a further basis of four members to a family, Ontario should have, with a five-year delayed program, 125,000 new houses at once to supply the present normal demand. Aside from that we must replace the housing and other building shortage caused by our national bonfire, as statistics show that for 1920 twenty-eight million dollars worth of buildings were damaged or destroyed by fire.

All elements in our national make-up seem to be willing to go down the bump-the-bumps but labor, and it seems to prefer to simply look on as a bystander and watch the sport.

We are all anxious to get back to normal, but can we do so until every factor contributes, and normal wages and profits are resumed?

Nobody knows whether prices are going down to pre-war levels or not. It does not now seem probable that they will in view of the difficulty of deflating wages; but one man's guess is as good as another, so all we can do is "hope." Not the hope that sits idly and waits in uncertainty but the hope that works and makes dreams come true. Normal times will return when the minds of men become normal.

In the meantime let us adopt that new Canadian slogan—"Let us throw the hooks into our jobs instead of into each other."

The various processes in the production of iron from the ore, showing the relation of labor, were described as follows:

First—Steam shovel from mines and tools or burden.

Second—Railroad to upper lake port and burden ore.

Third—Dock organization—loading into boats—burden.

Fourth—Lake transportation—burden.

Fifth—Unloading at Lake Erie port—burden.

Sixth—Railway transportation to furnace—burden.

Seventh—Blasting ore into pig—burden.

Eighth—Rolling mill—pig iron into bars—burden.

Ninth—Manufacturing bars into tools, etc.

Note—It takes four tons of iron ore besides limestone and coke to make one ton of steel. Three tons ore plus all its burden are waste.

Selling Service Instead of So Much Paint

Many Other Things for the Paint Salesman to Sell—Timely Use Of Paints and Varnish During 1921 Will Prevent Much Deterioration—Better to Save the Surface Than the Pieces

Written exclusively for Hardware and Metal by Frederick Arnold Farrar

THERE are many things for the store salesman in the paint department to sell besides paint, that is, so much goods in the can. The real thing he should be selling is service, and he will make sales just in proportion, not only to the service the goods render but the service he, as a paint salesman, is able to supply.

There are no end of good arguments in the way of painting now, for wealth depends quite as much upon conservation as on production. The timely use of paint and varnish during 1921 will prevent an enormous waste of property due to deterioration. Postponed painting is false economy—just tell this to your trade.

In the long run it costs more not to paint than to paint. Don't forget that when you "Save the Surface You Save All," and it is better to save that surface than to save the pieces—and tell your customers that every time they save a surface they help to reduce the cost of living.

Economy Is Spending Judiciously

Tell them that economy is not so much a matter of going without as in spending what you have judiciously. Of course, to this the keynote is proper planning—the average home owner knows what has to be done to his property to keep it in running order, and certain repairs and replacements are inevitable, for which provision must be made in the household accounts. If the cost of protecting surfaces is figured against the cost of replacement, they will all give paint and varnish a place in the 1921 household budget.

Here are some good suggestions for planning late winter painting and varnishing:—

The woodwork.
The walls.
The floors.
The dresser.
The closet shelves.
The fireplace and mantlepieces.
The fruit closet or the hanging shelves in the basement.
The linen chest.
The inside steps.
The medicine cabinet and bathroom accessories.
The built-in flour or sugar bins.
The bench which holds the laundry tubs.
The easily moved pieces of furniture.
The outdoor furniture which is stored for summer use.

All these are but a few of the possibilities.

Painting the Walls

There is also a great advantage in painting walls. The plain painted wall is growing in popularity, the ornately papered rooms are going out of vogue. There are many paints which can be washed, and the keeping of light paint clean and fresh looking is generally only a matter of soap and water, or some good prepared cleaner. It is a truly economical state of affairs when a whole room can be freshened and brightened by the housewife herself.

We are just giving you a lot of points which you can pass on to the buyer, points which will help you in your selling talk to influence a sale.

The choice of color for walls should be made in relation to the finish of the floor, the size and location of the doors and lighting facilities, not forgetting the draperies and rugs—so when a woman comes in to buy paint, ask a few of these questions. It will evidence interest in her individual case and inspire friendship.

Color Combinations

The room which has plenty of sunlight can stand a darker wall than one of northern exposure. A too light wall in a sunny room will be glaring, no matter how well the floor and woodwork are finished. The colors of neutral browns, grays, greens or even blue without a lustre are the most appropriate for a sunny room.

A small room will look larger if the walls are of a neutral gray and painted with a rather flat finish. On the other hand, halls, dark passages and rooms which get little or no sunlight can best make use of what light they receive by reflecting it in light colors, while buff, or salmon, light tans, or even a warm pink glare with a high lustre.

There is a great market for paints at this season of

Urges Buying Canadian Goods

T. S. Simms & Co., Brush Manufacturers, Address Letter to the Staff re Purchases of Foreign Goods

ST. JOHN, N.B.—T. S. Simms & Co., Ltd., of St. John, N.B., are showing to their employees by way of a circular letter the importance of buying Canadian made goods whenever possible. Excerpts from this letter are as follows:

Dear Fellow Workers:

As I have had the opportunity of comparing notes with many other manufacturers in the past few weeks, I have been impressed with the fact that Providence has favored our industry in a very marked way above the many, in carrying us through this winter with sufficient orders to keep everybody busy on full time.

As you probably know, many plants have been down for a long period and are still down and many others are running on decidedly short time. In the face of these facts, some figures that have just come to my attention have startling significance and as there seems to be such a good opportunity for each one of us to not only make a contribution to insuring, in so far as possible, continued steady employment in our own industries, I will briefly place the facts before you in an appeal for co-operation on the part of each.

For the year ending 1920, we Canadians imported goods valued at $1,345,582,300 as against $920,082,927 for the previous year, an increase of $425,499,373.

On much of these imports Canadians paid exchange reaching as high as 17¼ per cent. We are paying heavy exchange in spite of the fact that thousands of Canadian workers, who are willing and able to produce the most of these imports, are out of employment, because Canadian factories are running part time or closing down because they lack orders for goods. The unemployed men and women in many, many places and their families are being supported at public expense, involving additional burden to taxpayers.

There is no doubt that if Canadians united in a resolve to buy Canadian-made goods as far as possible instead of imported goods, most of the problems of trade depression and unemployment would be quickly solved.

Will you not do what you can individually both in regard to your purchase and by talking to everyone that you can influence, to not only protect yourself, but to help the other fellow by making sure, wherever possible, that goods made in Canada are given the preference over goods brought in from foreign countries?

Sincerely yours,
L. W. Simms, President.

75 PER CENT. OF NATIONAL ASSETS

Continued from page 75

Making Buyers of People Who Need Paint

It is a fact that this big market for paint exists, but how are we going to make buyers out of the people who need paint, when most of them do not realize their need. A man will break the lock of his door, smash a pane of glass, put out of commission one of the tools of his trade. He knows all these things have happened because they have happened suddenly and he sees them and realizes that they have to be replaced. He does not notice that the paint is wearing off his house until the bare wood begins to show. Even then, he often puts off painting and is only faced with the necessity of doing so when he discovers that decay of the structure has started.

Save the Surface advertisements are placing these facts before him, and the hardware dealer can drive home the lesson by constant reminder and by every other method of co-operation with the Save the Surface campaign.

The retail dealer is the actual outpost of industry, the ultimate salesman to the buying public. If he prospers the manufacturer prospers. If he fails to sell what the manufacturer makes and his shelves become overburdened with goods, the wheels of our factories close down, men are laid off, and trade becomes dull.

Three Classes of Retailers

We may divide the retail dealers into three classes:

1st.—Those who have initiative and are eager to seize every opportunity to increase their business, using every new idea and every bit of advertising sent them. Their clerks are happy and contented, and the work is done to the merry ringing of the bell of the cash register.

2nd.—Those who lack initiative, but are willing to learn and profit by the experience of others, ultimately becoming as successful as his more favored brother.

3rd.—Those who are in a rut, caring little of the activities of the world beyond the confines of their own township and content with the pittance which provides their daily bread. Thank heavens these are in the minority.

We expect the most from the first and second class, but even the third class we hope in time to have firm believers in the Save the Surface campaign.

Very few hardware dealers are cultivating the trade on their territories. They remain in the store trifling with details that the clerk could attend to, allowing business to develop itself if so inclined.

The Importance of Suggestion

Every morning and night on the way to and from work scores of houses in need of paint and in need of a dozen things for sale at the store, are passed by again and again. Your circle of acquaintance is large, and many householders are known personally to you. There are daily talks about the weather, about the crops, about politics, but how often do you remark casually to a friend:

"I have a new washing machine so easy to operate, and which does its work so well that washing has ceased to be drudgery. Drop around and see them, send one to friend Wife, and give her a surprise" or

"Your house is falling to pieces for lack of a coat of paint. That's bad business. Let decay once start and you soon lose the whole building. Paint will save a lot of money in the long run. I've got the best line of paints in town. Let me send up a man to give you an estimate."

I have known a paint salesman to go into a town, appoint an agent for his line of paint, then canvass that town on behalf of the agent for a week, and sell more paint than the agent ever sold before in six months. Yet the canvasser who produced those sales was not better as a salesman than the dealer himself, and in many instances not as good a salesman as one of the dealer's clerks.

Thus a dealer, who now spends half of his time in the store selling $15 to $25 worth of smaller priced articles, could go out in the country, call on two or three farmers, and sell two or three bills of goods amounting to from $10 to $20 each; yet his store will do just as much business that same half-day as though he were behind the counter himself.

The larger profit which can thus be made is obvious, for if the percentage of profit on dishpans, saws or cutlery is the same as on paints and varnish, the actual turnover from the sale of the latter is so much larger than from the sale of the cheaper articles that the profit is proportionately greater.

Need Every Stimulant

Now, more than at any other time in the history of Canada, everything should be done to stimulate business and the retail hardware dealer will be making a big step in the right direction by going out after every bit of paint business in his territory. The Save the Surface advertisements are paving the way. The papers covering Ontario, in which they will appear have a circulation which is equal in one year to three times its population.

Take advantage of the campaign; make your paint department a Save the Surface department. The manufacturer

BOECKH'S
Rubber Set Kalsomine Brushes

The bristles can't come out.

Every Brush Guaranteed.

This is the season to be well prepared for the requirements of brush buyers who are cleaning and tinting their walls after the winter season.

Radiators, stoves and furnaces make smut and stain. You know the buying habits of your customers; this is the time they freshen walls with some one of the many efficient wall tints now on the market.

Boeckh's Rubber Set Kalsomine Brushes fill the bill exactly. They are made of the best selected bristles, non-corrosive ferrules, and well-designed, comfortable handles.

The service from this superior brush is up to the well-known high standard of Boeckh service—the kind that brings back customers, with their friends, for more purchases.

Boeckh's service to the merchant is equally well known; prompt attention, quick shipments and every co-operation.

Have you one of the handsome Boeckh display cards? It's yours for the asking.

Place Your Order Now!

Roseate Dawn of Spring Painting Campaign

From The American Paint Journal, St. Louis.

THE statement that unemployment in Canada is stimulating the sale of paint, especially the "household" sizes and varieties, is made by "Hardware and Metal," Toronto, with the comment that "every cloud has a silver lining."

Similar reports are coming from various sections of the United States, especially the East. "Booster Ballou," the well-known retailer in Worcester, Mass., says that unemployment or short-time employment in the industrial plants in that vicinity is giving the man of the house the opportunity to do "odd jobs of painting" that have been neglected for several years, and he cites one skilled mechanic in a factory there who owns nine three-flat houses that he is painting himself, three days per week, while the factory is running three days per week.

An Indiana case is reported of a factory neighborhood where the plant owners shut down and proceeded to repair and repaint the factories and warehouses, which example was followed by the employees in cleaning up and painting up their homes.

In the meantime, the cost of painters' labor and of master painters' supervision, as of painting materials, is declining perceptibly; and as the public begins to learn that skilled labor is not only generally available again, but that war prices for good painters and good paint are now passe, the paint man's skies are taking on a roseate hue.

CO-OPERATION SOLVES RETAIL PROBLEMS

Continued from page 72

I am going to talk for a few minutes about co-operation because I believe in it and I believe it is the most essential condition with which to combat possible losses through falling prices.

Our business interests are now more bound up in each other than ever before. Co-operation among hardware men in every district is now more necessary than ever.

United Effort Needed

The conviction prevails in many trade circles that the association idea for an industry or a business is now more necessary than ever before. Present market conditions, financial tendencies, trade problems and other features require more united effort and co-operative discussion than ever before.

Automobile dealers, retail merchant associations, hardware retailers and representatives of other industries find occasion now to discuss developments more than ever before. Two heads are admittedly better than one.

Report of Dealers' Conventions Across the Line

Co-operation was the keynote of every convention session. Jobbers and manufacturers vied with each other in boosting the things that make for better hardware distribution. Throughout the sessions the interest of the retail hardware dealer was constantly given consideration. No more constructive meetings were ever held under hardware auspices.

Progress by Co-operation spells success if we will but take care of the reduction in prices together. We have come through a long siege of rising prices and have wondered when the thing would end. You will add admit the peak has been reached, we are over the top and prices are now on the down grade. Some of us may have large stocks which were bought at top prices, another dealer in your town may be just getting in these same lines and be able to sell at a much lower price. **I believe in co-operation here.** On the other hand you may be low or just out of some line and new goods arriving. Consult the other fellows' stock before you lower your price. This sort of co-operation will save the present dangerous looking situation.

I hear some of you say at once, this cannot be done. I am not on good terms with the other hardware man in my town. I never go into his store and he never comes into mine. The rankest kind of opposition exists at some points. Gentlemen who are so situated I am sorry for you and I am glad I am in business in Belleville where any other dealer feels quite welcome in my store and I as welcome in his.

I have here a clipping from our local paper which reads:

NOTICE

"We, the undersigned merchants, have decided to discontinue long credits and will conduct business after January 1st, 1921, on a thirty (30) day basis. All accounts are due the 15th of the month following purchase. Special arrangements made for building and contract work:

"Walker Hardware Co.
"C. M. Hall.
"The Stafford Hardware Co.
"Smith Hardware.
"Diamond & Hyde.
"The Jno. Lewis Co., Ltd.
"Howe & Hagerman.
"Garn. E. Dobbs.
"J. H. DeMarsh."

And is signed by all hardware and store dealers including plumbers.

This I believe is the type of co-operation which should prevail among hardware men and there are many localities where it does exist.

We meet here for mutual benefit and should be willing to carry the same feeling home with us, having in view the working out of some scheme which will improve conditions at present unfavorable.

PAINT PRICES AGAIN REDUCED

Prices on prepared paint have been further reduced this week. First quality paints have declined 60 cents per gallon on whites and 70 cts. per gallon on colors. Porch paints are reduced 70 cents per gallon. Inside floor paints are reduced 25 cents. Second quality paints are reduced 50 cents per gallon on white and colored. See details on page 138.

URGES BUYING CANADIAN GOODS

Continued from page 134

from whom you buy your paint will furnish you with everything necessary.

Use the slogan on your letterheads, billheads, envelopes, circulars and all printed matter.

Ask that your painters be furnished with booklets "Making more money in the painting business."

Be the first in your town to paint the slogan on your truck or delivery rig.

Clip the advertisements from the papers, paste them on cardboard and place them in prominent positions in your store.

When the new window trim is sent you put it up. If you can use more send for them.

Co-operative Advertising

Have local co-operative advertising. Get together with your fellow hardwaremen and run a series of ads on a co-operative plan in your local paper with all your names on them. Electros will be supplied free.

Remember the campaign is yours. Make the fullest possible use of it in the ways suggested or in ways of your own. You may count on the co-operation of campaign headquarters, and of the firm from whom you buy your supplies.

With everybody helping, pulling in the shafts and pushing at the wheel the old chariot of 1921 will deliver more paint to beautify more homes and save more surfaces to save all, than the cheeriest optimist ever dreamed possible.

SELLING SERVICE INSTEAD OF SO MUCH PAINT

Continued from page 131

the year if the public is properly approached. Use some of the above argumetns in arranging your local newspaper copy, and just remember that the paint department can be made the most profitable of any in the average hardware store.

New Twine Factory

Walkerton, Ont.—The Sterling Twine Company, Limited, a new industry at Walkerton, Ontario, is expected to be in operation some time this month. Their plant is a one-story brick building 45 x 200 feet with brick warehouse 50 x 100 feet and an addition thereto 20 x 70 feet. Part of the machinery has been installed. The class of goods to be manufactured consists of all kinds of commercial twines of various sizes, grades and qualities from shoe thread to clothesline.

CANADAS BUILDING RECORD

Construction contracts awarded in Canada for the month of January total $8,947,500. This is an increase of $201,000 over December, 1920, and of this amount $2,643,000 constitutes the amount of the awards for Ontario.

Weekly Paint Markets

Montreal

MONTREAL, February 17th.—The outstanding feature of the paint market this week is the reduction in ready mixed paints, this decline affecting first and second quality paints, including porch and inside floor paint.

Turpentine is also easier and quotations are 5 cents less. The glass market continues very unsettled and the new Montreal list does not seem to offer a settling effect. Linseed oil is reported a little firmer, and white lead, putty and shellac remain at former prices.

Mixed Paints Reduced

Montreal.

Reductions are announced this week on the different brands of ready mixed paints. The greatest reduction is on colors and porch floor paint of first quality, these now being quoted 70 cents lower. Whites of first quality show a decline of 60 cents a gallon, while inside floor paint is 25 cents less. On second quality paint both white and colors are reduced 50 cents per gallon. Whether these new lower prices will act as a stimulant to the spring demand seems doubtful. Manufacturers are of the opinion that buying will still be curtailed until later in the spring months.

Linseed Oil Firmer

Montreal.

A firmer tone is reported this week on linseed oil. The flax seed market has stiffened and higher prices are now quoted. Crushers state that if the price advances to any great extent on seed the outside markets will be looked to, as a small advance over present prices will make the South American market favorable to buy from. In some quarters linseed oil is quoted at five cents higher than previous prices; however, this only applies to some jobbers, others are quoting with no change, and following are the ruling prices:

1 to 2 barrels	0 99	1 01½
5 to 10 barrels	0 92	0 94½

Turpentine Easier

Montreal.

That turpentine is unsettled is reporting it very mildly, as different quotations are given from almost every dealer and jobber. However, local importers quote 5 cents lower than last week, with no notice of the outside conditions. Present prices are as follows:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 20
2 to 4 barrel lots	1 17
Broken lots	1 21

Shellac Quiet; No Change

Montreal.

Following the very unsettled state of the shellac market prices remain at the low levels quoted last week. Very few sales are being made on shellac at the present time, the lower prices apparently not stimulating trade to any degree. Following are the quotations:

Orange shellac, in barrels, $4.50; in one gal. jugs, $4.75; white, in barrels, or 5 gal. jugs, $5; in one gal. jugs, $5.25.

Putty Unchanged

Montreal.

Prices on putty remain unchanged and with very little business offering. This, however, is considered only seasonable. It is probable that present prices will not change for some time yet, at least until the spring demand has its effect on present stocks. Quotations are as follows:

Standard Putty—	5 tons	1 ton	Less ton
Bulk barrels, 800 lbs.	$6 00	$6 25	$6 60
Bulk drums, 100 lbs.	7 00	7 25	7 60
Do., or tins, loose, 25 lbs.	7 25	7 50	7 85
Bulk drums or tins, loose 12½ lbs.	7 50	7 75	8 10
3 and 5 lb. tins	9 60	9 85	10 20
1 and 2 lb. tins	10 75	11 00	11 35

Pure Linseed Oil Putty, $2.50 per 100 lbs. advance over above prices.

Terms: 2% 15 days or net 60 days, f.o.b. Montreal or Ottawa.

White Lead Remains Firm

Montreal.

This product remains at prices given some time ago. It was stated at that time that prices would likely remain steady as stocks were heavy in the hands of corroders. The demand has shown a slight improvement of late, but stocks are still heavy and the spring demand is eagerly looked to. Quotations may be found on current market pages.

Glass Situation Unchanged

Montreal.

The window glass market is still very unsettled, with very little improvement in the sales. Quotations remain at a third off the new Montreal glass list, but even these new prices have not the settling effect that was expected. Whether lower prices will be given is uncertain and may depend on the condition of the Belgian market. This source seems the favorable market, and is improving from week to week. Present quotations and new list will be found on current market pages.

Toronto

TORONTO, Feb. 17.—The chief point of interest in the paint market this week is naturally the new price on ready mixed paints. When the last change in paint prices was made about eleven weeks since, it was stated that those prices were guaranteed until July 1, but manufacturers have realized that costs must be forgotten and they have to bear their share in the readjustments of prices. The following are the reductions: Sixty cents on white and 70 cents on colors in first grade paints, porch paints 70 cents, inside floor paint 25 cents. Second quality paints 50 cents in white and colors. No other changes have been made, and varnishes are unchanged. White lead in oil is also left untouched. Other paint commodities are holding unchanged. Shellacs are a little lower again and turpentine has been reduced 5 cents this week. Linseed oil is held unchanged and the market is a trifle firmer in this product. The glass market is still unsettled, but with exchange getting firmer and the market strengthening present prices are regarded by many as extremely low, and it is thought that spring prices may show higher levels. Booked orders in paints are moving out and though smaller than last year in many cases are regarded as satisfactory under the conditions.

Prepared Paints Reduced

Toronto.

New lower prices are announced on prepared paints this week. On first quality paints the decline amounts to 60 cents per gallon on whites and 70 cents on colors. Porch paints are 70 cents per gallon lower. Inside floor paints have been reduced 25 cents, although it is possible that this amount may be changed again. On second quality paints the reduction amounts to 50 cents per gallon on white and colored.

It is stated that retailers who have taken delivery of spring bookings will receive credit notes based on the difference between the invoiced price and the new price, but no further guarantee will be given covering future prices. While it was felt by the manufacturers that conditions did not warrant a decline it has been decided that they will bear their share in reconstruction losses, and they believe that the paint trade have done all possible to meet customers and public

SIGN OF MERIT
BEST B&M Co MADE

"Save the surface and you save all" Paint & Varnish

Roof and Barn Paint

The Farmer as a Paint User

Farmers have a need for Moore's Roof and Barn Paint in the protection of their barns, stables and sheds. Farmers are constantly using paint around and about the farm and are good prospects for Moore's Quality-Made Barn Paint. It is a very elastic and durable paint, works easy, covers well, retains its color, will not peel or blister, and is waterproof. Is composed largely of oxides ground finely and thoroughly incorporated with our processed oil. It is especially adapted for Barns, Stables, Sheds, Fences, Bridges, Roofs; in short, it is a preservative for all wood and structural iron work.

A Postcard Will Bring Full Particulars

Benjamin Moore & Co.
LIMITED

Paints, Varnishes and Muresco

Toronto **Winnipeg**

If interested tear out this page and place with letters to be answered.

interests, and they confidently expect liberal support on the new price basis.

A good many spring orders have been shipped out and though they are usually smaller than last year, it is believed that last year was an exceptional one and the difficulty in obtaining what they ordered was responsible for many retailers ordering in excess of their requirements.

Shellacs Go Lower

Toronto.

Some lower quotations continue to be made on shellacs, and from $4.25 to $4.50 is quoted on orange in barrels, and $5.05 to $5.50 in gallon jugs. Quotations on white shellac are $4.80 to $5 in barrels, and $5.55 to $6 in gallon jugs.

White Lead Unchanged

Toronto.

No change has been made in prices of white lead in oil, and present quotations seem likely to hold at time of writing. Sales are reported to be slightly improved, but orders received for spring are usually smaller than ordinarily the case at this time of the year. This may mean that merchants are expecting further declines in prices, or that they are endeavoring to do business on a smaller stock. Prices are as per current market pages.

Putty Prices Hold

Toronto.

No changes have been made in putty prices and sales show a very slight improvement. Quotations are unchanged as follows.

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	8 05
Do., 25-lb. irons	8 30

Turpentine Dow Five Cents

Toronto.

The turpentine market in the last few days has been in an unsettled state, and in the opinion of large dealers a good deal of it is due to statements which have appeared in the daily press in which reports of declines in turpentine on Southern markets have appeared. These reports are stated by wholesalers of this product to be erroneous and entirely misleading. What has occurred is that there has been no regular market in turpentine for the past two months, and now that a lower quotation is made the impression has been created that the bottom has dropped out of the market. In comparing prices in effect on Savannah markets with those here it is sometimes overlooked that U. S. quotations are in wine measure, which is about one-fifth of the Imperial measure in force here, and also the difference in exchange, to say nothing of other costs, such as freight, etc. Taking these points into consideration it is stated that local prices compare favorably with those of Southern markets. Quotations are five cents lower this week and are as follows:—

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 10
2 to 4 barrel lots	1 07
5 gal. lots	1 25

Linseed Oil Unchanged

Toronto.

No change has been made this week in linseed oil prices, and while there has been a better demand business is still light. It is believed that the next few weeks will show an increase in sales. The seed market is showing more firmness than it has done for some time and though there may be a possibility of cheaper oil further on in the season the crushers are of the opinion that present prices are very low, taking into consideration present freight rates, labor, etc., and other costs. Following are present quotations:

	Raw.	Boiled.
1 to 2 barrels gal.	1 00	1 03
3 to 5 barrels, gal.	0 99	1 02
6 to 9 barrels, gal.	0 97	1 00

Less quantities add 15 cents per gallon.

Glass Still Unsettled

Toronto.

The window glass market remains very unsettled and is stated to be disorganized. Quotations are nominally unchanged from last week, and are 60 per cent. off old list for small quantities, with an extra 10 per cent. for large quantities, but some wholesalers are selling at a net list of their own. The Belgian market is reported to be firmer and with an improvement in the exchange value of the franc it is likely that prices during the coming spring may be higher, but while it is impossible to foresee what direction glass prices will take this coming season, many are of the opinion that they will be no lower than they are at the present time.

BUSINESS MUST NOW HIT ON ALL FOUR

Continued from page 129

goods in which they have utmost confidence. This was followed by the showing of the industrial film by the Plymouth Cordage Co. as described elsewhere.

Col. Robert Starke Absent

Wednesday morning session was devoted to the hearing of brief addresses from retailers, wholesalers and manufacturers on various phases of the business outlook. George Spence, general sales manager of the Steel Company of Canada, dealt with the iron and steel outlook, in the absence of Robert Hobson, president of that company, who was called to a meeting in New York. Regrets were read from John M. Taylor, president of Taylor-Forbes Company, that an indisposition prevented his attendance. Colonel Robert Starke, president the Canadian Wholesale Hardware Association, was also absent for the same reason and in his absence Herb Seybold, of Starke, Seybold Company, Montreal, read the address prepared by Colonel Starke.

Addresses were given by B. J. McCormick, general sales manager Canada Foundries and Forgings Company, Welland; Col. A. M. Hatch, Canada Steel Goods Company, Hamilton; S. H. Alexander, Wood, Alexander & James, Hamilton; W. J. Lortie, Toronto manager Dominion Linseed Oil Company; John Irwin, McArthur, Irwin Company, Montreal; Nelson Mills, Mills Hardware Company, Hamilton; George E. May, Toronto; F. B. Smith, Belleville, Ont.; A. J. Wright, Hamilton; James Hardy, secretary Canadian Wholesale Hardware Association. These addresses will be found elsewhere in this issue.

Wednesday afternoon was spent at the exhibits in the Armories, followed by a complimentary banquet tendered by Wood, Alexander & James, Hamilton, at the Royal Connaught Hotel.

Many important subjects were discussed at the Thursday session, including addresses on the chain store proposition by F. A. Maycumber, sales manager Winchester Repeating Arms Company, New Haven, Conn., and Wm. Hargreaves, manager Drug Trading Company, Toronto. An advertising talk was given in the evening and an open discussion on points brought up through the question box was also heard. Mutual insurance was also discussed at the convention, addresses being given by Norman S. Jones, manager Northwest Mutual Fire Association, and F. A. Martin, provincial manager the Hardware and Implement Dealers' Mutual Insurance Company.

A luncheon was tendered the delegates at Thursday noon at the Royal Connaught Hotel by the manufacturers of Hamilton, at which several brief addresses were delivered and an enjoyable social hour held.

A visit to a number of local plants of manufacturers was paid by the delegates on Friday morning, a fitting conclusion to an interesting and instructive convention.

IRON AND STEEL OUTLOOK

Continued from page 70

than the governmental price. Some independents admit they cannot make and sell bars at $2.35 Pittsburgh and make a profit and some are taking business at less.

In the case of wire products, the prices are very low. Wire nails have been selling at $3.25 base, notwithstanding makers state they cannot make any money at that price and when you consider a keg alone costing 35 cents, leaving $2.90 for making the nails, drawing the wide, etc., as compared with bars at $2.35, you can readily understand business, so far as manufacturers is concerned, is down to a close bargain if there is any.

Most of us have seen times of depression before and following, as it does in this case, a time of great activity, we are perhaps able to stand a temporary lull better than before. The resources of our country are too great and institutions too sound to permit of anything like disaster. What we have to accept is the probability of profit during this year will be smaller and a better condition of trade gradually improving as 1921 goes on its way.

"This Is the Store I Work in Twenty-four-hours-a-day"

—Winthrop Wise

Selling helps that really sell—cut-outs, signs and big, smashing window displays including Winthrop Wise, the twenty-four-hour-a-day salesman. That's only part of the closely-dovetailed proposition back of the agency for

Keystone
Stapled Metal Case Brooms

For the heavy sweeping necessary in factories, garages, mills, warehouses and stables, no broom gives such thorough satisfaction as the Keystone Stapled Metal Case Broom.

The metal case binds the corn securely to the heavy maple handle. The broom cannot be pulled from the handle, nor can the corn be cut or broken at the shoulder of the broom. Made of all corn, or corn and bamboo in various weights.

Isn't this broom trade in your town worth getting after?

A·G·M·CO. VIKO ALUMINUM

You Take Your Profits Quickly with Viko—

Aluminum has strength without weight, a desirable quality in metal used for cooking utensils. It is also an excellent conductor of heat, and takes a permanently smooth finish. Aluminum utensils, therefore, grow constantly in favor.

With the merchant, the question of stocking aluminum ware centers largely around the line. He must have a line that lends itself to modern merchandising methods; that encourages the quick taking of profits; and brings repeat business. VIKO, The Popular Aluminum, is just such a line as this. Viko utensils give perfect satisfaction to the customer, and sell profitably at a popular price. For full information about the Viko line—

Black Diamond for Cutting

When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Suppose you write us to-day about Silkstone and other lines that will benefit your business? We know you want to satisfy customers and build permanent, lasting trade; Silkstone is one of a line that does that to perfection.

You can sell it because Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. It is economical, durable and satisfies good taste.

Let us show you that it is profitable to sell. If a thing sells well and pays the merchant well, you certainly want it working for you in your store, don't you?

THE FARMERS ARE THINKING OF SPRAYING NOW

To-morrow may mean a lost opportunity.

Why don't you sell the farmer a Spramotor to-day?

You know that no other spraying method equals the Spramotor method for spraying and for painting or white-washing.

Write to-day for illustrated catalogue. If you are a live-wire dealer we'll want you for our agent—and you'll want us.

LEAD PIPE

SHEET LEAD

ANY WEIGHT. EIGHT FEET WIDE. ANY LENGTH.

THE CANADA METAL CO., LIMITED, TORONTO

CARTER'S

Stock It For Your Painter Customers—

CARTER'S GENUINE DRY RED LEAD

A high grade Red Lead that is always pure and uniform. When mixed with pure linseed oil it furnishes an easy spreading and economical surface protection for iron work, metal work, steam pipes, etc.

The same standard of goodness is characteristic of the other Carter products—Carter's Genuine Dry White Lead, Genuine Orange Lead and Litharge.

Keep a supply of all four on hand. You'll find them worth while.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

Drop-Forgings: often cheaper than castings—always far superior

WILLIAMS' DROP-FORGED "LIGHT SERVICE" CLAMPS

JUST "because they're cheap" is no reason why you should buy *cast* clamps. They're dear at any price if not dependable, and a moment's thought will show you that a cast product cannot be dependable for clamping service.

Williams' Light Service Clamps are strong, sturdy tools—light, yet extremely stiff. They are made in eight sizes, with capacities from 2 to 12 in., and all are fully guaranteed.

Two additional patterns for medium and heavy service.

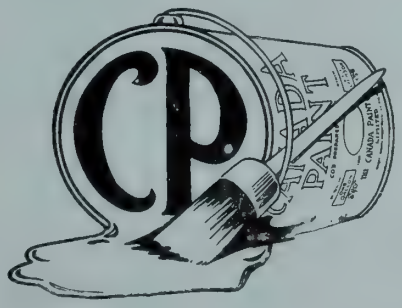
Will You Supply Him?

The farmer, the fruit grower—the man who realizes the value of effective spraying as a means of producing full crops of fruit and vegetables?

He knows that spraying is the only conceivable method of combatting the destructive insect pest, and he knows, too, that

C. P. Insecticides

offer the safest, most economical and most effective means of controlling the menace.



Here are Some C. P. INSECTICIDES Worth Recommending

Dry Lime Sulphur
Paris Green
Sprayide
Arsenate of Lime
Arsenate of Lead
(Dry and Paste)

A vigorous consumer advertising in important Canadian magazines and farm publications will serve to strengthen still further the confidence of farmers and fruit growers in the merits of C. P. Insecticides.

A stock of the lines listed here will enable you to cash in on the local demand. **Free spraying booklets** full of useful information concerning different spraying operations is part of the service rendered buyers of C. P. Insecticides.

Write for full particulars, prices, etc.

Making Friends For You

The good folks in your town who read the Atlantic Monthly, Century, Country Life in America, Harper's, House Beautiful, Review of Reviews, Scribner's or World's Work are finding many appealing suggestions in those charming Tommy and Betsy advertisements.

Vitraliting the kitchen chairs, the thought in the April issues, will make good sales for you — if you have Vitralite Tints. Perhaps you don't know about the introductory proposition, but we'll mail the whole story if you say so.

TO any hardwareman a work glove department would be a continual source of profit. Indeed many hardware dealers are now handling Carhartt work gloves and making money. One of our salesmen reported, "In one store where I got my first order, they had repeated twice in spite of a backward season."

A display case of Carhartt Gloves would not only add to the attractions of your store but would suggest their purchase at the very time when the customer is selecting tools and other appliances for jobs which require gloves. Carhartt Gloves are now selling at what are really rock-bottom prices. They induce ready sales because of their fine appearance. They earn good will because of their exceptional service. And they bring you a generous profit. Let us send you a sample assortment at present low prices.

Sixty-Five Years' Experience

When you buy a Taylor Safe you get the benefit of our 65 Years' experience in Safe building.

A Taylor Safe represents the most advanced scientific methods of fire construction.

It provides a repository—for your documents and other valuables—that resists the hottest fire and greatest fall.

Taylor Safes are made in 40 different sizes.

Write for quotations on Taylor Safes and Steel Cabinets.

Our motto—"Efficient Service"—is backed by a liberal guarantee which enables you to give perfect customer-satisfaction. We give prompt shipment of your order.

Do You Sell Happiness?

HAPPINESS as a single commodity would sell at a big premium, wouldn't it? But it cannot be sold that way, so it remains for dealers who handle happiness-promoting equipment, like the Miss Simplicity Electric Washer, to reap the profits of this market.

Attractive four-color folders explain clearly and convincingly the merits of Miss Simplicity. With your first order we will send you a supply imprinted with your own name and address.

Miss Simplicity **does** promote happiness. Miss Simplicity gives happy release from all the drudgery of wash day, yet insures the economies of home washing. Every housewife without an electric clothes washer in your community is a prospective purchaser.

Miss Simplicity is easy and simple to operate. The mechanical features are beyond question. Workmanship and materials are as perfect as honest Canadian effort and good Canadian capital can make them.

Miss Simplicity sells at a very attractive price and there is handsome profit, quick turnover, and sure customer-satisfaction for you. Write to-day for our dealer offer. It will certainly interest you.

165 Tea Set

VIKO
Aluminum Cooking Utensils and Specialties

For Consumer Satisfaction

One of the most popular sellers in the VIKO line is No. 165, a strongly made child's tea set. Aluminum cannot be equalled for hard wear, and this dependable set will delight children whose parents will show their appreciation in purchases of other articles in your store. The prices of this novel line of Aluminum Tea Sets are lower than similar sets in enamel ware, and compare favorably with china. Catalogue and price list on request.

GUARANTEE

VIKO Utensils are stamped from hard, thick, 99% pure, sheet aluminum. Every article illustrated in our catalog is absolutely guaranteed against any defect in material or workmanship. We authorize all our dealers to replace at our expense any VIKO utensil which should prove defective in either workmanship or material.

DID you ever contrast a Jacobs Chuck with any other chuck?

First the way it is made—next the ease and speed of adjustment—then the accuracy of the hole—and the ease with which the drill can be detached should the drill jam?

Try it sometime for your own enlightenment.

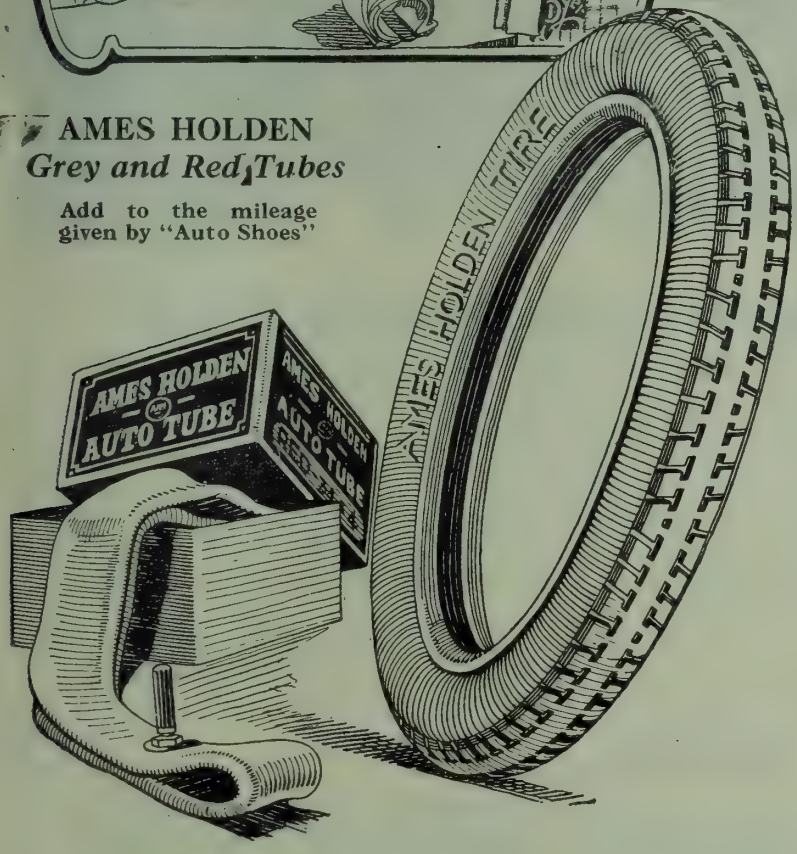
Gaining New or Greater Distribution

is a well-recognized and familiar use of properly-directed, continuous advertising.



For either marketing on a national scale or by "Zone Methods" continuous, properly-directed advertising blazes the trail, carries your name, reputation and a knowledge of the product to the trade, paving the way for the salesmen, lubricating your whole distribution system and creating friendly territory waiting to welcome your product and your travellers as your production expands.

A weekly message to the whole hardware trade of Canada through HARDWARE AND METAL—their recognized source of business information—will increase your distribution.

AMES HOLDEN
Grey and Red Tubes

Add to the mileage given by "Auto Shoes"

AHM System

Selling "Auto Shoes"

Business relations should be pleasant — can be pleasant — and incidentally profitable.

Selling Ames Holden "Auto Shoes" is going to be a pleasant business experience for dealers everywhere.

For there is a great purpose behind the marketing of Ames Holden "Auto Shoes" which carries within it the germs of a new relationship between manufacturer and dealer.

A relationship that calls for mutual confidence, unhampered by systems and reels of red tape, based on the fullest intent to deal frankly and fairly with the dealer and consumer alike.

Ames Holden "Auto Shoes" in the service they give—unusual mileage and reliability—are proving worthy of the policy behind them and the guarantee that upholds them.

And sales—steadily mounting upwards—are the infallible barometers which indicate the persistency of public demand for "mileage that costs less."

Let us tell you about the pleasant relationship that can exist between you and ourselves—the prospects and the profits in handling Ames Holden "Auto Shoes." Write.

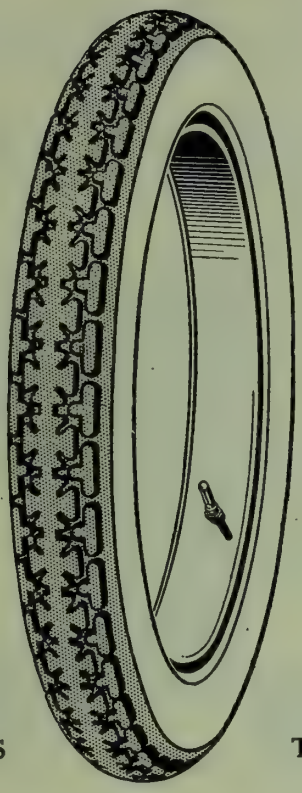
It Catches the Customer's Eye

One of the new Champion Spark Plug Merchandisers, displayed on a dealer's counter, show case, or shelf, guides motorists and engine owners to real spark plug service. As soon as the customer sees it he immediately links the dealer with the Champion reputation for dependability.

Not only is the Merchandiser a valuable silent salesman for the dealer; it keeps his stock of Champions clean and tidy; provides a place for every size and type he handles, and gives an accurate stock record at a glance.

The index chart in the Champion Merchandiser shows the correct type of Champion for the customer's engine. The salesman simply cannot go wrong in his selection.

Free Offer to Dealers



We will send you one of these striking Merchandisers free with a shipment of any one of three different assortments of Champion Spark Plugs. You can take this up with your jobber or write us direct for full details.

CROSS TREAD

"Gutta Percha" Tires Stand Alone

No frenzied salesmanship needed here, Mr. Dealer; no price-cutting necessary to move these goods. They stand on their merits alone, for the record of service they gave in 1920 and the coast-to-coast, year-'round advertising has already won them a place as a "best seller." People will ask for them, Mr. Dealer. It will pay you to stock them early—NOW.

Chart of Recommendations for AUTOMOBILES

(Abbreviated Edition)

How to Read the Chart

The Correct Grades of Gargoyle Mobiloil for engine lubrication are specified in the Chart below

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

These recommendations cover all models of both passenger and commercial vehicles unless otherwise specified.

Where different grades of Gargoyle Mobiloils are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and constitutes a scientific guide to Correct Automobile Lubrication.

If your car is not listed in this partial chart, consult the Chart of Recommendations at your dealer's, or send for booklet, "Correct Lubrication," which lists the Correct Grades for all cars.

Winter Lubrication

Cold weather advice which will help you make sales

THIS is the time when many motorists complain about "stiff" motors. "The starter won't turn her over." Motorists have oil pump trouble.

You can do these people a real service and at the same time increase your sales of Gargoyle Mobiloils.

Many automobile engines require an entirely different grade of oil during the cold season. Either through ignorance or neglect, many car owners do not change the oil in their engines. Trouble usually follows.

In cold weather oil has a tendency to congeal. With the wrong grade of oil in use, it is difficult to start the engine and there is poor circulation until the engine is "warmed up." This means insufficient lubrication for bearings and other parts where oil is vitally needed. Often it leads to repair bills.

Our Chart of Recommendations specifies the correct grade of Gargoyle Mobiloils for both summer and winter lubrication. In each case these specifications are the result of scientific analysis of engine requirements.

The Chart shows what cars require a different grade of oil in winter, and what cars do not. The Chart of Recommendations hanging on your wall is proof to your customers that you are qualified to specify the correct grade of Gargoyle Mobiloils for their car — in winter as well as summer.

Night's faithful guardian

In your community, Mr. Dealer, are many homes known to be without the protection of a Colt Automatic Pistol or Colt Revolver. These homes need your service.

Dangers of the night are as real for one community as for another. Are you doing your part to help ward them off?

You know that where Colt protection has been supplied, danger is minimized. A word from you, a reminder that you carry Colt's Fire Arms and can supply the correct model for home protection, will do more than make profitable sales. It is a service of value for the maintenance of law and order.

Cord or Fabric.

A Word to the Wise

Here is the Truth About the Tire Situation

Spring is almost here. Looking at conditions from any angle one must admit that more tires will be bought by the public in 1921 than in any previous year.

Wise dealers have placed or are placing their orders for Partridge Tires now; and will have stock on hand ready to take full advantage of the Spring trade.

Partridge Tires are quick, sure sellers. The demand for them is like a weed—you can't stop it growing.

If you are a tire dealer and not handling Partridge Tires, here is your opportunity to get in on a good thing.

Acornette Pump Connection

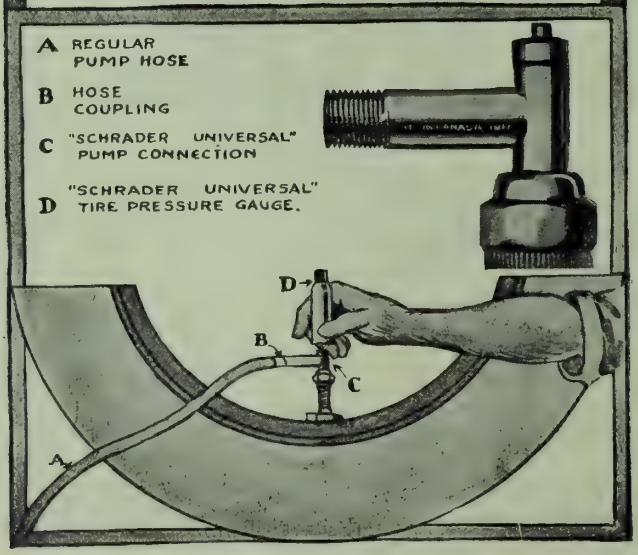
ECONOMY!

The Improved Acornette makes a timely appeal to motorists because it gives them more for their money.

The Acornette design prevents buckling and retards chaffing of the rubber washer. The result—Acornette grips the tire valve tighter and the washer lasts longer.

"Thru your jobber—his service is economy."

STEVENS & COMPANY
375 Broadway New York City



STEVENS PRODUCTS

Test Tire Pressure With Pump Hose Connected

SCREW the Schrader Universal Pump Connection to the regular hose-coupling of either hand or power pump, and you can use the Pressure Gauge without removing hose from valve. This saves you a lot of time and trouble. You simply place your pressure gauge over deflating pin. This handy little device costs only 65 cents, but it adds greatly to your convenience.

CARBORUNDUM IN THE GARAGE

PROFIT awaits the hardware man who develops a Carborundum business among the garages. Every garage has use for all of these Carborundum Products—

Carborundum Valve Grinding Compound for grinding all motor engine valves.

Carborundum and Aloxite Grinding Wheels for grinding tools, parts, fittings—

Aloxite Cloth for the general finishing of metals—

Carborundum Niagara Grinders for a hundred and one grinding jobs.

And right now, in the midst of the winter repair season, is the time to develop this business.

Would you be interested in our helping by sending your garage customers samples of Carborundum Compound and Aloxite Cloth?

"Save the surface and you save all" Paint & Varnish

THE SURVIVAL OF THE FITTEST

Two hundred years ago in England, Brandram discovered a process for corroding White Lead. It was found that his new method was capable of merging the material into a pigment of previously unknown smoothness. He marketed his invention with considerable success—so much so that it became the standard base for paint of every description, and it was used for interiors, exteriors, coaches, ships and every other surface, which was subject to Wear and Tear.

So, when later the early English Colonists came out to Canada

Brandram's Genuine B.B. White Lead

came with them and Canadians to-day are still using it in preference to any other make.

Many years ago we obtained this secret formula from the descendants of the original Brandram, and it is an interesting fact that even now, in 1921, the process of manufacture is identically the same as the original in the 18th Century, ours being the only patented process of White Lead manufacture that can boast of so ancient a pedigree. Its covering capacity and its durability are unrivalled the world over.

In spite of all the modern inventions, it is still the finest obtainable and is the White Lead basis of our famous B-H "English" Paint, and similar products.

The "Half-Dozen" Idea

Some dealers sell Aladdin by the dozen — these merchants seldom let a customer go out with just one cake.

We ourselves believe you need never confine an Aladdin sale to "one cake"—we favor the idea of six cakes to a sale.

It can easily be accomplished if you and your clerks just take the trouble to point out the advantage of having a *selection* of the beautiful Aladdin Colors on hand always.

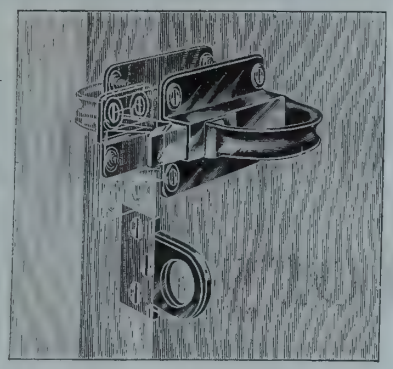
Every "Universal" Iron You Sell Is a Salesman For You

NOT every salesman employs language in selling. The "Universal" Iron is voiceless, but eloquent. It speaks the language of deeds. Every "Universal" Iron that goes into the home is an addition to your selling staff.

The "Universal" used by one woman will be seen by many women—the friends and neighbors. The iron is given an opportunity to perform. It demonstrates its quick-heating, smooth-ironing qualities. It serves as a salesman. It puts a fair price on itself and helps to make its own sale to an increasing number of women.



No woman can keep a good thing to herself. She talks about it, tells where she got it and what it cost. To start women talking about and looking for the "Universal" Iron, make use of Newspaper Ads, Folders, Car Cards. They're all new—all FREE. Write to-day and tell us your wants.

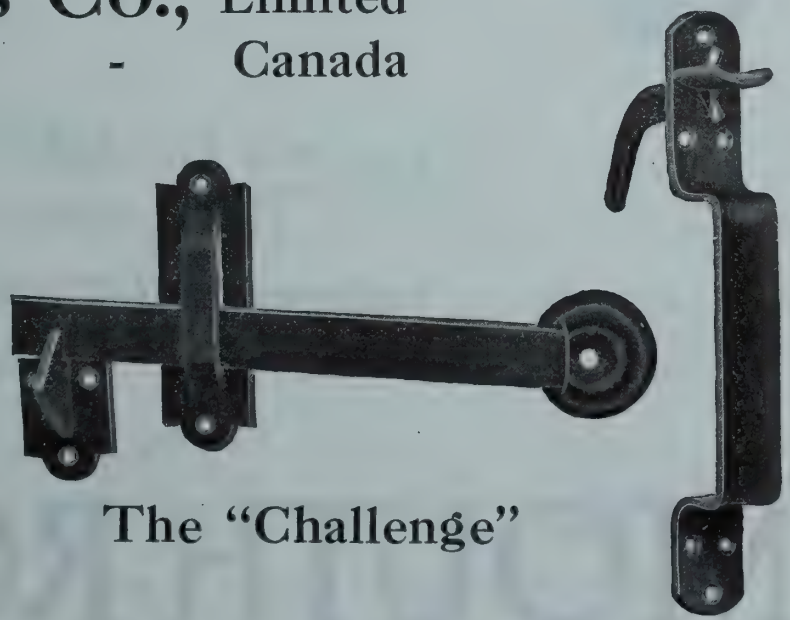
Two Latches With Selling Points That Make Sales

No. 1240 Barn Door Latch

A durable, common-sense latch with japanned frame and handles, tinned bolt and a sherardized spring of piano wire that cannot rust. A dependable latch that operates effectively and gives smooth, reliable action that wins friends and permanent, lasting trade for the dealer who sells it. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.



The "Challenge" Latch

This desirable latch possesses more points of quality and value—selling points—than any other thumb latch on the market. It is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place.

Packed one-half dozen in a box. 12 dozen in a case. Weight, 190 lbs. per case.

Clothes May be All Wool and Yet be Unsatisfactory

There are many grades of wool, some good, but all are wool. The same is true of rope. There are many grades of Manila fibre, some are good. All are pure Manila.

Plymouth rope is made of grades of fibre expressly selected for the work the rope is to do. Plymouth rope is "pure Manila"—more than that it is *good rope.*

Dealers selling Plymouth rope never have "back-fires" at their Rope Department.

Appearances Count Mightily

The successful dealer is the one who makes his store a shining example of neatness. He is every bit as jealous of the appearance of his goods as of their quality.

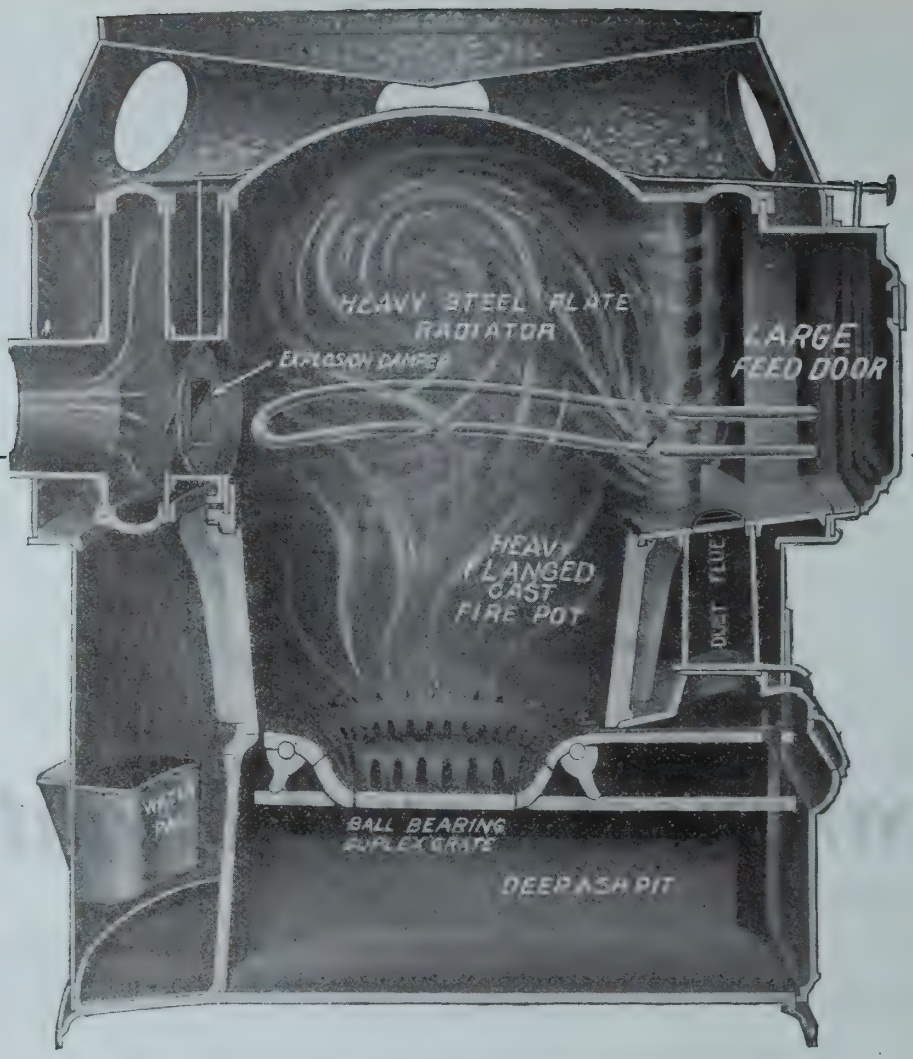
Imperial Floor Dressing aids the tidy storekeeper. It keeps down 90% of the atmospheric dust which is directly responsible for that undesirable, shop-worn appearance that repels the buying public.

Imperial Floor Dressing comes in one and four-gallon lithographed sealed cans, and in half-barrels and barrels. Ask the Imperial Oil salesman for prices and a demonstration.

Imperial Floor Dressing does more than reduce dust. It brightens floors and fixtures and gives them a like-new appearance that sells goods. It is the ideal cleaner and preservative for wood, linoleum or oil cloth.

IMPERIAL
FLOOR DRESSING

One gallon of Imperial Floor Dressing is sufficient for treating upwards of 700 square feet. It does not gum or evaporate, consequently one application will last for weeks.



You will appreciate the sanitary, dust-killing qualities of Imperial Floor Dressing in your own place of business. It is also a profitable line for the dealer to stock.

RAJAH PRIMER

$6.50 Each With Standard Fittings

SAVING ON BATTERIES COVERS COST

The Rajah Primer is designed to add a small amount of gasoline to the regular mixture to enrich it in its flow through the intake manifold from the carburetor to the motor **without requiring the choke to be closed.** Closing the choke cuts off the needed supply of air to make the best combustible mixture. The valve is attached to the intake manifold above the carburetor, the gasoline being supplied by gravity or pressure from the regular supply system — preferably from the bottom of the vacuum tank—the quantity used being always under the control of the operator.

MAKES STARTING INSTANTANEOUS

The construction of the valve and its operation is such that a quick start is certain under all conditions of weather—thus reducing the strain on both starter and batteries. Also through the valve a small amount of gasoline can be fed drop by drop into the intake to heat up the motor, until the carburetor begins to function properly. The "Rajah" reputation is behind this product, which is sufficient guarantee that in so far as accuracy and care in workmanship are concerned this device is as nearly perfect in every detail as it is possible to make it.

The Rajah Primer is manufactured under U.S. Letters Patent.

RAJAH SPARK PLUGS

½" No. 2

Specially adapted for Ford, Overland, Studebaker. Can also be used in any motor made for ½" Standard plug.

Price, Plug ...$1.25
Price, Porcelain .60

Race drivers use Rajah Plugs for a quicker pick-up, more power and higher speed. Special button top and quick detachable Rajah Terminal eliminates old style inconvenient Thumb Screw. Simple construction, easily taken apart, cleaned and replaced. Parts interchangeable. Sturdy electrodes. Patented knife edge bushing adjusts itself to shoulder of porcelain, and permits heat expansion without injury to porcelain. Insulation highest grade, hardfire, heat-resisting porcelain.

For all pleasure cars, trucks, tractors, marine, stationary, motorcycle and airplane engines.

⅞-18 Giant.

Also ½", ⅞-18 Long and ⅞-18 Extra Long—firing point 1¼".

A big, sturdy heavy duty type of plug for pleasure cars, trucks, tractors, marine and stationary engines. Exclusive equipment Advance-Rumely Tractors.

Price, Plug $1.50
Price, Porcelain ..... .70

The SAVAGE Repeating Shotgun

Is Ready for You and Your Trade

The Savage Repeating Shotgun—the gun you've been waiting for—the arm that completes the Savage line—is ready for you.

There was a demand for a Shotgun which would combine in design and workmanship, in convenience and reliability, in safety and performance, the Savage Quality to which Shooters and Distributors have so long been accustomed.

And there was only one way to make good—to produce a Shotgun that could honestly take its place with the Savage Line of Rifles and Pistols—a quality arm for a quality line.

Do not fail to stock this Savage—the most up-to-date Shotgun on the market to-day.

You will find that there is a big demand for this gun **now.**

Write us for descriptive matter and illustrated booklet on this new model.

POINTS ON THE NEW SAVAGE REPEATING SHOTGUN

Positive top tang safety — when gun is not cocked, safety cannot be applied, thus serving as an indicator that gun is not cocked.

Cannot be taken down with live shell in the barrel.

Magazine tube and action bar may be locked when taken down by turning down the magazine lever.

Impossible to turn the magazine into locking position unless the magazine tube is fully home, thus preventing looseness between barrel and receiver and insuring the proper sequence of take down and assembling operations.

Steel ferrules at both ends of action slide handle giving increased strength and rigidity.

SPECIFICATIONS:

Model 1921 Savage Repeating Hammerless Solid Breech, Solid top-side ejection, take-down, standard 12 gauge, 30 inch High Pressure Smokeless Steel Barrel, Pistol Grip, Positive top tang safety, moving parts enclosed, receiver channelled and matted in line of sight, weight 7½ lbs.

Regularly furnished in 30 inch barrel, full choke or with 26, 28 and 32 inch barrels, either modified choke or cylinder bore when specified.

Welded and Forged—
A Solid Coupling

No Wrench slips on
the Perfect Hex

Demon Grip

Welded Steel

Pump Rod Couplings

From his own point of view there are several excellent reasons why the hardware dealer who serves rural communities should recommend and sell the new DEMON GRIP Steel Pump Rod Coupling. Of course the dealer's convenience is not the only thing that makes goods move, but if you agree that a Pump Rod Coupling of the following description is easier to sell than anything you have previously sold, and that it will give your customer the best service, then ask your jobber's salesman to send you the new DEMON GRIP.

Made of Steel—same as the rod.
Hot Forged—perfect hex.
Welded—makes solid job.
Strongest—over three times as strong as a malleable.
Packing—twenty-five in a box to go on your shelf.
Novel—the above advantages make a novelty of a very staple article. The DEMON GRIP cannot help attracting attention.

It's the best buy and therefore a good seller.

"Gutta Percha" Tires
CORD and FABRIC

The dealer who sells "Gutta Percha" Tires, Cord and Fabric, does not have to spend all his time persuading people to buy them—they ask for them. There are no bad points to talk down, for in appearance and performance "Gutta Percha" Tires are as near perfection as human means can make them.

The record of "Gutta Percha" Tires is well known. Year-round, coast-to-coast advertising keeps it before the public. Every tire is up to standard and the dealer need have no hesitation in personally endorsing them, for the tires will make him new friends.

"I'LL TELL CANADA"

An advertising campaign in the leading farm journals and newspapers, covering every province, will carry the CaloriC message of comfort and economy throughout the Dominion in 1921. CaloriC advertising and sales co-operation is a most valuable asset to the CaloriC dealer.

If interested tear out this page and place with letters to be answered.

CALORIC PIPELESS FURNACE IN CANADA

The CaloriC is the same heating plant that is such a phenomenal success in England and other European Countries, in Alaska and the United States; hundreds of Calorics also have been installed in the Dominion of Canada.

OPPORTUNITY FOR DEALERS

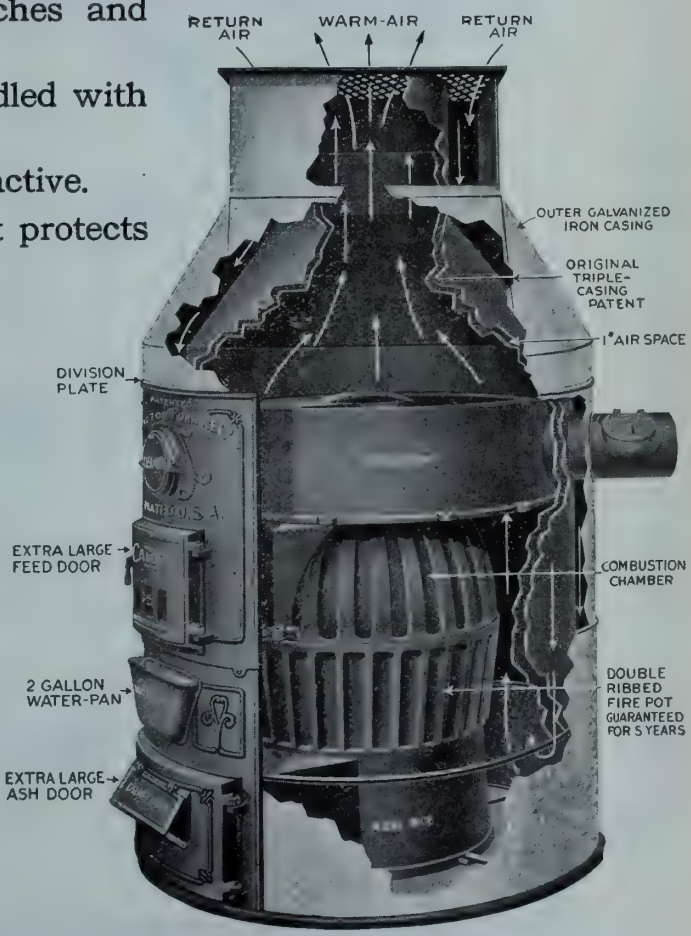
Thousands of prominent merchants in different countries have found the CaloriC the nearest to 100% satisfactory of any article they have ever sold, and with many it has rapidly developed into the biggest asset of their business.

The CaloriC has these distinct advantages from the merchandising standpoint:

A simplified warm-air heating system with a market in almost every home—also a vast market in heating stores, churches and other buildings.

Low in cost and easily and quickly handled with small capital.

Dealer profits that are exceptionally attractive.



Sold under a Moneyback Guarantee that protects both seller and buyer.

Proven and perfected through years of service—over 125,000 Calorics in use.

Selling season every day in the year. Exclusive selling territory.

Backed by the whole-souled co-operation of one of the most successful selling organizations in the world.

For details of the CaloriC opportunity, write or wire today to

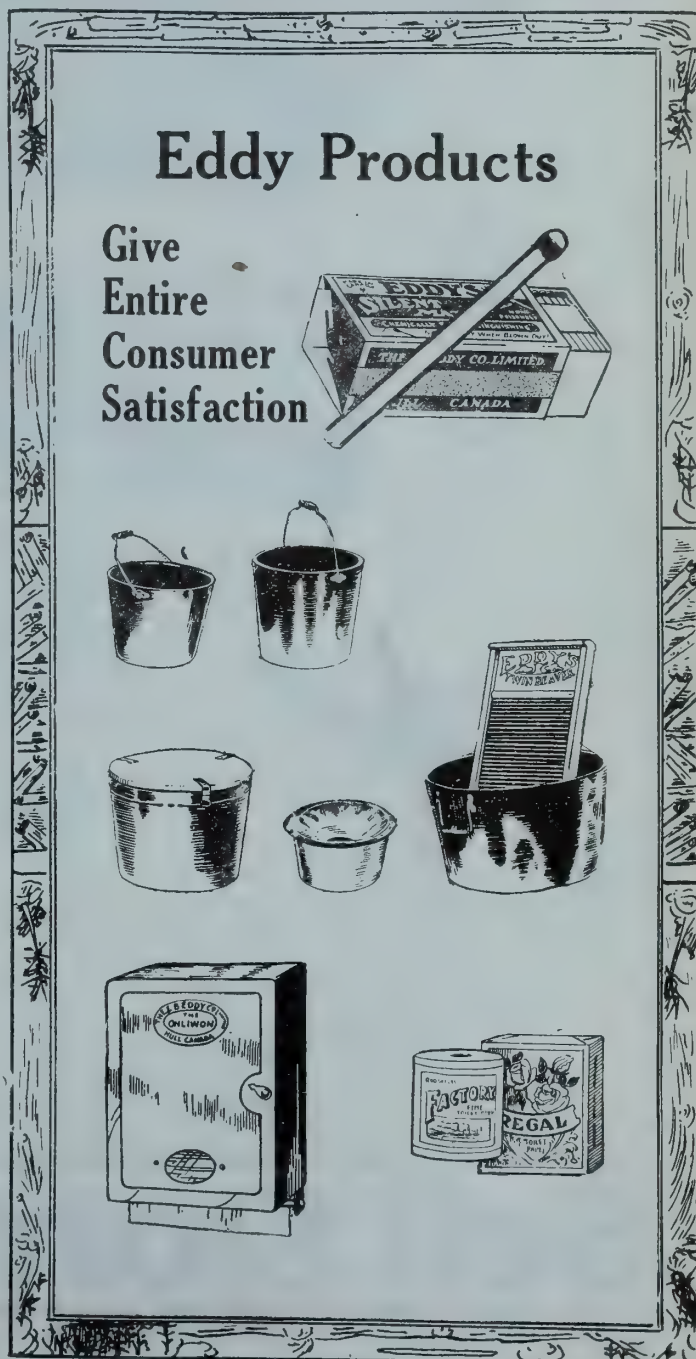
Story for Week Dated Feb. 26, 1921 Being No. 46 in the Series

Making E. B. Eddy Company Indurated Ware Products

TO find Eddy Company indurated ware in its first manufactured form at the plant you would have to visit the pulp mills which you have already read about. Here in the form of mechanical pulp and sulphite pulp the substance of the indurated ware exists, awaiting the hot ordeals by which it will become pails and tubs, and buckets and fibre washboards, etc.

The pulp in consistency to flow freely through pipes, is pumped to the indurated ware factory. Here it pours into a beater not unlike those which are found at the paper-making plants. In the beater the pulp undergoes a very thorough mixing to comb out the fibres, and put them in order to join firmly in the solid texture of the ware.



From the beater the pulp is pumped to a battery of powerful hydraulic presses specially devised for the manufacture of each particular indurated ware article. Pails, tubs, buckets, etc., are formed over a core of perforated brass, which is further covered with cheesecloth before the pulp flows into place around it. The outside mould of the machine is also of brass, and a pressure of from 200 to 2,000 pounds per square inch can be applied.

Under this tremendous pressure the pail or tub takes shape. It is released from this press after due time, and proceeds to the hot press, where it gets the impress of the firm name applied as well as further pressure to improve its qualities. It is dipped in special varnish-like composition to make it impervious, buffed off to smooth down any imperfections, and baked in a kiln to dry it. Three dippings and if need be four, and a baking after each dipping, guarantee for Eddy Co. indurated ware perfect quality. Handles are fitted after the baking has been done.

Paint Sales That Pay a Profit

One unit or as many as you want, in a compact row

You want a profit on every sale, and you should have it. But with the present high cost of paint oils you stand a big chance of losing your profits, unless your methods of handling are systematic and free from loss of time, labor and oils.

Pumps on Sales room Floor. Tanks in basement where ver convenient.

BOWSER ESTABLISHED 1885

Paint Oil Storage Systems

prevent paint oil losses. The pumps measure accurate quantities: no over measure, no leakage, no spilling, or evaporation. Everything is exact, systematic and saving. The sooner you install a Bowser System the sooner you will begin to reap the profits from proper storage equipment.

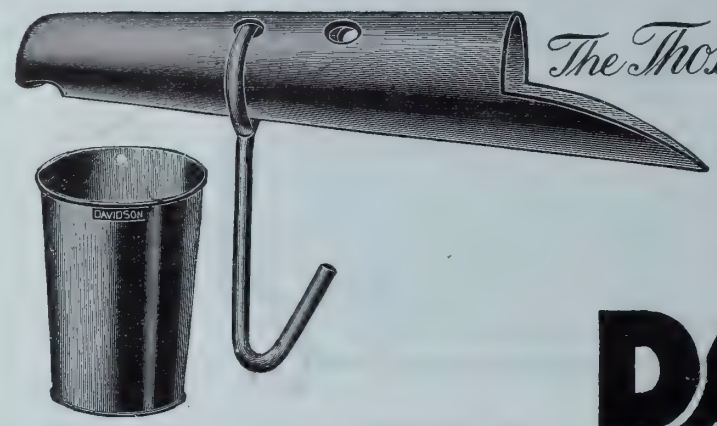
Sap Buckets and Spouts



How about Stock *For* Spring Trade?

Have you anticipated your requirements for the Spring yet? Many lines will need restocking—this week we draw your attention to Davidson's Sap Buckets and Spouts, which are big sellers on account of their quality and reliability.

Sap Buckets are stocked in plain tin, terne plate and galvanized iron—in all sizes. These galvanized buckets are very durable because they are rustless—they are made of black sheets and galvanized by hot process, thereby ensuring well-filled seams, which leave no place for moisture to lodge and corrode.

The "Sterling" Leaded Spout is also rustless, and, consequently, is a far superior article on account of being less harmful to the tree than other makes.

An inquiry will receive prompt attention.

There is Good Business

For You This Spring in

STEWART NO. 1
Horse Clipping Machines

Talk Spring horse clipping to every horse owner who enters your store. Many of them are readers of live stock or farm papers and already know the benefits of Spring clipping.

A clipped horse dries out quickly, rests comfortably, and is eager for work next day. He is safe from heaves, pneumonia, colds, rheumatism, etc. Having no long hair to hold moisture, he gets nourishment from his food instead of its going to create extra heat as in the case of horses with a mass of cold, wet hair. Clipping is as necessary as shoeing or good bedding, and horse owners appreciate it to-day.

Get in touch with your jobber at once so that he can supply you when you want the machines —in time for Spring clipping.

Three Special Reasons Why You Should Order Your FREEZERS Now

(1) We can ship more promptly now than when the big demand is on.

(2) Transportation is better now.

(3) Hot weather is sure to come. So will the rush for Freezers, all along the line, from user to dealer,—to jobber,—to us. But we cannot supply every demand promptly the last minute. Be wise in time, get your stock now while the getting is good. Be ready to supply your customers the moment they are in a humor to buy. If you hesitate now you may lose later. We venture to guess that your stock is low, so there is every good business reason why you should prepare in time. Place your order with your jobber now—you cannot lose.

1921—The Return to Normal

The holiday trade is over and buying has settled down steadily to its normal gait—a gait with which none of us has reason to be dissatisfied.

Judged by pre-war standards, business is running at a merry clip and that is all we can ask. It was the pre-war years that built businesses to stay.

Haphazard, irresponsible buying is finished. The year 1921 sees neither a slump nor the indications of one—merely the return to the normal.

Nothing is more in tune with the times than the

GILLETTE
Safety Razor

the steady, all-the-year-round seller that sold to the public for $5.00 before the war, through the war and remains the same to-day.

The Gillette Safety Razor is well advertised; it is more than half sold when your customer comes to you; it delivers service and satisfaction far beyond its price; it brings your customers back to you when new blades are needed; it affords you a generous profit without risk.

You Can Feel the Quality with Your Eyes Shut

You know—you just feel certain—that Quality exists in every New Canadian Beauty Electrical Appliance.

You can ***feel*** the Quality with your eyes shut. Open your eyes and you can ***see*** the Quality—in the sparkle of the highly polished nickel and in the trim, graceful lines.

The New

Canadian Beauty Electrical Appliances

For strength and construction nothing suits the New Canadian Beauty Line better than a shop test. Take one of our Toasters, for instance, and two or three of other makes. Go over them all point by point, and you will find that the New Canadian Beauty Appliance will score every time.

This counts nowadays. Women know enough about electrical appliances to distinguish Quality appliances from those of inferior grade. And they can ***see*** and ***feel*** the Quality in the New Canadian Beauty line.

Your jobber can supply you—with promptness—or, if you prefer, order direct.

Questions Re Income Tax Statements

No Allowance Made for Price Declines on Stock in Hand—Ruling Regarding Carrying Over of Accounts and Policy re Bad Debts—Percentages of Depreciation on Buildings, Fixtures, Vehicles

DIFFICULTY has been experienced by some hardware merchants in correctly filling in the Federal Income Tax forms required to be filed by April 30th setting forth income and other data concerning business during 1920. Some of the points are dealt with herein, and the answers are based on information secured by Hardware and Metal in an interview with an official of the Income Tax Department in Toronto.

(Question)—On the bottom of the Income Tax sheets there is a Surplus or Dividend Account. Will you explain through the columns of Hardware and Metal how this should be made out? We enclose the form cut off from last year's sheet.—Dakin Bros., Digby, N.S.

The part of the form referred to is the section for statement of "Undivided profits or surplus account," having under the debit side entries of "deficit at beginning of period (if any); Profits distributed to partners as follows; Other items; Loss for 1920 Accounting Period, and Undivided profits at end of period. On the credit side are listed: Undivided profits at beginning of period (if any); profits for 1920 period; other items, and deficit at end of period?

Assessment on Net Profits

(Answer)—This section is a more or less unimportant part of the form as the assessment is made on the net profits shown in the profit and loss statement on the same sheet. This section is merely to show the division of profits between the partners or other members of the company, and naturally applies chiefly to small firms. Should part of the profits for the year be transferred to capital account this will be shown on the "undivided profits or surplus account" form, but tax will be levied on the profits for the year as shown in the profit and loss section. Then again while there might be a profit during 1920 a deficit possibly existing at the beginning of the year from the previous year's operations would really result in a deficit at the end of 1920 but tax will be levied on the profits for the year. This section is merely a summary of the other information outlined, and is, we think, pretty clearly asked for.

Allowance For Price Declines

(Question)—In making up a financial statement and preparing our Income Tax forms, are we justified in deducting a certain percentage—say 15 or 20%—from the grand total of our inventory, to offset the decline in the market? We understand the trade is allowed to deduct by listing lines already affected by the decline. This will not cover the case in our opinion, as with the country in the present financial condition buying is going to be light. Otherwise we cannot honestly list these items that will probably be affected in price before they can be unloaded.—Glover Bros., Windthorst, Sask.

(Answer)—No allowance is made whatever for price declines on stock now on hand. In making up the inventory, while a policy of "taking stock" at replacement values instead of at cost has been recommended in view of prevailing conditions, yet the Government clearly stipulates that for the purpose of Income Tax, inventories shall be shown at cost. This need have little effect upon the basis for income assessment, however, as it will be reflected in decreased profits in the statement of 1921 business. Thus the inventory for the commencement of 1921 appearing in the next year's statement will show stock on hand in January, 1921, at a comparatively high figure, and will naturally decrease the figure of gross trading profit for the year. Similarly high-priced stock which had to be marked down during 1920 owing to declines resulted in less profit to be shown on the statement now being made out.

Carrying Over of Accounts

(Question)—Re the carrying over of accounts. Are we allowed to charge off what we consider to be bad accounts? In our experience of fourteen years of credit business we find that the number of credit customers who are out to do us is very small. Still, we do not like to show all our outstanding accounts as being 100%. May we deduct, say 10%, or thereabouts? We think being taxed on what we have out on account is most unfair. Farmers are not paying us 10% to be carried over if they can help it. Conditions are beyond their control. They are selling their crops for less than it cost them to produce those crops.—Chas. O. Glover, Windthorst, Sask.

(Answer)—There are two ways of overcoming this difficulty. Either the most questionable debts can be written off entirely on the Income Tax form, providing they are also written off on the merchants' books, or an allowance of 1% to 2% can be made by the merchant for bad debts on all accounts receivable, providing men-

tion of such allowance is made in the merchants' books and also on the tax form. Both plans cannot be followed, it must be one or the other. If certain debts which now appear to be redeemable prove during 1921 to be bad debts allowance can be made in the statement of business for 1921, providing, of course, that this is made clear on the books. Emphasis is laid on the fact that the merchants' books and the statement he files must coincide so that no difficulty will arise should an inspection be made.

Percentage of Depreciation

In connection with the depreciation account, the following percentages of depreciation are allowed by the Government:—

	Annually
Machinery, tools, furniture and fixtures	10%
Brick buildings	2½%
Stone or concrete building	2%
Frame building	5%
Automobiles (passenger or commercial) 1st year	25%
Automobiles (passenger or commercial) 2nd year	15%
Automobiles (passenger or commercial) 3rd year and after	10%
Wagons	10%

In connection with the use of automobiles it is pointed out that tires cannot be charged up against capital as depreciation. This item figures in running expenses as elsewhere allowed for. No depreciation is allowed on land values.

Statements Must Balance

It is pointed out by Income Tax department officials that the statement of total assets and total liabilities should balance. This can be done by the addition of the items capital account and surplus under the heading liabilities. Depreciation is figured in the section "sundry (specify)" in the statement of profit and loss.

GUARANTEES PRICES FOR THREE MONTHS

The unique plan of applying the policy of guaranteeing prices for a certain period in an effort to get customers to buy is being followed by Bay's Hardware, Kamsack, Sask. A recent announcement by this firm in the local newspaper states as follows:

"We Guarantee Prices for three months; that is, in the event of you purchasing any article at any time, we will issue a slip covering the transaction. If within three months the price on this article declines we will refund you the difference.

"Don't wait for lower prices because we protect you. It will pay you to buy goods as you need them."

The plan of revising prices on the basis of declines made by wholesalers and manufacturers is also followed and announcement to this effect incorporated in the local advertising.

What is the Use of Weights And Measures Inspectors?

Another Western Merchant Complains That Method of Handling Gasoline in Pumps Results In Big Loss—Loses 5 to 9 Gallons in 48 Gallon Tank

DEALING further with the question of profit in selling gasoline from a curb pump, as questioned in a letter from a Western hardware merchant and as set forth in February 12th issue of Hardware and Metal, the following letter deals further with the situation:

Editor, Hardware and Metal.—After reading your article re Any Profit in Gasoline From Pump, Feb. 12, 1921, would like to give my experience of same after handling gasoline for four years, knowing that it is handled at a loss, at least as far as I am concerned, and would like very much to see this situation rectified. I would suggest other hardware men, etc., to try it my way: Put a barrel of gas in empty tank, say, 48 gallons, as invoice, and see if he can get 43 out. If he can, he can beat me, for I have been all the way from 5 to even 9 gallons short and would like to demonstrate to any weights and measure official at any old time he likes to drop in. Would like to see other dealers' experience in your valuable journal.

Shortage in Coal Oil, Too

I would also like to say something about coal oil, as I have found during my four years' handling same that I am out about 3 to 5 gallons per barrel. Does shrinkage, due to evaporation, account for it? And would like to know why we should not all of us be able to buy drums with a government stamp as to the amount they will hold, Imperial measure, and demand that measure that we have to give in them. This, to my opinion, is the only solution to this terrible state of affairs as it at present exists with dealers in gasoline and coal oil.

Yours truly,
CHAS. EVANS, Macrorie, Sask.

Little Response to Lower Steel Prices

Conditions Unsettled—Independents Prices Further Reduced—Wide Price Range on Sheets—Wire Nails Off $3

COMPLETE readjustment of the iron and steel market to a stabilized basis manifestly has not yet been accomplished and conditions remain decidedly unsettled, says the Iron Trade Review. The cleavage between the position on prices of the independent companies and that of the Steel Corporation has been rendered more pronounced by a further descent of some of the schedules of the former producers. Competitive prices as much as $9 to $11 per ton below the maximum figures now being maintained by the largest producers have appeared the past week, and this spread is growing steadily. That the Steel corporation must meet this situation before many days is a matter of common market opinion.

Declining plant operations of the Steel Corporation are being given close attention in the general industry because of their bearing on the question of prices. Plainly the response of steel buyers to the market's lower price basis created by the independent mills has been disappointing to date.

Expected price readjustments in finished steel are going forward to conform with reductions previously established in related products. The Iron Trade Review's market composite this week is $47.10. This compares with $48.36 last week, $51.73 in all January, and $53.43 in all December. Conditions in the European markets are similar to those now in force in this country. The depression there is extending under conditions of the severest competition. Many British furnaces and steel works are idle. Wages are being reduced for the first time in several years.

Readjust Wages and Freights

With new buying so small that it is difficult to estimate and a receding scale of operations on the part of the United States Steel Corporation, thoughts are now centred on transportation charges as one element in manufacturing costs which has not had a revision, says the Iron Age. Demand is developing for a readjustment of railroad wages and thus of railroad freight rates.

The Steel Corporation in the Chicago district has dropped to a 65 per cent. ingot operation and three blast furnaces

VALUE OF PRICE TICKETS IN ELECTRICAL DISPLAY

In displaying electrical appliances the generous use of price tickets has been followed by many merchants with good success. The underlying idea of this display is the showing of lines used in connection with preparing breakfast. In this connection other electrical appliances such as toasters, grills, etc., might be added to the display of percolators. A map of the western hemisphere is shown with a window card bearing the statement "Make the world's breakfast a success." Advertising window cards are made use of in large number in this display.

Farmer Customers Buying Generously

Says J. M. Adam, St. Mary's, Ont.—Special Department for Electric Stoves—Auto Accessories to Have Place of Honor—New Department for Sporting Goods—Doubling Efficiency of Display Tables

AN unusually attractive window display at St. Marys, Ont., this week was arranged by J. M. Adam, hardware merchant. With a handsome cabinet washing machine as a central background he laid out on the floor of the window a striking showing of aluminum ware and electrical toasters. The display is one that not only attracts from a distance but holds the attention, and was a real sales producer.

"We no sooner had it in," said Mr. Adam to Hardware and Metal, "than we found out by the inquiries that people wanted aluminum ware and the other things we were showing. There is no better way of keeping merchandise moving than by seasonable window displays."

A Combination Display

In his other window Mr. Adam has a combination display. The window space is divided by an attractive wooden partition. One half of the space is given over to a showing of tools. The rest is occupied by paints. Mr. Adam says that he finds there is an all-year demand for tools and paints and whenever he finds himself wondering just what he had better set out before the people he can always be sure of getting results from either paints or tools or both.

Business, he stated, has been uniformly good. St. Marys is a town of 4,500 in the heart of a rich farming territory.

Farmers Prosperous

"The farmers," said Mr. Adam, "are not affected by conditions which have been disturbing business in some places. They are prosperous and they are buying generously. In spite of the unusually mild winter our stove sales have been most satisfactory. Those who want stoves are demanding the best. We have sold many up to $175 each."

Mr. Adam stated that he finds such a steady and increasing demand for electric stoves that he is fitting up a special department to show them. Up to the present time he has sold these stoves from the catalogue, but business in them has developed to the point where he sees a future for it, and in order to keep pace with the development a special section for electric stoves will be fitted up.

Auto Accessories Too

Mr. Adam has always done a satisfactory trade in auto accessories, but is planning a little rearrangement which he believes will make for still larger sales. His accessory department at present is at one end of the store. Very shortly it will be given what might be called the place of honor, in that it will occupy the space just inside the door at the right as one enters. Mr. Adam will have a silent salesman of the latest pattern filled with

Developing Trade in Decorative Burlap

Revival of Building Will Help Burlap Trade—Three Plans for Displaying Burlap in Store and Window

THE expected revival of building holds much for the hardware merchant who investigates the advantages of decorative wall burlap. Now that burlap may be had, for the first time in several years and at reduced prices, early planning for a selling campaign on these goods should fully repay the dealer. Many indications point to a revival of building activity, and it is when building conditions are active that burlaps are in demand.

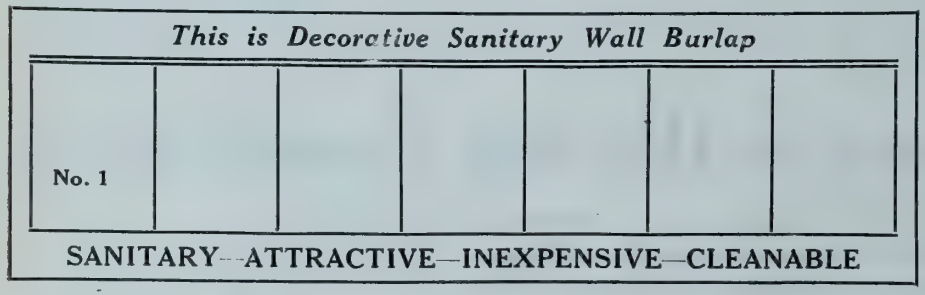
How to build up a trade for these products is of vital interest to the trade. For this reason two or three methods will be outlined.

Plan Number One

Decorative wall burlap is supplied in rolls of varying widths—from 30 to 90 inches—and in length 30 to 60 yards. The popular grades are the "oil coated," white, drab and green. Each is thoroughly impregnated with a linseed oil and color pigment, leaving the burlap in condition to be finished in any desired shade after it has been applied to the wall.

Open up a roll of this burlap and cut off a few pieces (any shade will answer). The size of these may vary from 6 inches square to 10 inches. Now secure a brush and three to six desired tints of flat paint, tinting each of the several squares with one shade. Let them dry thoroughly. Make a light frame of wood strips, the material for this being one inch thick and two inches wide. On this frame tack the square samples. With a little care in selecting shades you may now have a pleasing buff, suitable for hallway; a deep green or a red, either is suitable for living or dining room; a pleasing brown, a French gray, or a tan—any of them suitable for den, dining room, living room, etc.—according to one's taste.

Using a good strong flour paste, or small invisible tacks, secure these burlap squares to the frame and cover the edges with a narrow molding, ½ or ⅝ inch wide, suitably tinting the moldings. Then place two screw eyes in the frame and suspend from ceiling or on wall of store. The plan might include the display of this in the window. (See below.)



The showing of this would create interest. It would improve the display to have some brief information neatly lettered above or below the display of various tinted burlap, such as this:

> "Decorative Wall Burlap will help make your home brighter. These shades were made by applying one coat to each of the samples. Moderate in cost, attractive, comfortable, renewable, this is ideal as wall covering for Dining and Living Rooms, Kitchens, Halls, Stores, Offices, etc. Ask us to explain more fully."

Plan Number Two

In addition to making this a part of window display—in which several rolls of the burlap might be stood on end—with strips of the various shades rolled out toward the glass of window—it might be well to make up a little "piece" in the way of a hinged screen.

Here is how the finished display would look:

Using the 1 by 2 inch strips as before, a frame, or three frames, might be covered with the burlap, and then tinted suitably. The hinging of the three panels would be an easy matter. At the top of each screen panel a neat and attractive stencil would make so effective a finished piece as to attract every customer. Placed where it would be seen, with a typewritten description on the middle panel, having an attractive heading, this little effort would prove useful in creating many a sale.

Try out these suggestions. They will reveal the power of showing "something different."

FARMER CUSTOMERS BUYING GENEROUSLY

Continued from page 37

various accessories which lend themselves to display, and on the wall behind this he will fit up a wall display. Auto accessories he regards as a most promising line and his experience is that sales are not only steady but show a nice increase each year.

Sees a Future

In the space at present occupied by auto accessories he plans to fit up as soon as possible a sporting goods department.

"There has been a steady and increasing demand for sporting goods," he said, "and I am satisfied there is a lot of good business to be had. My intention is to keep the department up to date by showing strictly seasonable lines. There is a revival in this town of both baseball and lacrosse and there is a steady call for these goods in the spring, summer and fall. There is also a demand for football and hockey goods and for skates and I am looking for the new department to show a nice profit and in addition be a good advertisement for the store."

A Good Idea

Last week Mr. Adam worked out an idea which will at least double the efficiency of his display tables. Just here it might be mentioned that display tables are one of Mr. Adam's hobbies. He has proven time and again to his complete satisfaction that display tables speed turnover and that they save the salesman's time. Half a dozen display tables are always to be found at vantage points in the store where customers cannot help seeing them. Heretofore they have been just ordinary tables. Now they are double deckers and the bottom display space is tilted sharply so that maximum display is obtained. On one of these tables Mr. Adam may be showing on the top various small articles of aluminum ware. On the bottom he can display perhaps dairy pails, cans of paint or any other seasonable lines. His display tables are kept constantly changed. This is generally a necessity, as the merchandise is sold from them so rapidly that it has to be replaced and it is always replaced with a different line. People like to see a store different when they go in, says Mr. Adam, and they are always interested in new displays of whatever is set out. His display tables he regards as one of the most efficient sales forces he has.

An Attractive Display

Right up in the very front of his store he has arranged a small but very attractive display of bath room fixtures. Practically everything shown is nickel plated and makes an excellent showing. While there is of necessity in a town of 4,500 a limited sale for goods of this kind, Mr. Adam has found that numerous house owners are interested in the display and that it has increased his sales.

As far as business is concerned, Mr. Adam is optimistic regarding the outlook. As long as the farmers are as prosperous as they are he sees no reason to worry about business and is going right ahead on the plan that the man who has the stock and lets the people know about it is going to get the business.

Explains Recent Firearms Legislation

In View of Contemplated Action to Amend This Law Every Hardware Merchant Should Be Well Informed on Details of Criminal Code—Efficient Regulations Required to Catch Criminals

MUCH misunderstanding of the provisions of the offensive weapons act, section 118 of the criminal code, is evident among hardware merchants. This fact was shown at the convention of Ontario hardware merchants in Hamilton last week when joint action was suggested to have this act amended. The following explanation secured from Superintendent Jos. Rogers of the Ontario Provincial Police will help to a clearer understanding of the law:

Offensive weapons under the act are divided into two classes. The first includes "sheath knives, bowie knives, daggers, stilettos, metal knuckles, skull crackers or other offensive weapons which may be concealed on the person." The second class includes "cannon, machine guns, rifles, guns, revolvers, pistols, bombs or other firearms, or any devices for muffling or stopping the sound of the report of any firearms."

Permits to carry weapons of the second class may be obtained from chiefs of police or other officials. Permits for weapons of the first class only allow them to be kept in the home and under no circumstances may they be carried upon the person except in the home.

Permits may be issued by officers of the Canadian Mounted Police, Dominion Police, by magistrates, sheriffs or chiefs of police. No fee is set by the act according to Superintendent Rogers, and officials have no power to charge a fee for issuing a permit. They have power, however, to refuse permits unless satisfactory cause can be shown for the carrying of a weapon.

Cover One Year Only

Permits are issued for a year only, and must be renewed at the end of that period. Permits are valid only within the jurisdiction of the official issuing them. A permit issued by the police chief or magistrate of Toronto would permit the carrying of weapons only in Toronto; a permit issued by the provincial police superintendent would permit weapons to be carried anywhere in Ontario.

Permits are required for every individual weapon, including war trophies.

"How about a gun which was defective and could not be used?" "It would still be a gun and a permit would be required."

"Are permits required for hand grenades?" "Yes, they come under the head of bombs."

"Would a rifle with bayonet attached be counted as two weapons, and require two permits?" "There is no reference to bayonets in the act."

Ownership of a weapon before the coming into effect of the act in October last does not exempt a person from the obligation of obtaining a permit. The only exemption is in the case of shotguns, and this applies only when they were owned by British subjects. The act does not restrict the issuing of permits to British subjects only, but Superintendent Rogers states that very few permits are issued to foreigners.

Police have power to search any persons suspected of illegally carrying weapons. Search warrants are required for the entrance and search of homes, and such searches are made only when there is reason to believe weapons are illegally possessed there.

The act also forbids sale or loan or gift of the weapons enumerated to persons not holding permits. The maximum penalty under the act is $100 fine and three months' imprisonment.

Strict precautions are being taken in connection with all weapons imported into Canada, Superintendent Rogers stated, telling of an occasion on which it took his department two weeks to obtain the release of a number of guns sent them from the United States.

Sees Brisk Hardware Business Ahead

At Completion of Satisfactory February Sale Purdom Hardware Co., London, Ont., Are Planning on Rapid Resumption of Business

THE annual February sale of the Purdom Hardware Co. at London, Ont., which closed this week was the most successful ever held in the history of the firm.

"We are more than satisfied with the results," said Thomas H. Purdom to Hardware and Metal. "Right from the start we have had a most satisfactory turnover and business was good without exception every day of the sale."

There is a reason for these satisfactory results. The sale was not for one moment left to take care of itself. It was carefully planned. The firm figured on not only arousing the interest of the buying public, but on maintaining it right through the month. In order to do this it was necessary to have something new and attractive to offer the people all the time.

Features For Each Week

"We laid our plans for each week," said Mr. Purdom. "In opening we featured all general lines of tinware and graniteware. The second week we made a big drive in gray graniteware. For the third week we featured gray and white goods and for the closing week we went strong on aluminumware."

No firm in the province makes any more consistent use of window displays and advertising space than does this one. For the sale just closed there were big announcements, usually quarter pages, well illustrated and in every instance the prices were given in display type. This advertising matter was backed by window displays that were constantly changed. In connection with the windows price cards were freely used, and prominence was given to the marked-down prices. The old prices were shown on the cards with a heavy line through them and the new prices below.

"The sale made a wide appeal," said Mr. Purdom. "Women from all parts of the city came into the store asking for this and that article they had seen advertised. Many of them, when they saw our window and store displays, purchased other goods. The same thing happened with the country trade. Farmers and their wives came in for 25 miles around and replenished their stocks of tinware and enamelware. In a great many cases we lined them up for paint, roofing and other things they will require in the spring."

Mr. Purdom predicts splendid business ahead this year. He stated that with about $5,000,000 worth of building ready to start in London just as soon as weather conditions permit and with farmers all over the district as prosperous as they are, business cannot help but be good.

"We have found everything most satisfactory," he said, "and from inquiries that are being made constantly I am justified in saying that we are going to sell a large amount of merchandise in the coming months. I am looking for a brisk demand for tools on account of so much building and a big demand for paints, oils and varnishes. Both farmers and city residents have been asking about paints for work they are planning and there is no doubt about the orders that are going to come just as soon as weather conditions permit the work going ahead."

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

SATURDAY, FEBRUARY 26, 1921

AN ad on electric heaters which has recently come to our attention, and which appeared in an Ontario newspaper on February 10th, is entitled "With the approach of Fall the comfort of an electric heater will be appreciated in the household." It was with relief that we noted the ad was by an electrical dealer, thus absolving the hardware trade from a charge which has been frequently made in recent years in regard to the timeliness of their local advertising.

* * *

SECOND reading has been given in the Ontario Legislature to a bill aiming to put distilleries in the same class as manufacturers for business assessment purposes when they are manufacturing alcohol for commercial purposes only. Since it is apparent that tinsmiths are likely to escape from the classification of manufacturers, it is to be hoped that the aforementioned alcohol distillers will be the nearest approach to the hardware business to be classed as such.

The Income Tax Forms

CLOSE attention should be given the filing of Income Tax forms for both the Federal Income Tax and any local taxation on income, the former being asked for now and expected to be filed prior to April 30th. A number of technical points have arisen in connection with filling in the Federal tax forms and rulings have been secured by Hardware and Metal in reference to these points. An article in this issue on the subject will help to clear up any difficulties and any further questions from the trade on the subject will be taken up on receipt of enquiry.

One of the important points to remember is to have the records of the business in absolute accord with the statement filed. Inspectors will be sent through the country to check up returns and there is liable to be trouble where the books of the business show records which do not coincide with those filed. In some cases this may seem difficult but according to the rulings made on the points outlined, no undue hardship is intended to be thrust upon the trade and provision has been made for practically all eventualities. For instance, while the merchant may have a number of accounts receivable on his books at the end of 1920 among which he expects a number of them will be unredeemed, he has three courses open to avoid being taxed upon an amount which he may never receive. He can write off the debt as "bad" and so enter it upon his own books, or he can leave it as an "account receivable" and make a flat allowance on all such accounts of 1 per cent. to 2 per cent. for bad accounts, or he can carry the account over to 1921 account and show it as carried over. There are many other situations such as this, some of which are dealt with elsewhere in this issue, and Hardware and Metal will be glad to assist any hardware merchant in handling this matter.

The Sale of Offensive Weapons

THE recent amendment to the Criminal Code, section 118, dealing with the carrying or ownership of offensive weapons places stringent regulation upon the sale of such lines through retail hardware trade. This matter was brought to the attention of the retail hardware merchants at the convention of the Ontario Retail Hardware Association in Hamilton last week, by James Hardy, secretary of the Canadian Wholesale Hardware Association. It was evident from the remarks made by retail merchants upon that occasion and also from communications received by Hardware and Metal as a result of the publication of the amendments in a recent issue, that the provisions of the act are not fully understood by all in the trade. Joint action was decided upon at the convention mentioned to have these regulations made less stringent, but a thorough understanding of the law should be had by all merchants before tackling this subject. Considerable light is thrown on it in information given elsewhere in this issue.

It will be noted that the offensive weapons are divided into two classes. Permits for knives, daggers, metal knuckles, etc., allow them to be carried in the home only. Permits to carry rifles, guns, revolvers, etc., may be obtained without the payment of any fee from chiefs of police, officers of the Canadian Mounted Police, Dominion Police, magistrates or sheriffs. Permits are valid for one year and only within the jurisdiction of the official issuing them. Permits are required for war trophies or even for defective guns, though it has been explained that reputable citizens who have such trophies in their possession will not be deliberately "bothered by the police in this connection." The law is to enable the police to search the homes of suspicious individuals. However, this section is not of as much interest to the hardware merchant as that dealing with their purchase. Shotguns owned by British subjects prior to October last are the only weapons exempted from the regulations.

There will be much misunderstanding among the public as to these regulations and every hardware merchant to protect both himself and his customer should become thoroughly acquainted with them.

Exports Now Exceed Imports

AN improvement in the trend of Canadian trade is indicated in the trade returns for January. It is noteworthy that exports of Canadian products for that month exceeded by $8,660,000 the total imports for the month. The continuation of this relation of exports to imports will do much to rectify the country's adverse trade balance. There are only two months more in the fiscal year and as the figures stand now the exports come within twenty million dollars of equalling the value of imports for consumption. It is to be hoped that when the year closes it will be found that more goods have been sold abroad than have been imported, but in any case the balance, if there is such, will be very small. A noteworthy feature of the returns is the decline in importation of duty-free goods. These are mostly raw materials and semi-manufactured articles for use in Canadian factories. This is explained in some part by decreased activity in manufacturing in Canada and while this latter condition is not altogether welcome it results in temporarily improving Canada's position as a debtor nation which must pay with exports its interest on foreign obligations.

Retailer's Relations With His Banker

Merchant Can Do Nothing Better Than Submit Periodical Financial Statement to His Banker—All Retailers Not Good Business Men—Details Bankers Require to Know—Exactness Necessary.

Written for Hardware and Metal by a Banker

WE bankers are human, even if some of you business men think otherwise.

Now, the truth of it is that the banker is a good business man. Regard for the law and his depositors, to say nothing of his own financial welfare, demands that he exercise good judgment in place of sympathy when the average merchant asks a loan.

Don't think that we chuckle fiendishly when you need money to pay your notes or the interest on the mortgage, and have to come to us. Don't call us ugly names because we happen to refuse. It's all in the interest of good business. Personally, I might like ever so well to make a loan to Jones or Thompson, who are neighbors and friends, but if I am convinced that it would be poor business, friendship must not count beyond a certain point. To grant loans in some cases would work positive injury to the borrower, as well as to the bank, for borrowing often teaches bad habits.

Why So Strict

Many retail merchants cannot understand why bankers are so strict—why financial statements are demanded and why many of these are unsatisfactory. The answer is that not all retail merchants are good business men. They do not possess enough information about their business to make up a reliable statement, as a rule. If they cannot show sufficient cause why they should be trusted with a loan, why should these merchants blame the bankers?

The day of loose business methods is passing fast. Margins of profits are drawing closer and closer, so that it is necessary to do more figuring and better managing to find a profit. Besides, retail businesses are becoming so complex as to stock and seasons and discounts that much greater efficiency is needed to-day than grandfather needed in his general store twenty years ago.

A Businesslike Statement

That is why the banker asks a business-like statement and one that he can rely upon. No guesswork will do. The retail merchant might fool himself about his present worth and profits, but it is not so easy with the banker, who doesn't carry dead stock and dead accounts on his books year after year.

Whom should a banker trust? That depends on a number of things. The merchant may have a rating in some credit bureau. The banker may have had dealings with him before. There may be security or references to look up. A number of things will go to help the banker, as well as the wholesaler or any other business man, decide whether a certain applicant should be accommodated.

This much is true in all cases, however, The retail merchant can do nothing better than to submit a periodical financial statement to his banker, his wholesalers and jobbers and to selected mercantile agencies. Frankness, absolute frankness and honesty, will pay in the great majority of cases, and will serve to give the applicant a better rating than he would otherwise be able to get.

Protect Credit Jealously

It is safe to say that there are many merchants who do not enjoy the high rating they deserve. This is because they do not take advantage of their cash discounts and because they are not able to furnish a financial statement that does them justice.

Credit is a thing to be jealously protected. Good credit enables a merchant to buy where otherwise cash would be demanded. Reputable wholesalers and manufacturers are coming more and more to favor their best dealers in a number of ways. But the best part of building up a good line of credit is that the merchant is thus prepared against the time when either cash or good credit is needed and needed badly.

What Statement Should Contain

What should a good financial statement contain? It should tell in detail the assets and liabilities of the merchant, and his profit or loss for the past six months or year. There should be no equivocation or false valuations in such a statement. It is surprising how many retailers place artificial valuations on their stock or property, allowing nothing for depreciation, and think they have made an honest, conscientious statement. A statement is untrue if goods are entered at more than their market price or more than they cost, and if fixtures or other property are valued at more than they will bring at a forced sale.

A Well Kept Set of Books

Most banks and credit bureaus can supply statement forms. In cases where, because of a poor bookkeeping system, the seeker of credit is unable to arrive at his net worth, the bank sometimes undertakes to audit his books for him. The best preparation for a financial statement is to have a well-kept double entry set of books. These will yield all the information necessary.

It is through his demand for exactness and truthfulness that the banker stands between the retailer and loose business methods. Much credit is due banking and other institutions which are endeavoring to raise the plane of business methods and financial credit. They are a factor in the big struggle for efficiency.

Favor Removable Elecric Fixtures

Prominent Electrical Interests Discuss Advantages to Dealer and Public of Standard Receptacle for Fixtures

AT a recent meeting of prominent electrical interests in the United States the proposal that lighting fixtures be fitted with plugs and receptacles taking the place of the present soldered and tapped joints, so as to facilitate the work of putting up or taking down ceiling and bracket fixtures, was discussed from all angles and the consensus of opinion favored the idea. Almost every speaker emphasized the fact that the success of the new method of hanging fixtures would depend upon all the manufacturers agreeing on a standard interchangeable type of box or receptacle and plug.

The advantages of the idea to the general public and to each group of the trade were outlined and it was the opinion that the new construction would increase the sale of fixtures much beyond the present volume. Another authority stated that much better lighting would result because it would be possible to easily try out several different types of fixtures and also to move fixture about from one outlet to another to adapt the lighting of an office or workroom to the changes in furniture, partitions, etc.

Another point brought out was that the new plan would mean more volume of wiring for the dealer and would enable him to earn his money more easily, at the same time giving the public a better job.

News of Western Canada

Hardware Personages at Banquet

W. S. Fallis, D. McIvor, W. J. Illsey and Others Speak at Joint Gathering in Winnipeg to Hear Address on Business Outlook

WINNIPEG.—A number of prominent personages among manufacturers and wholesalers of hardware in Western Canada were present at a "get-together" banquet held by members of the Canadian Credit Men's Association, the Canadian Manufacturers' Association, the Manitoba branch of the R.M.A. and the Sales Managers' Association of Canada. The occasion was so successful and illuminating that its frequent recurrence was advocated by W. J. Illsey, manager of the retail stores of the J. H. Ashdown Hardware Co.

W. J. Fulton, manager of the Dominion Radiator Co., presided. W. Sanford Evans was the speaker of the evening; others included were: J. W. Dafoe, W. S. Fallis, managing director the Sherwin-Williams Co., visiting the West on a business trip; D. McIvor, the G. F. Stephens Co., president of the Sales Managers' Association of Canada; A. F. Higgins, chairman for Manitoba of the Retail Merchants' Association; W. E. Humphries; H. M. Dunham, honorary treasurer of the Manitoba Branch of the Retail Merchants' Association, and Mr. Illsey.

The speakers evinced their certain confidence in the ability of Canada to emerge with flying colors from the present world-wide period of readjustment. W. Sanford Evans emphasized the importance of co-operative measures being taken for stabilizing business relations.

The "get-together" spirit, said Mr. Evans, is the very quality to be fostered if those many questions which vitally affect the commercial life are to be solved and placed upon a satisfactory basis. During the war and the after-war period, Mr. Evans said, men had been, as it were, climbing up a hill, and on the way picking up heavy loads. On the higher level of the ascent, they were able to deposit these loads to their own advantage. But some of these men reached the crest of the hill with fresh loads they had picked up, but which they found they would have to deposit while making the descent on the other side, setting them down perhaps at a loss. Upon them it becomes incumbent to recognize this advantage as in a course of events which is only a natural sequence in the readjustment period. But while readjustment may be inevitable, and performs a natural economic function, it need not prove disastrous to business. On the contrary, it will eventually place conditions upon a more stable basis. Canada, believes Mr. Evans, will emerge quickly. Already there are discernible signs of her getting around that corner which the commerce of the country commenced to turn with the beginning of the readjustment period.

Short Course For Merchants Has Varied and Instructive Program

Fourth Annual Training School Arranged by University of Manitoba Next Week Promises to Attract a Large Number of Retailers.

WINNIPEG, Feb. 22.—The fourth annual training school for merchants, from February 28 until March 4, as arranged by the University of Manitoba, promises to attract a large number of retailers. The lectures, conferences and class work are planned to meet the needs of merchants and their assistants who wish to study the latest and best methods in merchandising. Among the lecturers will be Paul Findlay.

The programme for the four days is as follows:

Monday, February 28

3.00 to 5.00 p.m.—Registration.

Tuesday, March 1

9.30 a.m.—"The Retailer and the Customer." R. C. Line.

10.30 a.m.—"National Advertising and Dealers' Helps." F. Pratt Kuhn.

11.30 a.m.—"Plans for Increasing Your Sales." A. J. Webb and J. Drewe.

11.30 a.m.—"The Ethics of Business." Professor R. C. Lodge.

2.30 p.m.—"Store Service That Is Satisfactory." Paul Findlay.

3.30 p.m.—Group Conferences to be arranged.

3.30 to 5.30 p.m.—Show Card Writing. T. Baxter, R. H. VanKirk, A. H. Galle.

Formal Opening of Wood, Vallance, Ltd., in Regina

REGINA, Sask. — Wood, Vallance, Ltd,. recently held the formal opening of the new warehouse in this city, about five hundred guests being present on the occasion. Many hardware merchants near the city were present. James Feir, manager of the local branch, in his inaugural address predicted a great future for Regina and Saskatchewan as a whole. Mr. Smith, of Roger McClary Mfg. Co., gave a demonstration of their goods. Mr. Hodson, Maple Creek, a former employee of Wood, Vallance, Ltd., gave an interesting address on his three-way capacity—on the road, and as a customer of the firm. Mr. McGiverin, Firestone Tire Co., gave a short address. A social feature of the convention was the dinner tendered the salesmen, followed by a dance. Toward

FIRST GATHERING OF WOOD-VALLANCE REGINA STAFF

Group of heads of departments and salesmen of the staff of Wood, Vallance, Ltd., Regina, photographed at the recent first semi-annual convention. Back row, left to right—A. I. Holden, J. I. Lane, G. P. Hoskins, H. E. Goodman, H. G. Pitt, G. A. Campbell, J. Pinch, W. R. Mitchell, L. H. Starrett. Sitting—A. D. MacKay, B. E. Dalzell, Jas. Feir, W. B. Wetmore, E. G. Aime, R. Rollins, P. H. Kirby. Front row —W. O. Barber, G. M. Watson, W. C. Young, G. M. Andrews, David Smart.

& Smith, Gull Lake, and Mr. Williamson, of the K. W. Electric Co., Regina, made suitable reply.

The warehouse was in festive attire, being specially decorated for the auspicious occasion. A special dance program was much enjoyed as were also the other entertainment features provided. Cons. H. E. P. Mann, R.C.M.P., and H. E. Goodman of Wood, Vallance staff, provided songs. Following was the committee in charge:

General Convenor, James Feir; Reception, Mr. and Mrs. G. M. Watson; Decoration, P. H. Kirby; Refreshments, G. P. Hoskins and A. D. McKay; Invitation, printing, etc., W. C. Young; Orchestra, Floor Entertainment, H. G. Pitt.

First Semi-Annual Convention

The first semi-annual convention of Wood, Vallance, Ltd., of Regina, was recently held on the third floor of the new building in the rooms provided for the purpose. James Feir, general manager, opened the convention with a brief address. Mr. Kennedy, sales manager, and Mr. Gillespie, local representative for the conclusion of the convention the salesmen reciprocated with a dance to the staff.

Auto Equipment Show a Big Success

Winnipeg.—The Western Canada Automotive Equipment Show has been a big success. The exhibitors report that an optimistic feeling prevailed and spring orders in good volume were placed. Crowds packed the building all day for the exclusive showing of automotive equipment said to be the first show of this kind ever held in Canada. Half a million dollars worth of equipment was on display.

Cordage Factory Operated By Returned Soldiers

Vancouver, B.C.—Major J. C. Thorn is president of the recently formed Canada Western Cordage Co., Ltd., operated by 200 returned soldiers as shareholders. This enterprise was one of the first to receive the industrial loan from the Province of British Columbia, securing $200,000 in this way. They were also granted a site of 7½ acres free by the city of New Westminster.

The cordage company makes ropes of all sizes, having a capacity of five tons a day. All raw material is brought from Manila.

Western Notes

Macleod, Alta. — Cunningham Hardware has succeeded Cunningham-McLarty Hardware Co.

* * *

Regina.—The "Wovare" News has made its appearance. It is the monthly published by Wood, Vallance, Ltd., Regina.

* * *

Western Ontario News

W. N. Gunning is successor of W. W. Baker, hardware merchant, at Granton, Ont.

* * *

An old-time carnival proved a great attraction in Seaforth on Friday evening. Among those who donated the special prizes were George A. Sills and H. Edge, hardware merchants.

* * *

City Engineer Harry Brazier of London, Ont., wants prices immediately on 25,000 barrels of cement and 160,000 barrels of road oil.

* * *

Clyde Heaman, son of W. J. Heaman, hardware merchant at Exeter, Ont., was one of the contestants in the athletic meet held at London to select teams to be sent to Baltimore for the big Johns Hopkins indoor meet. He won the 100-yard dash in his group, but was beaten in the finals.

* * *

Messrs. Babb and Young this week opened a tinsmithing and plumbing shop at Mitchell, Ont.

* * *

In connection with "Dollar Day" at St. Marys this week, J. M. Adam, hardware merchant, had a most attractive window display of small articles of aluminumware, tin and graniteware. In the rear, making a background that was not only exceptionally striking, but carried a real "pull" to housewives, was a handsome electric washing machine. The Dollar Day committee this year arranged for all stores taking part to use yellow price cards and yellow pennants. These in conjunction with the advertising helps and the merchandise made a display that carried a real interest to prospective buyers. The St. Marys Hardware Co. made a big drive also on tinware. A number of display tables all about the store helped to speed turnover and save time by letting the customers "sell" themselves.

* * *

A wide circle of friends in the hardware trade in London and district are congratulating Major Fred Fisher this week on his appointment as bursar at the Ontario Hospital in Hamilton. Major Fisher commenced his business career after leaving school with the D. H. Howden Hardware Co., London, and for eighteen years was traveler for them, covering the district as far north as Wiarton.

* * *

Instead of holding their annual banquet this year, the members of the London Retail Hardware Merchants' Association have decided on a less formal affair and on Tuesday evening next, as soon as the stores close, will hold a luncheon. Following this adjournment will be made to their meeting hall and the evening will be spent in talking over prices of all lines of hardware and revising them carefully. Every effort will be made to stabilize quotations to meet the present market situation. If time permits there may be some informal discussions on routine business matters. The London Association is in a most flourishing condition.

Remodel Office and Showrooms

National Electric Heating Co., Ltd., Toronto, have remodeled their offices and showrooms to enable them to give better display to their increasing number of electrical appliances.

New Premises for Sturgeons, Ltd.

Toronto.—Sturgeons, Ltd., paint specialties, have removed from their premises on Church St. to 66 Richmond St. East.

N. F. Gundy Retires From Gundy-Clapperton Co.

N. F. Gundy, for many years a partner in the Gundy-Clapperton Co., Toronto, manufacturers of cut glass, has disposed of his holdings in that company and in future will devote all his attention to the McGlashan, Clarke Co., Niagara Falls, Ont., in which he has an interest. The latter company manufactures silver plated and metal flat-ware and celluloid cutlery and are the pioneer manufacturers in Canada of the Firth stainless steel table knives.

Maritime News

Moncton, N.B.—Samuel McWhinney, sheet metal worker, and Frank L. Pickle, bookkeeper, both of Moncton, carrying on business as S. McWhinney & Co., have dissolved partnership. Samuel McWhinney will carry on the business.

* * *

Shediac, N.B.—Ovide Gaudet, of Shediac, plumber, and Camile Gaudet, accountant, of the same place, have entered into partnership as the Gaudet Brothers, tinsmiths, plumbers and hardware.

* * *

Fredericton, N.B.—Among the directors elected to the board of New Brunswick Telephone Co. are F. R. Sumner, president of the Sumner Co., Moncton; R. B. Emerson, of Emerson & Fisher, and J. L. McAvity, of T. McAvity & Sons, St. John, N.B. These directors represent three of the largest hardware concerns in the Maritimes.

Quebec Considers Asbestos Control

Quebec.—It is reported that the Quebec Government is considering the question of putting the asbestos mining industry of the province under control in the same way as it has dealt with the pulpwood industry, providing that in the development of the asbestos mines it shall be a condition of the leasing of rights that plants be established in the Province of Quebec for the manufacture or partial manufacture of this material.

At the present moment Quebec Province supplies 85 per cent. of the asbestos requirements of the world, but very little is manufactured in the Province, plants being mainly in the United States.

One hundred and seventy-four thousand five hundred and twenty-one tons of asbestos, valued at $11,758,234, were shipped from the Province in 1919-20.

Promotion For A. W. Clark

President S. R. Fraim, of the E. T. Fraim Lock Co., Lancaster, Pa., announces that Mr. Alfred W. Clark, of Stamford, Connecticut, has assumed the duties of general sales manager for that corporation, with offices at Lancaster. Mr. Clark is known to the hardware trade throughout the United States and Canada. He became associated with the Yale & Towne Manufacturing Co., in 1890. Later he became salesman, and after eleven years in that capacity he became successively, manager of trade sales, assistant general manager of the Stamford plant, general manager of the Canadian Yale & Towne plant. Five years ago, he was made manager of price and product for the entire company.

Ford Motor Co. to Start Glass Factory

Detroit.—A glass factory is to be established in Flat Rock, Mich., by the Ford Motor Co. This is to be the first plant to be located outside of Detroit, following out his plan to establish Ford factories in small cities.

Form Steel and Iron Section

A new section of the Montreal branch of the Canadian Manufacturers' Association to be known as the "Steel and Iron" section has been organized. It is stated that there were over 150 firms in Montreal engaged in the manufacture of iron, steel or machinery and other metallic goods, and it is expected that this branch will eventually become one of the most important in the local organization. Steps are also being taken to organize other sections, including the dry goods, electrical apparatus, leather goods and foodstuffs trades.

J. K. ILLSLEY,

who, as announced in a recent issue of Hardware and Metal, has been appointed acting-manager of the Toronto office of Brandram-Henderson, Ltd. Mr. Illsley was formerly assistant to the manager of the Maritime division.

Agreement for British Empire Merger

Montreal.—At the conclusion of the meetings of the Boards of Directors of the Dominion Steel Corporation, Limited, and the Nova Scotia Steel & Coal Co., Ltd., it was officially announced that the boards of these companies had arrived at an agreement for the consolidation of the Dominion Steel Corporation, Ltd., the Nova Scotia Steel & Coal Co., Ltd., and the Halifax Shipyards, Ltd., under the name of the British Empire Steel Corporation, Ltd. The agreements are subject to the underwriting of certain securities, upon the completion of which the boards of the companies will again meet for the purpose of approving the underwriting and fixing the date when the agreements will be laid before the shareholders of the interested companies for their approval.

Paint Company Opens Retail Branch

Hamilton.—The Sherwin-Williams Co. has opened a retail store in the city of Hamilton, Ont., for the exclusive retail sale of Sherwin-Williams products.

Senator Nicholls Leaves Dominion Steel Board

Senator Frederic Nicholls, vice-president of the Dominion Steel Corporation, has resigned. Pressed for reasons for his resignation, Senator Nicholls said that an accumulation of other duties made it increasingly difficult for him to make the journeys to Montreal for Dominion Steel meetings. Asked whether he had differed from the other members of the board in regard to the proposed merger, he said he had nothing to add to the statement above given.

Changes on Staff of Canada Foundries and Forgings, Brockville

Brockville, Ont.—Among the changes in the executive of the Canada Foundries & Forgings Co. is to be noted the return of W. M. Weir as president in succession to T. J. Dillon, whose resignation was announced a few days ago. The board now stands as follows: Wm. M. Weir, president; Hon. George P. Graham, vice-president; Hon. W. J. Shaughnessy, Montreal; Lt.-Col. C. M. Monserrat, Ottawa; W. T. Sampson, Gananoque; Lt.-Col. C. W. McLean, W. D. Robb and B. F. Conway, Montreal; James Arnold, general manager, Brockville, and J. H. Briggs, Brockville, the latter being also secretary-treasurer.

The retiring members of the board are: T. J. Dillon, Welland; Henry Bertram, Dundas; Lawrence Chamberlain, New York; John T. Dillon, Buffalo; S. J. Lehurray, Montreal; J. A. Mackay and Colin O. Cameron. New names are: W. T. Sampson, W. D. Robb, B. F. Conway and James Arnold, while Hon. W. J. Shaughnessy, who retired from the board last year, has been re-elected, and W. M. Weir, who retired from the position of president last year, but remained on the board, returns to the position of president.

Appliances, Ltd., Agents for Bluebird Washer

Appliances, Ltd., 208 King Street West, Toronto, have been appointed exclusive sales agents for the "Colonial Maid" Bluebird electric clothes washer for the British Empire.

The general management of Appliances, Ltd., will be under the direct control of F. E. Hazard, formerly sales manager of the Bluebird Corporation, Ltd., manufacturers of "Colonial Maid" Bluebird electric clothes washer, and all business heretofore controlled by Bluebird Corporation, sales division, will be handled by Appliances, Ltd. The Winnipeg office of Appliances, Ltd., 304 Montreal Trust Building, will remain under the management of R. J. Dinwoody, formerly assistant sales manager of Bluebird Corporation, Ltd.

The general sales policy of Appliances, Ltd., will, it is said, provide for establishing immediately jobbing and warehouse connection throughout the Dominion.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

ENTERPRISE MFG. CO.

Montreal.—The Enterprise Mfg. Co., Ltd., Philadelphia, Penn., has just issued a new catalogue, showing their complete line with illustrations. Copies of same can be obtained from Messrs. Adcock & Brewer, 222 St. James St., Montreal.

* * *

MILLERS FALLS COMPANY

Montreal.—Something new in stock books has just been issued by Millers Falls Company, Philadelphia, Penn. It is really for the convenience of the jobber or large buyer who wishes to secure benefits of the superior stock system. This stock book shows the cut of the article, the catalogue number, size, material, finish, number of key changes and space for the price. Same may be procured from Messrs. Adcock & Brewer, Ltd., 222 St. James St., Montreal.

* * *

AUTOMOBILE BUMPERS

A catalog has been received from the Skinner Co., Ltd., Gananoque, Ont., illustrating a complete line of automobile bumpers made by this firm. In an introduction to the catalog the Skinner Co. state that they have established a policy of confining their sales to the legitimate jobbing trade. Bumpers for all the leading makes of cars are manufactured and listed, and every Skinner bumper is made under Canadian patents which are owned and controlled by the company.

* * *

BROWN & SHARPE GRADUATES

We have received a booklet under the above heading from the Brown & Sharpe Mfg. Co., Providence, R.I. The booklet contains a list of some of the men who have graduated or completed training courses in the machinery manufacturing trades. With the idea of making lists more complete in future editions Brown & Sharpe will gladly send a copy of the booklet to any reader of Hardware and Metal who is a former graduate apprentice or any one else who might find it useful as a vocational guidance.

* * *

"THE DISSTON CRUCIBLE"

A booklet has been received from the Henry Disston & Sons, Philadelphia, U.S.A., with a Canadian works at Toronto, entitled the Disston Crucible.

The copy received is dated January, 1921, and is published monthly by the Disston firm "for the advancement and interest of millmen."

The present issue contains some very interesting articles and items that will particularly appeal to users of cross-cut saws and the lumber industry generally. The magazine contains 16 pages, 5½ in. x 8¼ in., and is illustrated.

* * *

ASHDOWN'S SUMMER SPORTING GOODS CATALOG

A copy of a new sporting goods catalog for summer goods has been received from the J. H. Ashdown Hardware Co., Ltd., Winnipeg.

The catalog is fully illustrated and well got up and includes among other goods a comprehensive list of fishing tackle, canoes and rowboats, tents, hammocks and camp furniture. In other sporting goods, baseball supplies and outfits are fully listed, as are tennis, golf and lawn bowling goods. Followers of football and cricket will also find their wants cared for.

Other lines shown include bicycles, baby carriages, dog collars and leads, whistles and compasses, vacuum bottles and lunch kits, etc. The J. H. Ashdown Co. will gladly send a copy on request.

* * *

A VALUABLE BOOKLET FOR CHUCK USERS

The Skinner Chuck Company, New Britain, Conn., manufacturers of chucks for over thirty years, have just issued an interesting and really instructive booklet entitled, "Chucks and Their Uses." The object of the booklet is to offer the machinery buyer, the machinery salesman, the student, apprentice and mechanic, a compact, easily understandable, authoritative fund of information on standard types of chucks and their uses.

The booklet begins with a history of chucks and the story of their development. Then are taken up in detail the various types of chucks and their uses, each type being explained separately and in detail. Suggestions are offered regarding the proper way to fit a chuck to a lathe and the care of the chuck. An interesting feature of the booklet is a number of succint and homely "don'ts" that will be of interest to every practical user of chucks.

It is the intention of the Skinner Chuck Company to distribute these booklets without charge to any person interested in chucks.

* * *

PLUM COULEE RAWHIDE HALTERS

In issuing a new booklet, R. R. Kinread, 70-74 Princess St., Winnipeg, Man., announces that the business of R. R. Kinread and that of M. Silbert & Sons, have been amalgated, and M. Silbert & Sons in addition to their own lines will now manufacture the lines formerly made by R. R. Kinread and R. R. Kinread will have the sale of all goods manufactured, and is now the exclusive sales agent for the Plum Coulee rawhide halters, and the Canada "Never-Break" trace, for both the wholesale and the retail trade. The different styles and sizes of halters, traces, breechings, bellybands, hame and breast straps, etc., are listed and shown in the booklet just issued by R. R. Kinread. Each article made is thoroughly guaranteed, and is stated to be of the same grade and quality that has caused these goods to be known to almost every horse owner throughout the West, and they are now being shipped all over Canada.

* * *

GASOLINE FIRE POTS AND TORCHES

Clayton & Lambert, Detroit, Mich., have recently issued a catalog listing and describing the various lines of fire pots and gasoline torches they manufacture. About 60 different styles and sizes of torches suitable for all kinds of uses, trades and jobs, and varying in size from a jewellers or electricians torch 1¾ inch by 6½ inch, to a brazing machine with a ten gallon tank.

The new improved double needle torch recently introduced by Clayton & Lambert, is also shown and described. The booklet also includes a list of all extra repair parts for torches and fire pots.

* * *

SEAMLESS BRASS AND COPPER TUBING

A price list has been issued by the Goldstein Mfg. Co., John St., Toronto, Ont., of brass and copper seamless drawn tubes. This firm specialize in small sizes and thin gauges and fancy shapes in brass, copper, nickel, silver and precious metals, and also in silver solders for all purposes. **Alexander Gibb, 3 St. Nicholas St., Montreal, Que., is selling agent for the Goldstein Mfg. Co.**

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2648. **Representation in South America.**—A member of the Canadian Expeditionary Force at present residing in New Orleans and who is about to go to Mexico as a representative of a United States firm, desires to take up work with a Canadian exporter or group of exporters who desire to do business in the Spanish Republics of South America.

2693. **Construction materials. —** Large quantities of various building materials and equipment will be in demand for the rebuilding of the destroyed portions of Cork, for which an Irish trade incorporation desires to open up communications with Canadian exporters with a view to furnishing these supplies.

2694. **Representation in the British West Indies.**—A Canadian incorporation, which has an office in New York, intends opening up business in Trinidad, Barbados, and British Guiana. They desire to represent any firms interested in exporting to those countries, especially in cement, steel sheets and bars.

2696. **Plated ware.**—A firm of exporters, importers, and manufacturers' agents, with offices in Barbados and Trinidad and covering the West Indies, desires to obtain a Canadian connection for plated ware of all kinds. Good connections and references.

2737. **Representation in Australasia and the Orient.**—A returned officer, established as selling and export agent in Vancouver and having completed several large foreign sales since returning from overseas, desires Eastern Canadian connections in metal products, woodenware, etc., for sale in British Columbia or for export. Has representatives in Australia, New Zealand, the Orient, Straits Settlements, and other markets. Possesses thorough knowledge of import and export technique, is familiar with engineering problems, and in a position to advise purchasers on technical subjects. First-class bank references.

2739. **Electrical material.**—An old-established firm in Milan are anxious to get in touch with Canadian firms dealing in the above.

2742. **Rubber goods (all kinds).**—A very important Milanese firm would be glad to consider offers from Canadian firms dealing in rubber goods.

2745. **Leather belting, asbestos, etc.**—A house in Milan would be glad to purchase the foregoing articles in Canada.

2746. **Asbestos.**—A firm in Genoa are most anxious to represent Canadian firms wishing to export asbestos to Italy.

2747. **Electrical material.**—One of the most important Italian limited companies would be glad to hear from Canadian firms wishing to export the above to Italy.

PERFECTION GRINDERS

The Star Specialty Manufacturing Co., 227-233 W. Erie St., Chicago, Ill., have issued a catalog in which the Perfection grinders made by this firm are listed and described. A size and style of grinder is made for different requirements, and besides the belt driven grinders for mills, factories, shops, farms or garages using gasoline or other power there is also a full line of lighter grinders suitable for household and domestic use, as well as for mechanics, farmers, butchers, etc.

Perfection grinders are stated to combine the best of material, workmanship and finish, and each machine is thoroughly inspected and guaranteed to be perfect. **The Star Specialty Co. is represented in Canada by T. Mortimer, 64 Wellington St. W., Toronto, Ont.**

Twenty Years Ago

Items of interest reprinted from Hardware and Metal of February 23, 1901:

"White lead has taken another sudden decline. Quotations in 25-lb. packages are now Pure, $6.50."

"The first annual ball and concert of the Employees' Benefit Society of The McClary Mfg. Co., London, Ont., was held Monday night. Twelve hundred people participated in the event. The society is no new organization notwithstanding that this was their first attempt at a festive gathering of the kind. Lieut.-Colonel Gartshore was president of the general committee, Mr. McClary was honorary president."

"The general committee for the first annual ball and concert of the Employees' Benefit Society of the McClary Mfg. Co., London, included: John McClary, honorary president; W. M. Gartshore, president; Joseph Nicholson, first vice-president; James Pirie, second vice-president; H. Woodman, F. Bailey, J. Head, F. Couke, J. Barned, M. G. Delaney, W. Yelland, C. Manning, E. Wingett, D. Wilson, S. Milliken, J. Bailey, C. Donavan, J. Walcott, W. Lehman, R. Spencer, and John Kenneally were among those who directed the affair."

Big Future For Steel in Canada

World Conditions in Iron and Steel Production Outlined by President of U. S. Steel Products Co.—Building and Railroad Development Important Factor in Canada

THAT the steel requirements of the world are tremendous and that the latent demand which will make itself felt will mean big business for producing interests the world over, was the opinion expressed by E. P. Thomas, New York, president of the United States Steel Products Company, speaking in Toronto recently. Mr. Thomas recently returned from a visit to Europe and his outline of world conditions in the iron and steel industry was interesting. He stated that the non-warring countries in Europe were now 50,000,000 tons short of their normal requirements of steel, many works of international importance having been set aside even before the war because of the menace of international strife. He intimated that since the future is now more assured that these impediments have been largely removed.

Europe's Production Low

In speaking of the reconstruction of Europe Mr. Thomas stated that Belgium had increased its steel production to 60 per cent. of normal. Germany, he stated, was making between 7,000,000 and 8,000,000 tons less annually than before the war. When Russia comes back, if it does come back, he asserted, the greater part of Germany's exportable surplus of steel would be required in that country. On the whole, however, he believed the steel-making capacity of Europe would aid in making good the world shortage, and that such assistance would be needed.

Canadian Plant Rises

Referring to the construction of the Canadian plant of the Steel Corporation at Objibway, Ont., on the Detroit River, Mr. Thomas reminded his hearers that, in spite of the apparent tendency to delay building operations, $4,000,000 had already been spent, and that two large blast furnaces were well on the way toward completion. Incidentally he mentioned that whereas the Ojibway plant would have cost $20,000,000 according to the original estimates, the expenditure on the basis of present prices would be fully $50,000,000. The Steel Corporation will ultimately take its place as a Canadian manufacturer.

Outlook Better in Canada

The industrial outlook in Canada, Mr. Thomas believed to be more optimistic from the standpoint of its business leaders than in the United States. He saw the potential field for a great expansion in steel business in the Dominion, taking into account the building requirements and the needs of the Canadian railways. Coming fresh from an examination of European conditions, and with the advantage of intimate acquaintance with the United Sates situation, Mr. Thomas' attitude was one of decided optimism, taking a long view of the future.

LITTLE RESPONSE TO LOWER STEEL PRICES

Continued from page 36

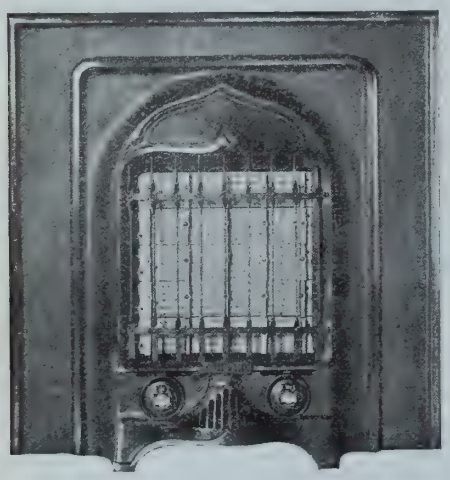
have been blown out, 20 now being active out of 29. In Pittsburg active ingot making is not more than 70 per cent. of the whole, as compared with about 80 per cent. a week ago. The leading independents appear to average about 25 per cent. and are active, as is true of the Steel Corporation, chiefly in pipe making.

Steel bars are easily obtained at 2.10c, Pittsburg basis, but sales have been made at 2c, and 1.95c has been quoted. Plate quotations range from 2.15c to 2.20c, though here also 2c has been named, with doubt now that business could be done at this basis except on an unusually attractive lot.

Wildest prices mark the sheet market, ranging from 3.70c for resale black sheets to 4.10c from mill, the latter representing a $2 drop from the level obtaining in the last two weeks. Resale galvanized sheets have been offered at 4.85c, while mill quotations range from 5.20c as in Chicago to 5.35c in Pittsburg, the latter representing a $3 per ton drop in the week and $7 in two weeks. Wire nails are off $3 following a $5 drop in plain wire a week ago.

The recent decline of $5 per ton in the price of basic pig iron in the valley has not brought out much business. The general tendency of the pig iron market is still downward. Prices on foundry iron have declined $1 at Cleveland and Pittsburg and are uncertain in other centres.

Increasing Imports of Gasoline



Consumption of gasoline in Canada has increased greatly since the war. In the first eleven months of 1918 importations of gasoline from the United States amounted to 662,000 barrels, while in the same period of 1920 it was 1,262,000 barrels, an increase of almost 100 per cent. At the same time the quantity of crude oil sent to Canada from the United States increased from 4,226,000 barrels in the 1918 period to 6,040,000 barrels in 1920, or nearly 50 per cent. The increase in the use of motor vehicles has been particularly pronounced in the farming sections of Western Canada. The Dominion imports a large quantity of high-grade oil from the Wyoming and Ohio fields, and from Peru, South America. Recently she has also imported Mexican crude.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

SUNFIRE ELECTRIC GRATE

The D. Moore Co., Ltd., Hamilton, Ont., are introducing a new electric grate to the trade. The Sunfire grate is being made in two sizes, 24½ x 30½, and 30½ x 30½ in frame. It is made of cast iron in statuary bronze finish, and has a special steel back, so constructed that it can be placed in any opening not smaller than 23 in. high, 18 in. wide, and 3 in. deep, provision being made for cold air entering at the base of the heater and out at the top, making, it is claimed, perfect circulation. Other features are, cast iron water pan to keep air moist; removable front for replacing burnouts, if necessary; double pole snap switches; specially constructed open guard; and non-corroding electrical connections.

Sunfire Electric Grate

There are three heats, low, medium and full, consuming 1,152, 1,728, and 2,880 watts respectively. The standard voltage is 110.

The makers claim that a Sunfire will heat a room 20 x 20 x 10 ft. satisfactorily at low cost, without dust, dirt or odor, and there is no waste heat going up the chimney, as in the case of a coal or wood stove or fire grate.

TOOL MAKERS' BUTTONS

A new tool maker's button, designed as No. 494D, has recently been put on the market by the L. S. Starrett Co., of Athol, Mass. This button is used principally on jig work, such as is used in the engine, automobile and harvesting machinery industries, and is 1 inch long and 1 inch diameter, a useful size for machine shops.

When a bushing in a jig cover is moved a few thousandths of an inch the general method followed has been to

No. 494 Tool Maker's Buttons

plug the old bushing hole to rebore. This new button, it is claimed, saves time as it may be located over the hole and clamped from the under side of the cover.

LIQUID VENEER MOP POLISH

A new mop polish is being put on the market by the Buffalo Specialty Co., of Bridgeburg, Ont. This is not the regular liquid veneer which this company has been selling for over twenty years, but a companion product. It is now offered to the public in response to a strong demand for a somewhat heavier product than liquid veneer, for use on dusting and polishing mops, such as the Liquid Veneer mop, as well as for use on a cloth that has previously been moistened with water. It is not intended to displace the regular liquid veneer, which is so favorably known, but, as previously stated, has been specially introduced for use on polishing mops and for cleaning and polishing woodwork, furniture, hardwood floors, automobiles, etc. It is put up in 4 and 12 oz. bottles and 32, 64 and 128 oz. tin cans.

NEW LIQUID VENEER MOP

A new liquid veneer mop, called the Liquid Veneer Junior, is introduced to the trade by the Buffalo Specialty Co., Bridgeburg, Ont. This mop, it is stated, has all the features of the regular mop,

Liquid Veneer Junior

except that it has not the full yarn centre, and retails for 50 cents less. The swab can be easily removed for washing, as in the regular mop, and as easily replaced.

C.C.M. NOW MAKING BOB SKATES

The Canada Cycle and Motor Co., Ltd., Weston, Ont., have commenced to manufacture a C.C.M. bob skate. The "bob" skates are a popular line for young children, and this new addition to the C.C.M. line will be ready for shipment in the immediate future.

CANNON PUMP OILERS

Two new additions have been made recently to the line of Cannon oilers. A new arrangement of the valves has been made and they are set in a horizontal plane so that, regardless of vibration, they always sit perfectly square on their seats, and being set at the lowest point insures that they are submerged in oil and require no priming. Another new feature is the elimination of the valve chamber. This insures the maximum effect upon the action of the valves in the pump piston.

In addition to the oiler described above the Cannon people have brought out a new type of automotive pattern pump oiler called the Handy Oiler.

Cannon Pump Auto Motive Oiler

This oiler is made in steel and copper plate finish and is intended for use in motor cars, launches and for general household use.

The details of construction include the one-piece deep drawn body, a double-seamed bottom and a brass oil filler opening. Its interior construction includes the all brass valves and the arrangement of the higher priced type described above. The spouts are non-detachable and are lap seamed; pump cylinders are of seamless brass tubing and the plungers are packed in calf leather.

The control of the oil in all the Cannon oilers is claimed to be regulated from a drop to a tablespoonful by pressure on the pump piston.

These oilers are manufactured by the Cannon Oiler Co., Keithsburg, Illinois, and descriptive circulars and general catalog will be mailed to any inquirers. Eastern Canadian agents are A. G. & A. L. Brown Co., St. James St., Montreal.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

SEVERAL important price changes have been made this week in hardware commodities. The base price on bright, annealed, and oiled and annealed wire has been reduced, and the "extras" list has been revised. New lower prices have been issued on the various kinds of bolts and nuts. White lead in oil has been further reduced in price, and putty quotations are also lowered.

Other price changes include reductions on leather soles and heels, harness and harness parts, stove bolts, wrought iron washers, electric weld coil chain, cow ties and halter chains, trace chains, coach screws, some lubricating oils and cup and axle grease. Bale ties and hay wire are lower in price; stove pipe wire has been reduced and a further decline is noted on cotton rope. Black and galvanized sheets show some reductions, but wrought pipe and fittings and bar iron and steel are held unchanged. In ingot metals the market continues dull with prices practically unchanged. Pig lead and spelter are easier and tin continues to fluctuate. In primary steel markets not much change is shown. The lower quotations made by some of the independent mills in the United States have not resulted in an increase of business to any appreciable extent, according to Pittsburgh reports. Business on springs and summer lines continues to show improvement and booked orders are now being shipped. Manufacturers and wholesalers are very optimistic, and with the approach of spring look for a return to a normal demand for all lines.

Montreal Markets

MONTREAL, February 24.—Many price changes of importance are noted in this week's market reports. Perhaps deserving first mention is the reduction on iron and steel wire, base price now being $5, with no extra charge for annealing, and the old extras now in effect. Electric welded chains of different kinds are also reduced from 5 to 15 per cent. A new bolt and nut price list is issued this week showing reductions on all kinds of bolts, coach and lag screws, and both square and hexagon nuts. Stove bolts are now 62½ per cent. off list, former quotations being 57½ per cent. Wrought iron washers have a new discount of 40 per cent. off list prices. Tap soles and heels show a decline of approximately 10 per cent., and lubricating oils are now from 3 to 5 cents a gallon less on the different grades. Cotton rope is again reduced 3 cents per pound.

Black and galvanized sheets are from 50 cents to $1.55 per 100 lbs. lower on the different gauges. Pipe, pipe fittings, bar iron and steel, and corrugated sheets remain steady. Ingot metals are reported slightly easier.

Bolts and Coach Screws Reduced

Montreal.

New lower prices are now effective on all kinds of bolts, coach and lag screws. Following is a complete list with the different discounts from list price:

BOLTS AND NUTS

Carriage Bolts, $1.00 list, ⅜ in dia. and smaller, 6 in. and shorter	25%
Do., longer lengths	10%
Do., 7-16 in. and larger	15%
Machine Bolts, ⅜ in. dia. and smaller, 4 in. and shorter	40%
Do., ⅜ in. dia. and smaller, longer lengths	15%
Do., 7-16 in. dia. and larger	20%
Sleigh Shoe Bolts, all sizes	10%
Coach and Lag Screws	35%
Square Head Blank Bolts	20%
Bolt Ends	20%
Plow Bolts, 1, 2, 3, heads	25%
Do., others	25%
Elevator Bolts, large head	10%
Do., corrugated heads	40%
Fancy Head Bolts	10%
Shaft Bolts ($3 list)	10%
Step Bolts, large head ($3 list)	10%
Whiffletree Bolts	10%

Stove Bolts 62½ Per Cent. Off

Montreal.

The new discount on stove bolts is 62½ per cent. off list; the former discount was 57½ per cent. off list.

Blank and Tapped Nuts Lower

Montreal.

Both hexagon and square nuts are priced lower in either blank or tapped. The reduction amounts to 75 cents on square and 50 cents on hexagon. Following are the present quotations:

NUTS—2 inch and smaller—	
Square blank, add to list	$1 25
Square, tapped, add to list	1 75
Hexagon, blank, add to list	1 75
Hexagon, tapped, add to list	2 25

Wire Now $5 Base

Montreal.

A reduction of 50 cents per 100 pounds is made on iron and steel wire, including bright, annealed, oiled and annealed, tinned and coppered. The new base price is $5 per 100 pounds, with the old extras now in use. Also, no extra is now charged for annealing.

Hay Wire Lower

Montreal.

Lower prices are now quoted on cut hay wire and bale ties, and new prices are shown below. The old list of extras is also now in effect. F.o.b. Montreal.

Cut Hay Wire—9 ga., $5.60; 10 ga., $5.70; 11 ga., $5.80; 12 ga., $5.90; 13 ga., $6.10; 13½ ga., $6.15; 14 ga., $6.30; 15 ga., $6.55; 16 ga., $6.90.

Bale Ties—12 ga., $5.90; 13 ga., $6.10; 13½ ga., $6.15; 14 ga., $6.30; 15 ga., $6.55; 16 ga., $6.90.

Wrought Washers Lower

Montreal.

A new lower discount is made on wrought iron washers, which are now 40 per cent. off list instead of the former 35 per cent., with usual lists and net extras for small quantities and package allowances.

Roofing Pitch $1.50 Per Cwt.

Montreal.

A new price has been made on roofing pitch, slightly higher than former quotations, at $1.50 per 100 pounds.

Tap Soles and Heels Decline

Montreal.

A reduction of approximately 10 per cent. is made on tap soles and heels. Below are the new quotations on a few of

the best selling sizes:

Tap Soles (women's)—No. 37½, $2.05; No. 37, $3.50; No. 36, $3.80 doz.

Tap Soles (men's)—No. 15, $2.25; No. 14, $2.85; No. 121, $3.65; No. 11, $4.95; No. 10, $6.20 doz.

Tap Soles (misses' and youths')—No. 134, $1.20; No. 43, $2.75; No. 4½, $3.35.

Heels—No. 50, $1.45; No. 81, $1.00; No. 141, 90c.

Decline in Lubricating Oils

Montreal.

A reduction of from 3 to 5 cents per gallon has been made in the prices of the different lubricating oils. The new list, with the different grades quoted, is not yet available and more particulars will be given next week.

Coil Chain Reduced

Montreal.

Dominion electric welded twist coil chain shows a reduction of about 10 per cent. on the different sizes.

Cow Ties Slightly Lower

Montreal.

A reduction is made on electric welded cow chains of approximately 10 per cent. Stall fixtures however remain unchanged in price.

Halter and Dog Chains Decline

Montreal.

Halter chains and dog chains, electric welded, are now quoted 5 per cent. lower. Tie out chains are reduced 15 per cent.

Trace Chains Reduced

Montreal.

A reduction of 15 per cent. is made on electric welded trace chains.

Cotton Rope Again Declines

Montreal.

Cotton rope again features in a reduction in price, the decline being 3 cents per pound. Present prices are 3-16-inch 46 cents, ¼ to ¾-inch 45 cents per pound.

Waste Materials Remain Quiet
